This proposal has been reviewed against the criteria in 36 CFR Part 216, and it has been determined that the proposal does not constitute a significant standard, policy or guideline as defined in those rules. This proposal is sub-regional in scope, affecting only purchasers of timber sale contracts in western Oregon and western Washington. The selection of a stumpage pricing index is highly technical and therefore is not likely to be a matter of general public interest. Moreover, the indexing system chosen to implement the April 15, 1982, decision to install stumpage rate adjustment for this area will involve only a minor effect on future sutmpage receipts in comparison with the other indexing systems considered. The Forest Service has actively consulted with representatives of the timber industry who would be affected by adoption of this proposal and has involved these representatives in the development of the proposed indices and alternatives for over 6 months.

After considering public comments on this proposed policy, the Forest Service will announce its final decision on indexing procedures. The final policy will be issued through amendment to Chapter 2400—Timber Management, of the Forest Service Manual.

F. Dale Robertson,
Associate Chief.
May 19, 1983.

BILLING CODE 3410-11-M

VETERANS ADMINISTRATION

DEPARTMENT OF DEFENSE

38 CFR Part 21

Post-Vietnam Era Veterans' Educational Assistance Program; Implementing Legislation

AGENCY: Veterans Administration and Department of Defense.

ACTION: Proposed regulations.

SUMMARY: The Veterans' Compensation, Education and Employment Amendments of 1982 contain several provisions which affect the Post-Vietnam Era Veterans' Educational Assistance Program (VEAP). One of these provisions requires the VA (Veterans Administration) to consider a serviceperson's lump-sum payments to the fund to have been made at the rate of $100 per month unless the serviceperson specifies a lower rate. In addition, individuals who are receiving educational assistance under VEAP no longer will have the assistance reduced or eliminated when they are incarcerated.

This proposal will implement these provisions of the law.

DATES: Comments must be received on or before June 24, 1983. As is required by the Veterans' Compensation, Education and Employment Amendments of 1982, the VA and the Department of Defense propose that the effective date of the regulations be October 14, 1982. It is proposed that the revocation of 38 CFR 21.5139 be made effective the same date.

ADDRESSES: Send written comments to: Administrator of Veterans' Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420.

All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until July 5, 1983. Anyone visiting Central Office in Washington, D.C. for the purpose of inspecting any of these comments will be received by the Central Office Veterans Services Unit in room 132. Visitors to VA field stations will be informed that the records are available for inspection only in Central Office, and will be furnished the address and room number.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer (225), Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, Washington, D.C. 20420 (202–389–2092).

SUPPLEMENTARY INFORMATION: Section 21.5052, Title 38, Code of Federal Regulations is amended to change the provisions concerning lump-sum payments to the VEAP fund. The VA will now consider lump-sum payments to have been made at the rate of $100 per month unless the serviceperson specifies a lower rate.

Section 21.5071, Title 38, Code of Federal Regulations is amended to show how the VA will calculate an individual's entitlement when entitlement is based on the new, higher rate for lump-sum payments.

Sections 21.5072, 21.5138 and 21.5294, Title 38, Code of Federal Regulations are amended and § 21.5139 is revoked to eliminate lower rates of payments to VEAP participants who are incarcerated.

These proposed regulations do not contain a major rule as that term is defined by Executive Order 12291, Federal Regulation. The annual effect on the economy will be less than $100 million. They will not result in any major increases in costs or prices for anyone. They will have no signifiant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Administrator of Veterans' Affairs and the Secretary of Defense hereby certify that these proposed regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 605(b). These proposed regulations therefore are exempt from the initital and final regulatory flexibility analyses requirements of sections 603 and 604.

This certification can be made because these proposed regulation changes concern only individual participants in VEAP, and simply reflect changes which have been made by Pub. L. 97–306, 96 Stat. 1429. Accordingly, they will have no significant impact on small entities, i.e., small businesses, small private and nonprofit organizations and small governmental jurisdictions.

The Catalog of Federal Domestic Assistance number for the program affected by these proposed regulations is 64.120.

List of Subjects in 38 CFR Part 21

Civil rights, Claims, Education, Grant programs—education, Loan programs—education, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: April 8, 1983.

By direction of the Administrator:

Everett Alvarez, Jr.,
Deputy Administrator, Veterans Administration.

Approved: May 6, 1983.

R. Dean Tice,
Deputy Assistant Secretary of Defense.

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

It is proposed to amend 38 CFR Part 21 as follows:

1. In § 21.5052, paragraph (f)(2) is revised as follows:

§ 21.5052 Contribution requirements.

* * * * *

(f) *Lump-sum contribution.* After September 30, 1980, an individual may make a lump-sum contribution or contributions in place of or in addition to monthly contributions.

* * * * *

(2) The Veterans administration will consider the lump-sum contributions to have been made by monthly deductions from the participant's military pay at the rate of $100 per month unless the participant specifies a different rate which must be

(i) No lower than $25 per month,

(ii) No higher than $100 per month, and

(iii) Evenly divisible by five. (38 U.S.C. 1622(d); Pub. L. 97–306; 96 Stat. 1429)

* * * * *

2. In § 21.5071, paragraph (b) is revised as follows:

§ 21.5071 Months of entitlement allowed.

* * * * *

(b) *Entitlement based on lump-sum contributions.* If an individual elects to make a lump-sum contribution, the Veterans Administration will credit an individual with 1 month of entitlement for—

(1) Every $100 included in the lump sum, or

(2) Every amount included in the lump sum which—

(i) Is at least $25 but no more than $100,

(ii) Is evenly divisible by five, and

(iii) Is specifically designated by the individual at the time he or she makes the contribution. (38 U.S.C. 1622(d); Pub. L. 97–306, 96, Stat. 1427)

* * * * *

3. In § 21.5072, paragraph (a)(1) is revised as follows:

§ 21.5072 Entitlement charge.

* * * * *

(a) *Residence training.* (1) a charge against the period of entitlement for a program other than one leading to a secondary school diploma or an equivalency certificate where the monthly rate is based on the individual's tuition and fees or one consisting exclusively of flight training will be made as follows:

(i) The Veterans Administration will charge an individual who is a full-time student 1 month's entitlement for each monthly benefit paid to him or her. (38 U.S.C. 1631; Pub. L. 97–306, 96 Stat. 1429)

(ii) The Veterans Administration will charge an individual who is other than a full-time student 1 month's entitlement for each sum of money paid equivalent to what the individual would have been paid had he or she been a full-time student for 1 month.

* * * * *

4. In § 21.5138, the introductory portion preceding paragraph (a) and the introductory portion of paragraph (b) are revised to read as follows:

§ 21.5138 Computation of benefit payments and monthly rates.

The Veterans Administration will compute all monthly rates and benefit payments as stated in this section except for those individuals to whom § 21.5136(b)(1) applies. (38 U.S.C. 1631; Pub. L. 97–306, 96 Stat. 1429)

* * * * *

(b) *Computation of benefit payment.* The Veterans Administration will compute benefits payments as follows for all training except for those individuals to whom § 21.5136(b)(1) applies: (38 U.S.C. 1631; Pub. L. 97–306, 96 Stat. 1429)

* * * * *

§ 21.5139 [Removed]

5. Section 21.5139 is removed.

6. In § 21.5294, paragraph (d)(2)(iv) is revised as follows:

§ 21.5294 Transfer of entitlement.

* * * * *

(d) *Application of sections to this portion of the pilot program.* * * *

(2) The following sections apply to this portion of the pilot program with amendments as noted:

* * * * *

(iv) In §§ 21.5132 through 21.5138 references to payment to the individual apply equally to payment to the spouse or child. (Sec. 903, Pub. L. 96–342; Pub. L. 97–306, 96 Stat. 1429)

* * * * *

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[BC Docket No. 82-276; RM-4060]

TV Broadcast Stations in Billings, Miles City, and Lewistown, Montana; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of comment/reply comment period.

SUMMARY: Action taken herein extends the time for filing comments and reply comments in a proceeding involving VHF television channel assignments at Miles City, Billings, and Lewistown, Montana. Comanche Enterprises requests the additional time to conduct

VOL 48 ISS 102 MAY 25 1983 UMI

an engineering study for another allocation option at Billings.

DATES: Comments must be filed on or before May 23, 1983, and reply comments on or before June 7, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

Order Extending Time for Filing Comments and Reply Comments

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Billings, Miles City, and Lewistown, Montana); BC Docket 82-270 RM-4060.

Adopted: May 9, 1983.

Released: May 12, 1983.

By the Chief, Policy and Rules Division.

1. On March 14, 1983, the Commission adopted a *Further Notice of Proposed Rule Making*, 48 Fed. Reg. 14681, published April 5, 1983, in response to a petition filed by Comanche Enterprises. The *Further Notice* proposed two options, (1) to reserve Channel 10 at Miles City, Montana, and reassign Channel °6 from Miles City to Billings, Montana, for commercial use or (2) to reassign Channel 13 from Lewistown to Billings, Montana. Comments and reply comments are currently due May 9 and May 24, 1983, respectively.

2. On May 4, 1983, counsel for Comanche Enterprises, filed a request seeking additional time in which to file comments to and including May 23, 1983. Counsel states there has been an application filed for Channel 13 at Lewistown which would appear to foreclose further consideration of Channel 13 being reassigned to Billings. Counsel adds that he has been conducting an engineering study to determine the feasibility of assigning another channel to Billings. However, the site selected would not meet the Commission's coverage requirements. Counsel states that the additional time is needed to complete the technical analysis for a new site and coordinate the filing of appropriate comments with his consulting engineer. We are also told by counsel that he has informed each of the commenting parties in this proceeding of his intent to file this request and they have imposed no objection to the extension.

3. Although the request did not meet the filing deadline as specified in Section 1.46 of the Commission's Rules, it appears that the circumstances noted in paragraph 2 justify the extension. It does not appear that any party involved in this proceeding would be adversely affected by the extension of time.

4. Accordingly, IT IS ORDERED, That the dates for filing comments and reply comments in Docket 82-276 (RM-4060) ARE EXTENDED to and including May 23, and June 7, 1983, respectively.

5. This action is taken pursuant to authority found in §§ 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

47 CFR Part 83

[PR Docket No. 83-426; FCC 83-200]

Expansion of Inspection Interval for Small Passenger Vessels and Vessels Operating on the Great Lakes

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to expand the inspection interval from 2 to 5 years for small passenger vessels carrying more than six passengers for hire, and from 12 to 24 months for vessels operating on the Great Lakes. The Commission initiated this proceeding in order to alleviate the burden of unnecessarily frequent inspections. It is expected that this action will result in significant work hour savings for the Commission and increased convenience for the affected vessel operators.

DATES: Comments must be received on or before June 13, 1983 and reply comments must be received on or before June 28, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nicholas G. Bagnato, Private Radio Bureau, (202) 632-7175.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 83

Communications equipment, Marine safety, Telephone.

Proposed Rule Making

In the matter of amendment of Part 83 of the rules concerning the inspection interval for small passenger vessels subject to Title III, Part III of the Communications Act and vessels subject to the Great Lakes Agreement, 1973; PR Docket No. 83-426.

Adopted: April 27, 1983.

Released: May 5, 1983.

By the Commission: Commissioner Jones absent.

Summary

1. In this Notice of Proposed Rule Making we proposed to amend Part 83 of the Commission's rules to expand the inspection interval for small passenger vessels subject to Title III, Part III of the Communications Act from 2 years to 5 years, and for vessels subject to the Great Lakes Agreement, 1973, from twelve months to twenty-four months.

Small Passenger Vessel Inspections

2. The Communications Act requires any vessel of the United States carrying more than 6 passengers for hire, navigated in the open sea or any tidewater within the jurisdiction of the United States adjacent to or contiguous to the open sea, to be equipped with an efficient radiotelephone in operating condition.[1] The Commission has the responsibility to make such inspections as may be necessary to insure compliance with this radiotelephone requirement.[2] Section 83.512 of the Commission's rules now requires an inspection at least every 24 months. When the vessel is found to be in compliance, a Communications Act Safety Radiotelephone Certificate (FCC Form 824) is issued for a period of 24 months.

[1] See Section 381, 47 U.S.C. 381.

[2] See Section 385, 47 U.S.C. 385.

3. Generally, the vessels affected by these requirements are boats used for party fishing, scuba diving and sightseeing. Typically, these small passenger vessels, operating within 20 nautical miles of the shore, are equipped with VHF radiotelephone installations; while those operating between 20 and 100 nautical miles from the shore are equipped with medium frequency (MF) radiotelephone installations.

4. Vessels navigated in the open sea, regardless of size, carrying or certificated to carry more than 12 passengers are subject to the *radiotelegraph* requirements of Title III, Part II of the Communications Act. However, the Commission exempted all passenger vessels of less than 100 gross tons not subject to the Safety Convention, from the radiotelegraph requirements provided the vessel complies with the radiotelephone provisions adopted pursuant to Title III, Part III of the Communications Act.[3] Thus, this is a second category of vessels which are subject to the requirements ot Title III, Part III.

5. The certification and 24 month inspection interval requirement became effective March 1, 1958.[4] The Commission had proposed this 24 month interval based on its judgment of the safety factors involved and the circumstances of voyages. No comments were received concerning the merits of the inspection interval or certification requirement. Therefore, the Commission adopted the 24 month interval as proposed.

6. Since 1958, maritime radiotelephony communications have been improved by the use of solid state radiotelephone equipment which is more reliable. There has also been an increase in the number of coast stations operating on radiotelephony, and a large increase in the number of radiotelephone equipped vessels. These factors have increased the reliability of the equipment and the probability of distress calls being heard and assistance rendered. The marine safety system is primarily a vessel-to-vessel system and its effectiveness is directly proportional to the number of participants in the system. In consideration of these improvements in the last 25 years, we believe that the interval between inspections and certification can be increased to five years without any negative impact on safety. This will not only help alleviate an administrative burden on small passenger vessel operators but will also permit the Commission to better allocate its scarce resources.[5] Accordingly, we are proposing that § 83.512 be amended to change the interval of inspection for vessels subject to Title III, Part III of the Communications Act from 24 months to 5 years. The U.S. Coast Guard has agreed to request the masters of the vessels to conduct an operational test of the radiotelephone during its inspection which will provide a satisfactory indication of the functioning of the radiotelephone installation between FCC inspections.

Great Lakes Inspections

7. The Agreement between the United States of America and Canada for the Promotion of Safety on the Great Lakes by Means of Radio, 1973 (GLA) now requires annual inspection. The United States and Canada have commenced discussions on amendment of Article XII of the GLA to extend the periodic inspection of the radiotelephone installations from not less than once every 13 months to not less than once every 25 months. For the same reasons indicated above, we are proposing to amend the rules to extend the periodic inspection from one year to two years (the rules permit a one month extension). Comments are solicited on merits of this proposal.

Procedure

8. The proposed amendment to the Commission's rules as set forth in the attached Appendix are issued under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r).

9. Under procedures set out in § 1.415 of the Rules and Regulations, 47 CFR 1.415, interested persons may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the report and order.

10. In accordance with the provisions of § 1.419 of the Rules and Regulations, 47 CFR 1.419, formal participants shall file an original and 5 copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

11. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231.

12. The rule amendments proposed in this proceeding will expand the period of inspection for specified small boat operators. While this action would result in a more convenient inspection schedule for certain members of the

[3] See § 83.480 of the rules, 47 CFR Part 80.

[4] Report and Order, Docket No. 11824, released January 4, 1957, 22 FR 184 January 9, 1957.

[5] Implementation of the proposed inspection cycle can by done in two ways: (a) present certificates can be extended for 3 additional years' or (b) five-year certificates can be issued as each vessel is inspected under its present term. We seek comment as to which is preferable and we will provide a copy of this Notice to the United States Coast Guard and to the National Transportation Safety Board, in order to ascertain their views on this question.

maritime pubic, little if any economic benefit will result because the Commission typically performs these relatively brief inspections at the convenience of the vessel operator, i.e., between voyages or in the offseason. Therefore, the Commission certifies that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354) do not apply to this rulemaking proceeding, because the rules will not, if promulgated, have a significant economic impact on a substantial number of small entities.

13. Regarding questions on matters covered in this document contact Nicholas G. Bagnato (202) 632-7175.

Secretary.

Appendix

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. Section 83.512 is revised to read as follows:

§ 83.512 Inspection of radiotelephone installation.

Every vessel subject to Part III of the Title III of the Communications Act shall have a detailed inspection by the Commission of the equipment and apparatus prescribed therein not less than once every five years. If after inspection the Commission determines that all relevant provisions of Part III of Title III of the Communications Act, the rules of the Commission made pursuant thereto, and the station license, are complied with in an efficient manner, a Communications Act Safety Rediotelephony Certificate will be issued. The issuance date of such certificate shall be the date the installation is found to be in compliance, or not later than one business day following such in-compliance date.

§ 83.537 [Amended]

2. Section 83.537 is amended by replacing the word twelve with twenty-four.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Meeting

AGENCY: Advisory Council on Historic Preservation.

ACTION: Rescheduled meeting.

SUMMARY: On Tuesday, May 18, the Advisory Council on Historic Preservation published a notice in the **Federal Register**, Vol. 48, No. 91, p. 20968 of its intent to meet at the Old Post Office, 1100 Pennsylvania Avenue NW., West Conference Room, Washington, D.C. at 9 a.m. on June 1, 1983. This meeting has been rescheduled to June 23, 1983. All other particulars remain the same.

FOR FURTHER INFORMATION CONTACT: Additional information concerning either the meeting agenda or the submission of oral and written statements to the Council is available from the Executive Director, Advisory Council on Historic Preservation, 1522 K Street NW., Suite 430, Washington, D.C. 20005, 202-245-3967.

Dated: May 20, 1983.

Robert R. Garvey, Jr.,

Executive Director.

BILLING CODE 4310-10-M

ARMS CONTROL AND DISARMAMENT AGENCY

General Advisory Committee; Closed Meeting

In accordance with the Federal Advisory Committee Act, as amended, the U.S. Arms Control and Disarmament Agency announces the following meeting:

Name: General Advisory Committee on Arms Control and Disarmament.

Date: June 9 and 10, 1983.

Time: 9:00 a.m. each day.

Place: State Department Building, Washington, D.C.

Type of meeting: Closed.

Contact Person: Dr. Charles M. Kupperman, Executive Director of the General Advisory Committee, Room 5927, U.S. Arms Control and Disarmament Agency, Washington, D.C. 20451, telephone (202) 632-5176.

Purpose of advisory committee: To advise the Director of the U.S. Arms Control and Disarmament Agency on Arms control and disarmament policy and activities, and from time to time to advise the President and the Secretary of State respecting matters affecting arms control, disarmament, and world peace.

Agenda: Will include the following discussions and presentations:

June 9

A.M. Verification Issues
P.M. Compliance Issues

June 10

A.M. Discussions of the foregoing and possibly other similar matters.

Reason for closing: The GAC members will be reviewing and discussing matters specifically required by Executive Order to be kept secret in the interest of national defense and foreign policy.

Authority to close meeting: The closing of this meeting is in accordance with a determination by the Director of the U.S. Arms Control and Disarmament Agency dated May 9, 1983, made pursuant to the provisions of Section 10(d) of the Federal Advisory Committee Act as amended.

William J. Montgomery,

Administrative Director.

BILLING CODE 6820-32-M

Office of the Secretary

Forms Under Review by Office of Management and Budget

May 20, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Officer, USDA, OIRM, Room 108-W Admin. Bldg., Washington, D.C. 20250, (202) 447-6201.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of you intent as early as possible.

CIVIL AERONAUTICS BOARD

[Order 83–5–95]

Fitness Determination of Aviation Associates, Inc. d.b.a. Sunaire

AGENCY: Civil Aeronautics Board..

ACTION: Notice of Commuter Air Carrier Fitness Determination—Order 83–5–95, Order to Show Cause.

SUMMARY: The Board is proposing to find that Aviation Associates, Inc. d.b.a. Sunaire is fit, willing, and able to provide commuter air carrier service under section 419(c)(2) of the Federal Aviation Act, as amended, and that the aircraft used in this service conform to applicable safety standards. The complete text of this order is available, as noted below.

DATES: Responses: All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed below no later than June 7, 1983, together with a summary of the testimony, statistical data, and other material relied upon to support the allegations.

ADDRESSES: Responses or additional data should be filed with the Special Authorities Division, Room 915, Civil Aeronautics Board, Washington, D.C. 20428, and with all persons listed in Attachment A to the order.

FOR FURTHER INFORMATION CONTACT: Sherry L. Kinland, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428 (202) 673–5333.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–5–95 is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 83–5–95 to that address.

By the Civil Aeronautics Board: May 19, 1983.

Phyllis T. Kaylor,

Secretary.

[Order 83–5–94; Docket 41499]

Institution of Buffalo Airways, Inc.; Fitness Investigation

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order instituting the Buffalo Airways, Inc. Fitness Investigation, Order 83–5–94, Docket 41499.

SUMMARY: The Board is issuing an order instituting a fitness investigation of Buffalo Airways, Inc. to engage in interstate/overseas and foreign charter air transportation of persons, property, and mail under Section 401(d)(3) of the Act.

DATES: Persons wishing to file petitions to intervene in the Buffalo Airways, Inc. Fitness Investigation shall file their petitions in Docket 41499 by June 2, 1983 and serve their filings on all persons listed below.

ADDRESS: Petitions to intervene should be filed in the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428, in Docket 41499, Buffalo Airways, Inc. Fitness Investigation.

In addition, copies of such filings should be served on Buffalo Airways, Inc.; Transamerica Airlines, Inc.; the Mayor and Airport Manager of Waco, Texas; the Texas Aeronautical Commission; and the Federal Aviation Administration.

Service will also be required on any other person filing a petition. For further information contract: Nicholas Lowry, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Ave., N.W., Washington, D.C. 20428; (202) 673–5345.

SUPPLEMENTARY INFORMATION: The complete text of Order 83–5–94, is available from the Distribution Section, C.A.B. Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 83–5–94 to Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: May 19, 1983.

Phyllis T. Kaylor,

Secretary.

[Order 83–5–107]

Orion Lift Service, Inc. d.b.a. Orion Air; Order to Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Order to Show Cause: Order 83–5–107.

SUMMARY: The Board has tentatively decided to issue a certificate of public convenience and necessity to Orion Lift Service, Inc. d.b.a. Orion Air to authorize the carrier to engage in worldwide charter air transportation of property and mail.

Objections: All interested persons having objections to the Board's tentative findings and conclusions, as described in the order cited above, shall, no later than June 3, 1983, file a statement of such objections with the Civil Aeronautics Board (20 copies, addressed to Docket 41166, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428) and mail copies to Orion Lift Service, Inc. d.b.a. Orion Air and to the United States Departments of State and Transportation. A statement of objections must cite the docket number and must include a summary of testimony, statistical data or other such supporting evidence.

If no objections are filed, the Secretary of the Board will enter an order which will make final the Board's tentative findings and conclusions and issue Orion Air's certificate of public convenience and necessity to authorize it to engage in worldwide charter air transportation of property and mail.

To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, (202) 673–5432. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Ira Lwibowitz, (202) 673–5203, Bureau of International Aviation, Civil Aeronauatics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: May 19, 1983.

Phyllis T. Kaylor,

Secretary.

COMMISSION ON CIVIL RIGHTS

South Dakota Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations

of the U.S. Commission on Civil Rights, that a meeting of the South Dakota Advisory Committee to the Commission will convene at 10:00a and will end at 4:00p, on June 17, 1983, at the Travelodge, 125 Main Street, Frontier Room, Rapid City, South Dakota 55701. The purposes of this meeting are to review the status of current Committee activities and plan future projects.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Ms. Rae Johnson, Box 276, Mission, South Dakota 57558, (605) 747–2312, or the Rocky Mountain Regional Office, Brooks Towers, 1020 Fifteenth Street, Suite 2235, Denver, Colorado 80202, (303) 827–2211.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., May 20, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335–01–M

DEPARTMENT OF COMMERCE

International Trade Administration

Carbon Steel Wire Nails From Japan; Announcement of Third Quarter Monitoring Prices

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Announcement of Third Quarter 1983 Monitoring Prices for Carbon Steel Wire Nails from Japan.

SUMMARY: The Department of Commerce continues to monitor imports of carbon steel wire nails from Japan in accordance with an August 11, 1981 memorandum of understanding which expires two years from its inception. The Department announces that third quarter 1983 monitoring prices for carbon steel wire nails from Japan will remain unchanged from the second quarter 1983 levels. The third quarter 1983 monitoring price applies to those products exported to the United States on or after July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Juanita S. Kavalauskas, Agreements Compliance Division, Import Administration, Room 3099, Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–3793.

SUPPLEMENTARY INFORMATION: In compliance with a memorandum of understanding submitted August 10, 1981, Japanese nail manufacturers provided assurances that all contracts for the sale of carbon steel wire nails to the United States below trigger prices ceased on or about March 5, 1981, and that all sales of the product for a two year period beginning August 11, 1981 would be made at prices at or above the relevant trigger prices.

The Japanese nail manufacturers agreed to supply all costs of production and transportation information necessary to monitor the import prices. The Japanese manufacturers agreed that if the Trigger Price Mechanism (TPM) were terminated or suspended prior to the two year period, they would continue to provide TPM type cost information through the Japanese Ministry of International Trade and Industry (MITI) in order that the Department of Commerce could continue to calculate monitoring prices. The TPM was suspended January 11, 1982 and trigger price monitoring was reinstated only for stainless steel round wire products in April 1982.

Commerce will continue to monitor imports of certain carbon steel wire nails from Japan through the use of Special Summary Steel Invoices to assure compliance with the third quarter 1983 price levels.

For its calculation of monitoring price levels the dollar/yen exchange rate the Department uses to convert Japanese steel producers' yen-denominated production cost to dollars is the average of the 36 months preceeding the calculation and publication of the quarter's monitoring price levels. The exchange rate used in the Department's third quarter 1983 production cost estimate is 232 yen to the dollar (the yen/dollar exchange rate average for May 1980 through April 1983).

Other Charges

The third quarter 1983 carbon steel wire nail monitoring prices are an estimate of the Japanese nail manufacturers' production cost plus the cost of transporting to the United States and handling in the United States. Thus, charges for ocean freight, interest, handling and insurance must be added to the production costs described above and reflected in monitoring price base and extras. The freight and handling charges remain unchanged from second quarter 1983 levels. Interest charges have been adjusted to reflect the current prime interest rate.

A list of the carbon steel wire nails subject to monitoring and applicable base prices and extras are reproduced in the Appendix to this notice.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[Case No. 626]

Piher Semiconductores, S.A., Order Amending Temporary Denial of Export Privileges

By Orders of April 9, 1982, 47 FR 16819 (April 20, 1982), June 2, 1982, 47 FR 24765 (June 8, 1982), August 3, 1982, 47 FR 35808 (August 17, 1982), October 12, 1982, 47 FR 46558 (October 19, 1982), December 7, 1982, 47 FR 55989 (December 14, 1982), and March 22, 1983, 48 FR 12762 (March 28, 1983), the Order of February 25, 1982, 47 FR 9044 (March 3, 1982) Temporarily Denying Export Privileges was amended so as to authorize certain exports by Piher International Corp., Avda San Julian, s/n, Apartado Correos 177, Granallers (Barcelona), Spain. The Order of March 22, 1983 further provided that Piher International Corp. could apply for an extension of such authorization to export if serious economic hardship would be caused by a failure of such extension coupled with a contiunuing consideratin of a motion filed by Piher International Corp. that requested exception from the provisions of Paragraph III of the Order of February 25, 1982.

Consideration of this motion to except Piher International Corp. is still contiuning, and it has now applied for an extension of its authorization to make certain exports, asserting that failure to obtain the extension will entail serious economic hardship.

Based on the representations made by Piher International Corp., I find that its application for an extension of its authorization to make certain exports is justified, and that granting this extension will not jeopardize the purpose of the Order of February 25, 1982.

Accordingly, it is hereby ordered that the Order of February 25, 1982 is further amended by excepting, from its denial of export privileges, Piher International Corp., with addresses at 565 W. Golf Road, Arlington Heights, Illinois 60005, and at Post Office Box 91969, Chicago, Illinois 60680, insofar as Piher International Corp. exports variable resistors and potentiometers to its customers in Canada and Singapore in fulfillment of shipments scheduled through August 1983 in the shipment release documents filed by Piher International Corp. in support of its Application for this extension, provided all such exports are G-DEST under the Export Administration Regulations (15 CFR Part 368, *et seq.* (1982)). Piher International Corp. may apply for an extension of this Amendment to shipments scheduled after August 1983 should a continuing consideration of its aforesaid motion entail serious economic hardship if such an extension is not issued.

This Amendment of the Order is effective June 1, 1983.

Dated: May 19, 1983, 10:00 a.m. E.D.T.

Thomas W. Hoya,
Hearing Commissioner.

BILLING CODE 3510-25-M

Postponement of Preliminary Antidumping Determination; Lightweight Polyester Filament Fabric From the Republic of Korea

AGENCY: International Trade Administration, Commerce.

ACTION: Postponement of preliminary antidumping determination.

SUMMARY: The preliminary antidumping determination involving lightweight polyester filament fabric from the Republic of Korea is being postponed because the investigation has been determined to be extraordinarily complicated. We intend to issue the preliminary antidumping determination not later than August 2, 1983.

EFFECTIVE DATE: May 25, 1983.

FOR FURTHER INFORMATION CONTACT: Charles E. Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; Telephone (202) 377–5288.

SUPPLEMENTARY INFORMATION: On January 24, 1983, we announced the initiation of an antidumping investigation to determine whether lightweight polyester filament fabric from the Republic of Korea is being, or is likely to be, sold in the United States at less than fair value within the meaning of the antidumping law (48 FR 3797). The merchandise covered by this investigation is lightweight polyester filament fabric currently provided in items 338.5009, 338.5011, 338.5012, 338.5013, and 338.5015, of the Tariff Schedules of the United States Annotated. The notice of initiation stated that if the investigation proceeded normally we would make our preliminary determination on or before June 13, 1983.

Section 733(c) of the Tariff Act of 1930, as amended (the Act), provides that the Department of Commerce may postpone its preliminary determination if it concludes that the parties concerned are cooperating, the case is extraordinarily complicated and additional time is necessary to make the preliminary determination. We find these factors to exist in the present case. Specifically, we determine this case to be extraordinarily complicated within the meaning of section 733(c)(1)(B)(i) by reason of the number and complexity of the transactions to be investigated and the large number of firms whose activities must be investigated. We intend to issue a preliminary determination not later than August 2, 1983.

This notice is published pursuant to section 733(c) of the Act.

Gary N. Horlick,
Deputy Assistant Secretary for Import Administration.

May 20, 1983.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Receipt of Application for Permit; Point Reyes Bird Observatory

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name: Point Reyes Bird Observatory (P132B).

b. Address: 4990 Shoreline Highway, Stinson Beach, California 94970.

2. Type of Permit: Scientific Research.

3. Name and Number of Animals:

Northern elephant seals *(Mirounga angustirostris)* 9,250

Harbor seals *(Phoca vitulina)* 150+

Steller sea lions *(Eumetopias jubatus)* 75+

California sea lions *(Zalophus californianus)* +

4. Type of Take:

Up to 9,250 Northern elephant seals will be marked/tagged over 5 years. Up to 150 harbor seals will be captured, marked/tagged and/or radio tagged over 5 years. Up to 75 premature Steller sea lion pups will be collected over 5 years. Incidental harassment of harbor seals, Steller sea lions and California sea lions may result from research activities.

5. Location of Activity: California, Farallon Islands and Point Reyes Peninsula.

6. Period of Activity: 1983–1989.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 19, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Caribbean Fishery Management Council and Administrative Subcommittee; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The Caribbean Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), has established an Administrative Subcommittee. The Council and the Administrative Subcommittee will hold separate public meetings. The Council will hold its 46th regular public meeting to consider status reports on fishery management plans (FMPs) under development (draft FMP for shallow-water reef fishes; draft FMP for the fishery resources of the Puerto Rican and St. Croix geological platforms), and to discuss other Council matters. The Administrative Subcommittee will meet to discuss regular administrative operations.

DATES: The Council's public meeting will convene on Tuesday, June 28, 1983, at approximately 2 p.m., adjourn at approximately 5 p.m.; reconvene on Wednesday, June 29, at approximately 9 a.m., and will adjourn at approximately noon. The Council's Administrative Subcommittee will also convene on Tuesday, June 28, at approximately 10 a.m., and will adjourn at approximately noon.

ADDRESS: All meetings will take place at the University of Puerto Rico, Humacao Campus, Conference Room of the Students Center, Puerto Rico.

FOR FURTHER INFORMATION CONTACT: Caribbean Fishery Management Council, Banco De Ponce Building—Suite 1108, Hato Rey, Puerto Rico 00918, telephone: (809) 753–4926.

Dated: May 20, 1983.

Ann Terbush,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

Pacific Fishery Management Council's Framework Plan Task Force; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Notice.

SUMMARY: The Pacific Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 et seq., has established a Framework Plan Task Force which will meet to discuss elements contained in the Salmon Framework Plan. The Task Force will review possible options for spawning escapement goals and allocation of the harvest, and other items if necessary. The results of this meeting will be presented to the Council at its June 8–9, 1983, meeting in Portland. Members of the public will be permitted to submit oral or written statements regarding these matters. A public comment period will be scheduled at 3 p.m., on May 31, 1983.

DATES: May 31, 1983, at 9 a.m. to 5 p.m.; June 1, 1983, 9 a.m., to noon (if necessary).

ADDRESS: The public meeting will take place at the Oregon Department of Fish and Wildlife, 506 S.W. Mill Street, Chinook Room, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon, Telephone: (503) 221–6352.

Dated: May 20, 1983.

Ann Terbush,

Acting Chief, Operations Coordination Group, National Marine Fisheries Service.

BILLING CODE 3510-22-M

CONSUMER PRODUCT SAFETY COMMISSION

Meeting of Chronic Hazard Advisory Panel on Asbestos and Notice of Availability of Draft Report for Public Comment

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of public meeting and availability of draft report.

SUMMARY: A Chronic Hazard Advisory Panel, established by the Commission to provide advice about the potential chronic hazards presented by asbestos in consumer products, has scheduled a public meeting to hear comments on its draft report which is expected to be available June 1, 1983. On the day following the public meeting the Panel will meet in open session to consider changes to the draft report.

DATES: The public meeting will begin at 9:00 am on June 20, 1983, and will continue until 5:00 pm. Requests to make presentations are due by June 15, 1983. The Panel will meet in open session on June 21, 1983 starting at 9:00 am and continuing until 5:00 pm.

ADDRESS: The meetings will be at 5401 Westbard Avenue, Bethesda, Maryland, in room 456.

FOR COPIES OF THE DRAFT REPORT AND FURTHER INFORMATION CONTACT: Colin B. Church, Directorate for Health Sciences, Consumer Product Safety Commission, Washington, D.C. 20207; (301) 492–6957.

SUPPLEMENTARY INFORMATION: The Chronic Hazard Advisory Panel on Asbestos is a seven-member group which has been established to advise the Commission concerning the potential chronic hazard of cancer associated with the use of consumer products containing asbestos. The Panel, convened in January, 1983, is addressing the concern that the presence of asbestos in consumer products under certain conditions may present a risk of cancer and respiratory disease to consumers.

At its meeting on June 20 the Panel will hear public comments on its draft "Report to the Commission". Those planning to make presentations on June 20 should submit their requests and typewritten copies or outlines of their presentations to Mr. Church by June 15, 1983. In order to accommodate all who wish to speak, presentations will be limited to 20 minutes or less. Written comments on the draft report are also welcome, if received by Mr. Church by June 15, for consideration by the Panel at its June 21 meeting.

On June 21, the Panel will meet in open session to consider oral and written public comments and appropriate changes, if any, to the draft report.

Dated: May 20, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

DOD Advisory Group on Electron Devices; Advisory Committee Meeting

The DoD Advisory Group on Electron Devices (AGED) will meet in closed session on 11 July 1983 at the AGED Secretariat, 201 Varick Street, New York, New York 10014.

The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. Section 1 10(d) (1976)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

Dated: May 20, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DOD Advisory Group on Electron Devices; Advisory Committee Meeting

Working Group C (Mainly Imaging and Display) of the DoD Advisory Group on Electron Devices (AGED) will meet in closed session on 23 June 1983 at IBM, Essex Junction, Vermont.

The missin of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This special device area includes such programs as infrared and night sensors. The review will include classified program details throughout.

In accordance with Section 10(d) of Pub. L. No. 92–463, as amended, (5 U.S.C. App. 1 section 10(d) (1976)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

Dated: May 20, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

Research in Education of the Handicapped

AGENCY: Department of Education.

ACTION: Application Notice of Transmittal of Fiscal Year 1983 Applications for New Projects and Notice of Annual Priority Selection.

Applications are invited for new technology research project grants or cooperative agreements under the Research in Education of the Handicapped program. Authority for this program is contained in Section 641 of Part E of the Education of the Handicapped Act. (20 U.S.C. 1441)

The Secretary announces the selection of Technology Projects as a priority area for funding for Fiscal Year 1983 research awards under Part E. This selection was made in accordance with applicable program regulations (34 CFR 324.9(b), 324.10, and 324.11) and the Education Department's regulations governing the selection of annual priorities (34 CFR 75.105 (b) and (c)). This priority supports projects on the use of technological devices and systems in schools and by handicapped students.

Closing date for transmittal of applications: Applications for new technology projects must be mailed or hand delivered by July 25, 1983.

Program information: In accordance with 34 CFR 324.11 the Secretary will give an absolute preference applications that meet the priority for technology projects described above. Within this priority the Secretary particularly invites applications for projects that will use schools as research environments to provide information on (1) the effectiveness of technological innovations, especially microcomputers, for improving the educational achievement of handicapped students, and (2) the organizational, administrative, and personnel requirements associated with using this new technology for achieving such benefit. Applications that meet this invitational priority, however, will not receive a competitive or absolute preference over other applications that describe projects on the use of technological devices and systems in schools and by handicapped students, in accordance with the priority for technology projects at 34 CFR 324.9(b).

Available funds: There is expected to be available $1,000,000 in fiscal year 1983 for support of this program. It is expected that projects will be for 4 years, with annual budgets not to exceed $250,000. These estimates do not bind the Department of Education to a specific number of awards, or to the amount of any award unless that amount in otherwise specified by statute or regulations.

Applications delivered by mail: Applications must be addressed to the Department of Education, Application Control Center, *Attention:* 84.023R, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other evidence of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

Each late applicant will be notified that its application will not be considered.

Applications delivered by hand: Hand-delivered applications must be taken to the U.S. Department of Education Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand-delivered will not be accepted after 4:30 p.m. on the closing date.

Application forms: Application forms and program information packages are available and may be obtained by writing to the Research Projects Section, Special Education Programs, Department of Education, 400 Maryland Avenue, S.W. (Donohoe Building, Room 4839), Washington, D.C. 20202.

Application must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

The Secretary strongly urges that the narrative portion of the application not exceed thirty (30) double-spaced pages in length. The Secretary further urges that applicants submit only information that is requested.

Applicable regulations: Regulations applicable to this program include the following:

(a) Regulations governing Research in Education of the Handicapped (34 CFR Part 324); and

(b) The Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

FOR FURTHER INFORMATION CONTACT: For further information contact Allen Dittmann, Research Projects Section, Special Education Programs, Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 472-4640.

(20 U.S.C. 1441-1444)

(Catalogue of Federal Domestic Assistance No. 84.023, Handicapped Research and Demonstration)

Dated: May 19, 1983.

T. H. Bell,

Secretary of Education.

BILLING CODE 4000-01-M

ENVIRONMENTAL PROTECTION AGENCY

[WH-FRL 2225-6]

Approval of Revised NPDES Memorandum of Agreement With Delaware

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of approval of revised national pollutant discharge elimination system (NPDES) memorandum of agreement (MOA) with Delaware.

SUMMARY: On May 4, 1983, the Administrator of EPA approved a revised NPDES MOA between the State of Delaware and EPA. Previously the Administrator had approved an MOA as part of Delaware's original NPDES program approval.

FOR FURTHER INFORMATION CONTACT: Allen J. Danzig, permits division (EN-336), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-755-0750.

SUPPLEMENTARY INFORMATION: Under section 402(b) of the Clean Water Act (33 U.S.C. 1251, et seq.), States may be authorized to participate in the NPDES program if they satisfy certain minimum requirements. On April 1, 1974, the State of Delaware was approved to administer the NPDES permit program within its borders. At that time, a Memorandum of Agreement (MOA) was entered into between EPA and Delaware governing the administration of the NPDES program.

In October 1977, Congress passed a new set of amendments to the Federal Water Pollution Control Act which made changes to the NPDES permit program. The Federal regulations governing NPDES programs were significantly revised and republished on June 7, 1979 (44 FR 32854, et seq.) and on May 19, 1980 (45 FR 33290, et seq.). In order for the State of Delaware's NPDES program to conform to the new Federal regulations, many changes in the MOA were mandated. On November 18, 1982, a notice appeared in the **Federal Register** (47 FR 51897) announcing a proposed revision of the MOA. No responses to the public notice for the revised Delaware MOA were received.

Since the MOA meets are current EPA requirements, I have today approved the revised MOA with Delaware. No changes have been made to the version of the MOA on which the November 18, 1982 **Federal Register** notice requested comments.

Review Under the Regulatory Flexibility Act and Executive Order 12291

Under the Regulatory Flexibility Act, EPA is required to prepare a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. The approval of the revised Delaware NPDES MOA merely provides an agreement for Delaware's administration and EPA review of the State's NPDES program. No new substantive requirements are established by this action. Therefore, this notice does not have a significant impact on a substantial number of small entities. It does not trigger the requirement of a Regulatory Flexibility Analysis.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Dated: May 4, 1983.

Lee L. Verstandig,

Acting Administrator.

BILLING CODE 6560-50-M

[AMS-FRL 2369-1]

Fuel Economy Retrofit Devices; Announcement of Fuel Economy Retrofit Device Evaluation for Malpassi Filter King

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Fuel Economy Retrofit Device Evaluation.

SUMMARY: This announces the completion of the EPA evaluation of the "Malpassi Filter King" device under provisions of Section 511 of the Motor Vehicle Information and Cost Savings Act. This notice also announces the findings, conclusions, and availability of the report.

FOR FURTHER INFORMATION CONTACT: Merrill W. Korth, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105, Telephone (313) 668-4299.

SUPPLEMENTARY INFORMATION:

I. Background

Section 511(b)(1) and Section 511(c) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2011(b)) require that:

(b)(1) Upon application of any manufacturer of a retrofit device (or prototype thereof), upon the request of the Federal Trade Commission pursuant to subsection (a), or upon his own motion, the EPA Administrator shall evaluate, in accordance with rules prescribed under subsection (d), any retrofit device to determine whether the retrofit device increases fuel economy and to determine whether the representations (if any) made with respect to such retrofit devices are accurate.

(c) The EPA Administrator shall publish in the **Federal Register** a summary of the results of all tests conducted under this section, together with the EPA Administrator's conclusions as to—

(1) the effect of and retrofit device on fuel economy;

(2) the effect of any such device on emissions of air pollutants; and

(3) any other information which the Administrator determines to be relevant in evaluating such device.

EPA published final regulations establishing procedures for conducting evaluations of fuel economy retrofit devices on March 23, 1979 [44 FR 17946].

II. Origin of Request for Evaluation, Device Descriptions and Report Identification

On February 8, 1982, the EPA received from Techimport Limited an application for evaluation of a device termed the Malpassi Filter King. EPA had previously evaluated the Malpassi Filter King but enough questions remained concerning this device that it was proper for EPA to accept a new application. The details and history of this situation are outlined in the report described below. The device is a fuel pressure regulator which is installed in the fuel line and is intended to prevent overfilling of the carburetor float bowl and consequential overenrichment of the air/fuel mixture. The device is claimed to reduce fuel consumption and to improve vehicle performance.

Report: "EPA Evaluation of the Malpassi Filter King Device Under Section 511 of the Motor Vehicle Information and Cost Savings Act". Report number EPA-AA-TEB-511-83-1 contains the analysis and conclusions. It consists of 68 pages and includes all of the attachments.

III. Availability of Evaluation Report

Copies of these reports may be obtained from the National Technical Information Service by using the above

VOL 48 ISS 102 MAY 25 1983 UMI

report number. Address requests to: National Technical Information Service, U.S. Department of Commerce, Springfield, VA 22161, Telephone: (703) 487–4650 or FTS 737–4650.

IV. Summary of Evaluation

EPA fully considered all of the information submitted by the applicant. The test data and other information supplied by the applicant were insufficient to substantiate the claims for the device. The applicant was asked to submit additional test data and EPA also provided him with a recommended test plan. Although the applicant attempted to work out test arrangements with Bendix Corporation and later Southwest Research Institute, testing was not actually performed. Because the applicant had not adequately responded to repeated requests for additional substantiating test data and also because it appeared he would not be doing so in the immediate future, EPA decided to conclude its evaluation of the device. Thus, EPA notified the applicant it would complete its evaluation on the basis of the information available and that he could reapply for another evaluation as soon as he obtained appropriate test data which substantiated his claims.

It is the Agency's conclusion that although some fuel is wasted as a result of overenrichment of the air/fuel mixture, there is no evidence that the Malpassi Filter King device can reduce such losses. Thus, there is no reason to expect the device to significantly change the fuel economy, or exhaust emission levels, or the performance of a typical vehicle in proper operating condition. Moreover, there remains some concern for the effect of the device on driveability and safety during certain operating conditions.

Dated: May 16, 1983.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise, and Radiation.

[FR Doc. 83–13942 Filed 5–24–83; 8:45 am]

BILLING CODE 6560–50–M

[PP 3G2783/T412] PH–FRL 2369–2)

PPG Industries, Inc.; Establishment of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established a temporary tolerance for residues of the herbicide 1-(carboethoxy)ethyl 5-[2-chloro-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate in or on the raw agricultural commodity soybeans. This temporary tolerance was requested by PPG Industries, Inc.

DATE: This temporary tolerance expires April 22, 1984.

FOR FURTHER INFORMATION CONTACT: Richard Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 237, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703–557–1830).

SUPPLEMENTARY INFORMATION: PPG Industries, Inc., P.O. Box 31, Barberton, OH 44203, has requested, in pesticide petition PP 3G2783 the establishment of a temporary tolerance for residues of the herbicide 1-(carboethoxy)ethyl 5-[2-cholor-4-(trifluoromethyl)phenoxy]-2-nitrobenzoate in or the raw agricultural commodity soybeans at 0.05 part per million (ppm).

This temporary tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 748–EUP–18 which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. PPG Industries, Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires April 22, 1984. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 610–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516, (21 U.S.C. 346a(j)))

Dated: May 17, 1983.

EM Industries, Inc.; Extension of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has extended a temporary tolerance for the combined residues of the growth regulator methyl 2-chloro-9-hydroxyfluorene-9-carboxylate, methyl 9-hydroxyfluorene-9-carboxylate, and methyl 2,7-dichloro-9-hydroxyfluorene-9-carboxylate in or on the raw agricultural commodity cucumbers.

DATE: This temporary tolerance expires March 31, 1984.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the **Federal Register** of May 28, 1982 (47 FR 23021) stating that a temporary tolerance had been extended for the combined residues of the growth regulator methyl 2-chloro-9-hydroxyfluorene-9-carboxylate, methyl 9-hydroxyfluorene-9-carboxylate, and methyl 2,7-dichloro-9-hydroxyfluorene-9-carboxylate in or on the raw agricultural commodity cucumbers at 0.1 part per million (ppm). This tolerance was extended in response to pesticide petition PP 8G2079, submitted by EM Industries, Inc., 5 Skyline Drive, Hawthorne, NY 10532. The company has requested a one-year extension of the temporary tolerance to permit the continued marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 21137–EUP–3 which is being extended under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that an extension of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been extended on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. EM Industries, Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This tolerance expires March 31, 1984. Residues not in excess of this amount remaining in or on the above raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience of scientific date with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516 (21 U.S.C. 346a(j)))

Dated: May 17, 1983.

Premanufacture Notices; Monthly Status Report for April 1983

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substances Control Act (TSCA) requires EPA to issue a list in the **Federal Register** at the beginning of each month reporting the premanufacture notices (PMNs) pending before the Agency and the PMNs for which the review period has expired since publication of the last monthly summary. This is the report for April 1983.

DATE: Written comments are due no later than 30 days before the applicable notice review period ends on the specific chemical substance. Nonconfidential portions of the PMNs may be seen in Rm. E–108 at the address below between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

ADDRESS: Written comments are to be identified with the document control number "[OPTS–53049]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Management Support Division, Office of Pesticides and Toxic Substances, Office of Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M Street SW., Washington, D.C. 20460, (202–382–3532).

FOR FURTHER INFORMATION CONTACT: Kirk Maconaughey, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–208, 401 M Street SW., Washington, D.C. 20460, (202–382–3746).

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during April; (b) PMNs received previously and still under review at the end of April; (c) PMNs for which the notice review period has ended during April; (d) chemical substances for which EPA has received a notice of commencement to manufacture during April; and (e) PMNs for which the review period has been suspended. Therefore, the April 1983 PMN Status Report is being published.

Dated: May 17, 1983.

Linda A. Travers,

Acting Director, Management Support Division.

83-642	Generic name: Disubstituted phenol	48 FR 20487 (5/6/83)	July 13, 1983.
83-643	Generic name: Disubstituted benzoxazole	48 FR 20488 (5/6/83)	Do.
83-644	Generic name: Trisubstituted benzoxazolium salt	48 FR 20488 (5/6/83)	Do.
83-645	Generic name: Alkyd polymer from a vegetable oil with substituted alkanediols and carbomono-cyclic acids	48 FR 20488 (5/6/83)	Do.
83-646	Generic name: Modified alkyd resin	48 FR 20488 (5/6/83)	Do.
83-647	Generic name: Polymer of formaldehyde and substituted phenols	48 FR 20488 (5/6/83)	Do.
83-648	do.	48 FR 20488 (5/6/83)	Do.
83-649	do.	48 FR 20488 (5/6/83)	Do.
83-650	Generic name: Polymer of a diisocyanate, polyether, alkanol substituted cycloalkane, dipropylene glycol	48 FR 20488 (5/6/83)	July 16, 1983.
83-651	Generic name: Polymer of a diisocyanate, polyether glycol, alkanol substituted cycloalkane, dipropylene glycol, alkanol diamine, substituted bisphenol A polymer.	48 FR 20488 (5/6/83)	Do.
83-652	Generic name: Modified poly(emido-amine)	48 FR 20488 (5/6/83)	July 17, 1983
83-653	Generic name: Disubstituted isobenzofurandione, disubstituted bis phenylenoxy bis copolymer with tetracarboxy carbocycle and disubstituted benzenediamine.	48 FR 20488 (5/6/83)	Do.
83-654	Lauryl sulfate salt with 2-amino-2-methyl-1-propanol	48 FR 20488 (5/6/83)	Do.
83-655	Generic name: Naphthalenesulfonic acid, derivative, ester with hydrobenzo-phenone	48 FR 20488 (5/6/83)	Do.
83-656	Generic name: Substituted alkyl carboxylic acid, carbomonocyclic ester	48 FR 20488 (5/6/83)	July 18, 1983.
83-657	Generic name: Pentasubstituted benzimidazolium salt	48 FR 20489 (5/6/83)	July 19, 1983.
83-658	Generic name: Trisubstituted benzenamine	48 FR 20489 (5/6/83)	Do.
83-659	Generic name: Tetrasubstituted benzene	48 FR 20489 (5/6/83)	Do.
83-660	Generic name: Perfluorinated hydrocarbon	48 FR 20489 (5/6/83)	Do.
83-661	Generic name: Polyimide ester	48 FR 20490 (5/6/83)	July 20, 1983.
83-662	Generic name: Melamine formaldehyde resin	48 FR 20490 (5/6/83)	Do.
83-663	Generic name: Alkyl-substituted aromatic amine	48 FR 20490 (5/6/83)	Do.
83-664	Generic name: Substituted benzoic acid	48 FR 20490 (5/6/83)	July 23, 1983.
83-665	Generic name: Mixed polyalkoxy alkyl siloxanes and silsesquioxanes	48 FR 20490 (5/6/83)	July 24, 1983.
83-666	Generic name: Aromatic alkyd	48 FR 20490 (5/6/83)	Do.
83-667	Generic name: Pentasubstituted benzimidazolium salt	48 FR 20490 (5/6/83)	Do.
83-668	Generic name: Tetrasubstituted benzenamine	48 FR 20490 (5/6/83)	Do.
83-669	Generic name: Chromium complex of substituted phenolsazosulfonaphthol with naphtholazosulfo-naphthinol	48 FR 20490 (5/6/83)	Do.
83-670	Polymer of: neopentyl glycol, trimellitic anhydride, phthalic anhydride, trimethyl pentanediol	48 FR 20491 (5/6/83)	Do.
83-671	Generic name: Tetrasubstituted benzothiazole salt	48 FR 20491 (5/6/83)	July 25, 1983.
83-672	Generic name: Trisubstituted benzothiazole salt	48 FR 20491 (5/6/83)	Do
83-673	Incomplete.		
83-674	do.		
83-675	Generic name: Vinyl acetate, butyl acrylate, substituted methacrylate, terpolymer	48 FR 20491 (5/6/83)	Do.
83-676	1-Naphthalenesulfonic acid, 8-amino-5-hydroxy-	48 FR 20491 (5/6/83)	July 26, 1983.
83-677	Generic name: Chromium complex of substituted alkylaminoformimidophenol with sulfonaphtholazo-sulfophenylpyrazolone	48 FR 20490 (5/6/83)	Do.
83-678	Generic name: Dibutyltin mercaptoacetate derivative	48 FR 20490 (5/6/83)	Do.
83-679	Generic name: Alkyl ester of an epoxy acid	48 FR 20490 (5/6/83)	Do.
83-680	Generic name: Hydroxyethylaminomethylated tannin	48 FR 21370 (5/12/83)	July 27, 1983.
83-681	Generic name: Carbocyclic isocyante	48 FR 21370 (5/12/83)	Do.
83-682	do.	48 FR 21370 (5/12/83)	Do.

II. 86 Premanufacture Notices Received Previously and Still Under Review at the End of the Month

PMN No.	Identity/generic name	FR citation	Expiration date
83-520	Generic name: Polyester polycarboxylate salt	48 FR 10470 (3/11/83)	May 29, 1983.
83-521	Generic name: Carbomonocyclic ester	48 FR 10470 (3/11/83)	Do.
83-522	Reaction product of succinic anhydride and 1,2-ethanediamine, N-[3-(trimethoxysilyl)propyl]-	48 FR 10470 (3/11/83)	Do.
83-523	1,1'-[isopropylidenebis(6-hydroxy-m-phenylene)] bis(tetrahydrothiophenium hydroxide) mixed salts	48 FR 10470 (3/11/83)	Do.
83-524	Generic name: Polymer of trisubstituted methane, alkyl phenol and substituted bis benzene derivative	48 FR 10470 (3/11/83)	Do.
83-525	Generic name: Substituted benzendiolure, salt	48 FR 10470 (3/11/83)	Do.
83-526	Generic name: Isocyanate-derived polyamide	48 FR 10470 (3/11/83)	Do.
83-527	Generic name: Sulfonaphthobisanaphthol, chromium complex	48 FR 10470 (3/11/83)	May 30, 1983.
83-528	Generic name: Dimer-trimer triglycidyl ester	48 FR 10470 (3/11/83)	Do.
83-529	Generic name: Dicarboxylic acid, polyamine polymer	48 FR 10470 (3/11/83)	Do.
83-530	Generic name: Disubstituted carbomonocyclic ester	48 FR 10470 (3/11/83)	Do.
83-531	Generic name: Polyoxo arylene triazino epoxy derivative	48 FR 10470 (3/11/83)	Do.
83-532	Generic name: Glycenyl propoxy diacrylate	48 FR 10470 (3/11/83)	Do.
83-533	Generic name: Alkanearnine, alkane acid epoxy propyl ester, alkane aldehyde polymer	48 FR 11500 (3/18/83)	June 1, 1983.
83-534	Generic name: Etheric aromatic ester	48 FR 11500 (3/18/83)	Do.
83-535	N,N'-bis(2,2,6,6-tetramethyl-4-piperidyl) hexamethylenediamine polymer with ethane-1,2-dibromo	48 FR 11500 (3/18/83)	June 4, 1983

II. 86 Premanufacture Notices Received Previously and Still Under Review at the End of the Month—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
83-536	Polymer of poly(oxytetramethylene)diol, toluene diisocyanate polymer, isocyanate terminated and benzenamine, 4,4'-methylenebis and 2-butanone oxime.	48 FR 11500 (3/18/83)	Do.
83-537	Generic name: Waterborne urethane-acrylic polymer	48 FR 11500 (3/18/83)	Do.
83-538	Generic name: Polymer of diethylenetriamine and higher polyamine with dibasic esters	48 FR 11500 (3/18/83)	June 5, 1983.
83-539	Generic name: Substituted aralkytsilanes	48 FR 11500 (3/18/83)	Do.
83-540	Generic name: Polyamidoamine	48 FR 11500 (3/18/83)	Do.
83-541	Generic name: Polymer of carbonic acid and mixed aromatic diols containing sulfone diol	48 FR 11500 (3/18/83)	Do.
83-542	Generic name: Alkyl, alkylene maleate	48 FR 11500 (3/18/83)	Do.
83-543	Generic name: Polymer of diethylenetriamine and higher polyamines with dibasic esters, reacted with epichlorohydrin	48 FR 11500 (3/18/83)	June 6, 1983.
83-544	Generic name: Unsaturated polyester	48 FR 11501 (3/18/83)	June 7, 1983.
83-545	Benzene, 1-3-bis(isocyanatomethyl)-	48 FR 11501 (3/18/83)	Do.
83-546	Generic name: Substituted phenolazo, substituted pyrazolone	48 FR 11501 (3/18/83)	Do.
83-547	do	48 FR 11501 (3/18/83)	Do.
83-548	Carboxylic acids, C_6-C_{10}, mono-and C_6-C_{10} di-, C_2-C_{12} di, polymers with phthalic anhydride and propylene glycol	48 FR 11501 (3/18/83)	Do.
83-549	Generic name: Substituted acetamide	48 FR 11501 (3/18/83)	Do.
83-550	Generic name: Polymer of formaldehyde and substituted phenols	48 FR 12580 (3/25/83)	June 8, 1983.
83-551	Generic name: Modified polymer of formaldehyde and substituted phenols	48 FR 12580 (3/25/83)	Do.
83-552	Generic name: Phenol formaldehyde butanol resin	48 FR 12581 (3/25/83)	Do.
83-553	Ethanesulfonic acid, 2-[bis (2-cyanoethyl) phosphino]-potassium salt	48 FR 12581 (3/25/83)	Do.
83-554	Generic name: 1,3-benzenedicarboxylic acid, 5-substituted polymer with 1,2-ethanediol and oxo-heteropolycycle	48 FR 12581 (3/25/83)	Do.
83-555	do	48 FR 12581 (3/25/83)	Do.
83-556	Generic name: Polyester polyurethane	48 FR 12581 (3/25/83)	June 12, 1983.
83-557	Generic name: Disubstituted heteromonocycle	48 FR 12581 (3/25/83)	Do.
83-558	Generic name: Modified epoxy resin	48 FR 12581 (3/25/83)	Do.
83-559	Generic name: Organo phosphate	48 FR 12581 (3/25/83)	Do.
83-560	Generic name: Organo phosphate polymer	48 FR 12581 (3/25/83)	Do.
83-561	Generic name: Acrylic alkyd polymer	48 FR 12581 (3/25/83)	Do.
83-562	do	48 FR 12581 (3/25/83)	Do.
83-563	Generic name: Substituted indolium, salt	48 FR 12581 (3/25/83)	Do.
83-564	Generic name: Diallyl cycloaliphatic diester	48 FR 12581 (3/25/83)	Do.
83-565	Generic name: Sodium salt of a polymer of acrylic acid, acrylamide, and substituted acrylamide	48 FR 12582 (3/25/83)	June 13, 1983
83-566	Generic name: Substituted chlorobenzene	48 FR 12582 (3/25/83)	June 14, 1983
83-567	Generic name: Modified acrylic copolymer	48 FR 12582 (3/25/83)	Do.
83-568	Generic name: Substituted styrene	48 FR 12582 (3/25/83)	Do
83-569	Generic name: Phenyl substituted butane	48 FR 12582 (3/25/83)	Do.
83-570	Generic name: Substituted alkane diols	48 FR 14035 (4/1/83)	June 15, 1983.
83-571	Generic name: Fatty acids, carbomonocyclic ester	48 FR 14035 (4/1/83)	Do
83-572	Generic name: Polyester polycarboxylate salt	48 FR 14035 (4/1/83)	Do.
83-573	Generic name: Unsaturated polyester	48 FR 14035 (4/1/83)	Do.
83-574	Polymer of melonic acid, diethyl ester, trimethylolpropane, 1,6-hexanediol, neopentylglycol	48 FR 14035 (4/1/83)	Do.
83-575	Polymer of bisphenol A-oxirane polymer, neodecanoic acid, 2,3-epoxypropyl ester, diethylaminopropylamine, diethanolamine	48 FR 14035 (4/1/83)	Do.
83-576	Generic name: Polymer of diphenylmethane diisocyanate, alkyl epoxides, alkane triol, and trisubstituted alkanol	48 FR 14035 (4/1/83)	Do.
83-577	Generic name: 2-(2-haloaryl)amino-6-(N,N-dialkylamino)fluoran	48 FR 14036 (4/1/83)	June 18, 1983.
83-578	Generic name: Alkoxymethylpolysilazanes	48 FR 14036 (4/1/83)	Do.
83-579	Invalid		
83-580	Generic name: Thio-substituted aromatic amine	48 FR 14036 (4/1/83)	Do
83-581	Generic name: (Substituted-acetacetanilidylazophenyl)-(substituted) benzothiazole alkanolamine salt	48 FR 14036 (4/1/83)	June 19, 1983
83-582	Dimethylsta-14-crown-5	48 FR 14036 (4/1/83)	Do.
83-583	Generic name: Organotrimethoxysilane	48 FR 14036 (4/1/83)	Do.
83-584	Generic name: Blocked isocyanate	48 FR 14036 (4/1/83)	Do.
83-585	Generic name: Polymer of styrene, mixed acrylates and acrylic amide	48 FR 14036 (4/1/83)	June 20, 1983
83-586	Generic name: Mixed acrylic copolymer	48 FR 14036 (4/1/83)	Do.
83-587	Generic name: Mixed metal oxide	48 FR 14036 (4/1/83)	June 21, 1983.
83-588	2,6-bis(picrylamino)pyridine	48 FR 15180 (4/7/83)	June 22, 1983.
83-589	2,6-bis(picrylamino)-3,5-dinitropyridine	48 FR 15180 (4/7/83)	Do
83-590	Generic name: Arylsulfonic acid, {[(arylamino)phenyl]azo} compound with alkanolamine	48 FR 15180 (4/7/83)	Do.
83-591	Generic name: Styrene-acrylic terpolymer	48 FR 15181 (4/7/83)	Do.
83-592	Generic name: Acrylic acid polymer	48 FR 15181 (4/7/83)	June 25, 1983
83-593	Generic name: Dialkylamino xylenol	48 FR 15181 (4/7/83)	Do
83-594	Generic name: Alkyl amino propyl carbamide	48 FR 15181 (4/7/83)	Do.
83-595	Generic name: Alkyl amino propyl amine	48 FR 15181 (4/7/83)	Do.
83-596	Generic name: Modified acrylic polymer	48 FR 15181 (4/7/83)	June 26, 1983
83-597	Generic name: Cycloaliphatic isocyanate-amine based polyol prepolymer	48 FR 15181 (4/7/83)	Do.
83-598	Generic name: Polyester resin of aliphatic polyols, mixed aromatic diacids and aliphatic diacid	48 FR 15181 (4/7/83)	Do.
83-599	Generic name: Polyester resin of aliphatic polyols, mixed aromatic diacids, aliphatic diacid, and aromatic diisocyanate	48 FR 15181 (4/7/83)	Do.
83-600	Generic name: Modified rosin ester	48 FR 15181 (4/7/83)	Do.
83-602	Generic name: Brominated polyol diester	48 FR 15181 (4/7/83)	June 27, 1983.
83-603	Generic name: Substituted nitrile	48 FR 15181 (4/7/83)	Do.
83-604	Generic name: Reaction product of a mixture of mono and disubstituted dioxocarbopolycyclic compounds and 1,4-disubstituted benzene with sulfur.	48 FR 15182 (4/7/83)	June 28, 1983.
83-605	Anthraquinone, 2,2'-benzo[1,2-d:5-d'] bisthiazole-2,6-diylbis [1-amino-	48 FR 15182 (4/7/83)	Do.
83-606	9,10-Anthracenedione, 2-methyl-1-nitro-	48 FR 15182 (4/7/83)	Do.
83-607	Generic name: Di (mixed alkyl) magnesium	48 FR 15182 (4/7/83)	Do.

III. 94 Premanufacture Notices for Which the Notice Review Period Has Ended During the Month. (Expiration of the Notice Review Period Does Not Signify That the Chemical Had Been Added to the Inventory)

PMN No.	Identity/generic name	FR citation	Expiration date
83-115	Generic name: Naphthalenedisulfonic acid, disodium salt, ((2-(sodium sulfooxyethyl) sulfonyl)aryl)azo, and monochlorotriazinyla-mino, substituted, copper complex.	47 FR 52224 (11/19/82)	Apr. 5, 1983.
83-255	Generic name: Dicarboxylic acid monoester	47 FR 54537 (12/3/82)	Apr. 11, 1983.
83-298	Generic name: Toluene alkylate	47 FR 57336 (12/23/82)	Apr. 17, 1983.
83-299	do	47 FR 57336 (12/23/82)	Do.
83-300	do	47 FR 57336 (12/23/82)	Do.
83-301	do	47 FR 57336 (12/23/82)	Do.
83-302	Generic name: Alkyl benzene	47 FR 57336 (12/23/82)	Do.
83-306	Generic name: Poly alkyl benzene sulfonate	47 FR 57337 (12/23/82)	Do.

VOL 48 ISS 102 MAY 25 1983 UMI

III. 94 Premanufacture Notices for Which the Notice Review Period Has Ended During the Month. (Expiration of the Notice Review Period Does Not Signify That the Chemical Had Been Added to the Inventory)—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
83-307	....do	47 FR 57337 (12/23/82)	Do.
83-308	....do	47 FR 57337 (12/23/82)	Do.
83-309	....do	47 FR 57337 (12/23/82)	Do.
83-310	Generic name: Benzene alkyl sulfonate	47 FR 57337 (12/23/82)	Do.
83-356	Generic name: Substituted 1-aminoanthraquinone-2-sulfonic acid alkali metal salt	48 FR 1820 (1/14/83)	Apr. 2, 1983
83-357	Generic name: Isocyanate functional polyurethane derived from reaction of diisocyanate, polymeric ether glycols, polymeric aliphatic polyester glycols.	48 FR 1820 (1/14/83)	Do.
83-358	Generic name: Alkoxy amine salt	48 FR 1820 (1/14/83)	Do.
83-359	Generic name: Polyurethane resin	48 FR 1820 (1/14/83)	Do.
83-360	Generic name: Polyester of aliphatic polyols, vegetable oil, and aromatic dibasic acid	48 FR 1820 (1/14/83)	Do.
83-361	Generic name: Fatty acid, phthalic, polyol polymer	48 FR 1820 (1/14/83)	Do.
83-362	Generic name: Vinyl acrylic copolymer	48 FR 1820 (1/14/83)	Do.
83-363	Generic name: Acrylic grafted copolymer	48 FR 1820 (1/14/83)	Do.
83-364	Generic name: Polymer of 1,1'-methylene-bis(4-isocyanato-benzene); 1,9-nonanedioic acid (azelaic), and 1,4-butanediol	48 FR 1820 (1/14/83)	Apr. 3, 1983
83-365	Generic name: Aromatic methylurea	48 FR 3045(1/24/83)	Apr. 6, 1983
83-366	An aqueous solution of ammonium acrylate	48 FR 3045 (1/24/83)	Do.
83-367	Generic name: Metal complex substituted aromatic salt	48 FR 3045 (1/24/83)	Apr. 8, 1983
83-368	Generic name: Disubstituted benzenesulfonic acid alkali metal salt	48 FR 3045 (1/24/83)	Do.
83-369	Generic name: Methyl-methylenelmidazole derivative of methyl-pyrazoloquinazolonazo-methylphenylbenzothazole	48 FR 3045 (1/24/83)	Do.
83-371	Polymer of: neopentyl glycol, 1,6 hexanediol, trimethylol propane, dimethyl 1,4 cyclohexane dicarboxylate, azelaic acid, isophthalic acid.	48 FR 3045 (1/24/83)	Do.
83-372	Generic name: Metal complexed, substituted aromatic compound	48 FR 3046 (1/24/83)	Apr. 10, 1983
83-373	Generic name: Substituted polyurea	48 FR 3046 (1/24/83)	Do.
83-374	Generic name: Metal complexed substituted aromatic salt	48 FR 3046 (1/24/83)	Do.
83-375	Generic name: Substituted benzene	48 FR 3046 (1/24/83)	Do.
83-376	Spiro[2H-1-benzopyran-2,2'-[2H]] indole, 1',3'-dihydro-1',3',3'-trimethyl-6,8-dinitro-	48 FR 3046 (1/24/83)	Apr. 11, 1983
83-377	Generic name: Substituted benzene	48 FR 3046 (1/24/83)	Do.
83-378	Generic name: Methyl-methylenelmidazole derivative of copper phthalocyanine, compound with acetic acid	48 FR 3046 (1/24/83)	Do.
83-379	Generic name: Methyl-methylenelmidazole derivative of copper phthalocyanine, compound with methoxy-acetic acid		
83-380	Void		
83-381	....do		
83-382	Refer to PMN 83-292		
83-383	Refer to PMN 83-292		
83-384	....do		
83-385	....do	48 FR 3046 (1/24/83)	Apr. 12, 1983
83-386	Generic name: Disubstituted 4-amino-5-hydroxy-2,7-naphthalenedisulfonic acid, alkali metal salt	48 FR 3046 (1/24/83)	Do.
83-387	Isophthalic-phthalic-adipic-benzoic acid-trimethylol propane-neopentyl glycol resin	48 FR 3046 (1/24/83)	Do.
83-388	Tallow-ethylene glycol-pentaerythritol-phthalic-benzoic acid resin	48 FR 3046 (1/24/83)	Do.
83-389	Generic name: ((Substituted heterocycle)azo) substituted aniline, acid salts	48 FR 3047 (1/24/83)	Do.
83-390	Generic name: Polyester-imide resin	48 FR 3047(1/24/83)	Do.
83-391	Generic name: Disubstituted bis(phenylazo) 4-amino-5-hydroxy-2,7-naphthalenedisulfonic acid, alkali metal salt	48 FR 3047 (1/24/83)	Do.
83-392	3,5-dinitrosalicyaldehyde	48 FR 5034 (2/4/83)	Apr. 16, 1983
83-393	Generic name: Aromatic amine-epoxy resin adduct	48 FR 5304 (2/4/83)	Do.
83-395	Generic name: Modified alkyd polymer frm a vegetable oil, carbomonocyclic anhydride, carbomonocyclic acid, a substituted alkane triol, and a substituted alkanoic ester.	48 FR 5304 (2/4/83)	Do.
83-396	Generic name: Methoxy dicyclopentadiene carboxyaldehyde	48 FR 5304 (2/4/83)	Do.
83-397	Generic name: Amine salt of a phosphonic acid	48 FR 5304 (2/4/83)	Apr. 17, 1983
83-398	Generic name: Substituted 1,3,4-thiadiazole	48 FR 5304 (2/4/83)	Do.
83-399	Polymer of dimethyl ester of 4,4'(hydroxy-methylene)bis-1,2-benzenedicarboxylic acid with 4,4'-oxydianiline	48 FR 5304 (2/4/83)	Do.
83-400	Generic name: Copolymer of acrylic and methacrylic monomers	48 FR 5305 (2/4/83)	Do.
83-402	Generic name: Poly alkylene oxide-aromatic diisocyanate prepolymer	48 FR 5305 (2/4/83)	Do.
83-403	Generic name: Diazo aromatic compound	48 FR 5305 (2/4/83)	Apr. 18, 1983
83-404	Generic name: Unsaturated amide quaternary ammonium polymer	48 FR 5305 (2/4/83)	Do.
83-405	Generic name: Polymer of a methacrylate ester, an unsaturated alcohol ester and a maleated diester	48 FR 5305 (2/4/83)	Do.
83-406	Generic name: Benzenesulfonic acid, aminochloro-triazinly-aminocarboxychlorophenylpyrazo-lonylazo-	48 FR 5305 (2/4/83)	Do.
83-407	Generic name: Unsaturated ester of a substituted aryl ether polymer	48 FR 5305 (2/4/83)	Do.
83-408	Generic name: Triazine trisisocyanate	48 FR 5305 (2/4/83)	Do.
83-409	Generic name: N,N'-alkylene bis(di-2-ethylhexyl-phosphorodithoyl) alkanamide	48 FR 5305 (2/4/83)	Do.
83-410	Generic name: N,N'-dimethyl alkyl amine salts of mono-and di-2-ethylhexyl hydrogen phosphates	48 FR 5305 (2/4/83)	Do.
83-411	Generic name: C_{11}-C_{14}-alkylamine salts of alkyl acid phosphates	48 FR 5305 (2/4/83)	Do.
83-412	Generic name: Substituted pyridinium, chloride	48 FR 5305 (2/4/83)	Do.
83-413	Generic name: Modified epoxy polymethacrylate	48 FR 5305 (2/4/83)	Apr. 19, 1983
83-414	Generic name: Diazo substituted aromatic compound	48 FR 5308 (2/4/83)	Do.
83-415	Generic name: Aromatic diazo compound	48 FR 5308 (2/4/83)	Do.
83-416	Generic name: Diazo substituted aromatic compound	48 FR 5306 (2/4/83)	Do.
83-417	Generic name: Alkyldiamine	48 FR 5306 (2/4/83)	Do.
83-419	Generic name: Naphtholdisulfonic acid, chloro-triazinylamino-sulfophenylazo	48 FR 5306 (2/4/83)	Do.
83-420	Generic name: Acrylic-styrene oligomer	48 FR 5306 (2/4/83)	Do.
83-421	....do	48 FR 5306 (2/4/83)	Do.
83-422	Generic name: Aromatic polyamic acid	48 FR 6396 (2/11/83)	Apr. 20, 1983.
83-423	Generic name: Acrylic terpolymer	48 FR 6396 (2/11/83)	Do.
83-424	Generic name: Primary hydrogenated alkyl amine and silicone polymer	48 FR 6396 (2/11/83)	Apr. 23, 1983.
83-425	Polymer of diglycidyl ether cyclohexane, dimethanol, bisphenol A	48 FR 6396 (2/11/83)	Do.
83-426	Generic name: Epoxy resin ester	48 FR 6396 (2/11/83)	Do.
83-427	Generic name: Alkyl amino metal carboxylates	48 FR 6398 (2/11/83)	Apr 24, 1983
83-428	Generic name: Bis alkoxy aluminum acetoacetic ester complex	48 FR 6398 (2/11/83)	Do.
83-429	Generic name: Thiacarbocyanine hydroxide anhydro disulfoalkyl thalkyl compound with thalkyl amine (1:1)	48 FR 6398 (2/11/83)	Do.
83-430	Generic name: Polyester of aliphatic polyols, vegetable oil, and aromatic dibasic acids	48 FR 6398 (2/11/83)	Do.
83-431	....do	48 FR 6397 (2/11/83)	Do.
83-432	Generic name: Diazo aromatic compound	48 FR 6397 (2/11/83)	Do.
83-435	Generic name: Acrylate of polybutadiene	48 FR 6397 (2/11/83)	Apr. 25, 1983.
83-436	Generic name: Chloroaromatic compound	48 FR 6397 (2/11/83)	Do.
83-437	Generic name: Reaction product of a polyhalo-genated anhydride, maleic anhydride, alkylene glycols and amino alcohol	48 FR 6397 (2/11/83)	Do.
83-438	Generic name: Disubstituted 3-phenylazo-4-amin-5-hydroxy-2,7-naphthalenedisulfonic acid, alkali metal salt	48 FR 6397 (2/11/83)	Apr. 26, 1983.
83-439	2,2-dimethyl-1,3-propanediol, polymer with 2,2'-oxybis (ethanol), 2-ethyl-2-hydroxy-methyl-1,3-propanediol and 1,3-isobenzofuran-dione.	48 FR 6397 (2/11/83)	Apr. 24, 1983.
83-440	Generic name: Methacrylate of polybutadiene	48 FR 6397 (2/11/83)	Apr. 26, 1983.
83-441	Polymer of: Methyl acrylate, ethyl acrylate, acrylamide	48 FR 6588 (2/14/83)	Apr. 27, 1983.
83-442	Generic name: Vegetable fatty acids; benezene carboxylic acid; hydroxymethyl alkanepolyol polymer	48 FR 6588 (2/14/83)	Do.
83-443	Generic name: Alkanediol dimethylalkanediol, alkanedioic acid; substituted alkanoic acid, benzenedicarboxylic acid polymer		

III. 94 Premanufacture Notices for Which the Notice Review Period Has Ended During the Month. (Expiration of the Notice Review Period Does Not Signify That the Chemical Had Been Added to the Inventory)—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
83-444	....do	48 FR 6588 (2/14/83)	Do.
83-445	Generic name: Modified sodium polyacrylate	48 FR 6588 (2/14/83)	Apr. 30, 1983

IV. 64 Chemical Substances for Which EPA Has Received Notices of Commencement to Manufacture

PMN No.	Chemical identification	FR citation	Date of commencement
81-58	Generic name: Phenolic novolak resin	46 FR 16953 (3/16/81)	Apr. 12, 1983.
81-89	Generic name: Epoxy resin/substituted amine	46 FR 20764 (4/7/81)	Mar. 19, 1983.
81-306	Generic name: Complex of a mixture of 4,4'-dihydroxyphenyl sulfone and 2,4-dihydroxyphenol sulfone and an alkylamine	46 FR 37967 (7/23/81)	Apr. 11, 1983.
81-310	Generic name: Modified phenolic novolak resin	46 FR 37968 (7/23/81)	Apr. 13, 1983.
81-352	Generic name: Epoxy urethane copolymer	46 FR 39886 (8/5/81)	Oct. 21, 1981.
81-428	Generic name: Substituted heteromonocyclic derivative of a substituted thioxantheno isoquinoline	46 FR 45808 (9/15/81)	Apr. 11, 1983.
81-571	Benzo (k,l,) thioxanthene 3,4-dicarboxylic anhydride	46 FR 56039 (11/13/81)	Mar. 21, 1983.
82-6	Generic name: (Dialkylaminophenylazo) azobenzene sulfonic acid	47 FR 2399 (1/15/82)	Apr. 11, 1983.
82-22	Generic name: Acrylic copolymer	47 FR 3594 (1/26/82)	May 23, 1983.
82-84	Generic name: Alkylthio metallic mercaptan	47 FR 7753 (2/22/83)	Apr. 1, 1983.
82-239	Generic name: Substituted unsaturated alcohol	47 FR 15407 (4/9/82)	Do.
82-240	....do	47 FR 15407 (4/9/82)	Do.
82-271	Generic name: Acid blocked amine	47 FR 16405 (4/16/82)	Jan. 26, 1983.
82-316	4-Butylmorpholine	47 FR 19782 (3/7/82)	Apr. 13, 1983.
82-353	Generic name: Substituted phenyl-pyrimidine	47 FR 22215 (5/21/82)	Mar. 21, 1983.
82-354	....do	47 FR 22215 (5/21/82)	Do.
82-427	Generic name: Alkoxylated aliphatic glycol	47 FR 26235 (6/17/82)	Apr. 14, 1983.
82-428	Generic name: Acrylated alkoxylated aliphatic glycol	47 FR 26235 (6/17/82)	Do.
82-442	Generic name: Aromatic acids, polyether polyol alkyd	47 FR 27611 (6/25/82)	Apr. 18, 1983.
82-525	Generic name: Polyester modified epoxy resin	47 FR 34186 (8/6/82)	Mar. 21, 1983.
82-529	Generic name: Aliphatic acid ester salt	47 FR 34186 (8/6/82)	Apr. 15, 1983.
82-612	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 25°-35°	47 FR 39244 (9/7/82)	April 1, 1983.
82-613	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 35°-50°	47 FR 39244 (9/7/82)	Do.
82-614	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 50°-60°	47 FR 39244 (9/7/82)	Do.
82-615	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 60°-75°	47 FR 39244 (9/7/82)	Do.
82-616	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 75°-90°	47 FR 39245 (9/7/82)	Do.
82-617	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 90°-105°	47 FR 39245 (9/7/82)	Do.
82-618	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 105°-120°	47 FR 39245 (9/7/82)	Do.
82-619	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 120°-140°	47 FR 39245 (9/7/82)	Do.
82-620	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 140°-165°	47 FR 39245 (9/7/82)	Do.
82-621	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 165°-180°	47 FR 39245 (9/7/82)	Do.
82-622	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 180°-190°	47 FR 39245 (9/7/82)	Do.
82-623	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 190°-200°	47 FR 39245 (9/7/82)	Do.
82-624	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 200°-220°	47 FR 39245 (9/7/82)	Do.
82-625	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 220°-235°	47 FR 39246 (9/7/82)	Do.
82-626	Mixed C_4-C_{18} perfluorinated hydrocarbons, ethers and tertiary amines, characterized by boiling point range 235°-255°	47 FR 39246 (9/7/82)	Do.
82-652	Generic name: Metal complexed substituted aromatic salt	47 FR 41166 (9/17/82)	Jan. 17, 1983.
82-664	Generic name: 4-Hydroxy-N-substituted-3-nitro-benzenesulfonamide	47 FR 42152 (9/24/82)	Feb. 8, 1983.
82-665	Generic name: 3-Amino-4-hydroxy-N-substituted benzenesulfonamide	47 FR 42152 (9/24/82)	Apr. 11, 1983.
83-17	Generic name: Fatty acids, substituted aromatic esters, alkali metal salts	47 FR 46372 (10/18/82)	Apr. 18, 1983.
83-47	Generic name: Polymer of acrylic acid and acrylic esters	47 FR 49073 (10/29/82)	Apr. 4, 1983
83-52	Reaction product of N, N' 2-bis(6-isocyanato-hexyl) imidodicabonic diamide with 3-(trimethoxy-silyl)-1-propanethiol	47 FR 49073 (10/29/82)	Apr. 1, 1983.
83-59	Generic name: Acrylic acid, polymer with vinyl acetate, acrylate esters, and substituted ethylene	47 FR 49074 (10/29/82)	Feb. 14, 1983.
83-68	Generic name: Alkylated isopropylbenzene	47 FR 50339 (11/5/82)	Apr. 18, 1983.
83-96	Generic name: (Substituted phenyllazo) benzene-sulfonic acid, aminum salt	47 FR 52222 (11/19/82)	Feb. 28, 1983.
83-118	Generic name: Polymeric polyamidoamine	47 FR 52224 (11/19/82)	Mar. 10, 1983.
83-237	Generic name: Substituted pyridine	47 FR 53782 (11/29/82)	Apr. 11, 1983.
83-255	Generic name: Dicarboxylic acid monoester	47 FR 54537 (12/3/82)	Apr. 25, 1983.
83-268	Generic name: Azobis-(nitrosulfophenyl-alkylsulfobenzene) compound with oxyalkylamine	47 FR 57333 (12/23/82)	Mar. 21, 1983.
83-297	Generic name: (Substituted) anthracenylimino-(substituted) carbomonocyclic acid alkylamine salt	47 FR 57335 (12/23/82)	Mar. 28, 1983.
83-317	Generic name: Modified polyester polyurethane from substituted alkanediols, alkanedioic acid, and a diisocyanate	47 FR 57338 (12/23/82)	Mar. 30, 1983.
83-330	Generic name: Substituted phenate	48 FR 73 (1/3/83)	Apr. 18, 1983.
83-338	Generic name: Substituted-1,8-triphenodiox-azinedisulfonic acid, sodium salt	48 FR 882 (1/7/83)	Mar. 27, 1983.
83-355	Generic name: Substituted aromatic secondary naphthalene amine	48 FR 1820 (1/14/83)	Mar. 21, 1983.
83-356	Generic name: Substituted 1-aminoanthraquinone-2-sulfonic acid alkali metal salt	48 FR 1820 (1/14/83)	Apr. 4, 1983.
83-357	Generic name: Isocyanate functional polyurethane derived from reaction of diisocyanate, polymeric ether glycols, polymeric aliphatic polyester glycols.	48 FR 1820 (1/14/83)	Apr. 25, 1983.
83-363	Generic name: Acrylic grafted copolymer	48 FR 1820 (1/14/83)	July 1, 1983.
83-368	Generic name: Disubstituted benzenesulfonic acid alkali metal salt	48 FR 3045 (1/24/83)	Apr. 11, 1983.
83-376	Spiro [2H-1-benzopyran-2,2',-(2H)] indole, 1',3'-dihydro-1',3',3'-trimethyl-6,8-dinitro-	48 FR 3046 (1/24/83)	Endo of April 1983.
83-386	Generic name: Disubstituted 4-amine-5-hydroxy-2,7-naphthalenesulfonic acid, alkali metal salt	48 FR 3046 (1/24/83)	Apr. 13, 1983.
83-390	Generic name: Polyester-imide resin	48 FR 3047 (1/24/83)	Apr. 20, 1983.
83-391	Generic name: Disubstrtued bis(phenylazo)4-amino-5-hydroxy-2,7-naphthalenesulfonic acid, alkali metal salt	48 FR 3047 (1/24/83)	Apr. 13, 1983
83-392	Generic name: 3,5-dinitrosalicylaldehyde	48 FR 3047 (1/24/83)	End of April 1983.
83-398	Generic name: Substituted 1,3,4-thiadiazole	48 FR 5304 (2/4/83)	Apr. 18, 1983.

V. 33 Premanufacture Notices for Which the Review Period Has Been Suspended

PMN No.	Identity/generic name	FR citation	Date suspended
80-137	Benzenamine, 4,4'-methylene bis [N-(1-methylbutylidene)	45 FR 48243 (7/18/80)	Sept. 22, 1980
80-138	....do	45 FR 48243 (7/18/80)	Do.
80-146	Phosphorodithioic acid o,o'-di (isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters, zinc salt	45 FR 49153 (7/23/80)	Sept. 17, 1980.
80-147	Phosphorodithioic acid o,o'-di (isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters	45 FR 49153 (7/23/80)	Do.
80-264	Generic name: Benzeamine, [N-(1-methyl-hexylidene)-N-(1-methyl butylidene)-4,4'-methylene bis]	45 FR 73127 (11/4/80)	Dec. 24, 1980

VOL 48 ISS 102 MAY 25 1983 UMI

V. 33 PREMANUFACTURE NOTICES FOR WHICH THE REVIEW PERIOD HAS BEEN SUSPENDED—Continued

PMN No.	Identity/generic name	FR citation	Date suspended
81-559	4-hydroxy-3-(5-(2-hydroxysulfonyloxy) ethylsulfonyl)-2-methoxyphenylazo)-7-succinylamino-2-naphthalenesulfonic acid disodium salt.	46 FR 55146 (11/6/81)	Jan. 27, 1982.
81-560		46 FR 55146 (11/6/81)	Do.
81-561	4-[4-[2-(hydroxysulfonyoxy)ethylsulfonyl]-5-methyl-2-methoxyphenylazo]-3-methyl-1-(3-sulfophenyl)-5-pyrazolone disodium salt	47 FR 1021 (1/8/82)	Mar. 28, 1982
81-660	4-hydroxy-3-(2-methoxy-5-methyl-4-(2-(hydroxysulfonyloxy)ethylsulfonyl)phenylazo)-1-naphthalene sulfonic acid disodium salt	47 FR 1021 (1/8/82)	Do.
81-661	4-hydroxy-3-(2-methoxy-5-methyl-4-(2-(hydroxysulfonyloxy)ethylsulfonyl)phenylazo)-6-(3-sulfophenyl)amino-2-naphthalenesulfonic acid trisodium salt.	47 FR 5932 (2/9/82)	Apr. 15, 1982.
82-80	Generic name: Zinc, o,o-bis alkylphosphoro dithioate	47 FR 25401 (6/11/82)	July 30, 1982.
82-367	Phosphorodithioic acid, o,o', secondary butyl and isooctyl mixed esters	47 FR 25401 (6/11/82)	Do.
82-366	Phosphorodithioic acid, o,o', secondary butyl and isooctyl mixed esters, zinc salt	47 FR 43161 (9/30/82)	Nov. 22, 1982
82-678	Generic name: Chlorinated aromatic azo anthraquinone pigment	47 FR 43161 (9/30/82)	Do.
82-679	Generic name: Chlorinated aromatic azo pigment	47 FR 46371 (10/18/82)	Oct. 22, 1982.
83-1	Generic name: Polyhalogenated aromatic alkylated hydrocarbon	47 FR 46373 (10/18/82)	Dec. 24, 1982
83-25	Generic name: Substituted pyridine	47 FR 47068 (10/22/82)	Dec. 27, 1982.
83-36	Generic name: Acrylated alkoxylated aliphatic glycol	47 FR 47068 (10/22/82)	Do.
83-37	...do	47 FR 52223 (11/19/82)	Jan. 26, 1983.
83-110	Generic name: Saturated acid diester	47 FR 53782 (11/29/82)	Jan. 25, 1983
83-237	Generic name: Substituted pyridine	48 FR 73 (1/3/83)	Mar. 14, 1983.
83-333	Generic name: Reaction product of polycyclesulfonic acid salt with phosphorus halide/halogen, subsequent reaction with an amine, subsequent reaction with an aldehyde/sodium bisulfite alkali.	48 FR 73 (1/3/83)	Mar. 17, 1983
83-335	Generic name: ((Substituted phenyl)azo) naphthalenesulfonic acid, sodium salt	48 FR 862 (1/7/83)	Mar. 21, 1983
83-341	Generic name: 7-[4-[4-chloro-6-[3-[2-(hydroxysulfonyloxy)ethylsulfonyl]anilino]-1,3,5-triazin-2-ylamino]-2-ureidophenylazo]-1,3,6-naphthalenetrisulfonic acid, tetrasodium salt.	48 FR 862 (1/7/83)	Do.
83-350	2-propoxyethyl acetate	48 FR 3045 (1/24/83)	Apr. 15, 1983
83-370	8-acetyl-3-dodecyl-7,7,9,9-tetramethyl-1,3,8-triazaspiro [4,5]decane-2,4-dione	48 FR 5304 (2/4/83)	Apr. 23, 1983.
83-394	Generic name: Polyglycidyl amine	48 FR 5304 (2/4/83)	Apr. 19, 1983.
83-401	Generic name: Naphthalenetrisulfonic acid, chlorotriazinylamino-methoxymethylphenylazo	48 FR 5306 (2/4/83)	Apr. 13, 1983.
83-418	Generic name: Benzenedisulfonic acid, chlorotriazinyl-amino-dimethylphenylazo-sulfo-naphthalenazo	48 FR 6397 (2/11/83)	Apr. 19, 1983.

Natrona Broadcast Co. Inc., et al.; Applications for Construction Permit; Correction

Released: May 12, 1983.

By the Chief, Mass Media Bureau:

In re applications of Natrona Broadcast Company, Inc Casper, Wyoming, Req: 103.7 MHz, Channel 279C 59.1 kW (H&V), 1929 feet, MM Docket No. 83-301, File No. BPH-810916AI; Goodluck Broadcasting, Inc., Casper, Wyoming, Req: 103.7 MHz, Channel 279C 100 kW (H&V), 183 feet, MM Docket No. 83-302 File No. BPH-820330BA; Casper Broadcasting Partners, Casper, Wyoming, Req: 1037 MHz, Channel 279C 57.8 kW (H&V), 1909 feet, MM Docket No. 83-303 File No. BPH-820524AE for construction permit.

The Commission, by the Chief, Mass Media Bureau, has before it the hearing designation order designating for

comparative hearing the above-captioned applications, released April 4, 1983 (48 FR 15709, Apr. 4, 1983), which erroneously listed the applicant assigned to "MM Docket No. 83-303" as "HARVEY Q. GREGORY" and the requested facilities as "103.7 MHz, Channel 279C, 57.7 kW, 1929 feet. Also, the words "File No." were inadvertently deleted from the caption of each of the Docket Numbers listed in the heading.

Accordingly, it is ordered, that the caption of the application assigned to "MM Docket No. 83-303" is corrected to read: "Casper Broadcasting Partners, Casper, Wyoming, Req: 103.7 MHz, Channel 279C, 57.8 kW (H&V), 1909 feet."

It is further ordered, That the captions of each of the Docket Numbers listed in the heading are corrected to include the words "File No." before each file number listed.

Federal Communications Commission.

Oswego Broadcasting and Communications, Inc. and Ithaca TV Associates; Order Designating Applications for Consolidated Hearing on Stated Issues

Adopted: April 29, 1983.
Released: May 12, 1983.

By the Chief, Mass Media Bureau:

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Oswego Broadcasting and Communications, Inc. (Oswego)[1] and Ithaca TV Associates (ITVA) for authority to construct a new commercial television broadcast station on Channel 52, Ithaca, New York; informal objections filed by L. Richard Stumbar; a petition to deny ITVA's application filed by Oswego [2]; and related pleadings.

[1] Oswego Broadcasting and Communications, Inc. changed its name from Paradise Broadcasting and Communications Systems, Inc., by amendment filed June 30, 1982.

[2] Oswego filed its petition to deny on August 30, 1982. Section 73.3584(a) of the Commission's Rules requires that if a "cut-off" date has been established "* * * such petitions must be filed by the date specified." The "cut-off" date for ITVA was June 30, 1982. Therefore, the petition will be dismissed, and will be considered as an informal objection filed pursuant to Section 73.3587 of the Commission's Rules. Objections from competing applicants are, in essence, predesignation petitions to specify issues and, as such, are no longer permitted; however, since Stumbar raises some of the same questions in his objection, we will consider Oswego's informal objection in this proceeding.

Oswego Broadcasting and Communications, Inc.

2. No determination has been reached that the tower height and location proposed by Oswego would not constitute a hazard to air navigation. Accordingly, an issue regarding this matter will be specified.

3. On May 10, 1982, the Commission received a letter from L. Richard Stumbar objecting to a grant of Oswego's application. The statement alleges that Oswego failed to promptly publish its local public notice which, Stumbar says, may have denied others adequate time to file competing applications or petitions to deny. Stumbar also states that Oswego does not have reasonable assurance of a transmitter site; and lastly, Stumbar charges Oswego with imprudent use of the allocation, since only Ithaca, New York, and nearby environs will be served.

4. Oswego did give public notice late; however, this does not warrant dismissal of its application. The purpose of the local public notice is to inform area residents of the proposal. It is the Commission's "cut-off" list, however, which officially notifies the public that an application has been accepted for filing. The "cut-off" list affords all interested parties equal opportunity to file competing applications and comments. With regard to the transmitter site, Oswego states, in its "Comments on Statement of Objection," that it currently has a lease purchase agreement for use of an existing tower at its proposed site. Mr. Stumbar, in his letter of November 15, 1982, alleges that members of the zoning board will not approve the operation of a moderate to high power UHF television transmitter at Oswego's proposed site. However, Mr. Stumbar has submitted no affidavits or other documentary support for his contention. Finally, in regard to efficient utilization of the channel, § 73.614(a) of the Commission's Rules specifies a minimum effective radiated power, a standard that Oswego's 1.4 kW well exceeds. The efficiency of the proposed use, in accordance with normal practice, is a matter that will be considered under the standard comparative issue. Accordingly, L. Richard Stumbar's informal objection will be denied.

Ithaca TV Associates

5. On June 10, 1982, Stumbar filed an informal objection to ITVA's application that was similar in content to the one filed against Oswego. Stumbar lists a late published public notice; no reasonable assurance of a transmitter site; and violation of § 73.636 of the Commission's Rules as reasons for the dismissal of ITVA's application.

6. As specified above in paragraph 4, a late-filed public notice does not warrant dismissal of an application. Stumbar also contends that the proposed facility is a "major environmental action" as defined under § 1.1305(a)(6)(ii), since the proposed site is on an existing wildlife refuge. We note that there are other broadcast towers in the area of ITVA's proposed site. It appears, therefore, that the site is an "antenna farm." Consequently, no issue will be specified. Section 1.1305(b)(1).

7. Stumbar, as well as Oswego in its informal objection, raises questions regarding ITVA's compliance with §73.636 of the Commission's Rules. Essentially, Stumbar and Oswego allege that through interlocking interests among the principals of Stations WOLF(AM), Syracuse, New York, WQNY(FM) (previously WEIV(FM)), Ithaca, New York and this application, the ITVA's proposal violates both the one-to-a-market rule and the regional concentration of control rule. From our review of the material presented herein, we have determined that it may be appropriate to examine these questions in hearing. Notes 8 and 11 of §73.636 provide that applications for UHF television facilities ". . . will be treated on a case-by-case basis in order to determine whether common ownership, operation or control of the stations in question would be in the public interest." Accordingly, an appropriate issue will be specified to determine whether there is common ownership, operation or control of WOLF(AM), Syracuse, New York, WQNY(FM), Ithaca, New York and the proposed television station inconsistent with the public interest.

8. The effective radiated visual power antenna height above average terrain and other technical data submitted by Oswego indicates that there would be a significant difference in the size of the area and population that it proposes to serve and the size of the area and population that ITVA proposes to serve. Consequently, for the purpose of comparison, the areas and populations which would be within the predicted 64 dBu (Grade B) contour, together with the availability of other television service of 64 dBu (Grade B) or greater intensity, will be considered under the standard comparative issue, for the purpose of determining whether a comparative

VOL 48 ISS 102 MAY 25 1983 UMI

preference should accrue to either of the applicants.

9. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

10. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, before an Administrative Law Judge, at a time and a place to be specified in a subsequent Order, upon the following issues:

1. To determine whether there is a reasonable possibility that the tower height and location proposed by Oswego Broadcasting and Communications, Inc. would constitute a hazard to air navigation.

2. To determine with respect to Ithaca TV associates whether there is common ownership, operation or control of WOLF(AM), Syracuse, New York, WQNY(FM), Ithaca, New York, and the proposed television station; and if there is, whether a grant of the proposed facility would be consistent with the public interest.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

11. It is further ordered, That, the Federal Aviation Administration is made a party respondent to this proceeding with respect to issue 1.

12. It is further ordered, That, the informal objection filed by L. Richard Stumbar against Oswego Broadcasting and Communications, Inc. is denied.

13. It is further ordered, That, the petition to deny filed by Oswego Broadcasting and Communications, Inc. is dismissed, and when considered as an informal objection filed pursuant to §73.3587 of the Commission's Rules, is granted.

14. It is further ordered, That, L. Richard Stumbar is made a party respondent with respect to issue 2.

15. It is further ordered, That, the informal objection filed by Richard L. Stumbar against Ithaca TV Associates is granted to the extent indicated herein and is otherwise denied.

16. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants and the parties respondent herein shall, pursuant to §1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

17. It is further ordered, That, the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended and §73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by Section 73.3594(g) of the Rules.

Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Barnett Banks of Florida, Inc.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary), Washington, D.C. 20551:

1. *Barnett Banks of Florida, Inc.*, Jacksonville, Florida; to acquire 100 percent of the voting shares or assets of Boulevard Bank, Key West, Florida. The application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Atlanta. Comments on this application must be received not later than June 17, 1983.

Board of Governors of the Federal Reserve System, May 19, 1983.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Notice of Proposed De Novo Nonbank Activities; First Amarillo Bancorporation, Inc. and First Security Corp.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President), 400 South Akard Street, Dallas, Texas 75222:

1. *First Amarillo Bancorporation, Inc.*, Amarillo, Texas (data processing and data transmission activities; Texas, New Mexico, Colorado, Oklahoma): To engage, through its subsidiary, Western Data Centers, Inc., in providing to others financial mortgage, banking, and economic data processing and

transmission services pursuant to a written agreement so describing and limiting the services. These activities would be performed both from its main office in Amarillo, Texas and remote locations in Lamar, Colorado; Lubbock, Perryton, and Quannah, Texas, serving the states of Texas, New Mexico, Colorado, and Oklahoma. Comments on this application must be received not later than June 17, 1983.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President), 400 Sansome Street, San Francisco, California 94120:

1. *First Security Corporation*, Salt Lake City, Utah (industrial loan company, lease finance, and insurance activities related to credit activities; Utah): To engage through its existing subsidiary, First Security Financial, in offering thrift savings accounts and thrift certficates; the business of making consumer, business and mortgage loans; the business of lease financing; acting as an agent in the sale of credit life and credit disability insurance related to extensions of credit where the insurance is limited to assuring repayment of the outstanding balance due on a specific extension of credit in the event of death, disability or involuntary unemployment of the debtor, pursuant to Section 601(A) of the Garn- St Germain Depository Institutions Act of 1982. These activities would be conducted from an office in Salt Lake County, Utah, serving the southeastern portion of Salt Lake County. Comments on this application must be received not later than June 13, 1983.

Board of Governors of the Federal Reserve System, May 19, 1983.

BILLING CODE 6210-01-M

The Chase Manhattan Corp.; Proposed Acquisition of Rose & Company Investment Brokers, Inc.

The Chase Manhattan Corporation, New York, New York, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Rose & Company Investment Brokers, Inc., Chicago, Illinois.

Applicant states that the proposed subsidiary would engage in the activities of (1) retail securities brokerage, restricted to buying and selling securities (including municipal securities through an affiliated bank) solely upon the order and for the account of customers; and (2) extending securities credit in conformity with the Board's Regulation T (12 CFR 220). In addition, Applicant would offer the following incidental services to its customers through Rose: (a) the payment of interest on net free balances in the accounts of its customers; (b) the provision of securities custodial services; (c) the maintenance of an arrangement with a money market fund or funds that would permit customers to invest free balances in the fund, (d) providing to its customers access to IRA accounts; (e) securities borrowing and lending; (f) acting as "inadvertent principal" in the event of the mistaken purchase of securities; and (g) providing for customers' access to their net free balances awaiting investment through debit cards issued by or checks drawn on an unaffiliated commercial bank. These activities would be performed from offices of Applicant's subsidiary in Boston, Massachusetts; Chicago, Illinois; Houston, Texas; Los Angeles, California; New York, New York; Pittsburgh, Pennsylvania; San Francisco, California; and Washington, D.C., and the geographic areas to be served are all fifty (50) states and the District of Columbia. Such activities have not been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b). However, the Board beleives that there is a reasonable basis for Applicant's opinion that such activities are closely related to banking or managing or controlling banks so as to warrant consideration of this proposal under § 225.4(a). See the Board's order approving the application of Bank American Corporation, San Francisco, California, to acquire the Charles

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Citizens Bancshares, Inc.*, Ville Platte, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens Bank of Ville Platte, Louisiana. Comments on this application must be received not later than June 17, 1983.

2. *Jeanerette First National Bancorp, Inc.*, Jeanerette, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Jeanerette, Jeanerette, Louisiana. Comments on this application must be received not later than June 15, 1983.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Centre 1 Bancorp, Inc., Beloit, Wisconsin; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank and Trust Company of Beloit, Beloit, Wisconsin. Comments on this application must be received not later than June 13, 1983.

C. Federal Reserve Bank of Minneapolis (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Beresford Bancorporation, Inc.*, Britton, South Dakota; to become a bank holding company by acquiring 92.5 percent of the voting shares of The First National Bank of Beresford, Beresford, South Dakota. Comments on this application must be received not later than June 17, 1983.

Board of Governors of the Federal Reserve System, May 19, 1983.
William W. Wiles,
Secretary of the Board.

BILLING CODE 6210-01-M

Hometown Bancorporation, Inc.; Formation of Bank Holding Company

Hometown Bancorporation, Inc., Rock Island, Illinois, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 51 percent or more of the voting shares of Financial Services Corporation of the Midwest, a bank holding company in Rock Island, Illinois and thus acquire indirect control of the Rock Island Bank, Rock Island, Illinois. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Hometown Bancorporation, Inc., Rock Island, Illinois, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire indirect control of Federal Discount Corporation, Rock Island, Illinois; Financial Services Life Insurance Company; Second Financial Services Life Insurance Company; and FSC Money Shopes.

Applicant states that the subsidiaries would engage in the activities of consumer finance and insurance. These activities would be performed from offices of Applicant's subsidiaries in Illinois, Iowa, Minnesota, North Dakota and Wisconsin, and the geographic areas to be served are Illinois, Iowa, Minnesota, North Dakota and Wisconsin. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. not later than June 18, 1983.

Board of Governors of the Federal Reserve System, May 19 1983.
William W. Wiles,
Secretary of the Board.

BILLING CODE 6210-01-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Housing Guaranty Program; Investment Opportunity

The Agency for International Development (A.I.D.) has authorized guaranties of two loans to the Government of Costa Rica (Borrower) as part of A.I.D.'s development assistance program. One of these loans will be to the Ministry of Finance for $4,800,000. The other loan will be to the Central Bank of Costa Rica for a total of $20,000,000. At this time, the Central Bank will borrow only $4,000,000 of the total amount authorized. The proceeds of these loans will be used to finance shelter projects for low income families in Costa Rica. The following is the name, address, telex number, and telephone number of the representative of the Borrower to be contacted by interested U.S. lenders or investment bankers:

Costa Rica

Project: 515-HG-006-$4,800,000, 515-HG-007-$20,000,000, Luis Bell, Director of External Finance Ministry of Finance, P.O. Box 10104, San Jose, Costa Rica, Telex: 22-77, Answer Back: MINHAC, Telephone: (506) 22-80-86.

Investors should contact the Borrower as soon as possible and indicate their interest in providing financing for this Housing Guaranty project. Following its discussions with interested investors, the Borrower will decide upon a procedure for selecting an investor and will inform interested investors of the procedure to be followed.

The Borrower will contract for both the $4,800,000 and the $4,000,000 loans simultaneously and both loans will have the same terms and conditions. Selection of investment bankers and/or lenders and the terms of the loans are initially subject to the individual discretion of the Borrower and thereafter subject to approval by A.I.D. The lenders and A.I.D. shall enter into a Contract of Guaranty covering the loans. Disbursements under the loans will be subject to certain conditions required of the Borrower by A.I.D. as set forth in an implementation agreement between A.I.D. and the Borrower.

The full repayment of the loans will be guaranteed by A.I.D. The A.I.D. guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to the authority of Section 222 of the Foreign Assistance Act of 1961, as amended (the "Act").

Lenders eligible to receive an A.I.D. guaranty are those specified in Section 238(c) of the Act. They are: (1) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and (4) foreign partnerships or associations wholly owned by U.S. citizens.

To be eligible for an A.I.D. guaranty, the loans must be repayable in full no later than the thirtieth anniversary of the disbursement of the principal amount thereof and the interest rates may be no higher than the maximum rate established by A.I.D.

Information as to the eligibility of investors and other aspects of the A.I.D. Housing Guaranty program can be obtained from:

Director, Office of Housing and Urban Programs, Agency for International Development, Room 625, SA-12, Washington, D.C. 20523, Telephone: (202) 632-9637.

Commission on Security and Economic Assistance

The notice of the second meeting of the Commission on Security and Economic Assistance to be held on May 26, 1983, was prepared, signed and forwarded to the **Federal Register** in sufficient time to comply with the 15-day advance notice requirements of OMB Circular A-63. However, because of inadvertent delays, the notice was not published until May 17, 1983 (48 FR 22220).

The Commission is required to produce its report on or about September 1983, and the schedules of the members of the Commission cannot be adjusted on such short notice. Accordingly, the meeting must be held as scheduled.

For further information contact: Mr. John K. Wilhelm, Agency for International Development, PPC/C, Room 1004 New State Building, Washington, D.C. 20523 (202) 632-7800.

Dated: May 20, 1983.

John K. Wilhelm,

A.I.D. Representative, Commission on Security and Economic Assistance.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-111; Final]

Bicycles From Taiwan

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigation and scheduling of a hearing to be held in connection with the investigation.

EFFECTIVE DATE: April 29, 1983.

SUMMARY: As a result of an affirmative preliminary determination by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that imports from Taiwan of bicycles, provided for in items 732.02 through 732.28, inclusive, of the Tariff Schedules of the United States, are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673), the United States International Trade Commission hereby gives notice of the institution of Investigation No. 731-TA-111 (Final) under section 735(b) of the act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. Unless the investigation is extended, the Department of Commerce will make its final dumping determination in the case on or before July 6, 1983, and the Commission will notify the Department of Commerce of its final injury determination by August 29, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: John MacHatton, Supervisory Investigator, Office of Investigations, U.S. International Trade Commission, telephone 202-523-0439.

SUPPLEMENTARY INFORMATION:

Background.—On November 8, 1982, the Commission notified the Department of Commerce, on the basis of the information developed during the course of its preliminary investigation, that there is a reasonable indication that an industry in the United States is being materially injured, or is threatened with material injury, by reason of alleged LTFV imports of bicycles from Taiwan. The preliminary investigation was instituted in response to a petition filed on September 24, 1982, by counsel on behalf of Roadmaster Corp. (formerly AMF Wheel Goods Division), Columbia Manufacturing Co., Huffy Corp., and Murray Ohio Manufacturing Co., individually, and as members of the Bicycle Manufacturers Association, Inc.

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to this investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), amended by 47 FR 33682, Aug. 4, 1982).

Staff report.—A public version of the staff report containing preliminary findings of fact in this investigation will be placed in the public record on July 12, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 10:00 a.m., on July 26, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on July 13, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m., on July 15, 1983 in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is July 21, 1983.

Testimony at the public hearing is governed by section 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33628, Aug. 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 (19 CFR 207.22, as amended by 47 FR 33682, Aug. 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24), and must be submitted not later than the close of business on August 2, 1983.

Written submission.—As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before August 2, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with section 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of §201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, subparts A through E (19 CFR Part 201, as amended by 47 FR 33682, Aug. 4, 1982).

This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: May 16, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigations Nos. 731-TA-113 and 114; Final]

Carbon Steel Wire Rod From Brazil and Trinidad and Tobago

AGENCY: United States International Trade Commission.

ACTION: Institution of final antidumping investigations and scheduling of a hearing to be held in connection with the investigations.

EFFECTIVE DATE: May 4, 1983.

SUMMARY: As a result of affirmative preliminary determinations by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that imports from Brazil and Trinidad and Tobago of carbon steel wire rod, provided for in item 897.17 of the Tariff Schedules of the United States, are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673), the United States International Trade Commission hereby gives notice of the institution of investigations Nos. 731-TA-113 and 114 (Final) under section 735(b) of the act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. Unless the investigation is extended, the Department of Commerce will make its final dumping determination in these cases on or before July 12, 1983, and the Commission will make its final injury determinations by August 31, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Mr. John MacHatton (202-523-0439), Office of Investigations, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background.—On November 15, 1982, the Commission determined, on the basis of the information developed during the course of its preliminary investigations, that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of allegedly LTFV imports of carbon steel wire rod from Brazil and Trinidad and Tobago. The preliminary investigations were instituted in response to a petition filed on September 30, 1982, by five producers of carbon steel wire rod.

Participation in the investigations.—Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11) not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to these investigations must be served on all other parties to the investigations (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Staff report.—A public version of the staff report containing preliminary findings of fact in these investigations will be placed in the public record on June 29, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearings.—The Commission will hold a hearing in connection with these investigations beginning at 10:00 a.m. on July 12, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on June 17, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m. on June 22, 1983, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is July 8, 1983.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33682, Aug. 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 (19 CFR 207.22), as amended by 47 FR 33682, Aug. 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on July 19, 1983.

Written submissions.—As mentioned, parties to these investigations may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations on or before July 19, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelop and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for

VOL 48 ISS 102 MAY 25 1983 UMI

confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, subparts A through E (19 CFR Part 201, as amended by 47 FR 33682, Aug. 4, 1982).

This notice is published pursuant § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: May 17, 1983.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-96; Final]

Nitrocellulose From France

AGENCY: United States International Trade Commission.

ACTION: Institution of a final antidumping investigation and scheduling of a hearing to be held in connection therewith.

EFFECTIVE DATE: May 10, 1983.

SUMMARY: On May 10, 1983, the U.S. Department of Commerce made an affirmative final determination that imports from France of nitrocellulose, provided for in item 445.25 of the Tariff Schedules of the United States, are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673). Accordingly, the United States International Trade Commission hereby gives notice of the institution of investigation No. 731-TA-96 (Final) under section 735(b) of the act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. The Commission will make its final injury determination by July 25, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Mr. Lawrence Rausch (202-523-0286), Office of Investigations, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background.—On August 16, 1982, the Commission determined, on the basis of the information developed during the course of its preliminary investigation, that there was a reasonable indication that an industry in the United States was materially injured or threatened with material injury by reason of allegedly less-than-fair-value imports of nitrocellulose from France. The preliminary investigation was instituted in response to a petition filed on July 2, 1982, by counsel for Hercules, Inc., Wilmington, Del.

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and address of all persons, or their representatives, who are parties to the investigation, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to this investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Staff report.—A public version of the staff report containing preliminary findings of fact in this investigation will be placed in the public record on June 10, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 10:00 a.m. on June 24, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on June 9, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m. on June 13, 1983, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is June 21, 1983.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33682, Aug. 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual material relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 (19 CFR 207.22, as amended by 47 FR 33682, Aug. 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on June 30, 1983.

Written submissions.—As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before June 21, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, subparts A through E (19 CFR part 201, as amended by 47 FR 33682, Aug. 4, 1982).

This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

[Investigation No. 337-TA-148]

Processes for the Manufacture of Skinless Sausage Casings and Resulting Product; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337, 1337a.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on April 25, 1983, pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and 19 U.S.C. 1337a, on behalf of Teepak, Inc., 2 North Riverside Plaza, Chicago, Illinois 60606 and Bufpak Corp., c/o Hillside Capital Inc., 405 Park Ave., New York, New York 10022. The complaint alleges unfair methods of competition and unfair acts in the importation of certain skinless sausage casings into the United States, or in their sale, by reason of alleged (1) infringement of at least claims 1 and 2 of U.S. Letters Patent 3,456,286; (2) infringement of at least claims 1, 2 and 5 of U.S. Letters Patent 3,461,484; (3) infringement of at least claims 1 and 3 of U.S. Letters Patent 3,383,222; and (4) infringement of at least claims 1, 2 and 5 of U.S. Letters Patent Re 28,281. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that, during the pendency of the investigation, the Commission issue a temporary exclusion order, prohibiting importation of the articles into the United States except under bond and, after a full investigation, issue a permanent exclusion order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation

Having considered the complaint, the U.S. International Trade Commission, on May 17, 1983, *ordered that:*

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930 an investigation be instituted to determine whether there is reason to believe that there is a violation or whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain skinless sausage casings into the United States, or in their sale, by reason of alleged (1) infringement of the claims of U.S. Letters Patent 3,456,286; (2) infringement of the claims of U.S. Letters Patent 3,461,484; (3) infringement of the claims of U.S. Letters Patent 3,383,222; and (4) infringement of the claims of U.S. Letters Patent Re 28,281, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are—

Teepak, Inc., 2 North Riverside Plaza, Chicago, Illinois 60606

Bufpak Corp., c/o Hillside Capital Inc., 405 Park Ave., New York, New York 10022

(b) The respondent is the following company, alleged to be in violation of section 337, and is the party upon which the complaint is to be served: Viscofan, S.A., Industria Navarra de Involturas Cellulosicas S.A., Avenida Tolosa S/N, Torre Lorea I.C., San Sebastian, Spain.

(c) Juan Cockburn, Esq., Unfair Import Investigations Division, U.S International Trade Commission, 701 E Street NW., Room 128, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer. Pursuant to § 210.30(c) of the Commission's Rules of Practice and Procedure (19 CFR 210.30(c)), discovery should be allowed in connection with the temporary relief phase of the investigation only to the extent necessary to weigh the standards that are applicable in deterimining whether temporary relief should be granted.

Responses must be submitted by the named respondent in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202-523-0471.

FOR FURTHER INFORMATION CONTACT: Juan Cockburn, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202-523-1272.

By order of the Commission.

Issued: May 19, 1983.

Kenneth R. Mason,

Secretary.

[Investigation No. 337-TA-133]

Vertical Milling Machines; Change of the Commission Investigative Attorney

Notice is hereby given that, as of this date, Arthur Wineburg, Esq., of the Unfair Import Investigations Division will be the Commission investigative attorney in the above-cited investigation instead of Orest Russ Pirfo, Esq.

The Secretary is requested to publish this Notice in the **Federal Register.**

Respectfully submitted,

Dated: May 18, 1983.

David I. Wilson,

Chief, Unfair Import Investigations Division.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by

VOL 48 ISS 102 MAY 25 1983 UMI

Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environmental nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied befor the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries about the following to Team, (202) 275–7992.

Volume No. OP1–180(F)

Decided: May 16, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 143060 (Sub-3), filed May 10, 1983. Applicant: PENN-PACIFIC, INC., 20815 Currier Rd., Walnut, CA 91789. Representative: William J. Monheim, P.O. Box 1756, Whittier, CA 90609, (213) 945–2745. As a *broker*, of *general commodities* (except household goods), between points in the U.S.

MC 151990 (Sub-1), filed April 29, 1983. Applicant: HIGH COUNTRY EXPRESS, INC., 40 West Alameda, Denver, CO 80223. Representative: William C. Van Dyke (same address as applicant), (303) 722–6014. (1) As a *broker* of *general commodities* (except household goods), between points in the U.S. (except AK and HI), and (2) transporting (a) for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), and (b) *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds, between points in the U.S. (except AK and HI).

MC 167800, filed May 3, 1983. Applicant: BIG "A" BUS CO., INC., 82 Chestnut Avenue, Irvington, NJ 07111. Representative: James Robert Evans, 145 W. Wisconsin Avenue, Neenah, WI 54956, (414) 722–2848. Transporting *passengers*, in charter and special operations, beginning and ending at points in NJ and NY, and extending to points in the U.S. (except AK and HI).

Note.—Applicant seeks to provide privately funded charter and special transportation.

MC 167810, filed May 3, 1983. Applicant: ROBERT Q'S TRAVEL MART INC., 155 York St., London, Otario, Canada N6A 1A8. Representative: John W. Ester, 100 West Long Lake Rd., Suite 102, Bloomfield Hills, MI 48013, (313) 645–9600. Transporting *passengers*, in charter and special operations, beginning and ending at the ports of entry on the international boundary line, between the U.S. and Canada, and extending to points in MI.

Note.—Applicant seeks to provide privately funded charter and special transportation.

MC 167821, filed May 3, 1983. Applicant: RICHARD A. REED, d.b.a. REED TRANSPORT, E. 1700 Twinlow Rd., Rathdrum, ID 83858. Representative: Helen M. Reed (same address as applicant), (208) 687–0909. Transporting *food and other edible products and byproducts intended for human consumption* (except alcholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S. (except AK and HI).

MC 167850, filed May 6, 1983. Applicant: NATIONWIDE EXPRESS, INC., 1215 Cetone Ave., Dayton, OH 45407. Representative: Robert M. O'Donnell, 145 W. Wisconsin Ave., Neenah, WI 549, (414) 722–2848.Transporting, for or on behalf of the United States Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S. (except AK and HI).

MC 167870, filed May 9, 1983. Applicant: HIGH RAIL BROKERAGE, INC., 4327 Memorial Drive, Suite J, Decatur, GA 30032. Representative: Gregory P. Smith (same address as applicant) (404) 294–9100. As a *broker*, of *general commodities* (except household goods), between points in the U.S.

MC 167890, filed May 9, 1983. Applicant: THOMAS L. WILLITS, 423 Maxiums Drive, Littleton, CO 80124. Representative: John T. Wirth, 717 17th St., Suite 2600, Denver, CO 80202–3357, (303) 892–6700. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S. (except HI).

BILLING CODE 7035-01-M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

BILLING CODE 7035-01-M

[No. 39150 et al.] [1]

Motor Carriers; Conalco Contract Carrier, Inc.—Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: The four motor contract carriers named in the footnote below have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due June 9, 1983. The sought relief will become final 15 days after the close of the comment period unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

[1] This proceeding embraces No. 39150, Conalco Contract Carrier, inc., No. 39151, Gabor Trucking, Inc., No. 39153, Gregory James Treat, and No. 39154, Olen Blankinship d.b.a. Blankinship Transportation.

ADDRESS: Send an original and 15 copies of comments to Room 2139, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Paul Schach, (202) 275–7885 or Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T. S. Infosystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C. 20423, or call 289–4357 in the D.C. metropolitan area or toll free (800) 424–5403.

Decided: May 16, 1983.

By the Commission, Division 2 Commissioners Gradison, Taylor and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB–6 (Sub-142]

Rail Carriers; Burlington Northern Railroad Company—Abandonment—in Peoria and Stark Counties, IL; Notice of Findings

The Commission has issued a certificate authorizing the Burlington Northern Railroad Company to abandon its 26.21-mile rail line between milepost 44.21 near Elmwood, IL and milepost 18.00 at the end of the line near Wyoming, Il, in Peoria and Stark Counties, IL. The abandonment certificate will become effective 30 days after the publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offer previously made must be remade within this 10-day period. information and procedures regarding financial assistance for continued rail services are contained in 49 U.S.C. 10905 and 49 CFR 1115.27.

BILLING CODE 7035-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel Meetings

AGENCY: National Endowment for the Humanities, NEAH.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at 1100 Pennsylvanie Avenue, N.W., Washington, D.C. 20506.

DATE: June 2, 1983
TIME: 9:00 a.m. to 5:00 p.m.
ROOM: 315
PROGRAM: This meeting will review applications submitted for Central Disciplines/Promoting Excellence in a Field Program, submitted for Education for projects beginning after October 1, 1983.

DATE: June 3, 1983
TIME: 9:00 a.m. to 5:00 p.m.
ROOM: 315
PROGRAM: This meeting will review applications submitted for Central Disciplines/Fostering Coherence Throughout an Institution Program, submitted for Education for projects beginning after October 1, 1983.

The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 786-0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Proposed Meetings

In order to provide advance information regarding proposed meetings of the ACRS Subcommittees and of the full Committee, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published April 27, 1983 (48 FR 19100). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the **Federal Register** approximately 15 days (or more) prior to the meeting. Those Subcommittee meetings for which it is anticipated that there will be a portion or all of the meeting open to the public are indicated by an asterisk (*). It is expected that the sessions of the full Committee meeting desinated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 a.m. and Subcommittee meetings usually begin at 8:30 a.m. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the June 1983 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Coimmittee (telephone 202/634-3267, ATTN: Barbara Jo White) between 8:15 a.m. and 5:00 p.m., Eastern Time.

ACRS Subcommittee Meetings

**Electric Systems*, May 26, 1983, Washington, DC. The Subcommittee will discuss the generic implications of the scram breaker failures at the Salem Nuclear Power Plant. Notice of this meeting was published May 12, 1983.

**Joint Metal Components and Reactor Fuels*, May 26-27, 1983, Washington, DC. The Subcommittees will discuss BWR pipe cracking phenomena and modifications, turbine disk cracking, reactor coolant pump seal failures, fuel cladding degradation, and NRC Action Plan on bolting integrity. Notice of this meeting was published May 9, 1983.

**Anticipated Transient Without Scram (ATWS)*, May 27, 1983, Washington, DC. The Subcommittee will continue review of the proposed Rule: "Reduction of Risk from Anticipated Transient Without Scram Events for Light Water Cooled Reactors." Notice of this meeting was published May 9, 1983.

**Quality Assurance During Construction*, June 1, 1983, Washington, DC. The Subcommittee will be brief by the NRC Staff on its quality assurance initiatives, including those related to the "Ford Amendment" of Pub. L. 97-415. The Subcommittee will also review the priorities given to generic items related to construction quality assurance in "A Prioritization of Generic Safety Issues" (NUREG-0933). Also, the Subcommittee will discuss, with representatives of the Institute of Nuclear Power Operations (INPO), INPO's efforts related to construction quality assurance (e.g., Construction Projects Evaluation Program).

**Qualification Program for Safety-Related Equipment*, June 7, 1983, Washington, DC. The Subcommittee will review the NRC Research Programs on Equipment Qualification and Plant Aging for the ACRS Report to the Commission on the FY 1985 and 1986 research budget.

**Plant Features Important to Safety*, June 7, 1983, Washington, DC. The Subcommittee will obtain from the NRC Staff a status report and program plan for equipment qualification and classification systems dealing with both mechanical and electrical components. New initiatives in the quality assurance area such as a graded approach to quality assurance will be explored.

**Advanced Reactors*, June 7, 1983, Washington, DC. The Subcommittee will review the NRC Research Programs on Advanced Reactors for the ACRS Report to the Commission on the FY 1985 and 1986 research budget.

**Safety Research Program*, June 8, 1983, Washington, DC. The Subcommittee will discuss the NRC Safety Research Program and Budget for FY 1985 and 1986, and also a draft ACRS report to the Commission on this matter.

**Generic Items*, June 8, 1983, Washington, DC—CANCELLED.

**Metal Components*, June 14-15, 1983, Oak Ridge, TN. On June 14, the Heavy Section Steel Technology (HSST) research site will be visited and the mid-year review of the HSST program will be discussed. On June 15, the Subcommittee will review the status of the pressurized thermal shock (PTS) program.

**Committee Activities*, June 22, 1983, La Jolla, CA. The Subcommittee will discuss the future scope and direction of ACRS activities.

**Joint Reactor Radiological Effects (RE)/Site Evaluation (SE)/Waste Management (WM)*, Date to be determined (June, Tentative), Washington, DC. The Subcommittees will review the NRC proposed Safety Research Program and Budget for RE/SE/WM for FY 1985 and 1986.

**Metal Components*, Date to be determined (June, Tentative), Washington, DC. The Subcommittee will review the NRC position on generic recommendations for steam generator tube integrity and multiple tube ruptures.

**Metal Components*, Date to be determined (June-July, Tentative), Washington, DC. The Subcommittee will review the NRC position on integrity of steel bolts.

**Systematic Evaluation Program*, July 20 and 21, 1983, Jackson, MI. The Subcommittee will discuss with Consumers Power Company the systematic evaluation program for the Big Rock Point Plant and visit the plant site.

**Midland Plant Unites 1 and 2*, Date to be determined (July, Tentative), Washington, DC. The Subcommittee will review Consumers Power Company's (CPCo) plan for an audit of plant quality at Midland Plant Units 1 and 2. In addition, representatives of CPCo will report on design and construction problems at Midland, their disposition, and the overall effectiveness of the effort to assure appropriate plant quality. The Committee will be briefed on CPCo's Construction Completion Plan.

**Human Factors*, Date to be determined (July-August, Tentative), Washington, DC. The Subcommittee will review the question of what qualifications would be desirable for members of a nuclear power plant operating staff.

**Decay Heat Removal Systems*, August 24, 1983 (Tentative), Washington, DC. The Subcommittee will discuss the Combustion Engineering Owners Group and NRC Staff recommendations concerning the installation of Power Operated Relief Valves on the Combustion Engineering power reactor systems.

**Qualification Program for Safety-Related Equipment*, Date to be determined (August, Tentative), Washington, DC. The Subcommittee will discuss Regulatory Guide 1.89, "Qualification of Electrical Equipment Important to Safety in Nuclear Power Plants."

ACRS Full Committee Meeting

June 9-11, 1983: Items are *tentatively* scheduled

**A. GESSAR-II—Proposed FDA for this standardized nuclear plant.*

**B. Boiling Water Reactors*—Integrity of primary system piping.

**C. Systematic Evaluation Program Phase III*—Briefing by NRC Staff.

**D. Nuclear Reliability Evaluation Program*—Briefing by NRC Staff.

**E. Systems Interaction Program*—Briefing by NRC Staff.

**F. Generic Implications of Salem ATWS Event*—NRC Staff briefing regarding generic implications of Salem circuit breaker malfunction.

**G. Severe Accident Policy*—NRC Staff briefing on status of proposed NRC policy on consideration of severe accidents in nuclear regulation.

**H. Prioritization of Unresolved Generic Issues*—The members will discuss and provide comments to NRC regarding proposed priorities for unresolved generic issues.

**I. Integrity of Primary Coolant System Piping*—The Committee will consider proposed changes in use of the double-ended pipe break as the design basis accident.

**J. Boiling Water Reactors*—The Committee will consider proposed changes in ECCS Evaluation Models for BWRs.

**K. Regionalization of NRC Activities*—The Committee will continue its discussion of plans to regionalize NRC Staff activities.

**L. Reactor Safety Research Program and Budget*—The Committee will prepare its annual report to NRC regarding the NRC safety research program and budget.

**M. Station Blackout*—Discuss proposed NRC plan to resolve USI-44 Station Blackout.

**N. ACRS Subcommittee Reports*—Designated Subcommittees will provide reports of current safety-related activities including designation of plant features important to safety, human factors considerations in nuclear power plant regulation, and quality assurance considerations in the construction of nuclear plants.

July 7-9, 1983—Agenda to be announced.

August 4-6, 1983—Agenda to be announced.

Dated: May 19, 1983.

John C. Hoyle

Advisory Committee Management Officer.

[FR Doc. 83-14052 Filed 5-24-83; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; 277th Meeting; Correction

A session of the ACRS Meeting on May 12 concerning Regionalization of NRC Activities was indicated as closed

VOL 48 ISS 102 MAY 25 1983 UMI

to the public in the May 5, 1983, **Federal Register** Notice (FR 48 20309). This was conducted as an open session with members of the public in attendance.

Dated: May 19, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 83-14063 Filed 5-24-83; 8:45 am]

BILLING CODE 7590-01-M

Application for Licenses to Import/Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following applications for import/export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, N.W., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the receipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 16th day of May at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

EXPORTS/IMPORTS

Name of applicant, date of application, date received, application number	Material type	Material in kilograms		End-use	Country of destination
		Total element	Total isotope		
Braunkohle Transport, May 10, 1983, May 12, 1983, tSNM83011.	4.0 percent enriched uranium.	500,000	20,000	For use in LWR Program	From various countries.
Exxon Nuclear Co., May 6, 1983, May 12, 1983 XSNM02044.	4.12 percent enriched uranium.	76,762	3,163	Two Reloads for Kuosheng II	Taiwan.
Westinghouse Electric, May 11, 1983, May 13, 1983, XSNM01067(01).	3.55 percent enriched uranium.	7,494 Additional	1,336 Additional	Increased material for KRSKO	Yugoslavia
Mitsui & Co., May 11,1983, May 13, 1983, XSNM02045.	3.95 percent enriched uranium.	26,866	816	Reload Fukushima I-3	Japan.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Extension.

2. The title of the information collection: NUREG-0737, TMI Action Plan.

3. The form number if applicable: Not Applicable.

4. How often the collection is required: Nonrecurring.

5. Who will be required or asked to report: Nuclear Power Plant Licensees.

6. An estimate of the number of responses: 70.

7. An estimate of the total number of hours need to complete the requirement or request: 1.04 million hours.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not Applicable.

9. Abstract: NUREG-0737 provides requirements imposed on licensees as a result of TMI accident and requires licensees to report on progress to date. Also requires licenseęs to implement some short-term recommendations based on the experience from the accident at TMI and the official studies and investigation.

Copies of the submittal may be inspected or obtained for a fee from NRC Public Document Room, 1717 H Street N.W., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill (202) 395-7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 19th day of May 1983.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

[FR Doc. 83-14067 Filed 5-24-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-250 and 50-251]

Florida Power and Light Co. (Turkey Point Plant, Unit Nos. 3 and 4); Revised Order Confirming Licensee Commitments on Post-TMI Related Issues

I

Florida Power and Light Company (the licensee) is the holder of Facility Operating License Nos. DPR-31 and DPR-41 which authorize the operation of the Turkey Point Plant, Unit Nos. 3 and 4 (the facilities) at steady-state power level not in excess of 2200 megawatts thermal. The facilities are pressurized water reactors (PWRs) located at the licensee's site in Dade County, Florida.

II

Following the accident at Three Mile Island Unit No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of

nuclear facilities based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82-05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82-10) was also sent to all licensees of operating power reactors for those items that were scheduled for implementation after March 1, 1982. These letters are hereby incorporated by reference. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(f) the following information for items which the staff had proposed for completion on or after July 1, 1981:

(1) For applicable items that have been completed, confirmation of completion and the date of completion, (2) for items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

III

Florida Power and Light Company responded to Generic Letter 82-05 by letters dated April 6, April 27, June 9, July 9, August 12, November 15, 1982, January 28, February 10 and 28, 1983; Florida Power and Light Company responded to Generic Letter 82-10, by letters dated July 2, July 22, and October 12, 1982. In these submittals, Florida Power and Light Company confirmed that some of the items identified in the Generic Letters had been completed and made firm commitments to complete the remainder. On March 14, 1983, the Commission issued an Order confirming the licensee's commitments to implement certain Post-TMI related items set forth in NUREG-0737. By letters dated March 31 and April 11, 1983, Florida Power and Light Company requested that the schedules for completion of Items II.F.1 (2) and (6) be revised. The staff's evaluation of the licensee's delays for the remaining items is provided herein:

II.F.1 (2) and (6) Post-Accident Monitoring

* * * * *

Iodine Particulate Monitoring—The systems have experienced severe problems due to moisture accumulation. New moisture traps were installed in Unit 3 and preoperational tests were performed. Upon successful testing, the Unit 4 system was to be modified. However, the preoperational tests were unsuccessful and the completion dates of March 1, 1983 for Unit 3 and September 15, 1983 for Unit 4 cannot be met.

The licensee is pursuing potential solutions and resolution of the moisture problem with the equipment vendor. To allow for the necessary design changes and procurement of equipment, the licensee has committed to make the required modifications and have the systems operable by May 15, 1984 for both Units 3 and 4. In the interim, the capability exists to obtain grab samples.

* * * * *

(6) Containment Hydrogen Monitor—Both trains in Unit 4 and one train in Unit 3 were completed and preoperational tests performed. One train in Unit 4 failed the preoperational tests. The other train in Unit 3 is a one-inch pipe compared to ⅜" for the other trains. A temperature of 300°F is necessary for successful operation of the systems. Heat tracing appears to be a problem for the failed train in Unit 4 and the train with the larger pipe in Unit 3. In order to achieve the necessary temperature, the inoperable trains will require design modifications and the completion date of March 31, 1983 for the one train in Unit 4 cannot be met.

The licensee has contacted the equipment vendor to seek assistance in resolving the heat tracing problem for the inoperable trains. To allow for design changes and procurement of equipment the licensee has committed to have both remaining trains operable by May 15, 1984. In the interim, each unit has one operable train.

We find, based on the above evaluation that: (1) The licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG-0737 requirements noted; (2) there is good cause for the delays (unexpected design complexity, interface problems, and equipment delays); and (3) as noted above, interim compensatory measures have been provided.

IV

Accordingly, pursuant to Sections 103 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered that the licensee shall:

Implement and maintain items II.F.1(2) and II.F.1(6) described in the Attachments to this Order in the manner described in the licensee's submittals noted in Section III herein no later than the dates in the Attachments.

V

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. A request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy shall also be sent to the Executive Legal Director at the same address.

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order. This Order is effective upon expiration of the time within which a hearing may be requested.

Dated at Bethesda, Maryland, this 11th day of May 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

ATTACHMENT 1.—LICENSEE COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-05

[Turkey Point Units 3 and 4]

Item	Title	NUREG-0737 schedule	Requirement	Licensee's completion schedule (or status)[1]
I.A.3.1	Simulator Exams	Superseded by Generic Ltr. 82-10.	Include simulator exams in licensing examinations	Complete.

VOL 48 ISS 102 MY 25 1983 UMI

ATTACHMENT 1.—LICENSEE COMMITMENTS ON APPLICABLE NUREG-0737 ITEMS FROM GENERIC LETTER 82-05—Continued

[Turkey Point Units 3 and 4]

Item	Title	NUREG-0737 schedule	Requirement	Licensee's completion schedule (or status) [1]
II.B.2	Plant shielding	Jan.1, 1982	Modify facility to provide access to vital areas under accident conditions.	Unit 3—Refueling outage (Sept. 1983); Unit 4—Steam Generator Repair (SGR) Outage (Oct. 1982–June 1983).
II.B.3	Post-accident sampling	do	Install upgrade post-accident sampling capability	Units 3 and 4—Mar. 1984
II.B.4	Training for mitigating core damage.	Oct. 1, 1981	Complete training program	Complete.
II.E.1.2	Aux FW indication and flow indicator.	July 1, 1981	Modify instrumentation to level of safety grade	Unit 3—refig. outage (Sept. 1983); Unit 4—SGR outage (OCt(ct. 1982–June 1983).
II.E.4.2	Containment isolation dependability.	do	Part 5—lower containment pressure setpoint to level compatible with normal operation.	Complete.
II.E.4.2	Containment isolation dependability.	do	Part 7—isolate purge and vent valves on radiation signal.	Do.
II.F.1	Accident monitoring	Jan. 1, 1982	(1) Install noble gas effluent monitors	June 30, 1983.
		do	(2) Provide capability for effluent monitoring of iodine	May 15, 1984.
		do	(3) Install in-containment radiation-level monitor	Complete.
		do	(4) Provide continuous indication of containment pressure.	Do.
		do	(5) Provide continuous indication of containment water level.	Do.
		do	(6) Provide continuous indication of hydrogen concentration in containment.	One train operable for each unit Other trains operable May 15, 1984.

[1] Where completion date refers to a refueling outage (the estimated date when the outage begins), the item will be completed prior to the restart of the facility.

General Public Utilities Nuclear Corp. (Three Mile Island Nuclear Station, Units 1 and 2); Request for Action

Notice is hereby given that by its letter dated March 23, 1983, the Three Mile Island Public Interest Resource Center called for the Nuclear Regulatory Commission to immediately halt all work at the Three Mile Island Nuclear Station, Units 1 and 2, with the exception of maintenance necessary for safety. The relief requested is based upon the allegations of Richard D. Parks, a senior startup engineer at Three Mile Island, Unit 2. The request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations, and accordingly, appropriate action will be taken on the request within a reasonable time. Copies of the request are available for inspection in the Commission's Public Document Room, located at 1717 H Street, N.W., Washington D.C., 20555, and in the local Public Document Room for the Three Mile Island Nuclear Station, located in the Government Publications Section of the State Library of Pennsylvania, Education Building, Commonwealth and Walnut Street, Harrisburg, Pa., 17126.

Dated at Bethesda, Maryland, this 17th day of May 1983.

For the Nuclear Regulatory Commission.
Harold R. Denton,
Director Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

POSTAL RATE COMMISSION

Motion for Waiver of Section 54(f)(2) of the Commission's Rules in the Next Omnibus Rate Case Filing

May 19, 1983.

On May 17, 1983, the United States Postal Service filed its motion for waiver of Rule 54(f)(2) of the Commission's rules of practice, in the next general rate proceeding.

In pertinent part, Rule 54(f)(2) provides that, in formal requests for changes in rates and fees, the Service must set forth its estimate, by function, of total Postal Service accrued costs for a fiscal year "[B]eginning not more than 12 months subsequent to the filing date of the formal request."

In its motion, the Service indicates that this requirement precludes the use of a future test year in a general rate case, other than when the request for a recommended decision is filed within the first few weeks of a fiscal year. The Service concludes that application of the fiscal year requirement may result in new rates not being implemented until a portion of the test year has expired. This would result in the test year not being truly prospective "and hence not representative of the period during which the rates would be in effect."

The Service states that, in order to ensure a representative test year, it desires a test year in its next general rate filing on the basis of a hybrid year consisting of four consecutive postal quarters.

Prior to the last general rate case proceeding before this Commission, the Postal Service filed a similar request for waiver of the fiscal year requirement. In Order No. 324, the Commission granted this request subject to certain conditions. Specifically, the Commission required the Postal Service to provide data which would allow the parties and the Commission to replicate from basic source data, the Postal Service's estimates of costs, revenues, volumes, etc., for the interim as well as the test year periods. Further, Order No. 324 required a reconciliation between actual and estimated results for the prior test year on the basis of the hybrid test year that was used in the most recent omnibus rate case in this instance, Docket No. R80-1.

Finally, in Order No. 324, the Commission indicated that it expected the Postal Service to reapply for a waiver if a rate case was not actually filed within six months of the grant of the waiver request.

The Commission hereby requests all interested parties to file written responses to the Service's motion. These comments may address the feasibility of imposing conditions on granting the waiver similar to those adopted in Docket No. R80-1. All responses and comments should be filed with the Commission on or before June 2, 1983.

By the Commission.
Cyril J. Pittack,
Acting Secretary.

[FR Doc. 83-13955 Filed 5-24-83; 8:45 am]
BILLING CODE 7715-01-M

[Docket No. A83-21; Order No. 500]

Cropper, Kentucky 40015, Jimmie K. Cox, Petitioner; Order of Filing of Appeal

May 20, 1983.

On May 17, 1983, the Commission received an appeal letter from Jimmie K. Cox (hereinafter "Petitioner"), concerning the United States Postal Service's decision to close the Cropper, Kentucky post office. The appeal letter appears to request the review provided for by section 404(b) of the Postal Reorganization Act (39 U.S.C. 404(b)).[1]

The Act requires that the Postal Service provide the affected community with at least 60 days' notice of a proposed post office closing so as to "ensure that such persons will have an opportunity to present their views."[2] The petition makes an appeal that the Cropper post office be kept open.

The Postal Reorganization Act states:

> The Postal Service shall provide a maximum degree of effective and regular postal services to rural areas, communities, and small towns where post offices are not self-sustaining. No small post office shall be closed solely for operating at a deficit, it being the specific intent of the Congress that effective postal service be insured to residents of both urban and rural communities.[3]

Section 404(b)(2)(C) of the Act specifically includes consideration of this goal in determinations by the Postal Service to close post offices. The effect on the community is also a mandatory consideration under section 404(b)(2)(A) of the Act.

The petition appears to set forth the Postal Service action complained of in sufficient detail to warrant further inquiry to determine whether the Postal Service complied with its regulations for the closing of post offices.[4]

Upon preliminary inspection, this case appears to involve the following issues of law:

1. Did the Postal Service properly consider the effect on the community under 39 U.S.C. 404(b)(2)(A)?

2. Whether the Postal Service gave adequate consideration to the effect-on-service factors under 39 U.S.C. 404(b)(2)(C)?

Other issues of law may become apparent when the Commission has had the opportunity to examine further the determination made by the Postal Service. The determination may be found to resolve adequately one or more of the issues involved in the case.

In view of the above, and in the interest of expediting this proceeding under the 120-day decisional deadline imposed by section 404(b)(5), the Postal Service is advised that the Commission reserves the right to request a legal memorandum from the Service on the issues described above and/or any further issues of law disclosed by the detemination made in this case. In the event that the Commission finds such memorandum necessary to explain or clarify the Service's legal position or interpretation on any such issue, it will make the request therefor by order, specifying the issues to be addressed.

When such a request is issued, the memorandum shall be filed within 20 days of the issuance, and a copy of the memorandum shall be served on the Petitioner by the Service.

In briefing the case or in filing any motion to dismiss for want of prosecution, in appropriate circumstances the Service may incorporate by reference all or any portion of a legal memorandum filed pursuant to such an order.

The Act does not contemplate appointment of an Officer of the Commission in section 404(b) cases,[5] and none is being appointed.

The Commission Orders

(A) The appeal letter from Jimmie K. Cox of the Cropper post office be accepted as a petition for review pursuant to section 404(b) of the Act (39 U.S.C. 404(b)).

(B) The Secretary of the Commission shall publish this Notice and Order in the **Federal Register.**

(C) The Postal Service shall file the administrative record in this case on or before June 1, 1983, pursuant to the Commission's rules of practice (39 CFR 3001.113(a)).

By the Commission.
Cyril J. Pittack,
Acting Secretary.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

SUMMARY OF PROPOSAL(S):

(1) Collection title: Employee's Certification.
(2) Form(s) submitted: G–346.
(3) Type of request: New collection.
(4) Frequency of use: On occasion.
(5) Respondents: Individuals or households.
(6) Annual responses: 21,600.
(7) Annual reporting hours: 1,800.
(8) Collection description: Under section 2(c)(3) of the RR Act, spouses must meet the "living with" requirement to obtain a spouse annuity or Medicare benefits. The collection obtains from the employee certification that the requirements are met.

(1) Collection title: Vocational Report.
(2) Form(s) submitted: G–251.
(3) Type of request: Existing collection in use without an OMB control number.
(4) Frequency of use: On occasion.
(5) Respondents: Individuals or households.
(6) Annual responses: 7,850.
(7) Annual reporting hours: 3,990.
(8) Collection description: Section 2 of the RRA provides for payment of disability annuities to qualified employees and widow(er)s. The collection obtains the information needed to determine ability to work.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Milo Sunderhauf (202–395–6880), Office of Management and Budget, Room 3201, New Executive Office Building, Washington, D.C. 20503.

William A. Oczkowski,
Director of Planning and Information Management.

SECURITIES AND EXCHANGE COMMISSION

[70–6845; Rel. No. 22945]

The Columbia Gas System, Inc.; Proposed Issuance and Sale of Fixed Rate Preferred Stock

May 18, 1983.

The Columbia Gas System, Inc. ("Columbia"), 20 Montchanin Road, Wilmington Del. 19807, a registered holding company, has filed with this Commission a post-effective amendment to the declaration in this proceeding pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) thereunder.

By order in this proceeding dated March 22, 1983 (HCAR No. 22886), Columbia was authorized to issue and sell 2,000,000 shares of its Adjustable Rate Cumulative Preferred Stock, Series C, par value $50 per share. Columbia now proposes to issue and sell during 1983 no more than 2,000,000 shares of (1) said adjustable rate preferred stock previously authorized, or (2) its——% Cumulative Preferred Stock, Series——, par value $50 per share ("fixed rate preferred stock"), or (3) any combination of adjustable and fixed rate preferred stock in one or more issues. Columbia will employ alternative competitive bidding procedures with respect to any fixed rate preferred stock in accordance with the Commission's statement of policy set forth in HCAR No. 22623 (September 2, 1982). It is stated that since March 22, 1983, the market for adjustable rate preferred stock has weakened materially and that long-term rates for debt and fixed rate preferred stock have declined.

The amended declaration and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Any interested persons wishing to comment or request a hearing should submit their views in writing by June 8, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as amended or as it may be further amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

[File No. 1–8122]

Grubb & Ellis Co.; Application To Withdraw From Listing and Registration

May 18, 1983.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2–2(d) promulgated thereunder, to withdraw the specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

1. The common stock ($1 par value) of Grubb & Ellis Company ("Company") is listed and registered on the Amex. Pursuant to a Registration Statement on Form 8–A which became effective on April 13, 1983, the Company is also listed and registered on the New York Stock Exchange ("NYSE"). The Company has determined that the direct and indirect costs and expenses do not justify maintaining the dual listing of the common stock on the Amex and the NYSE.

2. This application relates solely to withdrawal of the common stock from listing and registration on the Amex and shall have no effect upon the continued listing of such stock on the NYSE. The Amex has posed no objection to this matter.

Any interested person may, on or before June 9, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[70–6744; Rel No. 22946]

Michigan Power Co.; Proposed Issuance and Sale of Notes to Banks

May 18, 1983.

Michigan Power Company ("Michigan"), P.O. Box 413, Three Rivers, Mich. 49093, a public-utility subsidiary of American Electric Power Company, Inc., a registered holding company, has filed with this Commission a post-effective amendment to the application in this proceedintg pursuant to Section 6(b) of the Public Utility Holding Company Act of 1935 ("Act").

By order in this proceeding noted June 29, 1982 (HCAR No. 22558), Michigan was authorized to issue and sell notes to a group of banks in an aggregate amount not to exceed $5,000,000 outstanding at any one time from time to time prior to July 1, 1983. Michigan now seeks authorization for the extension of this short-term financing program for the period from July 1, 1983, through December 31, 1983. Michigan proposes to issue and sell notes to a group of banks from time to time subsequent to June 30, 1983, and prior to January 1, 1984, as funds may be required, provided that none of such notes to banks shall mature later than June 30, 1984. Each note will mature not more than 270 days after the date of issuance or renewal thereof. Michigan's credit arrangements with "local" banks do not require it to maintain additional balances as compensation for the line of credit made available by the bank, since Michigan maintains deposit balances at such banks for its operational and financial needs in amounts sufficient to satisfy any compensating balances required with respect to borrowings from such banks. Borrowings from these banks will generally bear interest at an annual rate not greater than the bank's prime commercial rate in effect from time to time. If the balances maintained and fees paid by Michigan with the "local" banks were maintained and paid solely to fulfill requirements for borrowing by Michigan, the effective annual interest cost to Michigan, assuming full use of the line of credit, would not exceed 125% of the prime commercial rate in effect from time to time, or not more than 15% on the basis of a prime commercial rate of 12%. Michigan's credit arrangements with larger nationally known banks generally require it to maintain compensating balances of 5% of the line of credit and to pay a fee that is equal to 3/8 of 1% of the size of the line. The combination of 5% compensating balances and the fee is generally equivalent to compensating balances not in excees of 10% of the line of credit made available. Borrowings from these banks will generally bear interest at an annual rate not greater than 108.5% of the bank's prime commercial rate in effect from time to time. The total cost of borrowing from these larger banks will not be greater than the effective rate for borrowings bearing interest at the prime rate with compensating balances equal to 10% of the line credit and 10% of the amount borrowed.

The proceeds of the short-term bank notes will be added to the general funds of Michigan and used to pay its maturing and general obligations, to provide needed working capital, for the purchase of natural gas for Michigan's operations, and for other corporate purposes.

The amended application and any further amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 14, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application, as amended or as it may be further amended, may be granted.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,
Secretary.

BILLING CODE 8010-01-M

[SR–MSE 83–3; Rel. No. 19782]

Midwest Stock Exchange, Inc.; Order Approving Proposed Rule Change

May 18, 1983.

The Midwest Stock Exchange, Inc. ("MSE"), 120 LaSalle Street, Chicago, Illinois submitted on March 14, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b–4 thereunder, to make certain enhancements to MSE's Automated Execution System ("MAX"). These changes primarily involve the automation of certain functions that previously had to be done manually by the specialist. Specifically, under the proposed rule change (1) the specialist would be allowed to designate an order size per issue that he will accept for automatic execution with a minimum of 400 shares (the current system-wide threshold); (2) limit orders would automatically be executed when the primary market price trades through the limit price; (3) the specialist would be allowed to stop an order automatically for the purpose of guaranteeing the order to be filled at the price at the time the stop was indicated or a better price during the trading session; (4) pre-opening orders would be automatically matched by the system, and the specialist will only have to take a position when there is an imbalance after this matching; and (5) the current "hold" period would be decreased from 5 minutes to 2 minutes. In addition, certain other technical changes would be accomplished under the proposed rule change.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19629, (March 24, 1983), and by publication in the **Federal Register** (48 FR 14105, April 1, 1983).[1]

[1] On March 24, 1983, the Commission granted temporary approval on an accelerated basis to this proposed rule, making the MAX enhancements effective through May 20, 1983. Securities Exchange Act Release No. 19629, March 24, 1983, 48 FR 14105, April 1, 1983.

VOL 48 ISS 102 MAY 25 1983 UMI

The Commission finds that the automated order routing and execution enhancements of MAX, by providing a more efficient means of executing orders on the MSE, will facilitate transactions in securities at MSE. The Commission finds, therefore, that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6, and the rules and the regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-13980 Filed 5-24-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-19774; File No. SR-PHLX-83-5]

Self-Regulatory Organization; Proposed Rule Change by Philadelphia Stock Exchange, Inc., Relating to Execution of Orders of 600 or More Shares

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 9, 1983 the Philadelphia Stock Exchange, Inc. ("PHLX") filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PHLX proposes to utilize existing computer facilities to enable member organizations to electronically transmit, directly to the specialist post, orders in eligible issues. Such orders will be executed manually, in accordance with applicable rules of the PHLX, and based upon arrangements worked out by the specialist and the member organization transmitting the order.

The eligible issues shall be those designated by the specialist.

The eligible order size shall be designated by the specialist, with a minimum order size of 600 shares.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the place specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The proposed rule change will provide a more efficient means than is currently available by which PHLX floor members may execute orders, resulting in better service to specialists, member organizations transmitting orders, and customers of such organizations. The proposed rule change will not affect a specialist's responsibilities under PHLX rules. It will only permit the use of PHLX computer facilities to enable member organizations to transmit orders which they may currently transmit through other means.

The proposed rule change is consistent with Section 6(b)(5) of the Act in that it will facilitate transactions in securities and remove impediments to and perfect the mechanism of a free and open market and a national market system, while protecting investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No comments on this proposed rule change have been solicited or received from members.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission has found good cause for approving the proposed rule change prior to the thirtieth day of the date of this publication in that the rules of at least two other regional exchanges (Pacific Stock Exchange, Inc., and Midwest Stock Exchange, Inc.) have for a period of time allowed the type of order routing that the proposed rule change will allow at PHLX.

IV. Solicitation of Comments

Interested Persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C., 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 17, 1983.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-13987 Filed 5-24-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 13255; (812-5476)]

Steinberg Commercial Paper, Inc.; Filing of Application for an Order of Exemption

May 18, 1983.

Notice is hereby given that Steinberg Commercial Paper, Inc. ("Applicant") 165 Broadway, New York, New York 10080, a Delaware corporation, filed an application on March 3, 1983, and an amendment thereto on May 3, 1983, for an order pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of those provisions of the Act relevant to this application.

Applicant states that its sole business will consist of issuing and selling the Applicant's commercial paper notes ("commercial paper notes") and advancing the net proceeds of sales thereof to Steinberg Inc., a corporation organized under the laws of the Province of Quebec, Canada (the "Borrower"). According to the Applicant, substantially all of its assets will consist of promissory notes issued to the Applicant by the Borrower ("loan notes") evidencing the obligations of the Borrower to repay to the Applicant indebtedness of the Borrower arising by reason of advances ("advances") made to the Borrower by the Applicant from the net proceeds of sales of the commercial paper notes or from the proceeds of borrowings ("borrowings") made by the Applicant from the Atlanta Agency ("Agency") of The Bank of Nova Scotia (the "Bank"). Payments of amounts owed by the Applicant in respect of each commercial paper note will be supported by an irrevocable letter of credit to be issued by the Agency in favor of the holder of such commercial paper note.

Applicant states that pursuant to the arrangements discussed below, each maturing commercial paper note will be paid directly to the holder of such commercial paper note with funds obtained through a drawing under the letter of credit attached to the commercial paper note. Applicant proposes to obtain funds for the repayment of disbursements under the letters of credit from the proceeds of sales of additional commercial paper notes from the proceeds of borrowings from the Agency and from the proceeds of repayments of advances by the Borrower.

Applicant represents that none of its outstanding common stock is, or in the future will be, owned by the Bank or by the Borrower, or by any affiliate of either of them. The Applicant further represents that there has been, and undertakes that in the future there will be, no public offering of the Applicant's common stock or of any other equity security of the Applicant.

Applicant states that the Borrower is one of the largest retailing organizations in Canada and, in addition, conducts business in the United States through an indirect wholly-owned subsidiary. Applicant further states that the Borrower, through its various operating groups and subsidiaries, is engaged primarily in retail food merchandising consisting of the operation of supermarkets, grocery stores and convenience markets. According to Applicant, Borrower, together with its subsidiaries, also conducts operations in the fields of real estate development, general merchandise retailing, food manufacturing and food services including the ownership and operation of restaurants. Applicant represents that it will receive assurance from the Borrower that the Borrower either is not an investment company within the meaning of subsection 3(a) of the Act or is deemed to be excluded from the definition of an investment company in the Act by virtue of the provisions of either subsection 3(b) or subsection 3(c) of the Act.

Applicant states that the Bank is the fourth largest bank in Canada as ranked by deposits at October 31, 1982, having total assets at that date of $53,630,484,000 and total deposits of $47,285,161,000 (per its audited financial statements). Applicant further states that the Bank provides a wide range of financial services to businesses, governments, financial institutions and individuals.

According to the application, the Agency is licensed under and regulated by the Financial Institutions Code of Georgia as an international banking corporation, and therefore may not transact any banking business within Georgia unless it has complied with certain statutory requirements, such as a requirement that it submit to the Georgia Department of Banking and Finance (the "Department") an application for a license which includes, among other things, a statement of the corporation's financial condition and a statement of the actual value of is assets, which must exceed its liabilities by at least $50,000,000 (U.S.). Applicant states that the Department may grant, once the necessary findings have been made, a license to engage in the banking business within the State of Georgia for a period not to exceed one year, and such license is renewable for periods of similar duration if the Department finds "that the international banking corporation is in a safe and satisfactory condition, that it has complied with requirements of law with respect to the international bank agency, and that such renewal of the license is proper and has been duly authorized by proper corporate action." Applicant further states that each corporation is subject to periodic examination by the Department, and is extensively regulated under the Georgia Code which governs significant aspects of the conduct of a banking business.

The Applicant proposes to enter into an arrangement with the Borrower pursuant to which the Borrower may request the Applicant to make advances to the Borrower. To obtain funds to make the advances, the Applicant proposes to issue and sell its short-term negotiable promissory notes which it asserts will be exempt from the registration requirements of the Securities Act of 1933 (the "Securities Act") by virtue of Section 3(a)(2) thereof, or to make borrowings from the Agency. Applicant states that the commercial paper notes will be sold in minimum denominations of $100,000 (U.S.), will have a maturity not exceeding 270 days, and will neither be payable on demand prior to maturity nor eligible for any extension, renewal, or automatic "rollover" at the option of either the holder or the Applicant. The Applicant undertakes not to market any commercial paper notes prior to receiving an opinion of counsel to the effect that the proposed offering of commercial paper is exempt from the registration requirements of the Securities Act by virtue of Section 3(a)(2). The Applicant does not request Commission review or approval of counsel's opinion regarding the availability of an exemption for the commercial paper notes under Section 3(a)(2) of the Securities Act.

According to Applicant, the commercial paper notes will be offered publicly, through one or more major dealers, only to the types of sophisticated and largely institutional investors that ordinarily participate in the commercial paper market. Applicant states that while an announcement of the establishment of the commercial paper facility may be made as a matter of record, the offering will not be advertised. The Applicant undertakes to insure that each dealer in the commercial paper notes will furnish to each offeree, memoranda describing the businesses of the Bank, the Applicant and the Borrower and providing the most recent annual financial information for the Bank and the Borrower, together with a description of the material differences between the Canadian accounting principles utilized in the preparation of the financial statements of the Bank and generally accepted accounting principles as applied in the United States. Applicant represents that the memoranda prepared by each dealer will be updated as promptly as practicable to reflect material adverse changes in the financial status of the Applicant, the Borrower or the Bank and will be at least as comprehensive as memoranda customarily used in offering commercial paper in the United States. Applicant consents to the inclusion, in any order granting this application, of an express condition that it comply with

VOL 48 ISS 102 MAY 25 1983 UMI

the undertakings in the last two sentences of this paragraph.

Applicant states that it will select a major commercial bank to act as issuing and paying agent for the commercial paper notes (the "Depositary"). Applicant further states that the Agency will consent to the appointment of the Depository.

According to the application, each commercial paper note will have a letter of credit attached thereto in the full amount payable under the commercial paper note. Applicant states that presentation by the holder of a commercial paper note to the Depositary for payment at maturity shall constitute a drawing under the attached letter of credit. Applicant further states that the Agency will be required to provide funds to the Depositary in an amount sufficient to satisfy the Agency's obligations under the letter of credit.

Applicant represents that, prior to their issuance, the commercial paper notes will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization and counsel to the Applicant shall have certified that the rating was received. However, no such rating shall be required to be obtained with respect to an issue of the Applicant's debt securities other than the commercial paper notes if, in the opinion of counsel, an exemption is available for the issue pursuant to subsection 4(2) of the Securities Act.

Applicant represents that, prior to the issuance of any commercial paper notes, the Bank will have appointed an agent to accept service of process in the City of New York, and will have expressly consented to the nonexclusive jurisdiction of the courts of the State of New York and the federal courts of the United States located in the City of New York, with respect to any action which may be brought against it in connection with the transactions described herein. Such appointment of an agent to accept service of process and such consent to jurisdiction shall be irrevocable until all amounts due and to become due in respect of the commercial paper notes have been paid.

Applicant states that it believes, on the basis of estimates provided by the Borrower, that in the first year in which commercial paper notes are issued, the face amount of commercial paper notes outstanding will not exceed $125,000,000 (U.S.).

Applicant states that it will enter into a credit agreement ("credit agreement") with the Borrower pursuant to which the Applicant will agree to make advances to the Borrower solely from the net proceeds of the sale of the commercial paper notes or from the net proceeds of borrowings from the Agency. Applicant further states that any borrowings will be made by the Applicant pursuant to the terms of a commercial paper support agreement between the Applicant and the Agency (the "commercial paper support agreement"). According to Applicant, the aggregate amount of commercial paper notes issued to obtain funds to make advances to the Borrower and to repay disbursements under the letters of credit will not be permitted to exceed a designated amount specified in the commercial paper support agreement.

Applicant states that it will advance to the Borrower all of the proceeds from sales of the commercial paper notes (after utilization of such amount of the proceeds as shall be required to reimburse the Agency for any disbursements made under the letters of credit and any borrowings made by the Applicant from the Agency and after deduction from the proceeds of amounts necessary to pay certain of the Applicant's liabilities in connection with the transaction, including a commission payable to the Applicant's commercial paper dealers on account of their services in connection with the purchase and sale of the commercial paper notes). Applicant further states that the Borrower will use the proceeds of the Advances for its general corporate purposes.

According to the application, the Borrower will agree to repay to the Applicant on the maturity date of each Advance made to the Borrower the principal amount thereof, together with interest thereon payable from time to time in an amount sufficient to enable the Applicant to meet its obligations to the Agency for interest payable under the commercial paper support agreement and to satisfy its other liabilities in connection with the transactions.

Applicant states that each advance made to the Borrower by the Applicant pursuant to the credit agreement will be evidenced by a loan note issued by the Borrower, and all of the advances will be made during one of two funding periods designated in the credit agreement. Applicant further states that each advance made during a particular funding period will mature on the date which is twenty-one business days after the fifth anniversary of the last day of such funding period. According to the application, other than in the event of a default under the credit agreement, no mandatory prepayment of any advance will be required, although the Borrower may elect to prepay an advance in whole or in part.

Applicant states that it will be required, pursuant to a pledge and security agreement, to assign and pledge to the Agency, for its own benefit and as collateral agent for the holders of the commercial paper notes, all of the Applicant's right, title and interest in the repayment obligations of the Borrower in respect of the advances.

Section 6(c) of the Act provides, in part, that the Commission, upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the requested relief, Applicant states that approval of the application is necessary or appropriate in the public interest. Applicant states that, as a company which is not an investment company within the meaning of subsection 3(a) of the Act or is deemed excluded from the definition of an investment company, the Borrower would be permitted to directly issue and sell debt securities in the United States without registering under the Act as an investment company. Accordingly, Applicant states that while it may technically be deemed to an investment company under Section 3(a) of the Act, its operations would be conducted only in order to provide funds to an entity which could itself directly issue and sell debt securities without registering under the Act as an investment company. According to the application, although the Borrower would itself be permitted to directly issue commercial paper in public offerings in the United States without compliance with the Act's registration provisions, under current Canadian law interest due on commercial paper issued by the Borrower in the United States would be subject to a fifteen percent Canadian non-residential withholding tax, and, accordingly, would not be competitive with commercial paper offered in the United States by other issuers. Applicant states that the Applicant, the Borrower and the Bank believe that the Borrower's financing objectives can, however, be fulfilled by the establishment of a program whereby a company, such as the Applicant, issues commercial paper and advances the proceeds to the Borrower. Applicant further states that such a program would enable the Borrower to expeditiously gain access to the attractive rates available to the commercial paper market and provide the Borrower with an efficient and reliable source of United States dollars without the imposition of the Canadian non-residential withholding tax of fifteen percent, and that prior to the commencement of the program, both Canadian counsel to the Borrower and the Canadian tax authorities will have confirmed the availability of an exemption from the Canadian non-resident withholding tax for a financing facility of the type to be established by the Applicant.

Applicant submits that approval of the application would be consistent with the protection of investors. Applicant asserts that its limited business purpose and its obligations to invest only in the loan notes, none of which will be an obligation of an investment company, as well as the irrevocable support of the commercial paper notes by the letters of credit to be issued by the Agency, obviate the need for the regulatory safeguards provided by the Act. Applicant further asserts that the holders of the Applicant's commercial paper notes do not require the protections accorded investors under the Act. Applicant states that repayment of the commercial paper notes will be supported by the letters of credit issued by the Agency, and that such letters of credit will be obligations of the Bank whose commercial paper notes are currently rated in the highest investment category by Moody's Investors Service, Inc., and whose letters of credit in support of commercial paper are currently rated in the highest investment category by Standard & Poor's Corporation. Applicant asserts that the characteristics of the commercial paper notes themselves also limit the possible exposure of investors.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 22-12381]

Citicorp; Application and Opportunity for Hearing

May 19, 1983.

Notice is hereby given that Citicorp (the "Applicant") has filed an application under clause (ii) of Section 310(b) (1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeship of United States Trust Company of New York (the "Trust company") under four existing indentures, and a Pooling and Servicing Agreement under which certificates evidencing interests in a pool of mortgage loans have been issued is not so likely to involve a material conflict of interest as to make it necessay in the public interest or for the protection of investors to disqualify the Trust Company from acting as Trustee under any of such indentures or Agreements.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under either of such indentures.

The Applicant alleges that:

(1) The Trust Company currently is acting as Trustee under four indentures in which Applicant is the obligor. The Indenture, dated as of February 15, 1972 involved the issuance of Floating Rate Notes due 1989, the indenture dated as of March 15, 1977 involved the issuance of various series of unsecured and unsubordinated Notes, the Indenture dates as of Auguest 25, 1977 involved the issuance of Rising-Rate Notes, Series A and the Indenture dated of April 21, 1980 involved the issuance of various series of unsecured and unsubordinated Notes. Said Indentures were filed as, respectively, Exhibits 4(a), 2(b), 2(b) and 2(a) to Applicants' respective Registration Statements Nos. 2-42915, 2-58355, 2-59396 and 2-64862 filed under the Securities Act of 1933, and have been qualified under the Trust Indenture Act of 1939. Said four Indentures issued pursuant to the Indentures are hereinafter called the Notes.

(2) The Applicant is not in default in any respect under the Indentures or under any other existing indenture.

(3) On January 31, 1983, the Trust Company entered into a Pooling and Servicing Agreement dated as of January 1, 1983 (the "1983 Agreement") with Citibank, N.A., Originator and Servicer, and Citicorp Homeowners, Inc., under which there were issued on January 31, 1983 Mortgage Pass-Through Certificates, Series 1983-A, 12.70% Pass-Through Rate (the "Series 1983-A Certificates") which evidence fractional undivided interests in a pool of conventional single-family mortgage loans (the "1983 Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balances aggregating $28,013,816.21 at the close of business on January 1, 1983, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1983-A Certificates. On January 31, 1983, Applicant, the parent of Citibank, N.A. entered into a Guaranty of even date (the "1983 Guaranty") pursuant to which Applicant agreed, for the benefit of the holders of the Series 1983-A Certificates, to be liable for 8% of the initial aggregate principal balance of the 1983 Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1983 Guaranty. The 1983 Guaranty states that Applicants obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1983 Guaranty would

VOL 48 ISS 102 MAY 25 1983 UMI

rank on a parity with the obligations evidenced by the Notes. The Series 1983–A Certificates were registered under the Securities Act of 1933 (Registration Statement on Form S–11 and S–3, File No. 2–80415) as part of a delayed or continuous offering of $150,000,000 aggregate amount of Mortgage Pass-Through Certificates (the "Certificates") pursuant to Rule 415 under the Act. The Series 1983–A Certificates were offered by a Prospectus Supplement dated January 31, 1983, supplemental to a Prospectus dated November 15, 1982. The 1983 Agreement has not been qualified under the Trust Indenture Act of 1939.

(4) The obligations of Applicant under the Indentures and the 1983 Guaranty are wholly unsecured, are unsubordinated and rank *pari passu*. Any differences that exist between the provisions of the Indentures and the 1983 Guaranty are unlikely to cause any conflict of interest among the trusteeships of the Trust Company under the Indentures and the 1983 Agreement.

(5) Applicant has waived notice of hearing and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the Office of the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C.

Notice is further given that any interested person may, not later than June 13, 1983, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–19792]

Advisory Committee on Tender Offers; Meeting

AGENCY: Securities and Exchange Commission.

ACTION: Notice of meeting of the Securities and Exchange Commission Advisory Committee on Tender Offers.

SUMMARY: This is to give notice that the Securities and Exchange Commission Advisory Committee on Tender Offers will conduct a meeting on June 10, 1983 in Room 1C30 at the Commission's main offices, 450 Fifth Street, N.W., Washington, D.C., beginning at 10:00 a.m. The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT: David Martin, Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549; (202)272–2573.

SUPPLEMENTARY INFORMATION: In accordance with section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, 10(a), the Securities and Exchange Commission Advisory Committee on Tender Offers [1] gives notice that it will conduct a meeting on June 10, 1983 in Room 1C30 at the Commission's main offices, 450 Fifth Street, N.W., Washington, D.C., beginning at 10:00 a.m. The purpose and agenda of the meeting will be to consider proposals developed for the Committee by its working groups and included in working group reports presented to the Committee at previous meetings. It is anticipated that as a result of the June 10 meeting the Committee will arrive at tentative conclusions for its final report. The meeting will be the fifth meeting of the Advisory Committee and will be open to the public.

Shirley E. Hollis,

Assistant Secretary.

May 20, 1983.

Cincinnati Stock Exchange; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 19, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stocks:

Dataproducts Corporation
Common Stock, $.10 Par Value (File No. 7–6653)
Houston Oil Trust
Units of Beneficial Interest (File No. 7–6654)
Resorts International, Inc.
Class A, $1 Par Value (File No. 7–6655)
Tech-Sym Corporation
Common Stock, $.10 Par Value (File No. 7–6656)
Texas Air Corporation
Common Stock, $.01 Par Value (File No. 7–6657)
Massey-Ferguson Ltd.
Common Stock, No Par Value (File No. 7–6659)
Stevens (J.P.) Company, Inc.
Common Stock, $7.50 Par Value (File No. 7–6660)
Unocal Corporation (DE)
Common Stock, $2½ Par Value (File No. 7–6661)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before June 10, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulations, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 22948; (70–5862) (70–6322)]

Ohio Power Co.; Proposed Provision of Services by Electric Utility Subsidiary to Associated Companies and Nonaffiliates

May 19, 1983.

Ohio Power Company ("OPCo"), 301 Cleveland Avenue, S.W., Canton, Ohio 44702, an electric utility subsidiary of American Electric Power Company, Inc., ("AEP"), a registered holding company, has filed with this Commission post-effective amendments to applications-declarations previously filed and amended pursuant to Section 13 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 86, 87, 90 and 91 promulgated thereunder.

By prior order dated June 25, 1976 (HCAR No. 19594), OPCo was authorized to acquire under long-term lease and to operate a rail-to-river coal transfer facility, known as the Cook Coal Terminal ("Terminal"), located near Metropolis, Illinois. OPCo uses the Terminal to transfer low-sulfur coal arriving by unit train to river barges for delivery to its steam electric generating plants along the Ohio River. OPCo has also been authorized to acquire and operate railroad car maintenance facilities at the Terminal (HCAR No. 21173, August 3, 1979 and HCAR No. 21886, January 16, 1981). This would permit OPCo to provide maintenance and repair services to the fleet of railroad hopper cars acquired by it and other operating companies in the AEP System for the transport of coal to the Terminal.

By post-effective amendments, OPCo now seeks authority to provide the following services at the Terminal: (1) A coal transloading service to associated companies within the AEP System (with respect to which jurisdiction was expressly reserved in the aforementioned order of June 25, 1976), and, during times of nonutilization by OPCo and its associated companies, to other nonaffiliated companies, and (2) a railroad car maintenance and repair service to associated companies within the AEP System.

In support of the first proposal, OPCo states that the Terminal's transloading capacity of 12 to 15 million tons annually is in excess of that required for the delivery of coal to its existing and future generating stations. Sufficient excess capacity exists to provide the service while ensuring that OPCo's operating requirements are also satisfied. The service, and charges therefor, would be made in accordance with a proposed Coal Transfer Agreement ("Transfer Agreement"), which would be executed with each associated company using the Terminal. OPCo will be required to perform the transloading and incidental services, at cost, in accordance with Rules 90 and 91 under the Act.

The transfer fee charged by OPCo would be limited to the cost of providing the service, determined on the basis of the costs of operation and maintenance of the Terminal, associated lease payments, depreciation and overhead expenses, plus a provision for the cost of capital provided by OPCo. As of December 31, 1982, capital invested by OPCo in the Terminal (fixed investments and working capital commitments) amounted to approximately $4.1 million. OPCo proposes to apply a cost of capital rate of 12.6% annually which represents an after-tax, weighted rate on the combined, imputed investment components of long-term debt, preferred stock and common equity. The common equity component of the overall rate of return on OPCo's investment would be subject to annual adjustment in each succeeding year based on changes in the rate of return on common equity allowed by the Federal Energy Regulatory Commission ("FERC") in the last wholesale rate proceeding involving OPCo, or, in the absence of such a proceeding, based on changes in the return allowed OPCo by the Public Utilitites Commission of Ohio in its most recent retail electric rate proceeding.

Under the Transfer Agreement, service costs would be allocated to a particular client (including OPCo) on the basis of the percentage of utilization of the Terminal, measured by annual tons transferred. Billings will be made monthly. Within 10 days of receipt of an invoice, each client will pay OPCo a standard fee for each ton of coal transferred for such client during the billing period. The standard fee will be estimated based on operating experience gained in prior periods adjusted to reflect expected changes in material operating factors. Within 45 days after the end of each calendar year, OPCo will compute an adjusted fee for each ton of coal transferred during the preceding year by taking (i) OPCo's total actual costs allocable to the Terminal for the calendar year, subtracting therefrom (ii) the total revenues earned in the corresponding period from contracts with nonaffiliated parties, and dividing the difference between (i) and (ii) by the total number of tons of coal tranferred during the period for AEP System companies, including itself. If the adjusted fee multiplied by the number of tons of coal transferred for any client differs from the total standard fees paid or accrued by such client during the year, the difference will be charged or credited as appropriate.

In determining the basis upon which to bill for the coal transloading service, OPCo considered two cost accounting systems: (1) A process cost system using a transfer fee, as heretofore described, and (2) a work order system for allocating costs directly to each job for each client. It is stated that the latter is feasible and useful when allocating costs in situations where personal services are being rendered to a particular client, or significant direct material costs, which can be easily identified and classified, are involved. The process costs system is generally appropriate when desaling with a single, reptitive process with fungible items, such as the transloading of coal. It is stated that no major expenditures of direct materials need be allocated on a client-by-client basis during the transloading of coal and that a work

VOL 48 ISS 102 MY 25 1983 UMI

order system would not be appropriately applied to this service.

Based on current and projected use of the Terminal, it is represented that there will be sufficient capacity available to permit its use to transfer coal under contract with nonaffiliated parties for a number of years. It is intended that any such service would be provided at the highest practicable rate, giving consideration to the competitive market applicable to such services. The proposed Transfer Agreement specifies that any revenues collected from nonaffiliated parties for such use of the Terminal will be applied as a reduction to the total cost of operating the Terminal and, thereby, will reduce the transfer fee which would be charged to FERC Account 151, Fuel Stock, by OPCo and all associated clients.

With reference to the rail car maintenance service, it has been stated that it would be economical and advantageous for all AEP System railroad hopper cars arriving at the Terminal to receive routine preventive and other maintenance. OPCo proposes to execute a Rail Car Maintenance Agreement ("Maintenance Agreement") with any interested associated company whereby the fee charged for such service would be limited to the cost of providing such service, in accordance with Rules 90 and 91 under the Act, determined on the basis of the expenses of operation and maintenance of the rail car repair facilities, overhead expenses, plus a provision for cost of capital on OPCo's associated investment. As of December 31, 1982, capital invested by OPCo in the maintenance facilities amounted to approximately $1.1 million. OPC proposes to apply a cost of capital rate of 11.96% annually which represents an after-tax, weighted rate on the combined, imputed investment components of long-term debt, preferred stock and common equity. The common equality component of the overall rate of return would be subject to annual adjustment in the same manner as set forth previously with reference to the transfer fee for the transloading service.

Under the cost accounting system currently in use, the costs of operation of the rail car maintenance facility (materials, direct labor and overheads) are accumulated using a job order costing system whereby costs are either directly assigned or allocated to each rail car repaired. A repair card (i.e., a work order) is completed for each rail car serviced. The cost of materials used are assigned directly to each rail car repaired (valued using that month's average price). Direct labor and overhead costs are allocated to each repair job based on the proportion of hours worked on each job to the total number of hours worked on all jobs.

Billings to associated companies will be based on monthly cost accumulations and will include the cost of all direct materials used in maintaining or repairing each rail car owned by an associated company, following OPCo's standard inventory valuation procedures applied on a consistent basis, and an allocation of all other costs to specific jobs and rail cars based on the ratio of the standard labor hours for a completed job to the total of such hours for all jobs completed during the monthly billing period.

The applications-declarations, as amended by said post-effective amendments and any amendments thereto, are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 15, 1982, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the applications-declarations, as amended or as they may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 01/01-0299]

Boston Hambro Capital Co.; Application for Approval of Conflict of Interest Transaction

Notice is hereby given that Boston Hambro Capital Company, One Boston Place, Boston, Massachusetts 02106, a Federal Licensee under the Small Business Investment Act of 1958, as amended ("Act"), (15 U.S.C. 661 *et seq.*), has filed an application with the Small Business Administration, (SBA) pursuant to Section 312 of the Act and covered by Section 107.1004(b)(1) of the Regulations governing small business investiment companies ("SBICs/Licensees") (15 FR 107.1004 (1982)), for approval of a conflict of interest transaction falling within the scope of the above sections of the Act and Regulations.

The Licensee proposes to purchase 41,667 shares of preferred stock of Telematics International, Inc., 8741 N.W. 57th St., Tamarac, Florida 33321 ("Telematics"). Telematics is considered to be an Associate of the Licensee under § 107.3(f) of the Regulations because certain persons who are Associates of the Licensee pursuant to § 107.3(d), own over 10 percent of the equity of Telematics.

Namely, Hambro International Venture Fund and Hambro International Venture Fund Off-Shore who are associates of the Corporate General Partner. Messrs. Edwin A. Goodman, Robert S. Sherman, Anders Brag, Richard G. Sampson and Richard D'Amore are officers of the General Partner.

Notice is hereby given that any person may, not later than ten (10) days from the date of this notice, submit written comments on the proposed transaction to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in the **Federal Register** and a newspaper of general circulation in Tamarac, Florida.

Visa Office: Change of Address; Correction Notice

The notice concerning the Change of Address of the Visa Office which appeared in 48 FR 23014, May 23, 1983 is modified as follows:

The Visa Office move has been postponed to June 4th and 5th. There will be no interruption in normal service to the public and regular telephone numbers should be used. The telephone numbers given in the Notice of May 23, 1983 should not be used.

Dated: May 23, 1983.

Diego C. Asencio,

Assistant Secretary for Consular Affairs.

Fish—Tariff-Rate Quota; Tariff-Rate Quota for the Calendar Year 1983, on Fish Dutiable Under Item 110.50, Tariff Schedules of the United States (TSUS)

AGENCY: Customs Service, Treasury.

ACTION: Announcement of the quota quantity on certain fish for calendar year 1983.

SUMMARY: The tariff-rate quota for fish pursuant to item 110.50, TSUS, for the 1983 calendar year is 49,488,851 pounds.

EFFECTIVE DATES: The 1983 tariff-rate quota is applicable to fish described in item 110.50. TSUS, which are entered, or withdrawn from warehouse, for consumption during calendar year 1983.

FOR FURTHER INFORMATION CONTACT: William D. Slyne, Chief, Special Operations Branch, Duty Assessment Division, U.S. Customs Service, Washington, D.C. 20229 (202-566-2957).

SUPPLEMENTARY INFORMATION: This tariff-rate quota for fish is equal to 15 percent of the average aggregate apparent annual consumption in the United States of fish, fresh, chilled or frozen, fillets, steaks, and sticks, of cod, cusk, haddock, hake, pollock, and rosefish, for the 3 preceding years, as provided for in headnote 1, part 3A, Schedule 1, and item 110.50, TSUS.

It has been determined that the average aggregate consumption for calendar year 1980 through 1982 was 329,925,674 pounds. Therefore, the quota quantity of fish, item 110.50, TSUS, for calendar year 1983 is 49,488,851 pounds.

Dated: May 19, 1983.

Edward F. Kwas,

Acting Commissioner of Customs.

BILLING CODE 4820-02-M

Receipt of Domestic Interested Party Petition Concerning Tariff Classification of Polypropylene Ropes; Correction

AGENCY: Customs Service, Treasury.

ACTION: Notice of receipt of domestic interested party petition; correction.

SUMMARY: This document corrects an error in the notice of receipt of a domestic interested party requesting the reclassification of certain imported polypropylene ropes which was published in the **Federal Register** on April 29, 1983 (48 FR 19510).

In the notice, the words "strips and" were inadvertently omitted in several places.

In order to avoid any possible confusion as to the extent of the subject petition, it has been determined advisable to clearly provide that the petition is concerned with the classification of any cordage made from strips over one inch in width. It is not limited solely to plexiform filaments. Accordingly, this document amends the notice by:

1. Revising the beginning of the second sentence of the first paragraph under the heading "Background" to read as follows: "The petitioner contends that certain imported polypropylene ropes made from strips over one inch in width and 'plexiform filaments' derived from strips over one inch in width, which are currently classified . . ."

2. Adding the words "strips and" before the words "plexiform filaments" in the following paragraphs under the heading "Background".

a. The last sentence in the second paragraph.

b. In both the first and second sentences of the fifth paragraph.

c. In all three sentences of the seventh paragraph.

d. The first sentence in the eighth paragraph.

3. Extending the comment period due to the corrections to provide the public with an additional 30 days in which to submit written comments to Customs regarding the document. Thus, the new deadline for submitting written comments is July 27, 1983.

EFFECTIVE DATE: May 25, 1983.

FOR FURTHER INFORMATION CONTACT: Phil Robins, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (566-8181).

Dated: May 20, 1983.

Recordation of Trade Name; Chams De Baron Ltd.

AGENCY: U.S. Customs Service, Department of the Treasury.

VOL
48
ISS
102
MAY
25
1983
UMI

ACTION: Notice of recordation.

SUMMARY: On March 10, 1983, a notice of application for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "CHAMS DE BARON LTD." was published in the **Federal Register** (48 FR 10188–10189). The notice advised that before final action on the application, consideration would be given to revelant data, views, or arguments submitted in opposition to the recordation and received not later than May 10, 1983. No responses were received in opposition to the notice.

Accordingly, as provided in section 133.14, Customs Regulations (19 CFR 133.14), the name "CHAMS DE BARON LTD." is recorded as the trade name used by Chams De Baron Ltd., a corporation organized under the laws of the State of New York, located at 1350 Broadway, New York, New York 10018. The trade name is used in connection with the following merchandise which is manufactured in Taiwan, Hong Kong, South Korea and the Philippines: men's and women's wearing apparel, including shirts, tops, sweaters, jackets and pants.

DATE: May 25, 1983.

Income Tax Treaty Negotiations With Belgium and Tunisia To Be Resumed

The Treasury Department announced that income tax treaty negotiations with Belgium and Tunisia will be resumed in June. The negotiations with Tunisia will take place in Tunis during the week or June 5, 1983, and the negotiations with Belgium will take place in Brussels during the week of June 13. Since the last negotiations took place more than two years ago in each case, the Treasury Department invites interested persons to submit additional comments at this time on issues concerning Belgium and/or Tunisian income taxes imposed on income derived in those countries by U.S. taxpayers and concerning the U.S. income tax imposed on income derived in the United States by residents of those countries. Comments should be submitted in writing to Alan W. Granwell, International Tax Counsel, U.S. Treasury, room 3064, Washington, D.C. 20220.

Dated: May 20, 1983.

UNITED STATES INFORMATION AGENCY

Advisory Commission on Public Diplomacy; Meeting

The United States Advisory Commission on Public Diplomacy will conduct a closed meeting in Room 800, 400 C Street, S.W., to discuss matters relating to the resignation of Mr. Gilbert A. Robinson as Deputy Director of the U.S. Information Agency. USIA Director Charles Z. Wick will meet with the Commission at 11:00 a.m., and Mr. John W. Shirley, Office of the Deputy Director, will meet with the Commission at 12:00 p.m., on May 25, 1983.

The emergency meeting is being held on short notice because of the unexpected resignation of Mr. Robinson and previous plans to travel abroad made by members of the Commission.

The meeting of the Commission will relate to the internal personnel rules and practices of the Agency. The information discussed, if disclosed, could result in the invasion of personal privacy and could significantly frustrate the implementation of proposed Agency actions (5 U.S.C. 552b(c) (2), (6), and 9(B)).

Dated: May 19, 1983.

Part II

Federal Reserve System

Bank Holding Companies and Change in Bank Control; Proposed Revision of Regulation Y; Proposed Rule

VOL 48 ISS 102 MAY 25 1983 UMI

FEDERAL RESERVE SYSTEM

12 CFR Part 225

[Docket No. R-0470]

Bank Holding Companies and Change in Bank Control; Proposed Revision of Regulation Y

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of proposed rulemaking.

SUMMARY: As part of its program to improve and simplify its regulations, the Board is proposing a revision of Regulation Y, its regulation implementing the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1841 *et seq.*) and the Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)). The Bank Holding Company Act requires prior Board approval for a company to become a bank holding company or for a bank holding company to acquire more than five percent of the shares of a bank or a bank holding company. The Act also regulates the nonbanking activities of bank holding companies and of foreign banking organizations that control U.S. banks or have U.S. offices. The Change in Bank Control Act requires generally that persons and certain companies give notice to the Board prior to acquiring shares representing control of a bank holding company or state member bank.

The proposed revision will reduce the number of required applications for nonbanking activities, simplify the procedures for filing such applications, and expedite the processing of all applications. With respect to required applications or notices, the regulation clarifies and describes the transactions that are covered and those that are exempt, and the factors considered by the Board in acting on the application or notice. In addition, the Board is adopting a new internal procedure for the processing of applications that will result in a shorter period, 30 to 60 days instead of 90 days, for the processing of most bank and nonbank applications. The internal changes are being made independently of the proposed revision of Regulation Y and will be adopted as soon as they can be implemented.

DATE: All comments should be received by the Board by July 18, 1983.

ADDRESS: All comments, which should refer to Docket No. R-0470, should be mailed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or delivered to Room B-2223 20th and Constitution Avenue, NW., Washington, D.C., between 8:45 a.m. and 5:15 p.m. weekdays. Comments may be inspected in Room B-1122 between 8:45 a.m. and 5:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: J. Virgil Mattingly, Associate General Counsel, Legal Division (202/452-3430); Bronwen Mason Chaiffetz, Senior Counsel, Legal Division (202/452-3564); Carl V. Howard, Senior Counsel, Legal Division (202/452-3786); David Kulig, Senior Counsel, Regulatory Improvement Project (202/452-2347); Lily T. Pilgrim, Attorney, Regulatory Improvement Project (202/452-2421); Don E. Kline, Associate Director, Division of Banking Supervision and Regulation (202/452-3421); or Sidney M. Sussan, Assistant Director, Division of Banking Supervision and Regulation (202/452-2638).

SUPPLEMENTARY INFORMATION: The Bank Holding Company Act of 1956, as amended ("BHC Act"), governs the acquisition of control of banks by companies and regulates the nonbanking activities of bank holding companies or covered foreign banking organizations. It was enacted to prevent the undue concentration of banking resources and to separate banking and commerce. Section 5(b) of the BHC Act (12 U.S.C. 1844(b)) authorizes the Board to adopt regulations to effectuate the purposes of the BHC Act and to prevent evasion of its provisions. The Change in Bank Control Act of 1978 ("Bank Control Act") imposes a 60-day prior notice requirement on persons seeking to acquire control of a bank holding company or an insured state-chartered bank that is a member of the Federal Reserve System ("state member bank").

I. BACKGROUND AND SUMMARY

In January 1979, the Board established a Regulatory Improvement Project and adopted procedures to improve the quality of its regulations. The Board's program calls for a thorough, periodic review of each of its existing regulations (Statement of Policy Regarding Expanded Rulemaking Procedures, 44 FR 3957 (1979)). The proposed revision of Regulation Y was conducted under this program and pursuant to the Financial Regulation Simplification Act of 1980 (12 U.S.C. 3521). In accordance with the Board's policy statement and the Simplification Act, the review focused on easing regulatory burden and clarifying and simplifying the regulation consistent with the terms and purposes of the BHC Act. In an effort to improve overall understanding of the regulation, the proposal specifies those transactions that do and those that do not require prior Board approval under the Act.

The Board carefully reviewed the procedures for handling applications, particularly those for nonbanking activities. As reflected in the revised regulation, the Board proposes reducing the number of required applications for nonbanking activities and simplifying the procedures for filing such applications. Over the past several years, the Board has consistently achieved its goal to complete the processing of 90 percent of all applications it receives within 90 days of acceptance of the applications. In addition, the Board had delegated to the Reserve Banks authority to act on more than 90 percent of BHC Act applications, a procedure which has shortened the time for decision on most applications to 45 days. In connection with its review of procedures for handling BHC Act applications, the Board is considering a new internal processing schedule.

The new schedule, which is embodied in the proposed revision, reduces the time for processing most bank and nonbank applications from 45 days to 30 days for applications acted on under delegated authority, and from 90 to 60 days for applications acted on by the Board. A 10-day deadline is also established for Reserve Banks to review applications submitted for processing to determine if they are complete. Based on past experience, it is anticipated that 90 percent or more of all applications will be acted upon under delegated authority, and thus be decided within 30 days.

The Board has also reviewed its application forms to simplify them by eliminating duplicative information and information already available to the Board. The Board estimates that these measures will reduce by between 40 to 60 percent the number of pages required in the current application forms.

The Board requests comments on all aspects of its proposed revision of Regulation Y, including definitions of terms. The Board will consider any additional areas for simplification and deregulation of Regulation Y that are suggested by commenters.

The Board, however, is not proposing for reexamination whether activities already on the list of permissible nonbanking activities in Regulation Y are closely related to banking. Those activities have been subject to rulemaking and extensive debate over the years. The Board does, however, propose to add to the list of permissible activities several activities that the Board has previously determined by order to be closely related to banking. In addition, commenters are invited to suggest other activities that should be considered for addition to the list of permissible nonbanking activities.

The changes proposed to ease regulatory burden and to clarify and simplify the regulation include:

(1) Elimination or modification of the requirement that a bank holding company obtain the Board's prior approval to open a new office to engage in a nonbanking activity in a state where the bank holding company has previously obtained the Board's approval to engage in the particular nonbanking activity (§ 225.25(a)(2));

(2) Expedited procedures (lasting 15 days) for relatively small acquisitions involving permissible nonbanking activities (§ 225.25(e));

(3) Expedited publication of notices of proposed new nonbanking activities (§ 225.25(c)(2));

(4) Elimination of applications for small acquisitions involving the assets of a consumer finance or mortgage banking office (§ 225.22(c)(8));

(5) Elimination of certain applications involving acquisitions of bank shares in a fiduciary capacity (§ 225.12(a));

(6) Incorporation into the regulation of deadlines for processing of applications and expediting of the application process (§§ 225.14 and 225.25);

(7) Incorporation of significant Board interpretations and statements of policy concerning regulatory and supervisory matters; and

(8) Specification of those types of transactions that do and those that do not require prior Board approval under the Act.

The proposed modification of the current requirement of Regulation Y for the approval of each new office of a nonbank subsidiary would reduce by about 75 percent the number of current nonbank applications filed with the Board under section 4(c)(8) of the BHC Act.

Another area that has been revised involves the purchase or redemption by a bank holding company of its own securities (§ 225.4(b)). The Board proposes to substitute for the current notice provision standards governing redemptions based upon the Board's capital adequacy guidelines.

With respect to the format of the proposed revision, the Board has incorporated all the important statutory provisions as they have been interpreted by the Board. Moreover, the material has been reorganized into self-contained subparts and stated as simply as possible. These structural changes should improve understanding of the regulation, facilitate compliance, and promote suggestions for further substantive improvements.

The Board certifies that none of the proposed changes will have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C 601).

The commentary that follows includes several Board rulings that are not included in the body of the proposed revision of the regulation. In taking final action on the revision, the Board expects to preserve these rulings in a convenient format as a permanent source of guidance to the regulation.

II. SUBPART A—GENERAL PROVISIONS

Section 225.1—Authority, Purpose, and Scope

This section of the proposed regulation identifies the Board's statutory authority for issuing the regulation, states the primary purposes of the regulation, and describes the scope of each of the five subparts. Subpart A contains definitions, administrative provisions, and a section on corporate practices of bank holding companies; Subpart B sets forth the requirements for the acquisition of bank and bank holding company securities and assets; Subpart C describes the limitations and requirements regarding nonbanking activities and acquisitions; Subpart D contains the rules for control and divestiture proceedings; and Subpart E sets forth the provisions implementing the Bank Control Act. The four operational subparts are comprehensive in that each subpart identifies the transactions that are covered and those that are exempt, and each subpart sets forth the applicable procedures regarding applications, notices, and hearings.

Current regulation: 12 CFR 225.1(a).

Section 225.2—Definitions

This section contains the definitions of terms used in the proposed regulation, and differs from the current regulation, which merely incorporates by reference the statutory definitions. Some of the definitions in the proposed revision mirror those in the BHC Act; others incorporate various Board interpretations.

Statutory reference: 12 U.S.C. 1841.
Current regulation: 12 CFR 225.1(b).

Section 225.2(a) "Bank"

"Bank" is defined as any institution that accepts demand deposits and engages in the business of making commercial loans. This definition reflects the statutory definition in section 2(c) of the BHC Act and incorporates Board interpretations of the terms "demand deposits" and "commercial lending" for the purpose of determining whether an institution is a bank. The statutory exclusions from the definition of bank are also set forth in the regulation.

1. *Demand deposits.* "Demand deposits" are defined to include any deposit with transactional capability that is paid on demand as a matter of practice, and include accounts accessible by check, draft, or negotiable order of withdrawal (NOW). (First Bancorporation (Beehive Financial Corporation), 68 *Federal Reserve Bulletin* 253 (1982).)

2. *Commercial loans.* The definition proposed reflects the Board's position that all loans are "commercial" loans except those made to individuals for personal, household, family, or charitable purposes. In order to prevent evasion of the BHC Act, the definition proposes to identify a variety of instruments that may serve as substitutes for commercial loans. (*Cf.*, Board Ruling of December 10, 1982, 1 Federal Reserve Regulatory Service ("F.R.R.S.") 4-363.2.)

Statutory reference: 12 U.S.C. 1841(c).

Section 225.2(b) "Bank holding company"

The definition of "bank holding company" reflects the statutory definition. The six exemptions from the definition contained in section 2(a)(5) of the BHC Act are also included and have been consolidated into four exemptions. The proposed revision also incorporates the provisions of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106), which applies certain certain provisions of the BHC Act to foreign banks (and their parent companies) operating branches, agencies and commercial lending companies in the United States.

Statutory reference: 12 U.S.C. 1841(a); 12 U.S.C. 3106.

Section 225.2(c) "Company"

The definition of "company" in the proposed regulation includes the statutory definition and the exclusions contained in section 2(b) of the BHC Act.

In accordance with a long-standing Board interpretation, the term "company" generally does not include buy-sell agreements, or voting trusts of 25 years or less duration, so long as the agreement or trust pertains solely to the securities of one bank and the parties involved in the agreement or trust do not engage jointly in any other banking or nonbanking activities. (Board Ruling of May 4, 1972, 1 F.R.R.S. 4-185.5.)

The Board has also taken the position that individuals and/or companies acting together must be joined under a formal agreement or structure in order to be an "association." (Board Ruling of September 13, 1977, 1 F.R.R.S. 4-420.

VOL 48 ISS 102 MAY 25 1983 UMI

aff'd sub. nom., Central Bank v. *Board of Governors*, No. 77–1937 (D.C. Cir. (Feb. 1, 1979).)

Statutory reference: 12 U.S.C. 1841(b).

Section 225.2(d) "Control" of a bank or company

The proposed definition of "control" of a bank or company incorporates the statutory definition from section 2 of the BHC Act, *i.e.*, control based on share ownership, election of directors or trustees, or controlling influence determinations by the Board. With respect to controlling influence determinations, the proposed regulation conforms the provisions of sections 2(a)(2)(C) and 2(d)(3) of the BHC Act by establishing that the Board may find control and a parent-subsidiary relationship where the Board determines that a company has the power to exercise a controlling influence over another company.

For purposes of § 225.2(d)(1) of the proposed regulation, "acting through one or more other persons" includes an arrangement under which a person acts as an agent or is indemnified by the company in purchasing or holding voting securities on behalf of the company. (Board letter, dated June 23, 1982, to Security Corp., Duncan, Oklahoma.) The Board has also taken the position that the ability to control the ultimate disposition of voting securities and to secure the economic benefits from the disposition indicates control of the securities. (Board Ruling of March 18, 1982, 1 F.R.R.S. 4–461.)

The definition of control in the proposed regulation incorporates the conclusive presumption of control now contained in § 225.2(a) of the current regulation, which relates to the transfer of 25 percent or more of the shares of a company being conditioned in any manner upon the transfer of 25 percent or more of the shares of another company. For example, if the voting shares of two companies are "stapled together" so that the transfer of one would automatically result in the transfer of the other, the presumption would apply. For purposes of this provision, the holders of securities of both companies constitute a company for the purposes of the BHC Act.

As provided in section 2(g) of the BHC Act, the proposed definition of control specifies that a company is deemed to control securities held by its subsidiaries, or held in a fiduciary capacity for its benefit or the benefit of shareholders or employees of the company or its subsidiaries. The Board has also interpreted this provision to include assets held in these capacities. For example, this provision would attribute control of securities or assets to a company if a profit sharing or pension plan for the benefit of the company's employees holds the securities.

Apart from the proposed regulation, the Board in its policy statement of July 8, 1982, outlined situations where nonvoting equity investments by a bank holding company in another company or a bank might give the bank holding company control of the other company or bank. (Statement of Policy on Nonvoting Equity Investments by Bank Holding Companies, 68 *Federal Reserve Bulletin* 413 (1982).)

Statutory reference: 12 U.S.C. 1841 (a)(2), (d); 12 U.S.C. 1841(g) (1), (2).

Section 225.2(e) "Management official"

The definition of management official is an abbreviated form for referring to a person who is an officer, director, partner, or trustee of a company or an employee of the company with policy-making functions. Directors include honorary and advisory directors. This definition, which codifies a Board interpretation of section 2(g)(3) of the BHC Act, is relevant in control and divestiture proceedings under Subpart D of the proposed regulation. (12 CFR 225.139.)

Statutory reference: 12 U.S.C. 1841(a)(2)(C) and 1841(g)(3).

Current regulation: 12 CFR 225.2(b) (1) and (2).

Section 225.2(f) "Outstanding shares"

This definition clarifies that the term "outstanding shares" refers only to shares that are issued and that have voting rights. For example, under this provision, outstanding shares would not include treasury shares held by a company where the company is precluded by law from voting its own shares that are held in its treasury.

Statutory reference: 12 U.S.C. 1843(c) (6), (7).

Section 225.2(g) "Person"

The definition of "person" reflects the definition of person contained in the Bank Control Act.

Statutory reference: 12 U.S.C. 1817(j) (8), (A).

Section 225.2(h) "Principle shareholder"

This definition reflects the current usage found in § 225.2(b) of Regulation Y concerning the rebuttable presumptions of control. It is relevant to determinations of control under Subpart D of the proposed regulation.

Current regulation: 12 CFR 225.2(b)(2).

Section 225.2(i) "Subsidiary"

The definition of "subsidiary" reflects the statutory definition in section 2(d) of the BHC Act, and refers to indirect as well as direct subsidiaries. For example, company C is a subsidiary of B which, in turn, is a subsidiary of A. Under the definition, C is deemed to be a subsidiary of A.

Statutory reference: 12 U.S.C. 1841(d).

Section 225.2(j) "Voting securities"

This definition clarifies the meaning of the term "voting shares" used in sections 2, 3 and 4 of the BHC Act. In the proposed regulation "voting securities" are defined to mean shared of common and preferred stock, partnership interests, and other similar interests, if the holders are entitled (under statute, charter, or in any manner) to vote for or select directors, trustees, or partners, or to vote on significant matters.

Under this definition, the acquisition by a bank holding company of "nonvoting stock" of another company would be limited to securities that do not normally carry the right to elect or appoint any directors, or to vote on significant matters. For example, the right to vote on or to veto payment of dividends, mergers, acquisitions by, or dissolution of the company would be regarded as the right to vote on significant corporate matters. In addition, the contingent right of the holders of a security to elect or appoint a director to the board of a company under specified conditions, such as failure to pay a dividend, would cause the security to be regarded as a voting security at the time the right to vote arises.

Even though securities may be voting securities for the purposes of this provision, it does not follow that they will be treated as equity for purposes of financial analysis. Whether voting securities are treated as debt or equity will depend upon their particular characteristics, *e.g.*, their term, right to dividends, and priority in creditor claims.

Statutory reference: 12 U.S.C. 1841(a)(2)(A)(3); 12 U.S.C. 1842(a); 12 U.S.C. 1843 (a)(1) and (c) (6), (7).

Section 225.3—Administration

Section 225.3(a) Delegation of authority

This provision indicates that certain actions of the Board may be taken by individuals or Reserve Banks delegated to act for the Board. For example, officials of the Board staff and individual Reserve Banks are authorized to act on applications, notices, and requests under certain conditions as well as to take certain administrative actions in the processing of applications or notices under this regulation. The functions delegated to particular Reserve Banks and Board officials, as well as the conditions under which the delegation of authority may be exercised, are detailed in the Board's Rules Regarding Delegation of Authority (12 CFR Part 265). Any person aggrieved by a decision under delegated authority may appeal the decision to the Board. In addition, the Rules provide that an action taken by a Reserve Bank under delegated authority may be reviewed by the Board, if within 10 days after the action, a member of the Board requests such review (12 CFR 265.3).

Section 225.3(b) Appropriate Federal Reserve Bank

This section specifies the Reserve Bank with which individuals and companies are to file reports, applications, and notices under the regulation.

Current regulation: 12 CFR 225.1(c)

Section 225.4—Corporate Practices

Section 225.4(a) Bank holding company policy and operations

This section codifies the policy of the Board that a bank holding company should serve as a source of strength for its bank subsidiaries, and conduct its bank and nonbank operations in accordance with sound banking policy and practice. Under this provision, bank holding companies should observe the statements of policy issued by the Board from time to time concerning supervisory and other matters. The provision is derived from section 3(c) of the BHC Act, which requires the Board to consider the financial and managerial resources and future prospects of the company and banks concerned; from section 5(b) of the BHC Act, which authorizes the Board to issue regulations; and from the Board's authority under the Financial Institutions Supervisory Act to issue cease and desist orders to prevent unsafe or unsound banking practices (12 U.S.C. 1818(b)(1) and (3)).

This provision also describes the provision in section 5(e) of the BHC Act that the Board may order divestiture of a nonbank activity or subsidiary if it determines that the activity or subsidiary constitutes a serious risk to the financial safety, soundness or stability of a bank holding company bank and is inconsistent with sound banking principles or the purposes of the BHC Act.

Statutory reference: 12 U.S.C. 1842(c), 1844(b), 1844(e), 1818(b).

Section 225.4(b) Purchase or redemption by a bank holding company of its own securities

As reflected in the preceding provision of the proposed regulation, a bank holding company should serve as a source of strength to its bank subsidiaries. Each application for a bank holding company formation or bank acquisition that has been approved by the Board has been approved on this basis, and the bank holding company has a continuing obligation to serve as a source of strength to its subsidiary banks.

The current regulation requires 45 days notice to the Board for a redemption of its securities if the redemption exceeds 10 percent of the net worth of the bank holding company. This provision was adopted in 1976 before the Board issued its Policy Statement on Capital Adequacy (1 F.R.R.S. 3–1506), which reflects the Board's judgment as to the minimum adequate capital levels for banks and bank holding companies or various sizes. To update the regulation, the Board proposes to amend the provisions of Regulation Y regarding redemptions to prohibit a bank holding company from purchasing or redeeming its equity securities, unless, after giving effect to the redemption or acquisition, the bank holding company complies with the minimum standards in the Board's Policy Statement on Capital Adequacy. The references to capital contained in the proposed regulation should be calculated in accordance with the definitions of capital in the Board's policy statement.

The proposed regulation would also permit a redemption where the guidelines are not met only if the redemption is *de minimis* or with the Board's prior approval. Approval would only be granted in unusual circumstances, since the Board does not believe that it is appropriate for a bank holding company that does not meet the Board's capital adequacy guidlines to make redemptions of securities that detract from the bank holding company's ability to serve as a source of strength to its subsidiary banks.

As with the capital adequacy standards, the standards for permissible acquisitions of equity securities are keyed to the size of the organization, and the result of the proposed redemption of securities on capital ratios. Since the Board has not published capital guidelines for large multi-national banking organizations, those organizations would be required, for the purpose of the redemption provision, to meet the standards applicable to organizations with assets of $1 billion or more. Use of these standards does not indicate that the Board has determined that these standards should be applied to large multinational banking organizations for other capital adequacy purposes.

With respect to the smallest organizations (under $150 million), the capital ratios, after giving effect to the proposed redemption of securities, are those of either each of the subsidiary bank(s), or the consolidated organization. This difference recognizes that most smaller organizations exist primarily for financing the acquisition of the subsidiary bank and are highly leveraged. The use of consolidated ratios by these organizations in most instances would not allow them to make redemptions of equity securities. In order to compensate for the use of the more liberal bank-only capital ratios for smaller organizations, the proposed regulation imposes an additional test for permissible redemptions that, giving effect to the proposed redemption, the debt-to-equity ratio of the parent is not more than 30 percent. This additional test will limit the ability of highly-leveraged organizations to redeem securities where the redemptions may adversely affect their financial strength.

Statutory reference: 12 U.S.C. 1844(b), 1818(b)(3).

Current regulation: 12 CFR 225.6.

Section 225.4(c) Deposit insurance

This provision reflects the statutory requirement in section 3(e) of the BHC Act that a bank must obtain Federal Deposit Insurance before it becomes a bank holding company or a subsidiary of a bank holding company.

Statutory reference: 12 U.S.C. 1842(e).

Section 225.4(d) "Tie-in" arrangements

This provision, which is contained in the current regulation, imposes on bank holding companies and nonbanking subsidiaries conducting activities pursuant to section 4(c)(8) of the BHC Act the prohibition against "tie-in" arrangements contained in section 106(b) of the BHC Act Amendments of 1970. For example, a nonbank subsidiary that is engaged in lending may not fix or vary the interest rate on its loans on the condition that the borrower obtain additional credit, property, or services from the parent holding company or from another subsidiary of the bank holding company. On the other hand, consistent with this regulation, a nonbank lending subsidiary may vary the interest rate on its loan to a

VOL 48 ISS 102 MAY 25 1983 UMI

customer based on the volume of borrowing by the customer from the subsidiary.

Statutory reference: 12 U.S.C. 1972(1).
Current regulation: 12 CFR 225.4(c)(1).

Section 225.4(e) Acting as transfer agent, municipal securities dealer, or clearing agent

This provision replaces the detailed provisions in the current regulation concerning securities activities of a bank holding company or a nonbanking subsidiary that is a "bank" as defined in section 3(a)(6) of the Securities Exchange Act of 1943 (15 U.S.C. 78c(a)(6)). Under the Board's Regulation H (12 CFR 208.8(f)–(j)), a member bank acting as a transfer agent, municipal securities dealer, or clearing agent, or as a participant in a clearing agency, must comply with requirements that are identical to those now contained in Regulation Y. In order to avoid this duplication, the proposed regulation refers to the relevant provisions of Regulation H, and provides that a bank holding company or covered nonbanking subsidiary must comply with the requirements of Regulation H as if it were a state member bank. If the bank holding company is itself a bank, it would be subject instead to the regulations of its primary banking supervisor. Subsidiaries of bank holding companies that are national banks, insured state nonmember banks, or nonbanking subsidiaries not subject to this paragraph are subject to comparable rules of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Securities and Exchange Commission, respectively.

Current regulation: 12 CFR 225.5 (c)–(f).

Section 225.5—Registration, Reports, and Inspections

A bank holding company should consult with the appropriate Reserve Bank as to the manner, form, and content of the information it must furnish to comply with this section. At the time of approval of an application to become a bank holding company, the company is advised by letter of the information that must be filed to satisfy the registration requirement. Thereafter, the company is furnished the appropriate forms for filing annual and other required reports.

Bank holding companies and their subsidiaries are subject to examination and inspection by the appropriate Reserve Bank pursuant to instructions from the Board.

Statutory reference: 12 U.S.C. 1844.
Current regulation: 12 CFR 225.5 (a), (b).

Section 225.6—Penalties for Violations

This section has been added to the proposed regulation to refer the reader to those provisions of the BHC Act, the Bank Control Act, and the Financial Institutions Supervisory Act, that subject individuals and companies to civil and criminal penalties and other administrative sanctions for violations.

Statutory reference: The statutory references are set forth in the proposed regulation.

III. SUBPART B—ACQUISITION OF BANK SECURITIES OR ASSETS

Section 225.11—Transactions Requiring Board Approval

This section of the proposed regulation, which is based on section 3(a) of the BHC Act, sets out the following transactions for which prior Board approval is required: (a) formation of a bank holding company; (b) acquisition of a subsidiary bank; (c) acquisition by a bank holding company of control of more that 5 percent of the voting securities of a bank or a bank holding company; (d) acquisition of bank assets; (e) merger or consolidation of bank holding companies; and (f) any other qcquisition that the Board determines in a particular case requires prior approval under the BHC Act.

Generally, the acquisition by a bank or bank holding company of its own voting securities or those of its parent bank holding company would not require the Board's approval under this section of the proposed regulation. Such an acquisition may, however, be prohibited under § 225.4(b) of Subpart A because it reduces the capital below the minimum standards for capital adequacy established by the Board.

Statutory reference: 12 U.S.C. 1842(a).

Section 225.11(c) Acquisition of control of bank securities or bank holding company securities

Under this section, a bank holding company must apply for the Board's prior approval to acquire voting securities of a bank or bank holding company if, after the acquisition, it would hold more than 5 percent of any class of voting securities of the bank or bank holding company. This section differs from the literal terms of section 3(a)(3) of the BHC Act, which refers only to acquisition of voting shares of a bank. However, the Board has determined that section 3 also applies to the acquisition by a bank holding company of shares of another bank holding company. (*State Street Boston Corporation*, 67 Federal Reserve Bulletin 362 (1981).)

Questions have arisen with respect to the need for an application under section 3(a) of the BHC Act in the case of a stock dividend or split, and the need for an application by a shareholder whose interest in a bank or company increases through a redemption by a bank or company of its own securities. Under paragraph (c) of this section of the proposed regulation, the receipt of securities from a stock dividend or split is not considered an acquisition requiring the Board's prior approval as long as the dividend or split does not alter the holding company's proportional share of any class of voting securities. This reflects the position contained in an existing Board interpretation. (12 CFR 223.103.)

A redemption of securities by a bank or bank holding company that increases the proportional interest of a holder of such securities usually will be regarded as an "acquisition" of bank securities by the holder and will require the holder to file an application for prior Board approval, even though the holder receives no additional shares. For example, an application would be required under paragraph (a) of this section if the redemption results in the holder becoming a bank holding company because its proportional interest has increased to 25 percent or more of any class of voting securities of a bank or bank holding company.

Section 225.11(d) Acquisition of bank assets

Under section 3(a)(4) of the BHC Act and under this provision, the acquisition by a bank holding company or a nonbank subsidiary of all or substantially all of the assets of a bank requires the Board's prior approval. This requirement does not apply where the acquisition of bank assets is made by a subsidiary bank of a bank holding company. For the treatment of mergers involving subsidiary banks of a bank holding company, see § 225.12(d) of the proposed regulation and the commentary to that section below.

Section 225.11(e) Merger of bank holding companies

Under section 3(a)(5) of the BHC Act and under this provision, a merger or consolidation of two or more bank holding companies requires prior Board approval. An exception to this requirement is a consolidation or merger in connection with a corporate reorganization. For example, in a tiered corporate structure where a bank holding company has a subsidiary that is also a bank holding company, the subsidiary may be merged into the parent without filing an application. However, the addition of a new bank holding company to a tiered bank holding company system normally would require prior approval under § 225.11 of the proposed regulation.

Section 225.11(f) Other acquisitions

Under this provision, the Board may determine that certain other acquisitions of securities of an institution require the Board's prior approval under section 3 of the BHC Act. The Board would not make a determination that a particular acquisition requires its approval before giving the acquiring company notice. The Board may exercise its authority under this provision whether or not a notice or application with respect to the proposed acquisition has been filed under any other provision of law. This provision is proposed pursuant to the Board's authority under section 5(b) of the BHC Act of the BHC Act adopt regulations to carry out the purposes of the Act and to prevent evasions, and it codifies 12 U.S.C. 1817(j)(16), which provides that a transaction subject to the Board's approval under section 3 of the BHC Act is not subject to the Bank Control Act.

Section 225.12—Transactions Not Requiring Board Approval

This section specifies transactions for which prior Board approval is not required under section 3(a) of the BHC Act.

Statutory reference: 12 U.S.C. 1842(a).

225.122(a) Acquisition of securities in fiduciary capacity

This paragraph provides that Board approval is not required for the acquisition by a company (including a bank) of voting securities of a bank or bank holding company in good faith in a fiduciary capacity, unless (1) the company has sole discretionary authority to vote the securities and will retain that authority for more than two years, or (2) the acquisition is for the benefit of the company, its shareholders, employees, or subsidiaries. The second clause is based upon the statutory presumption in sections 2(g) (1) and (2) of the BHC Act.

Within 90 days of receiving voting securities of a bank or bank holding company in a fiduciary capacity with sole discretionary voting authority, a bank holding company is required under section 3(a) of the BHC Act to file an application to retain the shares. The current regulation provides that such an application (in the form of a letter) is automatically approved within 45 days if it is accompanied by an unconditional undertaking to dispose of the shares or the voting authority within two years. Since the BHC Act gives the applicant a 2 year grace period to retain the shares even if the application is denied, the Board believes this application procedure is of little value. Therefore, under the proposed regulation, no application is required unless the company proposes to retain the shares with sole discretionary voting authority beyond the two-year grace period. If an application is required under this provision, the application should be filed in time for Board action before the two-year grace period expires.

While the exception contained in section 3 of the BHC Act for the acquisition of bank or bank holding company securities in a fiduciary capacity is limited to such acquisitions made by a bank, the proposed regulation extends the exception for fiduciary acquisition of bank and bank holding company securities to those made by a nonbank company. This liberalization is being proposed in recognition of the fact that there are nonbank companies, including nonbank subsidiaries of bank holding companies, that are engaged in fiduciary activities and would receive securities in a fuduciary capacity.

The fiduciary exemption in the BHC Act does not exempt the acquisition of bank or bank holding company shares by a bank as fiduciary for a trust that is a "company" as defined in § 225.2(c) of Subpart A. Thus, an application must be filed by such a trust if it proposes to make an acquisition of bank or bank holding company securities covered under § 225.11 of the proposed regulation. In this situation, however, an application would not also be required from the fiduciary or its parent, if the fiduciary meets the requirements for the exemption described in § 225.12(a) of the proposed regulation.

The BHC Act also does not exempt a transaction where the fiduciary receives shares from a selling company that is deemed to continue to control the shares after the divestiture under section 2(g)(3) of the BHC Act. This statutory provision is implemented in Subpart D of the proposed regulation.

Statutory reference: 12 U.S.C. 1842(a)(A)(i).
Current regulation: 12 CFR 225.3(c).

Section 225(b) Acquistion of securities in satisfaction of debts previously contracted

This provision exempts from the prior approval requirement the acquisition by a company (including a bank) of voting securities of a bank or bank holding company in the regular course of securing or collecting a debt previously contracted in good faith, so long as the company divests the securities within two years of acquisition. Under section 3(a) of the BHC Act, the Board may grant up to three one-year extensions of the two-year divestiture period.

For example, a bank subsidiary of a bank holding company that has made a loan collateralized by more than 5 percent of the voting securities of a bank may acquire those securities without the Board's approval in the event of a default by the borrower. The bank and its holding company would be required to file an application under this subpart for Board approval to retain those shares beyond the permissible time period.

While the statutory exception is limited to acquisitions made by banks, the proposed regulation extends the exception to any company that acquires bank securities in good faith in satisfaction of a debt previously contracted. This liberalization is being proposed in recognition of the fact that there are nonbank companies, including nonbank subsidiaries of bank holding companies, that make bank stock loans.

Statutory reference: 12 U.S.C. 1842(a)(A)(ii).

Section 225.12(c) Acquisition of securities by bank holding company with majority control

A bank holding company that lawfully controls a majority of the outstanding voting securities of a bank or bank holding company may acquire, without the Board's approval, any number of additional voting securities of the bank or bank holding company.

Statutory reference: 12 U.S.C. 1842(a)(B).

Section 225.12(d) Transactions subject to Bank Merger Act

It has been the Board's practice not to require an application under section 3(a) of the BHC Act for a merger, consolidation, or purchase of assets transaction involving a nonsubsidiary bank and an operating subsidiary bank of a bank holding company, or two or more subsidiary banks of a bank holding company if the transaction is subject to the approval of a federal supervisory agency under the Bank Merger Act (12 U.S.C. 1828) and the resulting bank is a subsidiary of the bank holding company. However, an application under the BHC Act would be required for a merger or consolidation involving the acquisition of shares of a nonsubsidiary bank, if the acquisition of shares and the merger or

VOL 48 ISS 102 MAY 25 1983 UMI

consolidation do not occur simultaneously.

Section 3(a)(4) of the BHC Act provides that prior Board approval is not required for the acquisition of bank assets by a *bank* subsidiary of a bank holding company. Based upon its practice in administering the statute, the Board has treated merger and consolidation transactions in the same manner as asset acquisitions so long as they were subject to approval under the Bank Merger Act, which contains standards that are identical to those in section 3 of the BHC Act.

The proposed regulation does not provide an exemption from prior approval where a merger is between a nonsubsidiary bank and a nonoperating ("phantom") bank formed by a bank holding company for the purpose of acquiring all the outstanding shares of the nonsubsidiary bank. This type of transaction is more appropriately viewed as a bank acquisition subject to the provisions of sections 3(a)(1), 3(a)(2), or (3)(a)(3) of the BHC Act and § 225.11 of the proposed regulation.

Statutory reference: 12 U.S.C. 1842(a)(4).

Section 225.12(e) Holding securities in escrow

This provision incorporates a Board interpretation that an application for prior approval is not required for the acquisition of securities of a bank or bank holding company in escrow, where the title to the securities and the voting rights remain with the seller and the seller has not received payment for the securities.

Current regulations: 12 CFR 225.134.

Section 225.13—Factors Considered in Deciding Applications Under Subpart B

Section 225.13(a) Prohibited anticompetitive transactions

Paragraph (a) of this section incorporates the statutory prohibition in section 3(c) of the BHC Act that the Board may not approve a transaction that results in a monopoly. Similarly, the BHC Act bars the Board from approving a transaction that would result in a violation of the antitrust laws (section 2 of the Sherman Act and section 7 of the Clayton Act), unless the Board finds that the anticompetitive effects are clearly outweighed by convenience and needs considerations. For example, in the case of a failing bank, the Board may find that the continuation of the bank as a viable institution providing financial services to the community clearly outweights the anticompetitive effects resulting from its acquisition by the particular bank holding company.

Statutory reference: 12 U.S.C. 1842(c)(1) and (2).

Section 225.13(b) Other factors considered

This paragraph, which is based on section 3(c) of the BHC Act, outlines the factors considered by the Board in acting on all applications for acquisitions of banks and bank holding companies under this subpart. The factors include financial and managerial resources and the convenience and needs of the communities to be served. The Board assesses these factors with respect to the applicant, the bank to be acquired, and all banks affiliated with the applicant by common management or shareholders. In assessing the impact of a transaction on community convenience and needs, the Board considers the effects of the proposal on existing and potential competition and on the concentration of banking resources.

In significant cases, the Board's order reflects the Board's consideration of these factors in the particular case. The more significant orders, including all denials, are reprinted in full in the "Legal Developments" section of the *Federal Reserve Bulletin*, typically in the following month's issue.

In addition to its orders, the Board from time to time issues general policy and information statements concerning bank holding company operations. (See, e.g., *Capital Adequacy Guidelines*, December 17, 1981, 1 F.R.R.S. 3–1506; *Policy Statement for Assessing Financial Factors in the Formation of Small One-Bank Holding Companies pursuant to the Bank Holding Company Act*, March 28, 1980, 1 F.R.R.S. 4–855; *Community Reinvestment Act Information Statement*, Jan. 3, 1980, 3 F.R.R.S. 6–1309; *Policy Statement Regarding Notice of Applications; Timeliness of Comments; and Guidelines for Public Meetings*, 12 CFR 262.25; see also proposed *Policy Statement for Assessing Competitive Factors Under the Bank Merger Act and the Bank Holding Company Act*, 47 FR 9017 (Docket No. R–0386, March 3, 1982). For other policy statements and directives, see *Miscellaneous Supervisory Material*, 1 F.R.R.S., 4–800, *et seq.*)

Statutory reference: 12 U.S.C. 1842(c).

Section 225.13(c) Interstate transactions

Paragraph (c) reflects the statutory prohibition in section (d) of the BHC Act ("Douglas Amendment"), which provides generally that the Board may not approve an application that will result in a bank holding company acquiring an interest in banks in two or more states. The provision makes clear that the prohibition applies to applications for the information of a multi-state bank holding company, as well as a bank or bank holding company acquisition by an existing bank holding company. It would not, however, apply to the formation of a bank holding company to acquire an existing interstate bank holding company.

Paragraph (C)(2) contains the two exceptions in section 3(d) of the BHC Act to the BHC Act's general prohibition against multi-state bank holding companies. The first exception is for an acquisition by an out-of-state bank holding company where the statute laws of the state in which the bank to be acquired is located specifically allow such an acquisition. The second exception is for the acquisition of a failing bank by an out-of-state bank holding company, and it is included to reflect the amendment to section 3(d) of the BHC Act by section 116 of the Garn-St Germain Depository Institutions Act of 1982 ("Garn-St Germain") (Pub. L. 97–320, 96 Stat. 1477).

Statutory reference: 12 U.S.C. 1842(d).

Section 225.14—Procedures for Applications, Notices, and Hearings

Section 225.14(a)–(d) Applications, notices, and action on applications

The proposed regulation sets forth the procedures for applications, notices, and hearings with respect to applications for the Board's prior approval of acquisitions of bank securities and assets.[1] In accordance with § 262.3 of the Board's Rules of Procedure, an applicant seeking Board approval under this subpart is required to file an application, on a form prescribed by the Board, with the appropriate Reserve Bank. An applicant is also required to arrange for notices in a newspaper of general circulation inviting comment on the application for 30 days in accordance with the requirements of the Board's Rules of Procedure (12 CFR 262.3(b)).

In an effort to expedite the processing of applications, the proposed regulation establishes time constraints for accepting an application for processing or notifying the applicant that the application is incomplete and seeking additional information. Upon recept of an application for processing, the Reserve Bank is required to give notice to and request the comments of the

[1] For a narrative description of the processing of applications, see the pamphlet *Processing Bank Holding Company and Merger Applications*, Federal Reserve System Information Series.

primary banking supervisor of the bank to be acquired. Notice of the application will also be sent to the **Federal Register** at that time for publication. The **Federal Register** notice will provide a comment period of no more than 30 days. The publication of the **Federal Register** notice upon receipt by the Reserve Bank of an application rather than awaiting formal acceptance of the application will reduce the processing time for many applications.

The proposed regulation provides that the application will be approved within 30 days after acceptance by the Reserve Bank, unless the applicant is notified that it has been referred to the Board for decision because the application does not meet the Board's criteria for delegated action. During 1982, 93 percent of all applications submitted to the System were approved under delegated authority. Thus, under the proposed regulation it is expected that the vast majority of applications will be acted upon within 30 days of their acceptance by the Reserve Bank. The Reserve Bank is authorized to extend this 30 day period for 15 days when the additional time is needed to resolve a protest or other substantive matter.

In the case of applications referred to the Board, the proposed regulation provides that the Board must act on an application within 60 days of its acceptance by the Reserve Bank. This period may be extended for additional time if the Board advises the applicant of the duration of the extension and the reasons for it. In no event may the Board extent the period for action beyond the 91-day period provided in paragraph (f) of this section discussed below. As discussed earlier, the Board has established an internal processing schedule of 60 days for cases to be acted upon by the Board and expects that the great majority of such cases will be acted upon with the 60 day period.

The proposed regulation omits a provision in the current regulation that provides for the automatic approval of certain one-bank holding company formations at the end of a 45-day period. In practice, the Federal Reserve System issues orders in the case of every application submitted under section 3 of the BHC Act, and thus the automatic approval procedure has not generally been followed. The omission of this provision should not have any impact on the processing time for routine one-bank holding company formations, however, since, as described above, the majority of such applications will be approved within 30 days of acceptance by the appropriate Reserve Bank, pursuant to delegated authority.

Statutory reference: 12 U.S.C. 1842(b).

Current regulation: 12 CFR 225.3.

Section 225.14(e) Hearings

The proposed regulation reflects the requirements in section 3(b) of the BHC Act that the Board shall order a hearing if it receives a timely written recommendation of disapproval of the application from the primary banking supervisor.

In administering the BHC Act, the Board has in particular instances found hearings or other proceedings useful in developing a complete record in connection with the processing of an application. Accordingly, under the proposed regulation, the Board has the discretion to order any proceeding that it deems appropriate to facilitate action on an application.

Statutory reference: 12 U.S.C. 1842(b).
Current regulation: 12 CFR 225.3(d).

Section 225.14(f) Approval through failure to act

In judicial decisions involving the 91-day provision in sections 3(a) and 4(c)(8) of the BHC Act, courts have indicated that adoption by the Board of a regulation regarding the calculation of the 91-day period would be desirable. Accordingly, the proposed regulation incorporates judicial constructions of the 91-day rule in the BHC Act, and provides that an application shall be deemed approved if the Board fails to act within 91 days after the date that the record on the application is complete. In conformance with established rules for computation of time periods, such as the Federal Rules of Civil Procedure, the first complete day of the 91-day period is the day following completion of the record. Under this method of computation, the date the record is completed is day zero and the Board must act within 91 days thereafter. The proposed regulation also specifies that Board action includes issuance of an order stating that the Board has approved or denied the application, reflecting the votes of the Board members, and indicating that a statement of the reasons for the action will follow.

The proposed provision specifies that the record on an application will not be considered complete before: (1) the date the Board receives an application accepted for processing by a Reserve Bank; (2) the last day of the formal comment period specified in any notice required under the regulation; (3) the date of the receipt of the last relevant, noncumulative information needed for the Board's decision on the application from a source outside the Federal Reserve System; or (4) the completion of any hearing required on the application.

Information from a source outside the Federal Reserve System includes any information submitted by the applicant in response to a request by the Board during the proceeding as well as information from a government agency or potential competitor. In addition, if the Board has requested information that the Board believes is necessary for its decision, the record is not complete until the Board receives that information. Similarly, if the Board is awaiting the results of an examination of any bank involved in the application, the record would not be complete until the Board receives the examination report. (See *Tri-State Bancorporation, Inc.* v. *Board of Governors*, 524 F. 2d 562 (7th Cir. 1975); *North Lawndale Economic Development Corp.* v. *Board of Governors*, 553 F. 2d 23 (7th Cir. 1977); *Central Wisconsin Bankshares, Inc.* v. *Board of Governors*, 583 F. 2d 294 (7th Cir. 1978); *Republic of Texas Corp.* v. *Board of Governors*, 649 F. 2d 1026 (5th Cir. 1981).)

An applicant or other interested person may contact Board staff for informal advice on the calculation of the 91-day period for a particular application. In response to such requests, Board staff will inform the applicant of the last date provided in any notice for comment on the application and the last date that any relevant information concerning the application has been received from outside the Federal Reserve System. It should be understood that dates provided by the staff in response to informal requests are subject to change if additional information is subsequently submitted to the Board.

Statuory reference: 12 U.S.C. 1842(b).

Section 225.14(g) Exceptions to notice and hearing requirements

This provision, which is derived from section 3(b) of the BHC Act, authorizes the Board to modify or dispense with the notice and hearing requirements in the case of a probable bank failure or other emergency situation. The procedures authorized under this provision normally will be utilized in close consultation with the appropriate financial regulatory agencies. Generally, an emergency situation is one that is less serious than a probable bank failure, and the Board has considerable discretion to determine that an emergency exists under particular circumstances.

Statutory reference: 12 U.S.C. 1843(b).

Section 225.14(h) Waiting period

Under section 11(b) of the BHC Act, transactions for which an application has been approved under section 3 of

VOL 48 ISS 102 25 1983 MAY UMI

the Act, either as a result of Board approval or the 91-day rule, may not be consummated until the thirtieth day after approval of the application. Emergency and failing bank acquisitions are generally exempt from the 30-day waiting period. The purpose of the waiting period is to afford the United States Department of Justice an opportunity to review the proposal and determine whether it conforms to the antitrust laws. If the Department does not challenge the merger during this period, the merger is thereafter immune from challenge under section 7 of the Clayton Act.

The Board requests comment on the feasibility of an amendment to Regulation Y that will allow this waiting period to be reduced with the concurrence of the Department of Justice where the proposal does not present any anticompetitive effects. For example, one-bank holding company formations generally do not present anticompetitive effects and are not the type of proposals for which the 30-day waiting period was designed.

Statutory reference: 12 U.S.C. 1849(b).

IV. SUBPART C—NONBANKING ACTIVITIES AND ACQUISITIONS OF BANK HOLDING COMPANIES

Section 4 of the BHC Act embodies one of the primary purposes of the BHC Act, the separation of banking and commerce, by limiting the nonbanking activities in which a bank holding company and its subsidiaries may engage and by prohibiting the acquisition of shares in nonbanking entities unless such acquisitions are specifically permitted under one of the exemptions to the section. This subpart of the proposed regulation implements section 4 and applies to any bank holding company as defined in Subpart A (including certain foreign banking organizations).

The subpart sets forth the limitations on nonbanking activities and describes the major exemptions from the nonbanking prohibitions contained in the BHC Act. The statutory exemption in section 4(a)(2) of the BHC Act relating to retention of real estate holdings acquired prior to 1970, and the limited exemption in section 4(c)(10) for a bank that is a bank holding company have not been included in the regulation because of their limited applicability. Also, the provisions of section 4(c)(12) of the BHC Act, which pertain to the expansion of nonbanking activities that were required to be divested by 1980, are not included.

The statutory exemptions in sections 4(c) (9) and (13) of the BHC Act are implemented in various provisions of Regulation K ("International Banking Operations," 12 CFR Part 211). Section 4(c)(9) concerns shares held or activities conducted by a company organized under the laws of a foreign country. Section 4(c)(13) relates to the exemption for shares or activities of a company that does no business in the United States except as an incident to its international activities.

Section 4(c)(14) of the BHC Act, which was added in 1982 by the Bank Export Services Act (Title II of Pub. L. 97–290), involves an exemption for acquisition by a bank holding company of an investment in an export trading company. The Board's proposed amendment to Regulation K implementing this exemption was issued for comment on January 14, 1983 (48 FR 3775, Docket No. R–0445).

Section 225.21—Permissible Nonbanking Activities and Acquisitions; Exempt Bank Holding Companies

Section 225.21(a) Permissible nonbanking activities and acquisitions

This paragraph reflects the prohibition of section 4(a) of the BHC Act that a bank holding company and its subsidiaries may not engage in any activity other than those of banking or managing or controlling banks or activities otherwise deemed permissible under the BHC Act, and may not acquire voting securities of a company engaged in impermissible activities.

Since the statutory definition of company in section 2(b) of the BHC Act includes the term "partnership," the prohibition against engaging in a nonbanking activity also applies to a bank holding company or subsidiary becoming a partner in a partnership (or acquiring voting securities in a partnership) that is engaged in nonbanking activities. (See *Central Colorado Co. & C.C.B., Inc.*, 66 Federal Reserve Bulletin 655 (1980).) Similarly, the prohibition applies to acquiring an interest in a joint venture (either in corporate or partnership form), where the joint venture is engaged in a nonbanking activity.

Under § 225.4(c)(3) of the current regulation and a current Board interpretation, the prohibition against nonbanking acquisitions also includes acquisitions of assets of a going concern (12 CFR 225.132). Specifically, under these provisions, assets acquired other than in the ordinary course of business or that constitute the acquisition in whole or in part of a going concern, including a subsidiary, division, department or office, are subject to the prohibitions and prior approval requirements of section 4 of the BHC Act. (As discussed below, the Board is providing exemptions in §§ 225.22(c) (7) and (8) from prior approval requirements for assets acquired in the ordinary course of business and for certain assets acquired by consumer finance and residential mortgage banking companies.)

Statutory reference: 12 U.S.C. 1843(a) (1), (2).

Current regulation: 12 CFR 225.4(c)(3).

Section 225.21(b) Exempt bank holding companies

This paragraph specifies the types of companies that are exempt from the prohibitions against nonbanking activities of section 4 of the BHC Act and the proposed regulation. Included among them are certain labor, agricultural, and horticultural organizations; family-owned companies; and companies granted hardship exemptions by the Board under section 4(d) of the BHC Act.

Statutory reference: 12 U.S.C. 1843(c) (i) and (ii), and (d).

Section 225.22—Exempt Nonbanking Activities and Acquisitions

This section sets out the exemptions from the nonbanking prohibitions contained in section 4(a) of the BHC Act. The exemptions are derived, for the most part, from those set forth in section 4(c) of the BHC Act, as well as interpretations that have been issued by the Board. A bank holding company may engage in an activity or acquire shares of a nonbanking company without prior Board approval, if the activity or acquisition falls within one of the following exemptions.

Statutory reference: 12 U.S.C. 1843(c).

Section 225.22(a) Servicing activities.

Under sections 4(a)(2) and 4(c)(1) of the BHC Act, a bank holding company may provide services for its banking and nonbanking subsidiaries either directly or indirectly through a subsidiary. This section of the proposed regulation clarifies the scope of the servicing activities that may be performed for a bank holding company and its subsidiaries. Generally, a bank holding company may provide only services related to the internal operations of the bank holding company or its subsidiaries. Examples of the activities are set forth in the proposed regulation. The servicing exemption is not intended, however, to be used by a bank holding company as a guise for providing nonbank services to outside parties or otherwise engaging in nonbanking activities. Thus, as a general matter, a bank holding company or its subsidiaries may not rely on the

servicing exemption to act as principal or agent in soliciting business or providing services to parties other than the bank holding company or its subsidiaries. This provision differs from several Board interpretations issued before the 1970 amendments to the Act. These interpretations will be modified or deleted if this provision is adopted. (See *e.g.* 12 CFR 225.104, 225.109, 225.118, and 225.122.)

Statutory reference: 12 U.S.C. 1843 (a)(2) and (c)(1).

Section 225.22(b) Safe deposit business

As reflected in section 4(c)(1)(B) of the BHC Act, the proposed regulation allows a bank holding company to engage in or to acquire shares of a company that conducts a safe deposit business.

Statutory reference: 12 U.S.C. 1843(c)(1)(B).

Section 225.22(c) Nonbanking acquisitions not requiring prior Board approval

1. *DPC (debts previously contracted) acquisitions.* Section 4(c)(2) of the BHC Act provides that a bank holding company or subsidiary may acquire nonbank shares in satisfaction of a debt previously contracted and hold such shares for a two-year period, with the possibility of three additional one-year extensions being granted by the Board. This provision codifies the exemption and expands it to include interests in real or personal property. Under a current Board interpretation, the Board may approve an additional five-year period for a total of ten years for the divestiture of real estate acquired DPC (12 C.F.R. 225.140).

Statutory reference: 12 U.S.C. 1843(c)(2).

2. *Securities or assets required to be divested by subsidiary.* Section 4(c)(3) of the BHC Act permits certain acquisitions to be made by a bank holding company from its subsidiaries. The regulation allows for a temporary holding for up to two years of nonbanking shares that a subsidiary of the holding company has been required to divest by a federal or state examining authority.

Statutory reference: 12 U.S.C. 1843(c)(3).

3. *Fiduciary investments.* Bank holding companies and their subsidiaries are permitted under section 4(c)(4) of the BHC Act to acquire and hold nonbanking securities and activities in a fiduciary capacity so long as they are not held for the benefit of the bank holding company, its subsidiaries, or its employees. Under the BHC Act, this provision does not permit a bank holding company subsidiary to acquire nonbank securities and activities as fiduciary for a trust that is a "company" (as defined in section 2(b) of the BHC Act). The legislative history of this provision suggests this limitation is intended to apply only where the trust is also a bank holding company. Thus, if the trust itself is not a bank holding company, the exemption is available to the bank holding company subsidiary that acts as fiduciary. (Of course, if the trust is a bank holding company, it is subject to the same limitations of this subpart with respect to its nonbank securities and activities that apply to any other bank holding company.)

While the exception for the acquisition of nonbank shares and assets in a fiduciary capacity contained in section 4(c)(4) of the BHC Act is limited to such acquisitions made by a subsidiary bank, the proposed regulation extends the exception for fiduciary acquisition of nonbank shares and assets to those made by a nonbank company. This interpretation is being proposed in recognition of the fact that there are nonbank companies, including nonbank subsidiaries of bank holding companies, that hold securities and assets in a fiduciary capacity.

Statutory reference: 12 U.S.C. 1843(c)(4).

4. *Securities eligible for investment by a national bank.* This exemption derives from section 4(c)(5) of the BHC Act and permits a bank holding company to acquire directly or through a nonbank subsidiary securities of the kinds and amounts that are explicitly eligible by federal statute for investment by a national bank. Such investments, the authorization for which is contained in 12 U.S.C. 24, Par. Seventh, include securities issued by Federal Home Loan Banks, the Federal National Mortgage Association, and the Government National Mortgage Association, and stock issued by a safe-deposit company or agricultural credit corporation. (See discussion below of § 225.22(d) concerning investments that may be made by subsidiary banks of a bank holding company.)

The limitation to "explicitly eligible" investments was adopted by the Board in 1971 to prevent section 4(c)(5) of the BHC Act from being used to circumvent the requirements of section 4(c)(8). For example, a bank holding company may not acquire a consumer finance company without prior Board approval on the ground that a national bank is permitted by agency rule to own such a company. For the same reason, the Board believes that section 4(c)(5) should not be interpreted to exempt investments in bank service corporations under the Bank Service Corporation Act amendments in section 709 of the Garn-St Germain Act since these amendments, while greatly expanding the permissible services of such corporations, evidence an intent to limit the activities to those permissible under section 4(c)(8) of the BHC Act. The proposed regulation specifically excludes investments in bank service corporations.

Statutory reference: 12 U.S.C. 1843(c)(5), 24.

Current regulation: 12 CFR 225.4(e).

5. *Securities totalling 5 percent or less of a company.* This provision, which is derived from section 4(c)(6) of the BHC Act, permits passive investments by a bank holding company or subsidiary so long as the investment in a company or property does not amount to more than five percent of any class of voting securities of the company or more than a five percent interest in the property. The regulation codifies the Board's position, as reflected in a published interpretation, that section 4(c)(6) may only be used for passive investments and is not authority for a bank holding company to engage in entrepreneurial activity through the company or property in which the investment is made (12 CFR 225.137).

Statutory reference: 12 U.S.C. 1843(c)(6).

6. *Securities of investment company.* Under section 4(c)(7) of the BHC Act, a bank holding company may invest in an investment company that limits its activities to investing in securities that do not amount to more than five percent of any class of voting securities of any company.

Statutory reference: 12 U.S.C. 1843(c)(7).

7. *Assets acquired in the ordinary course of business.* Prior approval of the Board is not required for the acquisition of certain assets in the ordinary course of business, subject to the Board's interpretation of "ordinary course of business" in 12 CFR 225.132. Acquisitions exempt under this provision may not represent all or substantially all the assets of a subsidiary, division, department, or office or the employees of the selling company. This proposal, together with the next paragraph, represents a modification of the proposal that was issued several years ago (Docket No. R–0005) and supersedes that rulemaking proceeding.

8. *Asset acquisitions by consumer finance or mortgage company.* This provision establishes an exemption from section 4 of the BHC Act for a consumer finance or mortgage company to acquire

VOL 48 ISS 102 MAY 25 1983 UMI

assets of an office(s) engaged in making consumer loans, provided the acquisition amounts to no more than 10 percent of the assets of the acquiring consumer finance of mortgage company or $10 million, whichever is less. For purposes of this exemption, a consumer loan is any loan the proceeds of which are used for personal, family or household purposes.

The Board is proposing this exemption to promote competitive equity between holding company affiliates and independent companies in the consumer finance and mortgage banking industries. These independent companies buy and sell offices frequently and generally need not await regulatory approval. The Board believes that the BHC Act should not be interpreted to limit unduly the normal business operations of a nonbank affiliate of a bank holding company, as long as the exemption is not used to eliminate a competitor.

The proposed regulation indicates that the Board may withdraw the authority to make acquisitions under this exemption by notifying the bank holding company. It is contemplated that the Board would withdraw this authority only in unusual circumstances, for example, where the financial condition of the bank holding company or its subsidiaries does not warrant futher expansion.

Section 225.22(d) Acquisition of securities by subsidiary banks

This provision restates § 225.4(e) of the current Regulation Y concerning acquisitions by subsidiary banks of a bank holding company. Under the present and proposed language, a national bank or its subsidiary may acquire or retain shares in accordance with the rules and regulations of the Comptroller of the Currency.

In addition, for purposes of federal law, a state-chartered bank or its subsidiary may:

(i) acquire or retain shares if such shares are of the kinds and amounts explicitly eligible by federal statute for investment by a national bank; and

(ii) acquire or retain all of the shares (except directors' qualifying shares) of a company that engages solely in activities in which the parent bank may engage, at locations at which the bank may engage in the activity, and subject to the same limitations as if the bank were engaging in the activity directly.

Statutory reference: 12 U.S.C. 1843(c)(5).

Section 225.22(e) Activities and securities of new bank holding companies

This provision incorporates section 4(a)(2) of the BHC Act, which permits a company becoming a bank holding company a period of two years to bring its nonbanking activities and investments into conformity with section 4. The two-year period may be extended by the Board for three additional one-year periods.

A bank holding company may not further extend the divestiture period by forming a new bank holding company and transferring its bank and nonconforming activities to the new company to evade the requirements of the Act. Thus, consistent with section 2(a)(6) of the BHC Act, a successor to a bank holding company, as defined in section 2(e) of the BHC Act, would have to conform to any divestiture period to which the predecessor bank holding company was subject.

Statutory reference: 12 U.S.C. 1841(a)(6) and (e); 1843(a)(2).

Section 225.22(f) Grandfathered activities and securities

This provision incorporates the exemptions contained in sections 4(a)((2) and 4(c)(11) of the BHC Act, which provide certain grandfather privileges to a "company covered in 1970" (i.e., a company that became a bank holding company as a result of the 1970 Amendments to the BHC Act and would have been a bank holding company on June 30, 1968 if those amendments had been in effect then). Generally, such a company may continue to hold those interests and to engage in those activities that it held or engaged in on June 30, 1968, and may expand such activities, including by the formation of a new company to engage in such activities. Subsidiaries or activities acquired after June 30, 1968, pursuant to a binding written contract entered into prior to June 30, 1968, are similarly grandfathered. As provided in section 4(a)(2) of the BHC Act, the Board may find, after notice to the bank holding company, that divestiture of grandfathered activities is necessary to ensure safe and sound operations or to avoid certain anticompetitive effects.

Statutory reference: 12 U.S.C. 1843(a)(2) and (c)(11).

Section 225.22(g) Securities or activities exempt under Regulation K

This provision exempts securities acquired or activities engaged in by a bank holding company under the authority of the Board's Regulation K, "International Banking Operations" (12 CFR Part 211).

Statutory reference: 12 U.S.C. 1843(c)(9) and (13); 12 U.S.C. 3106.

Section 225.23—Nonbanking Activities Requiring Board Approval

The principal authority for bank holding companies to engage in nonbanking activities is set forth in section 4(c)(8) of the BHC Act, which was revised and expanded by the 1970 Amendments to the Act. That section provides generally that a bank holding company may seek Board approval to engage in, or acquire shares of a company engaged in, activities that the Board has determined, after notice and opportunity for hearing, "to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." The statute provides that the Board may make this determination by order or by regulation. In the exercise of its rulemaking authority, the Board has to date determined that 14 activities are "closely related to banking."

Except for insurance agency activities descussed below, the proposed regulation incorporates the description of the activities contained in the current regulation, with only minor, nonsubstantive changes intended to restate the description in simpler language. Some descriptions of activities have not been simplified where they were the result of extensive regulatory proceedings and were upheld in their present form following judicial review. The revised list has been reduced to 13 activities by combining the making and servicing of loans. No comment is requested on the question of the appropriateness of the Board's determination that the listed activities are closely related to banking since such comment was reeived and considered in earlier proceedings.

In addition, the Board is proposing to add to the list five nonbanking activities that the Board has previously determined by order to be closely related to banking and therefore permissible for particular bank holding companies. The Board invites comment on whether they should be added to the list or modified in any respect, so that they would be permissible for bank holding companies generally. These activities are: issuing money orders with a face value of $1,000 or less; arranging commercial real estate equity financing; underwriting and dealing in certain federal, state, and municipal securities; acting as a futures commission merchant for certain financial assets; and offering certain foreign exchange services and

advice. In a separate proceeding, the Board has also proposed to amend the regulation to include providing certain securities brokerage services that were approved by order (48 FR 7746, Docket No. R–0455, Feb. 22, 1983). As indicated above, the Board also invites regulatory proposals for additional nonbanking activities.

For ease of reference, the descriptions of permissible data processing activities and courier activities include providing such services for the internal operations of the bank holding company and its subsidiaries. Such activities, if engaged in solely for the internal operations of the bank holding company, would be permissible on the basis of section 4(a)(2) or 4(c)(1)(C) of the BHC Act. The Board will consider deleting these provisions, which are also contained in the current regulation, if commenters consider their retention in the regulation misleading.

Set forth below in summary form is a list of the 13 current activities and the 5 additional proposed activities, together with citations to the current regulation and the *Federal Reserve Bulletin* containing the regulatory action of the Board, and judicial decisions relating to the Board's determinations. For the five proposed activities, a citation is given to the case where the activity was approved for a particular bank holding company.

(1) *Making and servicing loans.* 12 CFR 225.4(a) (1) and (3); 57 *Federal Reserve Bulletin* 512 (1971).

(2) *Industrial banking.* 12 CFR 225.4(a)(2); 57 *Federal Reserve Bulletin* 512, 513 (1971).

(3) *Trust company functions.* 12 CFR 225.4(a)(4); 57 *Federal Reserve Bulletin* 512, 513 (1971); 60 *Federal Reserve Bulletin* 446 and 504 (1974). An organization under this paragraph would usually be chartered by state or federal authorities to engage in trust activities and would be subject to regulation and examination by its chartering authority. The trust activities intended to be permitted under this section are traditional activities carried on by trust companies generally.

(4) *Investment or financial advice.* 12 CFR 225.4(a)(5); 57 *Federal Reserve Bulletin* 512, 513 (1971); 58 *Federal Reserve Bulletin* 149 and 571 (1972); *Board of Governors* v. *Investment Company institute, 450 U.S. 46 (1981).*

As reflected in a footnote to the current regulation, investment advising is to be contrasted with "management consulting" which the Board views as including, but not limited to, the provision of analysis or advice as to a firm's (i) purchasing operations, such as inventory control, sources of supply, and cost minimization subject to constraints; (ii) production operations, such as quality control, work measurement, product methods, scheduling shifts, time and motion studies, and safety standards; (iii) marketing operations, such as market testing, advertising programs, market development, packaging, and brand development; (iv) planning operations, such as demand and cost projections, plant location, program planning, corporate acquisitions and mergers, and determination of long-term and short-term goals; (v) personnel operations, such as recruitment, training, incentive programs, employee compensation, and management-personnel relations; (vi) internal operations, such as taxes, corporate organization, budgeting systems, budget control, data processing systems evaluation, and efficiency evaluation; or (vii) research operations, such as product development, basic research, and product design and innovation. The Board has determined that general management consulting—as opposed to management consulting to depository institutions—is not an activity that is so closely related to banking or managing or controlling banks as to be a proper incident thereto.

(5) *Leasing.* 12 CFR 225.4(a)(6) (i) and (ii); 57 *Federal Reserve Bulletin* 512, 513 (1971); 60 *Federal Reserve Bulletin* 284, 285–86 (1974); 62 *Federal Reserve Bulletin* 944 (1976). The proposed regulation combines the provisions of the current regulation concerning personal and real property leasing, since those provisions are nearly identical.

(6) *Community development.* 12 CFR 225.4(a)(7); 12 CFR 225.127; 57 *Federal Reserve Bulletin* 512, 513 (1971). While this provision is not intended to allow for projects designed essentially for commercial gain, the Board believes bank holding companies should have flexibility in making investments or charitable contributions that result in or are designed for community improvement, and the receipt of modest profits would not be inconsistent with the nature of this activity.

(7) *Data processing.* 12 CFR 225.4(a)(8); 57 *Federal Reserve Bulletin* 512, 513 (1971); 68 *Federal Reserve Bulletin* 552 (1982).

(8) *Insurance sales.* 12 CFR 225.4(a)(9); 57 *Federal Reserve Bulletin* 674, 674–75 (1971); 65 *Federal Reserve Bulletin* 924 (1979); 67 *Federal Reserve Bulletin* 629 (1981). In its interpretation concerning this activity, the Board describes types of insurance that are regarded as directly related to an extension of credit. (12 CFR 225.128.) Several of these activities have been limited or prohibited by the amendments to section 4(c)(8) of the BHC Act made by Title VI of Garn-St Germain. The Board is reviewing the issues raised by the amendment in Garn-St Germain and will amend Regulation Y to reflect the resolution of these issues. In the interim, the Board will consider applications from companies to engage in insurance activities that the company believes are permissible under the provisions of Garn-St Germain.

(9) *Insurance underwriting.* 12 CFR 225.4(a)(10); 59 *Federal Reserve Bulletin* 19, 20 (1973). As stated in the current and proposed regulation, to assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. As reflected in a current interpretation, the Board also expects that once an application has been approved on this basis, a bank holding company will provide these benefits on a continuing basis by adjusting its rates and services in relation to adjustments in the *primo facie* rates provided by state law (12 CFR 225.135).

(10) *Courier services.* 12 CFR 225.4(a)(11); 59 *Federal Reserve Bulletin* 892 (1973); *National Courier Ass'n* v. *Board of Governors,* 516 F.2d 1229 (D.C. Cir. 1975). The Board's interpretation at 12 CFR 225.129 provides additional conditions on bank holding company performance of this activity. All applications for this activity must be acted on by the Board rather than the Reserve Banks, until the Board gains experience with these applications.

(11) *Management consulting for depository institutions.* 12 CFR 225.4(a)(12); 60 *Federal Reserve Bulletin* 223 and 446 (1974); 68 *Federal Reserve Bulletin* 237, 237–38 (1982). The Board's interpretation at 12 CFR 225.131 specifically describes permissible management consulting activities and provides an exemption from the prohibition against holding shares of a client bank where the shares are acquired in satisfaction of a debt previously contracted or held in a fiduciary capacity without sole voting authority.

(12) *Money orders, savings bonds, and travelers checks.* 12 CFR 225.4a(13); 65 *Federal Reserve Bulletin* 249, 250 (1979); 67 *Federal Reserve Bulletin* 912 (1981). The proposed revision regarding this

VOL 48 ISS 102 MAY 25 1983 UMI

activity includes the issuance of money orders having a face value of $1,000 or less. That additional activity was approved by the Board by order for a particular bank holding company (63 *Federal Reserve Bulletin* 416 (1977)).

(13) *Real estate appraising.* 12 CFR 225.4(a)(14); 68 *Federal Reserve Bulletin* 975 (1980).

(14) *Commercial real estate equity financing.* 68 *Federal Reserve Bulletin* 647 (1982).

(15) *Underwriting and dealing in government obligations.* 64 *Federal Reserve Bulletin* 222, 223 (1978); 65 *Federal Reserve Bulletin* 363 (1979); 68 *Federal Reserve Bulletin* 249 (1982)

(16) *Foreign-exchange advisory and transactional services.* 69 *Federal Reserve Bulletin* 221 (1983).

(17) *Futures commission merchant.* 63 *Federal Reserve Bulletin* 951 (1977); 68 *Federal Reserve Bulletin* 514 (1982).

Under the proposal, a bank holding company may engage in FCM activities pursuant to this provision on major domestic exchanges and such foreign commodities or financial futures exchanges as the Board has considered in previous applications. The Board will consider applications to engage in FCM activities on other foreign exchanges on a case-by-case basis. If this proposal is approved, all applications to undertake this activity would be acted on by the Board, not the Reserve Banks, until the Board gains more experience in this area.

Statutory reference: 12 U.S.C. 1843(c)(8).

Section 225.24—Factors Considered in Deciding Applications Under Subpart C

Section 225.24(a) Criteria for activities previously determined to be closely related to banking

This provision incorporates tha statutory test in section 4(c)(8) of the BHC Act, which requires the Board to weigh the public benefits that are likely to be derived by a particular bank holding company engaging in a specific nonbanking activity against the possible adverse effects in order to determine whether the proposal should be approved. The enumeration of benefits and adverse effects in the regulation, as in the statute, is meant to be illustrative and not exhaustive and, therefore, the Board is not precluded from considering other factors in deciding an application.

Section 4(c)(8) of the BHC Act allows the Board to differentiate between activities commenced *de novo* and those commenced through the acquisition of a going concern. Accordingly, the proposed regulation reflects the general finding of the Board that performance of an activity by a bank holding company on a *de novo* basis is likely to yield public benefits.

Statutory reference: 12 U.S.C. 1843(c)(8).

Section 225.24(b) Criteria for other nonbanking activities

Section 4(c)(8) of the BHC Act provides a two-step test for determining the permissibility of nonbanking activities for bank holding companies. First, the Board must determine that the activity is closely related to banking. Second, having made that finding, the Board must determine whether the activity is "a proper incident" to banking by weighing the benefits of a particular bank holding company engaging in a specific nonbanking activity against the possible adverse effects. (*Board of Governors* v. *Investment Company Institute*, 450 U.S. 46 (1981); *National Courier Ass'n.* v. *Board of Governors*, 516 F.2d 1229 (D.C. Cir. 1975).)

Under the provisions of the BHC Act, the Board has broad discretion in determining whether an activity is closely related to banking. In making this determination, the Board has found the following guidelines established by the court to be useful:

(1) banks generally have provided the proposed services;

(2) banks generally provide services that are operationally or functionally so similar to the proposed service as to equip them particularly well to provide the proposed service; and

(3) banks generally provide services that are so integrally related to the proposed service as to require their provision in a specialized form. (*National Courier Ass'n.* v. *Board of Governors*, F.2d 1229 (D.C. Cir. 1975).)

In addition, the Board consider other factors in deciding what activities are closely related to banking. (*Alabama Association of Insurance Agents* v. *Board of Governors*, 533 F.2d 224, 241 (5th Cir. 1976), *cert. denied*, 435 U.S. 904 (1978); *Board of Governors* v. *Investment Company Institute*, 450 U.S. 46, 55 (1981).)

Statutory reference: 12 U.S.C. 1843(c)(8).

Section 225.24(c) Financial and managerial criteria

In addition to the factors specified in § 225.24(a) of the regulation, derived from section 4(c)(8) of the BHC Act, the Board's evaluation of an application to engage in any nonbanking activity includes a review of the financial and managerial resources of the bank holding company, its subsidiaries and the company to be acquired, and the effect of the transaction on their resources. For example, a proposal that may detract from the financial condition of the applicant bank holding company would be weighed as an adverse factor in the Board's overall evaluation of the application.

Statutory reference: 12 U.S.C. 1843(c)(8).

Section 225.25—Procedures for Applications, Notices, and Hearings

The proposed regulation sets out the procedures for filing applications for Board approval to engage in nonbanking activities. As discussed below, where a bank holding company has received Board approval to engage in an activity in a particular state, subsequent expansion of that activity by opening additional offices or expanding its business in that state (other than by acquiring companies) will generally not require additional applications. In addition, expedited procedures for certain small acquisitions of going concerns engaged in permissible nonbanking activities are being proposed in order to reduce the regulatory burden on bank holding companies.

Statutory reference: 12 U.S.C. 1843(c)(8); 1844(b).

Current regulation: 12 CFR 225.4(b).

225.25(a)(1) Filing application

An application for board approval to engage in an activity that the Board has determined to be closely related to banking must be filed with the appropriate Reserve Bank.[2] In filing an application, the bank holding company should specify the activities in which it proposes to engage. For example, a bank holding company seeking to engage in mortgage lending activities should so specify, rather than referring to the general category of making, acquiring, or servicing loans under § 25.23(b)(1).

As indicated in § 225.23(a)(2), the Board will entertain applications to engage in other nonbanking activities that a bank holding company believes to be closely related to banking as to be a proper incident thereto. Any bank holding company may also request the Board to consider an activity previously rejected as impermissible, if the bank holding company can demonstrate that circumstances have changed since the Board's determination. In either case,

[2] In most cases, an application to engage in a permissible nonbanking activity will be acted upon by a Reserve Bank pursuant to delegated authority from the Board. The Board has decided, however, that applications involving courier activities or joint ventures should be acted upon by the Board, rather than the Reserve Bank.

the bank holding company must file its application in accordance with this section, provide reasons for its belief that the activity is closely related to banking or to managing or controlling banks within the meaning of section 4(c)(8) of the BHC Act, and describe the public benefits likely to result from the bank holding company engaging in the activity.

Statutory reference: 12 U.S.C. 1843(c)(8).

Section 225.25(a)(2) Geographic scope of nonbanking activities

Under the current regulation, an application is required to open each new office or to expand the service area of a previously approved nonbanking activity. The requirement for individual office approvals was imposed by the Board in 1971 in implementing the new nonbanking authority given bank holding companies under the 1970 Amendments to the BHC Act. However, the Board does not believe that the BHC Act requires an application for such *de novo* expansion. Section 4 of the BHC Act requires only that the Board's prior approval be obtained by a bank holding company to engage in a nonbank activity or to acquire shares of a company engaged in nonbank activities.

Based on its experience in administering this provision, the Board has found that, where the bank holding company and its subsidiaries are in satisfactory financial condition, the establishment of *de novo* offices has had insignificant adverse effects, particularly on competition and the concentration of resources. Hence, such applications have been uniformly approved. In light of this experience and in order to reduce the burden on bank holding companies, the Board believes it is appropriate to modify significantly the present application procedures by eliminating the requirement for individual applications for *de novo* expansion in a previously approved activity. The Board notes that section 4(c)(8) of the BHC Act provides that, in acting on applications under that section, the Board may distinguish between activities established *de novo* and the acquisition of a going concern.

Under the procedures proposed in this provision, a bank holding company will specify in its initial application for approval the state or states in which the bank holding company intends to engage in a nonbanking activity or to acquire a going concern engaged in a nonbanking activity. If the application is approved, the bank holding company may open new offices or form new subsidiaries to engage in the activity in any state(s) specified in the application without any additional Board approval. This authority is limited to engaging in the particular activity specified by the bank holding company in its application to enter a state. For example, a bank holding company that applied to engage in consumer finance in a particular state may not open offices or expand into mortgage banking without Board approval even though consumer finance and mortgage banking are both within the authority of lending in § 225.23(b)(1).

De novo expansion will continue to be monitored by the Board in connection with its ongoing supervision and regulation of the bank holding company. The regulation also authorizes the Board to require an application for permission to open a new office. This authority is expected to be exercised rarely, however, principally where the company is experiencing financial difficulty.

The bank holding company must engage in the activity or acquire the company engaged in the activity in each state(s) specified in the application within a period of two years from the Board's approval. For any state specified in the application where it fails to engage in the activity within two years, the holding company's authority to expand in that state would lapse and a new 4(c)(8) application to engage in the activity in that state must be filed in accordance with the procedures of this subpart. In administering this provision the Board will regard a bank holding company as having engaged in an activity in a particular state if, for example, it acquires a going concern, opens offices, or solicits customers in the state.

With respect to companies that have received approval in the past to engage in an activity in a particular state at specific offices or on some other limited basis under the Board's current Regulation Y, and wish to expand *de novo* within the state under the Board's proposed regulation, the Board proposes to permit the filing of a letter request for approval instead of the application normally required. (The letter should contain the date the company received approval to engage in the activity in a state and the extent of its authority.) Notice of these requests would be published in the **Federal Register**, and the requests would be acted upon after the close of the comment period. Such a procedure is being proposed as a matter of fairness to potential competitors who may not have commented on the company's earlier application due to the limited scope of the earlier proposal. (In such a case, of course, the company's earlier limited authorization to engage in the activity would not be subject to challenge.)

If, however, the holding company has received the Board's approval to engage in a given activity throughout a state, no further approval would be required to open additional offices within that state, nor would the holding company be required to file the type of letter referred to in the previous paragraph. To avoid any misunderstandings in this situation, the company should confer with its Reserve Bank about its existing authority before expanding on the basis of this section of the regulation.

As a further effort to reduce the regulatory burden, the Board is considering whether to eliminate the requirement for state-by-state approval for *de novo* expansion of permissible nonbanking activities. Under this alternative approach, a bank holding company would be permitted, without further application to the Board, to open new offices anywhere in the country that are engaged in nonbanking activities for which the bank holding company has previously received Board approval. Comments are specifically invited on this alternative, and the Board may adopt it as part of its final action on this proposed revision of Regulation Y.

Statutory reference: 12 U.S.C. 1843(c)(8); 1844(b).

Current regulation: 12 CFR 225.4 (b)(1), (c)(2).

Section 225.25(b)–(d) Applications and notices

These provisions are similar to the procedures for applications for bank acquisitions in § 225.14(a)–(d) of Subpart B of the proposed regulation discussed above. They establish time limits for accepting nonbanking applications for processing, require prompt publication of notice in the **Federal Register** inviting public comment on such applications, and provide for a prompt decision on applications, generally within 30 days of acceptance of an application regarding an activity on the Regulation Y list of permissible activities.

Under current practice, no time period is specified for publishing notice of a proposal to engage in a new nonbanking activity not on the list of those already found permissible by the Board. The decision whether to publish notice of the proposal for comment is currently made by the Board at a formal Board meeting. As a result, processing of such proposals has at times been delayed. In order to expedite the processing of these proposals, under the proposed regulation the Board will send notice of a proposed new activity to the **Federal**

VOL 48 ISS 102 MAY 25 1983 UMI

Register within 10 business days after receipt of the application from the Reserve Bank, unless there is no legal basis for publication of the activity. The notice will invite comment generally for a period of 30 days.

This 10-day period for sending notice to the Federal Register would not apply to a proposal involving a nonbanking activity that the Board has previously determined not to be closely related to banking. A decision whether to publish such a notice would be made only after the Board determines whether circumstances have changed to warrant reconsideration of the activity.

The Board requests comment on whether this proposal to publish routinely notice of proposed new nonbank activities will impose undue burdens on the public in commenting on an activity about which the Board has made no preliminary judgment. In this connection, the Board will consider as an alternative a provision that would authorize the extension of this 10-day period for publication for an additional 30 days in order to allow for full Board consideration of whether to publish notice of a proposed new activity. In the event the Board decides not to publish the proposal, the Board will notify the applicant of the reasons for the decision.

The proposed revision omits a provision in the current regulation that provides for automatic approval, at the end of a 45-day period, of applications to engage *de novo* in activities on the list of those permissible for bank holding companies. In practice, the Federal Reserve System issues letters of approval for every application to engage in permissible *de novo* nonbanking activities under section 4 of the BHC Act, and thus, the automatic approval procedure has not generally been followed. The omission of this provision should not have any adverse impact on applicants, however, since the Board proposes to reduce substantially the number of required applications for *de novo* activities by exempting from application requirements expansion in a state where nonbank operations have been approved for a bank holding company. Moreover, the remaining applications for *de novo* entry into a state will ordinarily be approved within 30 days of acceptance by the Reserve Bank.

Statutory reference: 12 U.S.C. 1843(c)(8).

Current regulation: 12 CFR 225.4(a).

Section 225.25(e) Simplified procedures for small acquisitions

In response to requests that the Board reinstitute the simplified procedures in 12 CFR 225.4(b)(3) (which were suspended in 1971) and to establish expedited consideration for small acquisitions that raise no significant issues, the Board is proposing in this section to adopt a simplified notice procedure for small acquisitions involving permissible nonbanking activities described in § 225.23. Under the proposal, a bank holding company may apply to acquire certain voting securities or assets of a company engaged in activities permissible under § 225.23 by filing with the Reserve Bank a brief description of the proposed transaction and a notice of the proposed acquisition that appeared in a newspaper of general circulation in the area(s) to be served as a result of the acquisition.

The description of the proposed transaction should include information responsible to items 1, 4 (a, c, d), 5 and 6 of Exhibit B and item 3 of Exhibit C in the Board's F.R. Y–4 application form. The newspaper notice must provide not less than 10 days for public comment. This procedure applies only to an acquisition where the book value of the assets acquired or the gross consideration paid for the securities or assets is $10 million or less and the bank holding company has previously received approval to engage in the activity in the relevant state. Within five business days after the close of the comment period the Reserve Bank will notify the bank holding company that the proposed acquisition has been approved pursuant to delegated authority or that the application has been referred to the Board if action is not appropriate under delegated authority.

The new notice procedure being proposed represents a significant reduction in the time and expense associated with making small acquisitions involving permissible activiies. It eliminates the need for a regular application and reduces the time a bank holding company must wait before making an acquisition, i.e., from a maximum of 90 days to usually 15 days after the date the newspaper notice is published. It should also be noted that the proposed notice procedure may be used for acquisitions involving any of the nonbanking activities in § 225.23 that the Board has determined to be closely related to banking, whereas the suspended simplified procedures were generally only available for the acquisition of small finance companies and certain insurance agency activities.

The Board's experience in administering the BHC Act suggests that the type of acquisitions that would be permitted under the new notice procedure would not result in adverse effects and would be in the public interest. In those instances where an acquisition might result in adverse effects, or where substantive adverse comments raising a material issue are filed in response to the newspaper notice, the Reserve Bank may extend the period for approval of refer the application to the Board for consideration.

Statutory reference: 12 U.S.C. 1843(c)(8); 1844(b).

Current regulations: 12 CFR 225.4(b)(3).

Section 225.25(f) Hearing

Section 4(c)(8) of the BHC Act requires the Board to provide notice and opportunity for hearing in connection with an application by a bank holding company to engage in an activity that is or may be closely related to banking. Various courts have held that the Board is required to hold a hearing only where material issues of fact are in dispute (*Independent Ins. Agents of America, Inc.* v. *Board of Governors,* 646 F.2d 868 (4th Cir. 1981); *Independent Inc. Agents of America, Inc.* v. *Board of Governors,* 658 F.2d 571 (8th Cir. 1981)).

Statutory reference; 12 U.S.C. 1843(c)(8).

Section 225.25(g) Approval through failure to act

Under section 4(c) of the BHC Act, an application under section 4(c)(8) of the BHC Act that the Board fails to act on within 91 calendar days of submission of the complete record to the Board is deemed approved. This statutory provision is identical to that provided in section 3 of the BHC Act with respect to bank acquisitions, and the regulatory provision in this subpart incorporates by reference that proposed in § 225.14(f) of Subpart B for banking acquisitions.

Statutory reference: 12 U.S.C. 1843(c).

Section 225.(h) Emergency thrift institution acquisitions

This provision implements the Board's authority under section 118 of Garn-St Germain to dispense with the notice and hearing requirements of section 4(c)(8) of the BHC Act if the Board finds that an emergency exists involving a thrift institution.

Statutory reference: 12 U.S.C. 1843(c)(8).

V. SUBPART D—CONTROL AND DIVESTITURE PROCEEDINGS

Section 225.31—Control Proceedings

Section 225.31(a) Preliminary determination of control

Under sections 2(a)(2)(C) and 2(d)(3) of the BHC Act, the Board may determine, after notice and opportunity for hearing, that a company exercises or has the power to exercise a controlling influence over the management and policies of a bank or other company, even though the company may not otherwise have control under § 225.2(d) of Subpart A of the proposed regulation. Section 225.2 (b) and (c) of the current regulation describe circumstances and procedures under which control determinations may be made. While these provisions have been reorganized and simplified in the proposed regulation, the basic approach of the current provisions has not been altered. Where facts and circumstances are present or information is received to indicate that a company exercises a controlling influence over the management or policies of a bank or another company, the Reserve Bank will review the relationship to determine if it would be appropriate for the Board to issue a preliminary determination of control.

While it is anticipated that most situations involving possible control relationships will be handled informally, where discussion does not resolve the issue, the Board may institute a formal proceeding by issuing a preliminary determination of control under the procedures described in this section. In those situations where a preliminary determination of control is issued, the company will be given notice of the facts and the circumstances upon which the determination is based and provided an opportunity to contest the presumption.

Statutory reference: 12 U.S.C. 1841 (a)(2)(C) and (d)(3).

Current regulation: 12 CFR 225.2(c).

Section 225.31(b) Response to preliminary determination of control

Upon receipt of the notice, the company would have 30 days to respond. The company may agree to the determination and submit for the Board's approval a specific plan for prompt termination of the control relationship, or alternatively, file an application for Board approval to retain the control relationship under Subpart B of the regulation in the case of a bank or a bank holding company, or Subpart C in the case of a nonbanking concern. If the company contests the ruling, it is required to submit its response to the preliminary determination of control along with any request for a hearing.

Statutory reference: 12 U.S.C. 1841 (a)(2)(C) and (d)(3) and 1844(b).

Current regulation: 12 CFR 225.2(c).

Section 225.31(c) Hearing and final determination

If there are material issues of fact in dispute, or if it is otherwise appropriate, the Board may order a hearing or other proceeding for the purpose of taking testimony and receiving evidence on the issue of whether a company exercises or has the power to exercise a controlling influence over a bank or other company. There is no statutory requirement that the Board hold a hearing with respect to a determination that a company controls voting securities of a bank or company. The Board may, however, order a hearing if appropriate in such a situation. After reviewing the evidence on the preliminary determination of control, including any record of a hearing, the Board will issue an order directing the company to take appropriate action.

Statutory reference: 12 U.S.C. 1841 (a)(2)(C) and (d)(3).

Current regulation: 12 CFR 225.2(c).

Section 225.31(d) Rebuttable presumptions of control

In 1971, the Board adopted five rebuttable presumptions of control for use in control proceedings. Two of these presumptions relate to control of voting securities; three relate to the existence of a controlling influence over the management or policies of a bank or other company. Where voting securities are deemed to be controlled by a company under this provision, they would be aggregated with any securities of the other company held by the company in other capacities (see § 225.2(d)(2) of the proposed regulation) to determine whether divestiture or an application is required. The proposed regulation simplifies the language of these presumptions without altering their substance. As discussed above, the conclusive presumption of control contained in § 225.2(a) of the current regulation relating to "stapled shares" arrangements is incorporated into the definition of "control" in the proposed regulation. It is contemplated that most situations involving these presumptions of control (or any other situation where the facts suggest control) will be resolved through informal discussion with the Reserve Bank.

Statutory reference: 12 U.S.C. 1841 (a)(2)(C) and (d)(3).

Current regulation: 12 CFR 225.2(b).

Section 225.32—Divestiture Proceedings

Section 225.32(a) Ineffective divestitures

Divestitures are at times required by the Board under the BHC Act and include divestitutes of DPC assets, liquidating assets, and impermissible nonbanking interests and activities. Section 2(g)(3) of the BHC Act provides generally that a company divesting shares to any other company that is indebted to the transferring company or has one or more management officials in common with the transferring company is deemed to continue to own or control the divested shares unless the Board determines, after opportunity for hearing, that the transferring company is not capable of controlling the company or individual that receives the divested shares. The provisions of this section of the proposed regulation set forth the basic requirements of the statute, the procedures for requesting a determination of noncontrol, and a description of the standards applied in reviewing the effectiveness of divestitures. There are no significant changes from current procedures.

In a previous interpretation, the Board (1) exempted certain routine business or personal credit from the definition of indebtedness, (2) provided that references to transferor and transferee in the statute included parents and subsidiaries of each, and (3) indicated that the presumption of continued control extends to property as well as shares (12 CFR 225.139). This interpretation is codified in the proposed regulation, and may be rescinded if the proposed provisions are adopted by the Board.

Statutory reference: 12 U.S.C. 1841(g)(3).

Section 225.32 (b) and (c) Request for divestiture determination; hearing

Any company that is deemed to control an acquiring person as a result of the presumptions set forth in this regulation may request a determination that the divestiture is effective notwithstanding the presumption. The company should submit a letter to the Board describing the transaction and setting forth the reasons why the company believes it does not control the acquiring person. Any request for a hearing should also be included in the letter. Under the proposal, if the Board finds there are material facts in dispute, the Board may order a hearing or other proceeding.

Statutory reference: 12 U.S.C. 1841(g)(3).

VOL 48 ISS 102 MAY 25 1983 UMI

Section 225.32(d) Standards for making divestiture determination

The proposed regulation sets out the factors that are generally considered in determining whether or not the divesting company controls the acquiring person. The first factor concerns the nature and extent of the indebtedness, and whether, as a result of the indebtedness, the divesting company would be capable of controlling the acquiring person. The second factor considered involves an assessment of the role of any interlocking officials in both the divesting company and the acquiring person. For example, if the interlocking official is an outside director who has no other relationship with the companies involved, it is more likely that a favorable determination would be issued.

Statutory reference: 12 U.S.C. 1841(g)(3); 1844(b).

Section 225.32(e) Final determination

After reviewing a company's request for a determination under this section, the Board will issue an order, which may be in the form of a letter, setting forth its determination as to the effectiveness of the divestiture.

Statutory reference: 12 U.S.C. 1841(g)(3); 1844(b).

Section 225.32(f) Review of Other Divestitures

This provision allows the Board to review a divestiture when a presumption of control under the statute or this regulation is not present. While it is not anticipated that this provision will be used frequently, the Board is, consistent with its authority to prevent evasions of the BHC Act, preserving its right to examine all divestitures.

Statutory reference: 12 U.S.C. 1844(b).

VI. SUBPART E—CHANGE IN BANK CONTROL

Section 225.41—Control Transactions Requiring Prior Notice

This section, which effectuates the Change in Bank Control Act (12 U.S.C. 1817(j)), is based for the most part on the existing provisions of section 225.7 of Regulation Y. (See also *Policy Statement on Change in Bank Control Act of 1978*, 1 F.R.R.S. 4–801.) The proposed section specifies those transactions involving the acquisition of voting securities of a state member bank or bank holding company for which 60 days' written notice must be given to the Board. Unless exempt under the Change in Bank Control Act or this subpart, any person or persons acting in concert must file prior notice with the Board if, after a proposed transaction, the acquiring person(s) will control or hold the power to vote 25 percent or more of any class of voting securities of a state member bank or bank holding company. Such voting power is defined as control under the Change in Bank Control Act. For the purposes of this section, a redemption of securities by a bank or bank holding company that increases any person's holdings to 25 percent or more of any class of voting securities, it triggers the rebuttable presumption described below, is an "acquisition" and requires the filing of a notice by that person.

The term "acting in concert" is not defined in the statute or the regulation. However, the Board regards this term as including two or more persons (which may also include a corporation or other entity) who have joined together informally through parallel action or intention for the purpose of acquiring voting securities of a bank or bank holding company. For example, a group of persons who have identified themselves as a group for purposes of the securities laws would constitute persons "acting in concert" for purposes of this section. Such an informal arrangement should be distinguished, however, from a formal agreement or contract among persons to purchase bank or bank holding company securities. A formal agreement among persons could result in the group being treated as a "company" within the meaning of section 2(c) of the BHC Act, and a purchase of bank securities by the group could be subject to Subpart B of the regulation instead of Subpart E.

In addition to control through the acquisition of 25 percent or more of a class of voting securities of a bank or bank holding company, the Board proposes to retain the presumption that the acquisition of between 10 percent and 25 percent of voting securities of a bank or bank holding company will also result in control, and thus requires prior notice, if either of two circumstances applies: (1) the institution being acquired has securities registered under the Securities Exchange Act of 1934 (12 U.S.C. 78*l*); or (2) after the transaction, no other person owns a greater percentage of that class of voting securities than the acquiring person. An acquiring person has the opportunity to rebut this presumption, but the Board's experience indicates that situations where the presumption has been rebutted successfully have been infrequent.

Statutory reference: 12 U.S.C. 1817(j)(1), (13).

Current regulation: 12 CFR 225.7(a).

Section 225.42—Transactions Not Requiring Prior Notice

The Bank Control Act specifically exempts from its coverage transactions that are otherwise subject to section 3 of the BHC Act or section 18 of the Federal Deposit Insurance Act (i.e., Bank Merger Act). In addition, the proposed regulation provides that certain other transactions do not require notice. These exemptions are essentially the same as in § 225.7(c) of the current regulation, except for a clarification of the exemption relating to proxy solicitation to indicate that the solicitation can be for a regular or special meeting of shareholders and the addition of an exemption for a stock dividend or split. As indicated in the current regulation, the exemption for the acquisition of voting securities of a foreign bank holding company does not extend to reports and information required under paragraphs 9, 10, and 12 of the Bank Control Act.

Statutory reference: 12 U.S.C. 1817(j)(13), (16).

Current regulation: 12 CFR 225.7(c).

Section 225.43—Procedures for Filing, Processing, and Acting on Notices

Section 225.43 (a) and (b) Filing notices; advice to bank supervisory agencies

This section sets forth the procedures for processing notices. Normally, notices are reviewed and acted upon by the appropriate Reserve Bank under delegated authority.

A notice required under this subpart must be filed with the appropriate Federal Reserve Bank at least 60 days prior to the contemplated consummation of a transaction. Information contained in the notice should conform to the notice form provided by the Reserve Bank and be responsive to every item specified in paragraph 6 of the Bank Control Act (12 U.S.C. section 1817(j)(6)). The Reserve Bank may waive any information requirement contained in the notice form, as well as require additional information as it deems appropriate. Once accepted, a copy of the notice is forwarded to the appropriate state bank supervisory agency if it relates to a state member bank; a copy of the notice is also forwarded to the Comptroller of the Currency and the Federal Deposit Insurance Corporation. In the case of a probable failure of a bank or bank holding company, the Board may modify the notice requirements of this section..

Statutory reference: 12 U.S.C. 1817(j)(1),(2),(6), and (11).

Current regulation: 12 CFR 225.7(b).

Section 225.43(c) Time period for Board action

A proposed transaction may be consummated 60 days after submission of an informationally complete notice to the Reserve Bank, unless the Board notifies the acquiring person of its disapproval of the proposed acquisition or of extension of the 60-day period for an additional 30 days. A proposed acquisition may be consummated before the expiration of the 60-day period if the Board notifies the acquiring party of its intention not to disapprove the acqusition.

The Board may return a notice at any time if it finds that the acquiring person has not furnished all the required information or has submitted material information that is substantially inaccurate. However, in unusual circumstances, rather than returning the notice as being incomplete, the Board may extend the time period further in order to permit an acquiring person to furnish the required information necessary to complete the processing.

Statutory reference: 12 U.S.C. 1817(j)(1).

Section 225.43(d) Investigation of notices

In investigating a Change in Bank Control notice, the Board may solicit or receive information or views from any source. The submission of information or presentation of views by any person other than the acquiring person, however, does not thereby afford that person status as a party to the proceeding or any standing or right to participate in the Board's decision on the notice.

Section 225.43(e) Disapproval and hearing

If the Board disapproves an acquisition, it must notify the acquiring person of its decision in writing and the reasons for its decision. The person will have 10 calendar days after receipt of the Board's disapproval decision to request a hearing. Any such hearing must be conducted in accordance with the Board's Rules of Practice for Formal Hearings and, at the conclusion of the hearing, the Board will issue an order either approving or disapproving the proposed acquisition on the basis of the record of the hearing.

Statutory reference: 12 U.S.C. 1817(j)(3) and (4).

Section 225.43(f) Factors considered in acting on notices

Paragraph 7 of the Change in Bank Control Act (12 U.S.C. 1817(j)(7)) describes the factors to be considered by the Board in disapproving a proposed acquisition. In assessing such factors, the proposed regulation provides that the Board will consider the information submitted in the notice, the views and recommendations of any supervisory agency, and any other information that is relevant to the statutory factors.

Statutory reference: 12 U.S.C. 1817(j)(7).

List of Subjects in 12 CFR Part 225

Banks, banking; Federal Reserve System; Holding companies; Reporting and recordkeeping requirements; Securities.

For the reasons set out in the preamble, and pursuant to the Board's authority under section 5(b) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(b)); section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and section 7(j)(13) of the Federal Deposit Insurance Act, as amended by the Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)(13)), it is proposed to revise 12 CFR Part 225 as follows:

PART 225—BANK HOLDING COMPANIES AND CHANGE IN BANK CONTROL

Subpart A—General Provisions

Sec.
225.1 Authority, purpose, and scope.
225.2 Definitions.
225.3 Administration.
225.4 Corporate practices.
225.5 Registration, reports, and inspections.
225.6 Penalties for violations.

Subpart B—Acquisition of Bank Securities or Assets

225.11 Transactions requiring Board approval.
225.12 Transactions not requiring Board approval.
225.13 Factors considered in deciding applications under Subpart B.
225.14 Procedures for applications, notices, and hearings.

Subpart C—Nonbanking Activities and Acquisitions of Bank Holding Companies

225.21 Permissible nonbanking activities and acquisitions; exempt bank holding companies.
225.22 Exempt nonbanking activities and acquisitions.
225.23 Nonbanking activities requiring Board approval.
225.24 Factors considered in deciding applications under Subpart C.
225.25 Procedures for applications, notices, and hearings.

Subpart D—Control and Divestiture Proceedings

225.31 Control proceedings.
225.32 Divestiture proceedings.

Subpart E—Change in Bank Control

Sec.
225.41 Control transactions requiring prior notice.
225.42 Transactions not requiring prior notice.
225.43 Procedures for filing, processing, and acting on notices.

Authority: Section 5(b) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844(b)); section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and section 7(j)(13) of the Federal Deposit Insurance Act, as amended by the Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)(13)).

Subpart A—General Provisions

§ 225.1 Authority, purpose, and scope.

(a) *Authority.* This Part (Regulation Y) is issued by the Board of Governors of the Federal Reserve System ("Board") under section 5(b) of the Banking Holding Company Act of 1956, as amended (12 U.S.C. 1844(b)) ("BHC Act"), under section 8 of the International Banking Act of 1978 (12 U.S.C. 3106), and under section 7(j)(13) of the Federal Deposit Insurance Act, as amended by the Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)(13)) ("Banking Control Act"). The BHC Act is codified at 12 U.S.C. 1841, *et. seq.*

(b) *Purpose.* The principal purposes of this Part are to regulate the acquisition of control of banks by companies and individuals, to define the nonbanking activities in which bank holding companies and foreign banking organizations with U.S. operations may engage, and to set forth the procedures for securing approval for such transactions and activities.

(c) *Scope.*

(1) Subpart A contains general provisions and definitions of terms used in this regulation.

(2) Subpart B governs acquisitions of bank or bank holding company securities and assets by bank holding companies or by any company that will become a bank holding company as a result of the acquisition.

(3) Subpart C defines the nonbanking activities in which bank holding companies and foreign banking organizations may engage directly or through a subsidiary. In addition, certain nonbanking activities conducted by foreign banking organizations and certain foreign activities conducted by bank holding companies are governed by the Board's Regulation K. (12 CFR Part 211 International Banking Operations).

(4) Subpart D specifies situations in which a company is presumed to exercise control over voting securities or a controlling influence over the

VOL

02
MY
25
1983
UMI

management or policies of a bank or other company, sets forth the procedures for making a control determination, and provides rules governing the effectiveness of divestitures by bank holding companies.

(5) Subpart E governs changes in bank control resulting from the acquisition by individuals or companies (other than bank holding companies) of voting securities of a bank holding company or state member bank of the Federal Reserve System.

§ 225.2 Definitions.

Except as modified in this section or unless the context otherwise requires, the terms used in this regulation have the same meanings as set forth in the relevant statutes.

(a)(1) "Bank" means any institution organized under the laws of the United States that accepts demand deposits and engages in the business of making commercial loans. For the purposes of this definition:

(i) "Demand deposits" means any deposit with transactional capability that as a matter of practice is payable on demand, and includes deposits accessible by check, draft, negotiable order of withdrawal, or other similar instrument;

(ii) "Commercial loans" means any loan other than a loan to an individual for personal, family, household, or charitable purposes, and includes the purchase of commercial paper, certificates of deposit, bankers' acceptances, and similar money market instruments, the extension of broker call loans, the sale of federal funds, and the deposit of interest-bearing funds; and

(iii) "United States" means the United States and include any state of the Unites States, the District of Columbia, any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands.

(2) "Bank" does not include:

(i) Any institution that does not do business in the United States except as an incident to its activities outside the United States;

(ii) Any institution the accounts of which are insured by the Federal Savings and Loan Insurance Corporation or any institution chartered by the Federal Home Loan Bank Board; or

(iii) "Agreement" or "Edge" corporations operating under sections 25 or 25(a) of the Federal Reserve Act (12 U.S.C. 601–604(a), 611–631).

(b)(1) "Bank holding company" means any company (including a bank) that has direct or indirect control of a bank, unless such control results from the ownership or control of:

(i) Securities held in good faith in a fiduciary capacity (other than as provided in paragraph (d)(2) (ii) and (iii) of this section) without sole discretionary voting authority, or as otherwise exempted under section 2(a)(5)(A) of the BHC Act;

(ii) Securities or voting rights held only for a reasonable period of time for the purpose of underwriting securities or participating in a proxy solicitation, as provided in section 2(a)(5) (B) and (C) of the BHC Act;

(iii) Securities acquired in satisfaction of debts previously contracted in good faith, as provided in section 2(a)(5)(D) of the BHC Act, if the securities are divested within two years of acquisition unless the time is extended by the Board; or

(iv) Securities of certain institutions owned by a thrift institution or a trust company, as provided in sections 2(a)(5)(E) and (F) of the BHC Act.

(2) Except for the purposes of § 225.4(b) of this subpart and Subpart E of this regulation or as otherwise provided in this regulation, the term "bank holding company" includes a "foreign banking organization" as defined in § 211.23 of the Board's Regulation K (12 CFR 211.23). For the purposes of Subpart B, the term bank holding company does not include a foreign banking organization that does not own or control a bank in the United States.

(c) "Company" includes any bank, corporation, general or limited partnership, association or similar organization, business trust, or any other trust unless by its terms it must terminate either within 25 years or within 21 years and 10 months after the death of individuals living on the effective date of the trust. "Company" does not include any organization the majority of whose voting securities are owned by the United States or any state.

(d)(1) "Control" of a bank or company includes (except for the purposes of Subpart E):

(i) Owning, controlling, or having power to vote 25 percent or more of the outstanding shares of any class of voting securities of the bank or company, directly or indirectly or acting through one or more other persons;

(ii) Controlling in any manner the election of a majority of the directors or trustees (or individuals exercising similar functions) of the bank or company;

(iii) Exercising or having the power to exercise directly or indirectly a controlling influence over the management or policies of the bank or company, as determined by the Board after notice and opportunity for hearing in accordance with § 225.31 of Subpart D of this regulation; or

(iv) Conditioning in any manner the transfer of 25 percent or more of any class of voting securities of a bank or company upon the transfer of 25 percent or more of any class of voting securities of another bank or company.

(2) As provided in section 2(g) of the BHC Act, a company shall be deemed to control securities or assets owned, controlled, or held directly or indirectly:

(i) By any subsidiary of the company;

(ii) In a fiduciary capacity (including by pension and profit-sharing trusts) for the benefit of the shareholders, members, or employees (or individuals serving in similar capacities) of the company or of any of its subsidiaries; or

(iii) In a fiduciary capacity for the benefit of the company or any of its subsidiaries.

(e) "Management official" means any officer, director (including honorary or advisory directors), partner, or trustee of a company or any employee of the company with policy-making functions.

(f) "Outstanding shares" means any securities with voting rights, but does not include securities owned by the United States or by a company wholly-owned by the United States.

(g) "Person" includes an individual, bank, corporation, partnership, trust, association, joint venture, pool, syndicate, sole proprietorship, unincorporated organization, or any other form of entity.

(h) "Principal shareholder" means a person that owns or controls directly or indirectly 25 percent or more of any class of voting securities of a company.

(i) "Subsidiary" means a bank or company that is controlled by another company or person, and unless otherwise indicated, refers to a direct or indirect subsidiary of a bank holding company. An "indirect subsidiary" of a bank holding company means a bank or company controlled by a subsidiary of the bank holding company.

(j) "Voting securities" means shares of common and preferred stock, general and limited partnership interests, and other similar interests, if the holders are entitled by statute, charter, or in any manner to vote for or select directors, trustees, or partners (or persons exercising similar functions), or to vote on other significant matters.

§ 225.3 Administration.

(a) *Delegation of authority.* Designated Board members and officers and the Federal Reserve Banks are authorized by the Board to exercise various functions prescribed in this regulation and in the Board's Rules Regarding Delegation of Authority (12 CFR Part 265) and the Board's Rules of Procedure (12 CFR Part 262).

(b) *Appropriate Federal Reserve Bank.* In administering this regulation, the appropriate Federal Reserve Bank is as follows:

(1) For a bank holding company (or a company applying to become a bank holding company): the Reserve Bank of the Federal Reserve district in which the company's banking operations are principally conducted, as measured by total domestic deposits in its subsidiary banks on the date it became (or will become) a bank holding company;

(2) For a foreign banking organization (as defined in 12 CFR 211.23) that has no banking subsidiaries and is not subject to paragraph (b)(1) of this section: the Reserve Bank of the Federal Reserve district in which the total assets of the organization's United States branches, agencies, and commercial lending companies are the largest as of the later of January 1, 1980, or the date it becomes a foreign banking organization;

(3) For an individual or company submitting a notice under Subpart E of this regulation: the Reserve Bank of the Federal Reserve district in which the banking operations of the bank holding company or state member bank to be acquired are principally conducted, as measured by total domestic deposits on the date the notice is filed.

§ 225.4 Corporate practices.

(a) *Bank holding company policy and operations.* (1) A bank holding company shall serve as a source of financial and managerial strength to its bank subsidiaries and shall conduct all of its operations in accordance with sound banking policy and practice.

(2) Whenever the Board believes an activity or control of a nonbank subsidiary constitutes a serious risk to the financial safety, soundness, or stability of a bank subsidiary of a bank holding company, and is inconsistent with sound banking principles or the purposes of the BHC Act, the Board may require the bank holding company to terminate the activity or to terminate control of the subsidiary, as provided in section 5(e) of the BHC Act.

(b) *Purchase or redemption by a bank holding company of its own securities.* A bank holding company may not purchase or redeem its equity securities, unless:

(1) The gross consideration paid for the securities, when added to the net consideration [1] paid for all similar transactions during the preceding 12-month period, is not more than $10 million or 1 percent of the bank holding company's net worth, whichever is less; or

(2) The bank holding company has:

(i) Consolidated assets of $1 billion or more, and after the purchase or redemption, its consolidated primary capital-to-total assets ratio is at least 5 percent;

(ii) Consolidated assets of $150 million to $1 billion, and after the purchase or redemption, its consolidated primary capital-to-total assets ratio is at least 6 percent; or

(iii) Total banking assets of $150 million or less, and after the purchase or redemption,

(A) The primary capital-to-total assets ratio of the bank holding company (consolidated) is at least 6 percent or

(B) The primary capital-to-total assets ratio of each subsidiary bank of the holding company is at least 6 percent and the debt-to-equity ratio of the parent bank holding company (nonconsolidated) is no more than 30 percent; or

(3) The bank holding company obtains the prior approval of the Board for the redemption or purchase on the basis of unusual circumstances.

(c) *Deposit insurance.* Every bank shall obtain Federal Deposit Insurance prior to becoming a bank holding company or a subsidiary of a bank holding company, and shall remain an insured bank as defined in section 3(h) of the Federal Deposit Insurance Act (12 U.S.C. 1813(h)).

(d) *"Tie-in" arrangements.* A bank holding company and any nonbanking subsidiary conducting an activity under § 225.23 of this regulation may not in any manner extend credit, lease or sell property of any kind, provide any service, or fix or vary the consideration for any of these transactions, if the provision of the credit, property, or service is subject to any conidition that, if imposed by a bank, would constitute an unlawful tie-in arrangement under section 106 of the BHC Act Amendments of 1970 (12 U.S.C. 1971 and 1972(1)).

(e) *Acting as transfer agent, municipal securities dealer, or clearing agent.* A bank holding company or any nonbanking subsidiary that is a "bank," as defined in section 3(a)(6) of the Securities Exchange Act of 1934 (15 U.S.C. 78c(a)(6)), and that is a transfer agent of securities, a municipal securities dealer, a clearing agency, or a participant in a clearing agency (as those terms are defined in section 3(a) of the Securities Exchange Act (12 U.S.C. 78c(a)), shall be subject to § 208.8(f)–(j) of the Board's Regulation H (12 CFR 208.8(f)–(j)) as if it were a state member bank.

§ 225.5 Registration, reports, and inspections.

(a) *Registration of bank holding companies.* Each company shall register within 180 days after becoming a bank holding company by furnishing information in the manner and form prescribed by the Board.

(b) *Reports of bank holding companies.* Each bank holding company shall furnish in the manner and form prescribed by the Board an annual report of the company's operations for the fiscal year in which it becomes a bank holding company, and for each fiscal year thereafter during which it remains a bank holding company. Additional information and reports shall be furnished as the Board may require.

(c) *Examinations and inspections.* The Board may examine or inspect any bank holding company and each of its subsidiaries and prepare a report of their operations and activities. With respect to foreign banking organizations the Board may examine any branch or agency of a foreign bank in a State of the United States and may examine or inspect each of its United States subsidiaries and prepare reports of their operations and activities. The Board shall rely as far as possible on the reports of examination made by the primary federal or state supervisor of the bank subsidiaries of a bank holding company or of the foreign bank.

§ 225.6 Penalties for violations.

(a) *Criminal and civil penalties.* (1) Section 8 of the BHC Act provides certain civil and criminal penalties for a violation by any company or individual of the BHC Act or any regulation or order issued under it, or for making a false entry in any book, report, or statement of a bank holding company. Civil money penalty assessments for violations of the BHC Act shall be made in accordance with Subpart B of the Board's Rules of Practice for Hearing (12 CFR 263, Subpart B). For any willful violation of the Bank Control Act or any regulation or order issued under it, the Board may assess a civil penalty as provided in 12 U.S.C. 1817(i)(15).

(b) *Cease and desist proceedings.* For any violation of the BHC Act, the Bank Control Act, this regulation, or any order or notice issued thereunder, the Board may institute a cease and desist

[1] For the purposes of this section, "net consideration" is the gross consideration paid by the company for all of its equity securities purchased or redeemed during the period minus the gross consideration received for all of its equity securities sold during the period other than as part of a new issue.

VOL 48 ISS 102 MAY 25 1983

proceeding in accordance with the Financial Institutions Supervisory Act of 1966, as amended (12 U.S.C. 1818(b) (1) and (3)).

Subpart B—Acquisition of Bank Securities or Assets

§ 225.11 Transactions requiring Board approval.

The following transactions require an application for the Board's prior approval under section 3 of the BHC Act unless otherwise exempted under § 225.12 of this subpart:

(a) *Formation of bank holding company.* Any action that causes a company to become a bank holding company.

(b) *Acquisition of subsidiary bank.* Any action that causes a bank to be come a subsidiary of a bank holding company.

(c) *Acquisition of control of bank securities or bank holding company securities.* The acquisition by a bank holding company of control of any voting securities of a bank or bank holding company, if the acquisition results in the company's control of more than 5 percent of the outstanding shares of any class of voting securities of the bank of bank holding company. An acquisition includes the purchase of additional securities through the exercise of preemptive rights, but does not include securities received in a stock dividend or stock split that does not alter the bank holding company's proportional share of any class of voting security.

(d) *Acquisition of bank assets.* The acquisition by a bank holding company (that is not a bank) or by a nonbank subsidiary of all or substantially all of the assets of a bank.

(e) *Merger of bank holding companies.* The merger or consolidation of bank holding companies, including a merger through the purchase of assets and assumption of liabilities.

(f) *Other acquisitions.* Any other acquisition of control of a bank or bank holding company that the Board determines, after notice to the acquiring company, requires prior approval under section 3 of the BHC Act.

§ 225.12 Transactions not requiring Board approval.

The following transactions do not require the Board's approval under § 225.11 of this subpart:

(a) *Acquisition of securities in fiduciary capacity.* The acquisition by a bank or company, as provided by section 3(a) of the BHC Act, of control of voting securities or assets of a bank or bank holding company in good faith in a fiduciary capacity, unless:

(1) The acquiring bank or company has sole discretionary authority to vote the securities and will retain such authority for more than two years; or

(2) The acquisition is for the benefit of the bank or company or its shareholders, employees, or subsidiaries.

(b) *Acquisition of securities in satisfaction of debts previously contracted.* The acquisition by a bank or company of voting securities or assets of a bank or bank holding company in the regular course of securing or collecting a debt previously contracted in good faith, as provided in section 3(a) of the BHC Act, if the bank or company divests the securities or assets within two years of acquisition. The Board may grant requests for up to three one-year extensions.

(c) *Acquisition of securities by bank holding company with majority control.* The acquisition by a company of additional voting securities of a bank or bank holding company where more than 50 percent of the outstanding voting securities of the bank or company is controlled by the acquiring company prior to the acquisition.

(d) *Transactions subject to Bank Merger Act.* The merger, consolidation, or purchase of assets involving a nonsubsidiary bank and a subsidiary bank of a bank holding company, or a similar transaction involving subsidiary banks of a bank holding company, if the transaction requires the prior approval of a Federal supervisory agency under the Bank Merger Act (12 U.S.C. 8128(c)). This exception does not include the merger of a nonsubsidiary bank and a nonoperating subsidiary bank formed by a company for the purpose of acquiring the nonsubsidiary bank.

(e) *Holding securities in escrow.* The holding of bank or bank holding company securities or assets in a good faith escrow arrangement for the benefit of an applicant pending the Board's action on the application for approval of the proposed acquisition, if title to the securities and the voting rights remain with the seller and payment for the securities has not been made to the seller.

§ 225.13 Factors considered in deciding applications under Subpart B.

(a) *Prohibited anticompetitive transactions.* As specified in Sections 3(c) (1) and (2) of the BHC Act, the Board may not approve any application under this subpart if the transaction would:

(i) Result in a monopoly or would further an effort to monopolize the business of banking in any part of the United States; or

(ii) Substantially lessen competition, tend to create a monopoly, or in any other manner be in restraint of trade in any section of the country, unless the Board finds that the anticompetitive effects of the transaction are clearly outweighed by the probable effect of the transaction in meeting the convenience and needs of the community.

(b) *Other factors considered.* In deciding applications under this subpart, the Board's consideration shall include the following factors with respect to the applicant, its subsidiaries, any banks related to the applicant through common ownership or management, and the bank to be acquired:

(1) *Financial condition.* Their financial condition and future prospects, including whether current and projected capital positions and levels of indebtedness conform to the Board's standards.

(2) *Management.* The competence and character of the applicant's principals; the applicant's record of compliance with laws and regulations; and its record of fulfulling its commitments to, and any conditions imposed by, the Board in connection with prior applications.

(3) *Convenience and needs of the community and performance under Community Reinvestment Act.* The convenience and needs of the communities to be served, including:

(i) The impact of the proposed transaction on the number and availability of alternative sources of banking services, and on existing and potential competition and the concentration of banking resources; and

(ii) The record of performance under the Community Reinvestment Act of 1977 (12 U.S.C. 2901 et seq.) and the Board's Community Reinvestment Regulation (12 CFR Part 228, Regulation BB).

(C)(1) *Interstate transactions.* The Board may not approve any transaction that would result in:

(i) The formation of a bank holding company that controls more than 5 percent of any class of voting securities of two or more banks located in different states; or

(ii) The acquisition by a bank holding company or any of its subsidiaries of any voting securities of, any interest in, or substantially all of the assets of, an additional bank located in a state other than the state in which the operations of the bank holding company's banking subsidiaries were principally conducted on July 1, 1966 (as measured by total deposits), or on the date on which the

company became a bank holding company, whichever is later.

(2) *Exceptions.* The prohibitions of this paragraph shall not apply if:

(i) The bank is located in a state that has by statute expressly authorized the acquisition of securities of, an interest in, or substantially all of the assets of, a bank within the state by an out-of-state bank holding company; or

(ii) The transaction involves the acquistion of a closed or failing bank that has been authorized under section 13(f) of the Federal Deposit Insurance Act (12 U.S.C. 1823(f)).

§ 225.14 Procedures for applications, notices, and hearings.

(a) *Filing application.* An application by a company for the Board's prior approval under this subpart shall be filed with the appropriate Reserve Bank on the designated form and shall comply with § 262.3 of the Rules of Procedure (12 CFR 262.3), which contains a requirement for publication by the applicant of newspaper notice of the application.

(b) *Notice.*

(1) *Notice to primary banking supervisor.* Upon receipt of an application under this subpart, the Reserve Bank shall give prompt notice and a copy of the application to the primary banking supervisor of the bank to be acquired. The primary supervisor shall have 30 calendar days from the date of the letter giving notice in which to submit its views and recommendations to the Board.

(2) **Federal Register** *notice.* Upon receipt by the Reserve Bank of an application under this subpart, notice of the application shall be promptly sent to the **Federal Register** for publication. The **Federal Register** notice shall invite comment on the application for a period of no more than 30 days.

(c) *Accepting application for processing.* Within 10 calendar days after the Reserve Bank receives an application under this subpart, the Reserve Bank shall either accept the application for processing or advise applicant that the application is incomplete and requires additional information. In unusual circumstances, the Reserve Bank may extend this time period upon written notice to the applicant. Upon accepting an application, the Reserve Bank shall immediately send copies of the application to the Board.

(d) *Action on applications.*

(1) *Action under delegated authority.* An application shall be approved within 30 calendar days after it is accepted for processing under paragraph (c) of this section, unless the applicant is notified that the application has been referred to the Board for decision because action is not appropriate under delegated authority. The 30-day period may be extended for 15 days by the Reserve Bank upon written notice to the applicant.

(2) *Board action.* In the case of applications referred to the Board for decision, the application shall be approved within 60 calendar days after it is accepted for processing under paragraph (c) of this section, unless the applicant is notified that the 60-day period will be extended for a specified period and is given the reasons for the extension. In no event may the extension exceed the 91-day period provided in paragraph (f) of this section.

(e) *Hearings.* As provided in section 3(b) of the BHC Act, the Board shall order a hearing if it receives from the primary supervisor of the bank to be acquired a written recommendation of disapproval of an application within the 30-day period specified in paragraph (b)(1) of this section. The Board may order a formal or informal hearing or other proceeding in connection with the processing of an application, as provided in § 262.3(i)(2) of the Rules of Procedure. Any request for hearing other than from the primary supervisor shall comply with § 262.3(e) of the Rules of Procedure (12 CFR 262.3(e)).

(f) *Approval through failure to act.*

(1) *Ninety-one day rule.* An application under this subpart shall be deemed approved if the Board fails to act on the application within 91 calendar days after the date of submission to the Board of the complete record on the application. For this purpose, Board action includes the issuance of an order stating that the Board has approved or denied the application, reflecting the votes of the members of the Board, and indicating that a statement of the reasons for the decision will follow promptly.

(2) *"Complete record."* For the purpose of computing the 91-day period, the record shall be regarded as complete on the latest of:

(i) The date of receipt by the Board of an application that has been accepted for processing by the Reserve Bank under paragraph (c) of this section;

(ii) The last day provided in any notice for receipt of comments and hearings requests on the application;

(iii) The date of receipt by the Board of the last relevant material regarding the application that is needed for the Board's decision, if the material is received from a source outside of the Federal Reserve System and is not already in the record; or

(iv) The date of completion of any hearing or other proceeding ordered under paragraph (e) of this section.

(g) *Exceptions to notice and hearing requirements.*

(1) *Probable bank failure.* If the Board finds it must act immediately on an application in order to prevent the probable failure of a bank or bank holding company, the Board may modify or dispense with the notice and hearing requirements provided in this section.

(2) *Emergency.* If the Board finds that, although immediate action on an application is not necessary, an emergency exists requiring expeditious action, the Board may require the primary supervisor to submit its recommendation within 10 calendar days, and the Board may act on the application without a hearing, and may modify or dispense with the other notice and hearing requirements provided in this section.

(h) *Waiting period.* A transaction approved under this subpart shall not be consummated before the thirtieth day after the date of approval of the application, unless the Board has determined that the application involves a probable bank failure or an emergency situation under paragraph (g) of this section.

Subpart C—Nonbanking Activities and Acquisitions of Bank Holding Companies

§ 225.21 Permissible nonbanking activities and acquisitions; exempt bank holding companies.

(a) *Permissible nonbanking activities and acquisitions.* Except as provided in § 225.22 of this subpart, a bank holding company or a subsidiary may not engage in, or acquire or control voting securities or assets of a company engaged in, any activity other than:

(1) Banking or managing or controlling banks and other subsidiaries authorized under the BHC Act; and

(2) An activity determined to be closely related to banking as provided in § 225.23 of this subpart, provided the bank holding company has obtained the prior approval of the Board under § 225.25 of this subpart for that activity.

(b) *Exempt bank holding companies.* The following bank holding companies are exempt from the provisions of this subpart:

(1) *Family-owned companies.* Any company that is a "company covered in 1970," as defined in section 2(b) of the BHC Act, and that had more than 85 percent of its voting stock collectively owned on June 30, 1968, and

UMI

VOL
48
ISS

UMI

continuously thereafter, by members of the same family or their spouses.

(2) *Labor, agricultural, and horticultural organizations.* Any company that was on January 4, 1977, both a bank holding company and a labor, agricultural, or horticultural organization exempt from taxation under section 501 of the Internal Revenue Code (26 U.S.C. 501).

(3) *Companies granted hardship exemption.* Any bank holding company that has controlled only one bank since before July 1, 1968, and that has been granted an exemption by the Board under section 4(d) of the BHC Act, subject to any conditions imposed by the Board.

§ 225.22 Exempt nonbanking activities and acquisitions.

(a) *Servicing activities.* A bank holding company may, without the Board's prior approval, furnish directly, or acquire all the shares of a subsidiary to furnish, services for the internal operations of the holding company and its subsidiaries. Such services include: (i) accounting; (ii) advertising; (iii) data processing; (iv) holding or operating property used primarily by a subsidiary in its operations or for its future use; (v) liquidating property acquired from a subsidiary; (vi) liquidating property acquired from any source either prior to May 9, 1956, or the date on which the company became a bank holding company, whichever is later; (vii) personnel services; and (viii) selling, purchasing, or underwriting insurance such as blanket bond insurance, group insurance for employees, and property and casualty insurance.

(b) *Safe deposit business.* A bank holding company may, without the Board's prior approval, conduct a safe deposit business, or acquire voting securities of a company that conducts such a business.

(c) *Nonbanking acquisitions not requiring prior Board approval.* A bank holding company or subsidiary may, without the Board's prior approval, acquire:

(1) *DPC acquisitions.* (i) Securities and real or personal property, by foreclosure or otherwise, in satisfaction of debts previously contracted ("DPC property") in good faith, if the DPC property is divested within two years of acquisition.

(ii) Upon request, this 2-year period may be extended for three additional one-year periods by the Board. In the case of real estate, an additional 5-year period may also be permitted by the Board for a total of 10 years.

(iii) Transfers of DPC property within the bank holding company system shall not extend any period for divestiture of the property.

(2) *Securities or assets required to be divested by subsidiary.* Securities or assets required to be divested by a subsidiary at the request of an appropriate examining federal or state authority (except by the Board under the BHC Act or this regulation), if the bank holding company divests the securities or assets within two years from the date acquired from the subsidiary.

(3) *Fiduciary investments.* Securities or assets acquired by a company in good faith in a fiduciary capacity, if they are:

(i) Held in the ordinary course of business; and

(ii) Not acquired for the benefit of the company or its shareholders, employees, or subsidiaries.

(4) *Securities eligible for investment by a national bank.* Securities of the kinds and amounts explicitly eligible by federal statute (other than the Bank Service Corporation Act, 12 U.S.C. 1861 *et seq.*) for investment by a national bank, and securities acquired prior to June 30, 1971, in reliance on section 4(c)(5) of the BHC Act and interpretations of the Comptroller of the Currency under section 5136 of the Revised Statutes (12 U.S.C. 24(7)).

(5) *Securities totalling 5 percent or less of a company.* Securities or property that, in the aggregate, represent 5 percent or less of any class of outstanding voting securities of a company or a 5 percent interest or less in the property, provided the acquiring company holds the securities or property as a passive investment.

(6) *Securities of investment company.* Securities of an investment company that is solely engaged in investing in securities and that does not own or control more than 5 percent of any class of outstanding voting securities of any company.

(7) *Assets acquired in the ordinary course of business.* Assets of a company acquired in the ordinary course of business, subject to the limitations and provisions of 12 CFR 225.132, provided the assets relate to activities in which the acquiring company has previously received Board approval to engage under § 225.23 of this subpart in the areas to be served, and the assets do not represent all or substantially all of the assets of a company, or a subsidiary, division, department, or office of the company from which the assets are acquired.

(8) *Asset acquisitions by consumer finance or mortgage company.* Assets of an office(s) of a company that relate solely to making, acquiring, or servicing loans solely for personal, family, or household purposes, provided that:

(i) The acquiring company has previously received Board's approval to engage in consumer finance or residential mortgage banking activities under § 225.23(b)(1) of this subpart in the area to be served by the acquired office(s);

(ii) The assets sold from any company in any calendar year do not represent more than 10 percent of the assets of the acquiring consumer finance of mortgage company or more than $10 million, whichever is less;

(iii) The assets acquired do not represent more than 50 percent of the assets of the selling company;

(iv) The acquiring company notifies the Reserve Bank of the acquisition within 30 days after the acquisition; and

(v) The Board has not previously notified the acquiring company that it may not acquire assets under this paragraph.

(d) *Acquisition of securities by subsidiary banks.*

(1) A national bank or its subsidiary may acquire or retain securities on the basis of section 4(c)(5) of the BHC Act in accordance with the regulations of the Comptroller of the Currency.

(2) A state-chartered bank or its subsidiary may, insofar as federal law is concerned, acquire or retain securities on the basis of section 4(c)(5) to the BHC Act: (i) of the kinds and amounts explicitly eligible by federal statute for investment by a national bank; or (ii) that represent all of the voting securities of a company (except director's qualifying shares) that engages solely in activities in which the parent bank may engage, at locations at which the bank may engage in the activity, and subject to the same limitations as if the bank were engaging in the activity directly.

(e) *Activities and securities of new bank holding companies.* A company that becomes a bank holding company with the Board's approval under § 225.11 of Subpart B of this regulation may, for a period of two years, engage in nonbanking activities and hold nonbanking securities that it engaged in or held on the date it became a bank holding company. The Board may grant requests for up to three one-year extensions.

(f) *Grandfathered activities and securities.* Unless the Board orders divestiture or termination under section 4(a)(2) of the BHC Act, a "company covered in 1970," as defined in section 2(b) of the BHC Act, may:

(1) Retain securities and engage in activities that it has lawfully held or engaged in continously since June 30, 1968; and

(2) Acquire securities of a newly-formed company to engage in such activities.

(g) *Securities or activities exempt under Regulation K.* A bank holding company may acquire voting securities or assets and engage in activities authorized for that bank holding company under Regulation K (12 CFR Part 211).

§ 225.23 Nonbanking activities requiring Board approval.

(a) *Approval required to engage in nonbanking activities.* A bank holding company shall apply, in accordance with § 225.25 of this subpart, for the Board's prior approval to engage directly or indirectly, or to acquire or control voting securities or assets of a company engaged, in: (1) an activity specified in paragraph (b) of this section, including such incidental activities as are necessary to carry on the activities specified; and (2) in an activity not specified in paragraph (b) that the bank holding company believes is closely related to banking or to managing or controlling banks within the meaning of section 4(c)(8) of the BHC Act.

(b) *Activities determined to be closely related to banking.* The following activities are so closely related to banking or managing or controlling banks as to be a proper incident thereto:

(1) *Making and servicing loans.* Making, acquiring, or servicing loans or other extensions of credit (including issuing letters of credit and accepting drafts) for the company's account or for the account of others, such as would be made, for example, by the following types of companies: (i) consumer finance; (ii) credit card; (iii) mortgage; (iv) commercial finance; and (v) factoring.

(2) *Industrial banking.* Operating an industrial bank, Morris Plan bank, or industrial loan company, as authorized under state law, so long as the institution is not a bank as defined in § 225.2(a) of Subpart A of this regulation.

(3) *Trust company functions.* Performing functions or activities that may be performed by a trust company (including activities of a fiduciary, agency, or custodial nature), in the manner authorized by federal or state law, so long as the institution does not make loans or investments or accept deposits other than:

(i) Deposits that are generated from trust funds not currently invested and that are properly secured to the extent required by law;

(ii) Deposits representing funds received for a special use in the capacity of managing agent or custodian for an owner of, or investor in, real property, securities, or other personal property; or for such owner or investor as agent or custodian of funds held for investment or as escrow agent; or for an issuer of, or broker or dealer in securities, in a capacity such as a paying agent, dividend disbursing agent, or securities clearing agent; provided such deposits are not employed by or for the account of the customer in the manner of a general purpose checking account or interest-bearing account; or

(iii) Making call loans to securities dealers or purchasing money market instruments such as certificates of deposit, commercial paper, government or municipal securities, and bankers acceptances. (Such authorized loans and investments, however, may not be used as a method of channeling funds to nonbanking affiliates of the trust company.)

(4) *Investment or financial advice.* Acting as investment or financial adviser to the extent of:

(i) Serving as the advisory company for a mortgage or a real estate investment trust;

(iii) Serving as investment adviser (as defined in section 2(a)(20) of the Investment Company Act of 1940, 15 U.S.C. 80a–2(a)(20)), to an investment company registered under that act;

(iii) Providing portfolio investment advice [2] to any other person;

(iv) Furnishing general economic information and advice, general economic statistical forecasting services and industry studies; [3] and

(v) Providing financial advice to state and local governments, such as with respect to the issuance of their securities.

(5) *Leasing personal or real property.* Leasing personal or real property or acting as agent, broker, or adviser in leasing such property if:

(i) The lease is to serve as the functional equivalent of an extension of credit to the lessee of the property;

(ii) The property to be leased is acquired specifically for the leasing transaction under consideration or was acquired specifically for an earlier leasing transaction;

(iii) The lease is on a nonoperating basis; [4]

(iv) At the inception of the initial lease the effect of the transaction (and, with respect to governmental entities only, reasonably anticipated future transactions [5] will yield a return that will compensate the lessor for not less than the lessor's full investment in the property plus the estimated total cost of financing the property over the term of the lease,[6] from:

(A) Rentals;

(B) Estimated tax benefits (investment tax credit, net economic gain from tax deferral from accelerated depreciation, and other tax benefits with a substantially similar effect);

(C) The estimated residual value of the property at the expiration of the initial term of the lease, which in no case shall exceed 20 percent of the acquisition cost of the property to the lessor; and

(D) In the case of a lease of personal property of not more than seven years in duration, such additional amount, which shall not exceed 60 percent of the acquisition cost of the property, as may be provided by an unconditional guarantee by a lessee, independent third party, or manufacturer, which has been determined by the lessor to have the financial resources to meet such obligation, that will assure the lessor of

---

[2] The term "portfolio investment" intended to refer generally to the investment of funds in a "security" as defined in section 2(1) of the securities Act of 1933 (15 U.S.C. 77b) or in real property interests, except where the real property is to be used in the trade or business of the person being advised. In furnishing portfolio investment advice, bank holding companies and their subsidiaries shall observe the standards of care and conduct applicable to fiduciaries.

[3] This activity is to be contrasted with "management consulting." See the commentary for a discussion of impermissible management consulting activities.

[4] For purposes of the leasing of automobiles, the requirement that the lease be on a nonoperating basis means that the bank holding company may not, directly or indirectly: (1) provide for the servicing, repair, or maintenance of the leased vehicle during the lease term; (2) purchase parts and accessories in bulk or for an individual vehicle after the lessee has taken delivery of the vehicle; (3) provided for the loan of an automobile during servicing of the leased vehicle; (4) purchase insurance for lessee; or (5) provide for the renewal of the vehicle's license merely as a service to the lessee where the lessee could renew the license without authorization from the lessor.

[5] The Board understands that some federal, state and local governmental entities may not enter into a lease for a period in excess of one year. Such an impediment does not prohibit a company authorized under § 225.23(a)(5) from entering into a lease with such governmental entities if the company reasonably anticipates that the governmental entities will renew the lease annually until such time as the company is fully compensated for its investment in the leased property plus its costs of financing the property. Further, a company authorized under § 225.23(a)(5) may also engage in so-called "bridge" lease financing of personal property, but not real property, where the lease is short term pending completion of long-term financing, by the same or another lender.

[6] The estimate by the lessor of the total cost of financing the property over the term of the lease should reflect, among other factors: the term of the lease, the modes of financing available to the lessor, the credit rating of the lessor and/or the lessee (if a factor in the financing), and prevailing rates in the money and capital markets.

VOL 48 ISS 102 MAY 25 1983

recovery of its investment and cost of financing; provided, that in the aggregate the amount derived from estimated residual value under subparagraph C and any unconditional guarantee shall not exceed 60 percent of the acquisition cost of the property;

(v) The maximum lease term during which the lessor must recover the lessor's full investment on the property, plus the estimated total cost of financing the property, shall be 40 years; and

(vii) At the expiration of the lease (including any renewals or extensions with the same lessee), all interest in the property shall be either liquidated or released on a nonoperating basis as soon as practicable but in no event later than two years from the expiration of the lease; [7] however, in no case shall the lessor retain any interest in the property beyond 50 years after its acquisition of the property.

(6) *Community development.* Investing in or making contributions to corporations or projects designed primarily to promote community welfare and to further the development of low income areas by providing housing, services, or jobs for residents.

(7) *Data processing.* (i) Providing data processing and data transmission services, data bases, or facilities (including data processing and data transmission hardware, software, documentation, and operating personnel) for the internal operations of the holding company or its subsidiaries;

(ii) Providing to others data processing and transmission services, facilities, data bases, or access to such services, facilities, or data bases by any technologically feasible means, where:

(A) Data to be processed or furnished are financial, banking, or economic, and the services are provided pursuant to a written agreement so describing and limiting the services;

(B) The facilities are designed, marketed, and operated for the processing and transmission of financial, banking, or economic data; and

(C) Hardware in connection therewith is offered only in conjunction with software designed and marketed for the processing and transmission of financial, banking, or economic data, and where the general purpose hardware does not constitute more than 30 percent of the cost of any packaged offering.

[7] In the event of a default on the lease agreement prior to the expiration of the lease term, the lessor shall either re-lease the property, subject to all the conditions of this subsection, or liquidate the property as soon as practicable but in no event later than two years from the date of default on the lease agreement.

(8) *Insurance sales.* Except as prohibited in Title VI of the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97-320, 96 Stat. 1536), acting as insurance agent or broker in offices at which the holding company or its subsidiaries are otherwise engaged in business (or in an office adjacent thereto) with respect to the following types of insurance:

(i) Any insurance that (A) is directly related to an extension of credit by a bank or bank-related firm of the kind described in this regulation, or (B) is directly related to the provision of other financial services by a bank or such a bank-related firm; and

(ii) Any insurance sold by a bank holding company or a nonbanking subsidiary in a community that has a population not exceeding 5,000 (as shown by the last preceding decennial census), provided the principal place of banking business of the bank holding company is located in a community having a population not exceeding 5,000. [8]

(9) *Insurance underwriting.* Acting as underwriter for credit life insurance and credit accident and health insurance that is directly related to an extension of credit by the bank holding company system.[9]

(10) *Courier services.* Providing courier services for:

(i) The internal operations of the bank holding company and its subsidiaries;

(ii) Checks, commercial papers, documents, and written instruments (excluding currency or bearer-type negotiable instruments) that are exchanged among banks and financial institutions; and

(iii) Audit and accounting media of a banking or financial nature and other business records and documents used in processing such media.[9]

(11) *Management consulting to depository institutions.* Providing, on an explicit fee basis without regard to any correspondent balances, management consulting advice to banks and other depository institutions [10], if:

[8] To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service.

[9] See also the Board's interpretation on courier activities (12 CFR 225.129), which sets forth conditions for bank holding company entry into the activity.

[10] In performing this activity, bank holding companies are not authorized to perform tasks or operations or provide services to client institutions either on a daily or continuing basis, except as shall be necessary to instruct the client institution on how to perform such services for itself. See also the Board's interpretation regarding bank management consulting advice at 12 CFR 225.131. The provisions of this interpretation shall apply to the performance of management consulting services for nonbank depository institutions as well as commercial banks.

(i) The services are not provided on a daily or continuing basis;

(ii) The bank holding company does not control any equity securities issued by the client;

(iii) No management official, as defined in 12 CFR 212.2, of the bank holding company or subsidiary serves as a management official of the client, unless granted an exception by the appropriate federal regulatory agency; and

(iv) Each potential client is notified of all depository institutions affiliated with the bank holding company and of all other clients located in the same market areas as the potential client.

(12) *Money orders, savings bonds, and travelers checks.* The issuance and sale at retail of money orders having a face value of not more than $1,000; the sale of U.S. savings bonds; and the issuance and sale of travelers checks.

(13) *Real estate appraising.* Performing appraisals of real estate.

(14) *Commercial real estate equity financing.* Acting as intermediary for the financing of commercial or industrial income-producing real estate by arranging the transfer of the title, control and risk of such a real estate project to one or more investors, if:

(i) The financing arranged exceeds $1 million;

(ii) The bank holding company and its affiliate do not provide financing to the investors to acquire a real estate project for which the bank holding company arranges equity financing;

(iii) The bank holding company and its affiliates do not have an interest in or participate in managing, developing or syndicating a real estate project for which it arranges equity financing, and do not promote or sponsor the development or syndication of such property; and

(iv) The fee received for arranging equity financing for a real estate project is not based on profits to be derived from the project and is not larger than the fee that would be charged by an unaffiliated intermediary.

(15) *Underwriting and dealing in government obligations.* Underwriting and dealing in obligations of the United States, general obligations of various states and of political subdivisions thereof, and other obligations that state member banks of the Federal Reserve System may be authorized to deal in under 12 U.S.C. 24 and 355, including bankers acceptances and certificates of deposit.

(16) *Foreign exchange advisory and transactional services.* Providing, by any means, general information and statistical forecasting with respect to foreign exchange markets; advisory services designed to assist customers in monitoring, evaluating and managing their foreign exchange exposures; and transactional services with respect to foreign exchange by arranging for "swaps" among customers with complementary foreign exchange exposures, if:

(i) The activity is conducted through a separately incorporated subsidiary of the bank holding company;

(ii) The foreign exchange subsidiary does not take positions in foreign exchange for its own account;

(iii) The foreign exchange subsidiary observes the standards of care and conduct applicable to fiduciaries with respect to its foreign exchange advisory and transactional services; and

(iv) The foreign exchange subsidiary does not itself execute foreign exchange transactions.

(17) *Futures commission merchant.* Acting as a futures commission merchant ("FCM") for nonaffiliated persons, in the execution and clearance on major commodity exchanges of future contracts for bullion, foreign exchange, government securities, negotiable United States money market instruments and certain other money market instruments, if:

(i) The activity is conducted through a separately incorporated subsidiary of the bank holding company, subject to the provisions of the Commodity Exchange Act (7 U.S.C. 1 to 26), and to regulation by the Commodity Futures Trading Commission ("CFTC") and at least one of the major domestic commodity exchanges or in the case of a foreign office, subject to regulation by a comparable regulatory authority and exchange;

(ii) The FCM does not become a clearing member of any exchange or clearing association that requires the parent corporation of a clearing member to also become a member of that exchange or clearing association unless a waiver of the requirement is obtained;

(iii) The FCM does not trade for its own account;

(iv) The FCM time stamps orders of all customers to the nearest minute, executes all orders in chronological sequence consistent with the customers' specifications, and executes all orders with reasonable promptness with due regard to market conditions;

(v) The FCM advises each of its customers in writing that doing business with it will not affect any provision of credit to that customer by other subsidiaries of the parent bank holding company, including its banking affiliates;

(vi) The FCM does not extend credit to customers for the purpose of meeting initial or maintenance margin required of customers except for posting margin on behalf of customers in advance of prompt reimbursement;

(vii) The FCM has initial capitalization that is in substantial excess of that required by CFTC regulations (or comparable regulatory authority), and will maintain fully adequate capitalization;

(viii) Services provided to the FCM by its affiliates are provided under specific contract on an explicit fee basis; and

(ix) The bank holding company and its subsidiaries have demonstrated expertise and an established capability in the cash, forward and futures markets for the contracts involved.

§ 225.24 Factors considered in deciding applications under Subpart C.

(a) *Criteria for activities previously determined to be closely related to banking.* In deciding any application by a bank holding company to engage in a nonbanking activity specified in § 225.23(b) of this subpart, the Board shall determine whether the activity is a proper incident to banking. In making this determination the Board shall consider whether the performance by the applicant bank holding company of the activity can reasonably be expected to produce benefits to the public (such as greater convenience, increased competition, and gains in efficiency) that outweigh possible adverse effects (such as undue concentration of resources, decreased or unfair competition, conflicts of interest, and unsound banking practices). Unless the record clearly demonstrates otherwise, the commencement of a nonbanking activity *de novo* is presumed to result in benefits to the public through increased competition.

(b) *Criteria for other nonbanking activities.* In deciding any application by a bank holding company to engage in a nonbanking activity not specified in § 225.23(b) of this subpart, the Board shall determine whether the proposed activity (1) is closely related to banking or to managing or controlling banks, and (2) is a proper incident to banking, as described in paragraph (a) of this section.

(c) *Financial and managerial criteria.* In deciding any application described in paragraph (a) of (b) of this section, the Board shall also consider the financial and managerial resources of the applicant, including its subsidiaries, and any company to be acquired, and the effect of the proposed transaction on their resources.

§ 225.25 Procedures for applications, notices, and hearings.

(a) (1) *Filing application.* An application by a company for the Board's prior approval under § 225.23 of this subpart shall be filed with the appropriate Reserve Bank on the designated form and shall comply with § 262.3 of the Rules of Procedure (12 CFR 262.3). An application for Board approval to engage directly or through a subsidiary in an activity not specified in § 225.23(b) shall contain evidence and argument that the activity is closely related to banking or to managing or controlling banks within the meaning of section 4(c)(8) of the BHC Act.

(2) *Geographic scope of nonbanking activities.* (i) Any application required under § 225.23 of this subpart shall specify the states in which the company proposes to engage *de novo*, or to acquire a company engaged, in the nonbanking activity.

(ii) A bank holding company is not required to file an application under § 225.23 of this subpart to open a new office or to form a subsidiary to engage in a nonbanking activity in a state in which the bank holding company has received the Board's approval under § 225.23 for that activity, unless the Board has notified the company that an application is required for such expansion.

(iii) If a bank holding company fails to engage in the nonbanking activity in the state specified in its application within two years of Board approval of the application, the Board's approval of that activity in that state terminates and the bank holding company shall reapply for the Board's approval before commencing the nonbanking activity in that state.

(3) *Alteration or relocation of nonbanking activity.* With respect to an application approved under § 225.23 of this subpart, nonbanking activities shall not be altered in any significant respect from those considered by the Board in acting on the application, nor provided in any states other than those specified in the notice published with respect to such application.

(4) *Activities outside the United States.* With respect to activities to be engaged in outside the United States, the procedures of this section apply only to activities to be engaged in directly by a bank holding company that is not a qualifying foreign banking organization or by a United States nonbank

UMI

VOL 48 ISS 102 MAY 25 1983 UMI

subsidiary of any bank holding company.

(b) *Accepting application for processing.* Within 10 calendar days after the Reserve Bank receives an application under this subpart, the Reserve Bank shall either accept the application for processing or advise the applicant that the application is incomplete and requires additional information. In unusual circumstances, the Reserve Bank may extend this time period upon written notice to the applicant. Upon accepting an application, the Reserve Bank shall immediately send copies of the application to the Board.

(c) **Federal Register** *notice.*

(1) *Listed activities.* Upon receipt by the Reserve Bank of an application involving an activity listed in § 225.23(b) of this subpart, notice of the application shall be promptly sent to the **Federal Register** for publication. The **Federal Register** notice shall invite comment for a period of not more than 30 days.

(2) *Proposed new activities.* In the case of an application involving an activity not listed in § 225.23(b) of this subpart, notice of the application shall be sent to the **Federal Register** for publication within 10 business days after receipt by the Board of an application accepted for processing under paragraph (b) of this section, unless (i) the activity has previously been determined not to be closely related to banking or a proper incident thereto; or (ii) there is no basis for publishing for comment whether the activity is so closely related to banking as to be a proper incident thereto under § 225.24(b) of this subpart. In the event notice of an activity not listed in § 225.23(b) is not published for comment, the applicant shall be notified of the reasons for the decision. The **Federal Register** notice shall invite comment on the proposal for a reasonable period of time, generally for 30 days.

(d) *Action on applications.*

(1) *Action under delegated authority.* An application shall be approved within 30 calendar days after it is accepted for processing under paragraph (b) on this section, unless the applicant is notified that the application has been referred to the Board for decision because action is not appropriate under delegated authority. The 30-day period may be extended for 15 days by the Reserve Bank upon written notice to the applicant.

(2) *Board action.* In the case of applications referred to the Board for decision, the application shall be approved within 60 calendar days after it is accepted for processing under paragraph (b) of this section, unless the applicant is notified that the 60-day period will be extended for a specified period and is given the reasons for the extension. In no event may the extension exceed the 91-day period specified in paragraph (g) of this section.

(e) *Simplified procedures for small acquisitions.* (1) As an alternative to the application procedure of pargraph (a)(1) of this section, a bank holding company may apply to acquire voting securities or assets of a company engaged in activities authorized under § 225.23 of this subpart by providing the appropriate Reserve Bank with a brief description of the transaction and a copy of a newspaper notice, in a form prescribed by the Board. The newspaper notice shall have been published by the applicant within the preceding 5 days in a newspaper of general circulation in the areas to be served as a result of the acquisition, providing an opportunity for interested persons to comment on the application for a period of at least 10 calendar days. The procedure prescribed in this paragraph is available only where:

(i) Neither the book value of the assets acquired nor the gross consideration paid for the securities or assets exceed $10 million; and

(ii) The bank holding company has previously received Board approval to engage in the activity involved in the acquisition in the relevant state.

(2) Within five business days after the close the comment period, the application shall either be approved or referred to the Board for processing if action is not appropriate under delegated authority. If an adverse comment is received, the Reserve Bank may extend this 5-day period for a reasonable period of time upon written notice to the applicant.

(f) *Hearing.* Any request for hearing shall comply with the provisions of § 263.3(e) of the Rules of Procedure (12 CFR 262.3(e)). The Board may order a formal or informal hearing or other proceeding in connection with the processing of an application, as provided in § 263.3(i)(2) of the Rules of Procedure 12 CFR 22.3(i)(2)). A hearing shall be required only if there are disputed issues of material fact that cannot be resolved in some other manner.

(g) *Approval through failure to act.* An application under this subpart shall be deemed approved if the Board fails to act on the application within 91 calendar days after the date of the submission to the Board of the complete record on the application. The procedures for computation of the 91-day rule as set forth in § 225.14(f) of Subpart B of this regulation apply to applications under this subpart.

(h) *Emergency thrift institution acquisitions.* In the case of an application to acquire a thrift institution, the Board may modify or dispense with the notice and hearing requirements of this section if the Board finds that an emergency exists which requires the Board to act immediately and the primary Federal regulator of the institution concurs in this finding.

Subpart D—Control and Divestiture Proceedings Contents

§ 225.31 Control proceedings.

(a) *Preliminary determination of control.* (1) The Board may issue a preliminary determination of control under the procedures set forth in this section in any case in which:

(i) One of the presumptions of control set forth in paragraph (d) of this section is present; or

(ii) It appears that the company exercises or has the power to exercise a controlling influence over the management or policies of the other company or bank.

(2) If the Board makes a preliminary determination of control under this section, the Board shall send notice to the controlling company setting forth a statement of the facts upon which the preliminary determination is based.

(b) *Response to preliminary determination of control.* Within 30 calendar days of issuance by the Board of a preliminary determination of control under this section, the company against whom the determination has been made shall:

(1) Submit for the Board's approval a specific plan for the prompt termination of the control relationship;

(2) File an application under Subpart B or C of this regulation to retain the control relationship; or

(3) Contest the preliminary determination by filing a response, setting forth the facts and circumstances in support of its position that no control exists. The company may request a hearing or other proceeding to contest the preliminary determination. Any such request for a hearing or other proceeding shall accompany the response.

(c) *Hearing and final determination.* (1) The Board may order a formal hearing or other appropriate proceeding upon the request of a company that contests a preliminary determination that the company exercises or has the power to exercise a controlling influence over the management or policies of the other company or bank, if the Board finds that material facts are in dispute.

The Board may also order a formal hearing or other proceeding with respect to a preliminary determination that the company controls voting securities of the other company or bank under the presumptions in paragraph (d)(1) of this section.

(2) In the event a hearing or other proceeding is held, any applicable presumptions established by paragraph (d) of this section shall be considered in accordance with the rules of evidence.

(3) After considering the submissions of the company and other evidence, including the record of any hearing or other proceeding, the Board shall issue a final order determining whether the company controls voting securities or exercises or has the power to exercise a controlling influence over the management or policies of another company or bank. If a control relationship is found, the Board may direct the company to terminate the control relationship or to file an application for the Board's approval to retain the control relationship.

(d) *Rebuttable presumptions of control.* The following rebuttable presumptions shall be used in any proceeding under this section:

(1) *Control of voting securities.* (i) *Securities convertible into voting securities.* A company that owns, controls, or holds securities that are immediately convertible at the option of the holder or owner into voting securities of the other company or bank, controls the voting securities.

(ii) *Option or restriction on voting securities.* A company that has entered into a contract or agreement under which the rights of a holder of voting securities of another company or bank are restricted in any manner controls the securities subject to such contract or agreement. This presumption shall not apply where the contract or agreement:

(A) Is a mutual agreement among shareholders granting to each other a right of first refusal with respect to their shares;

(B) Is incident to a *bona fide* loan transaction; or

(C) Relates to restrictions on transferability and continues only for such time as may reasonably be necessary to obtain approval from a federal bank supervisory authority with respect to acquisition by the company of such securities.

(2) *Controlling influence over company.* (i) *Management agreement.* A company that has a contract or agreement under which it directs or exercises significant influence over the general management or major operations of another company or bank controls the other company or bank.

(ii) *Shares controlled by company and associated individuals.* A company that together with its management officials or principal shareholders (including members of the immediate families of either) owns, controls, or holds with power to vote 25 percent or more of any class of voting securities of another company or bank controls the other company or bank, if the company itself owns, controls, or holds with power to vote 5 percent or more of any class of voting securities of the other company or bank (except where such securities are held by the company in a fiduciary capacity and the company does not have sole discretionary authority to exercise the voting rights).

(iii) *Common management officials.* A company that has one or more management officials or principal shareholders in common with another company or bank controls the other company or bank, if the company owns, controls or holds with power to vote 5 percent or more of any class of voting securities of the other company or bank (except where such securities are held by the company in a fiduciary capacity and the company does not have sole discretionary authority to exercise the voting rights), and no other person controls as much as 5 percent.

§ 225.32 Divestiture proceedings.

(a) *Ineffective divestitures.* (1) As provided under section 2(g)(3) of the BHC Act, the divestiture of assets or voting securities by a bank holding company (or a company that would be a bank holding company but for the divestitute) shall be presumed ineffective and the divesting company shall be presumed to control the acquiring person or the divested assets or securities in the following circumstances:

(i) The acquiring person is indebted in any manner to the divesting company; or

(ii) The divesting company has any management official in common with the acquiring person.

(2) For the purposes of this section:

(i) "indebtedness" does not include routine business or personal credit that is unrelated to the divestiture transaction and that is extended by the divesting company in the ordinary course of its lending business; and

(ii) "Divesting company" and "acquiring person" include their parent companies and subsidiaries, and if the acquiring person is an individual, companies controlled by the individual.

(b) *Request for divestitute determination.* For any divestiture that is deemed ineffective under paragraph (a) of this section, the divesting company may request the Board to determine that the divestiture is effective notwithstanding the presumption of paragraph (a) by submitting a letter that includes:

(1) A description of the divesture transaction and the existing and prospective relationship between the divesting company and the acquiring person;

(2) Evidence and argument showing that the divesting company does not and is not capable of controlling the acquiring person or the divested assets or securities; and

(3) Any request for a hearing.

(c) *Hearing.* The Board may order a formal hearing or other appropriate proceeding upon the request of a divesting company under paragraph (b) of this section, if the Board finds that material facts are in dispute with respect to the divestiture. The Board may also order a formal hearing or other proceeding if, in the Board's judgment, such a proceeding would be appropriate

(d) *Standards for making divestiture determination.* In acting on the request of a divesting company under paragraph (b) of this section, the Board shall consider the following factors, among others, in determining whether the divesting company is capable of controlling the acquiring person or the divested assets or securities:

(1) *Indebtedness of acquiring person to divesting company.*

(i) The terms of the indebtedness, including the amount of the indebtedness in relation to the total purchase price;

(ii) The ability of the acquiring person to repay its indebtedness; and

(iii) The manner in which the divesting company would dispose of the divested assets in the event it reacquired the assets as a result of default on the indebtedness.

(2) *Management official interlocks.* The extent of the involvement of the interlocking managment official in the operations of the divesting company and the acquiring person, and the management official's relationship to the assets or securities being divested.

(e) *Final determination.* After considering the submissions of the divesting company and other evidence, including the record of any hearing or other proceeding, the Board shall issue an order determining whether the company controls or is capable of controlling the acquiring person or the divested assets or securities.

(f) *Review of other divestitures.* In any divestiture of assets or securities by a company that is not covered under paragraph (a) of this section, the Board

VOL 48 ISS 102 MY 25 1983 UMI

or appropriate Reserve Bank may review the divestiture to assure that all control relationships between the divesting company and the divested assets or voting securities have been terminated.

Subpart E—Change in Bank Control

§ 225.41 Control transactions requiring prior notice.

(a) *Prior notice requirement.* (1) As provided in the Bank Control Act, any person acting directly or indirectly or through or in concert with one or more persons shall give the Board 60 days' written notice, as specified in § 225.43 of this subpart, before acquiring control of a state member bank or bank holding company, unless the acquisition is exempt under § 225.42 of this subpart.

(2) For the purposes of this paragraph, "acquisition" includes a purchase, assignment, transfer, or pledge of voting securities, or an increase in percentage ownership of a bank or company resulting from a redemption of voting securities.

(b) *Acquisitions requiring prior notice.* The following transactions constitute or are presumed to constitute the acquisition of control under the Bank Control Act, requiring prior notice to the Board:

(1) The acquisition of any voting securities of a state member bank or bank holding company if, after the transaction, the acquiring person owns, controls, or holds with power to vote 25 percent or more of any class of voting securities of the institution; or

(2) The acquisition of voting securities of a state member bank or bank holding company if, after the transaction, the acquiring person will own, control, or hold with power to vote 10 percent or more but less than 25 percent of any class of voting securities of such institution, and if:

(A) The institution has registered securities under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78*l*); or

(B) No other person will own a greater percentage of that class of voting securities immediately after the transaction.

(c) *Rebuttal of presumption of control.* Prior notice to the Board is not required for any acquisition of voting securities under the presumption set forth in paragraph (b)(2) of this section if the Board finds that the acquisition will not result in control. The Board will afford the person seeking to rebut the presumption established in paragraph (b)(2) an opportunity to present views in writing or, where appropriate, orally before its designated representatives either at an informal conference or at an informal presentation of evidence.

(d) *Other transactions.* Transactions other than those set forth in paragraph (b)(2) resulting in a person's control of less than 25 percent of a class of voting shares of a state member bank or bank holding company do not result in control for purposes of the Bank Control Act.

§ 225.42 Transactions not requiring prior notice.

The following transactions do not require prior notice to the Board under this subpart:

(a) *Previously authorized acquisitions.* The acquisition of additional shares of a class of voting securities of a state member bank or bank holding company by any person who has lawfully acquired and maintained control of 25 percent or more of that class of voting securities after filing the notice required under § 225.41(b)(1) of this subpart.

(b) *Acquisitions subject to approval under BHC Act or Bank Merger Act.* Any acquisition of voting securities subject to approval under section 3 of the BHC Act (§ 225.11 of Subpart B), or section 18 of the Federal Deposit Insurance Act (Bank Merger Act, 12 U.S.C. 1828).

(c) *Transactions exempt under BHC Act.* Any acquisition described in sections 2(a)(5) or 3(a)(A) of the BHC Act by a person described in those provisions.

(d) *Grandfathered control relationships.* (1) The acquisition of additional voting securities of a state member bank or bank holding company by a person who continuously, since March 9, 1979, or since that institution commenced business, held power to vote 25 percent or more of any class of voting securities of that institution; or

(2) The acquisition of additional voting securities so long as the aggregate securities held does not exceed 25 percent of any class of voting securities of a state member bank or bank holding company by a person who is presumed under § 225.41(b)(2) of this subpart to have controlled the institution continuously since March 9, 1979.

(e) *Acquisitions in satisfaction of debts previously contracted or through inheritance or gift.* The acquisition of voting securities in any amount in satisfaction of a debt previously contracted in good faith, or through inheritance or a bona fide gift, if the acquiring person notifies the appropriate Reserve Bank within 30 calendar days after the acquisition and provides any relevant information requested by the Reserve Bank.

(f) *Proxy solicitations.* The acquisition of the power to vote securities of a state member bank or bank holding company through receipt of a revocable proxy in connection with a proxy solicitation for the purpose of conducting business at a regular or special meeting of the institution, if the proxy terminates within a reasonable period after the conclusion of the meeting.

(g) *Stock dividends.* The receipt of voting securities of a state member bank or bank holding company through a stock dividend or stock split so long as the proportional interest of the recipient in the institution remains substantially the same.

(h) *Acquisition of foreign banking organization.* The acquisition of voting securities of a foreign bank holding company, except that this exemption does not extend to the reports and information required under paragraphs 9, 10, and 12 of the Bank Control Act (12 U.S.C. 1817(j) (9), (10), and (12)).

§ 225.43 Procedures for filing, processing, and acting on notices.

(a) *Filing notice.* Any notice required under this subpart shall be filed with the appropriate Reserve Bank and shall contain information required by paragraph 6 of the Bank Control Act (12 U.S.C. 1817(j)(6)), or prescribed in the appropriate Board form. With respect to personal financial statements required by paragraph 6(B) of the Bank Control Act, an individual acquirer may include a current statement of assets and liabilities, as of a date within 90 days of the notice, a brief income summary, and a statement of material changes since the date thereof, subject to the authority of the Reserve Bank or the Board to require additional information.

(b) *Advice to bank supervisory agencies.* (1) Upon accepting a notice for processing, the Reserve Bank shall send a copy of the notice to the appropriate state bank supervisory agency where the notice relates to acquisition of securities of a state member bank. The state supervisor shall have 30 calendar days from the date it receives the notice in which to submit its views and recommendations to the Board. The Reserve Bank shall also send a copy of any notice it accepts to the Comptroller of the Currency and the Federal Deposit Insurance Corporation.

(2) If the Board finds that it must act immediately in order to prevent the probable failure of the bank or bank holding company involved, the Board may dispense with or modify the requirements of paragraph (b)(1) of this section with respect to notice to the state supervisory agency.

(c) *Time period for Board action.* (1) *Consummation of acquisition.* (i) A proposed acquisition may be consummated 60 days after submission to the Reserve Bank of a complete notice under paragraph (a) of this section, unless the Board issues within that 60-day period a notice disapproving the proposed acquisition or extending the 60-day period as provided under paragraph (c)(2) of this section.

(ii) A proposed acquisition for which notice has been filed under paragraph (a) of this section may be consummated before the expiration of the 60-day period provided for review of the notice if the Board notifies the acquiring person in writing of the Board's intention not to disapprove the acquisition.

(2) *Extensions of time period.* (i) The Board may extend the 60-day period in paragraph (c)(1)(i) of this section for an additional 30 days by notifying the acquiring person.

(ii) The Board may further extend the time period for disapproval or may return the notice if the Board finds that the acquiring person has not furnished all the information required under paragraph (a) of this section or has submitted material information that is substantially inaccurate. If the Board extends the time period, it shall notify the acquiring person of the information that is incomplete or inaccurate.

(d) *Investigation of notice.* In investigating any notice accepted under this subpart, the Board or Reserve Bank may solicit from any person (including any bank or bank holding company involved in the notice, and any appropriate state, federal or foreign governmental authority) information or views regarding the proposal, which may be presented in any form or manner deemed appropriate. Any person, other than the acquiring person, whose views are solicited or who presents information, does not thereby become a party to the proceeding or acquire any standing or right to participate in the Board's consideration of the notice.

(e) *Disapproval and hearing.* Within three days after its decision to issue a notice of intent to disapprove any proposed acquisition, the Board shall notify the acquiring person in writing of the reasons for the action. Within 10 calendar days of receipt of a notice of intent to disapprove by the Board, the acquiring person may submit a written request for a hearing on the Board's decision. Any hearing conducted under this paragraph shall be in accordance with the Rules of Practice for Formal Hearings (12 CFR 263, Subpart A). At the conclusion of the hearing, the Board shall, by order, approve or disapprove the proposed acquisition on the basis of the record of the hearing. In the event that the acquiring person does not request a hearing, the notice of intent to disapprove becomes final and unappealable.

(f) *Factors considered in acting on notices.* In reviewing a notice filed under this subpart, the Board shall consider the information in the record and the views and recommendations of any bank supervisory agency. The Board may also consider any other relevant information obtained during any investigation of the notice. The Board may disapprove an acquisition if it finds adverse effects with respect to any of the factors (i.e., competitive, financial, managerial, banking, and completeness of information) set forth in paragraph 7 of the Bank Control Act (12 U.S.C. 1817(j)(7)).

By order of the Board of Governors of the Federal Reserve System, May 19, 1983.

William W. Wiles,

Secretary of the Board.

Part III

Environmental Protection Agency

Notification Requirements; Reportable Quantity Adjustments; Proposed Rule and Designation of Additional Hazardous Substances; Advanced Notice of Proposed Rulemaking

VOL 48 ISS 102 MAY 25 1983 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 302

[SW H-FRL 2207-5]

Notification Requirements; Reportable Quantity Adjustments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Sections 103(a) and 103(b) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("Superfund," "CERCLA," or "the Act") require that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities ("RQs") immediately notify the National Response Center of the release. Section 102 sets a reportable quantity of one pound for hazardous substances, except those for which reportable quantities hav been established pursuant to Section 311(b)(4) of the Federal Water Pollution Control Act.

Section 102(b) authorizes the Environmental Protection Agency ("EPA" or "the Agency") to adjust reportable quantities. EPA is proposing in this notice to adjust many of the reportable quantities established under CERCLA. These RQ adjustments are intended to reduce the burdens of reporting on the regulated community, to allow EPA to focus its resources on the most serious releases, and to protect public health and welfare and the environment more effectively. To help implement these changes, the Agency is clarifying notification requirements for releases of hazardous substances under CERCLA.

The Agency is also proposing to revise reportable quantities established under Section 311(b)(4) of the Clean Water Act ("CWA") for discharges of hazardous substances into navigable waters, so that the CWA Section 311 reportable quantities will be identical to and therefore consistent with those ultimately promulgated under CERCLA.

DATES: Comments must be received on or before July 25, 1983.

ADDRESSES: *Comments:* Comments should be submitted in triplicate to: Emergency Response Division, Docket Clerk, Attention: Docket Number 102RQ, U.S. Environmental Protection Agency, 401 M Street, S.W., WH-548B, Washington, D.C. 20460.

Docket: Copies of materials relevant to this rulemaking are contained in Room S-398 at U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. The docket is available for review between the hours of 8:00 a.m. and 4:00 p.m. Monday through Friday. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Dr. K. Jack Kooyoomjian, Chief, Regulation Development Section, Emergency Response Division (WH-548 B), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, or the RCRA/Superfund Hotline (800) 424-9346, in Washington, D.C., (202) 382-3000.

SUPPLEMENTARY INFORMATION: The contents of today's preamble are listed in the following outline:

INTRODUCTION

NOTIFICATION

I. Mechanics of Notification
II. Persons Covered by This Notice
III. Releases Covered by This Notice
  A. Hazardous Substances Subject to This Notice
  B. Definition of Releases Subject to This Notice
  C. Determination of When a Reportable Quantity Has Been Released
IV. Exemptions From the CERCLA Notification Requirements
  A. Federally Permitted Releases
    1. Releases From Point Sources With National Pollutant Discharge Elimination System (NPDES) Permits
    2. Releases Subject to CWA Section 404 Permits
    3. Releases From Facilities With Final RCRA Permits
    4. Releases Pursuant to Marine Protection, Research, and Sanctuaries Act Permits
    5. Underground Injections Authorized Pursuant to the Safe Drinking Water Act
    6. Emissions Subject to Clean Air Act Controls
    7. Injections of Materials Related to Development of Crude Oil or Natural Gas Supplies
    8. Introduction of Pollutants into Publicly Owned Treatment Works
    9. Releases of Source, Byproduct, or Special Nuclear Materials
  B. Pesticide Products
  C. Releases Reported Under RCRA
  D. Continuous Releases
V. Duplicate Reporting

Reportable Quantity Adjustments

I. Introduction
II. Summary of Methodology Underlying the Reportable Quantity Adjustments
III. Number of Reportable Quantity Levels and Their Values
IV. Use of Criteria To Adjust Reportable Quantities
  A. Primary Criteria
  B. Secondary Critera
  C. Results of the Proposed Methodology
  D. Special Types of Substances
  1. Unlisted RCRA Wastes (ICRE Wastes)
  2. Radionuclides
  E. Additional Criteria Considered But Not Currently Used for Adjusting Reportable Quantities
  F. Additional Criteria Considered, but Rejected
V. Alternative Methodologies Considered

Reportable Quantity Adjustments under Section 311 of the Clean Water Act

Summary of Supporting Analyses

I. Classification and Regulatory Impact Analysis
II. Certification Why a Regulatory Flexibility Analysis Is Not Necessary
III. Information Impact Analysis

Introduction

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (Pub. L. 96-510), 42 U.S.C. § 9601 *et seq.*, enacted on December 11, 1980, establishes broad federal authority to deal with releases or threats of releases of hazardous substances from vessels and facilities. The Act specifies an initial list of 696 hazardous substances (Section 101(14)). EPA may designate additional hazardous substances (Section 102).

The Act requires the person in charge of a vessel or facility to notify the National Response Center ("NRC") immediately when there is a release of a designated hazardous substance in an amount equal to or greater than the reportable quantity for that substance (Sections 103 (a) and (b) [1]). Section 102(b) of CERCLA establishes RQs for releases of designated hazardous substances at one pound, unless other reportable quantities were assigned under Section 311 of the Clean Water Act. Section 102 authorizes EPA to adjust all of these reportable quantities.

A major purpose of the Sections 103 (a) and (b) notification requirements is to alert government officials to releases of hazardous substances that may require rapid response to protect public health and welfare and the environment. Under the Act, the federal government may respond whenever there is a release or a substantial threat of a release into the environment of a hazardous substance or of other pollutants or contaminants which may present an imminent and substantial danger to public health or welfare (Section 104). Response activities are to be taken, to the extent possible, in accordance with the National Contingency Plan developed under Section 105, which has been revised to reflect the responsibilities and powers created by CERCLA (47 FR 31180 (July 16, 1982)). Notification based on reportable quantities is merely a trigger for informing the government of a release so that the need for response can be evaluated and any necessary response undertaken in a timely fashion. The government will not necessarily respond to all reported releases.

Section 103(b) establishes penalties, including criminal sanctions, for persons in charge of vessels or facilities who fail to report releases of hazardous substances which equal or exceed reportable quantities. Any person who, as soon as he has knowledge of a reportable release, fails to report the release pursuant to Section 103 (a) or (b) shall, upon conviction, be fined no more than $10,000 or imprisoned for not more than one year, or both. Notifications received under Section 103(a) or information obtained by such notice cannot be used against any reporting person in any criminal case, except a prosecution for perjury or for giving a false statement.

The notification requirements for releases of hazardous substances are addressed in this rulemaking. The rule proposed today lists the CERCLA hazardous substances, proposes adjustments to the reportable quantities for 387 of the 696 hazardous substances, and discusses procedures for reporting releases. An Advance Notice of Proposed Rulemaking (ANPRM) covering the designation of hazardous substances in addition to those specified in Section 101(14) of the Act is also being published in today's **Federal Register**.

It should be noted that other provisions of the Act may be applicable even where notification is not required. Therefore, nothing in this proposal should be interpreted as reflecting Agency policy or the applicable law with respect to other provisions of the Act. For example, a party responsible for a release is liable for the costs of cleaning up that release and for any natural resource damages, even if the release is not subject to the notification requirements of Sections 103 (a) and (b). Similarly, proper reporting of a release in accordance with Sections 103 (a) and (b) does not preclude liability for cleanup costs. The fact that a release of a hazardous substance is properly reported or that it is not subject to the notification requirements of Sections 103 (a) and (b) will not prevent EPA or other governmental agencies from taking response actions under Section 104, seeking reimbursement from responsible parties under Section 107, or taking an enforcement action against responsible parties.

The section of this preamble entitled "Notification" addresses the CERCLA notification provisions, including the persons required to notify the NRC of a release, the substances for which notification is required, the types of releases subject to the notification requirements, and the exemptions from these requirements. The section entitled "Reportable Quantity Adjustments" discusses the proposed RQ adjustments and the methodology used in making these adjustments.

[1] Section 103(c) provides a separate and distinct notification requirement. Section 103(c) requires notification of the existence and location of facilities at which hazardous wastes have been stored, treated, or disposed of and which are not presently permitted or accorded interim status under Section 3005 of the Resource Conservation and Recovery Act of 1976, as amended ("RCRA"). EPA has published an interim interpretative notice and policy statement concerning this notification, as well as a form that persons may use to notify EPA of such sites. Persons who have complied with Section 103(c) of CERCLA are still subject to notification provisions of Sections 103 (a) and (b), unless the release qualifies for the exemption provided by Section 103(f) (see 46 FR 22144 (April 15, 1981)).

Notification

I. Mechanics of Notification

Notifications pursuant to Sections 103 (a) and (b) of CERCLA are to be made by telephone to the National Response Center. The toll-free number for notification is (800) 424-8802, except from the Washington, D.C. metropolitan area, Hawaii, and Alaska, where the telephone number for notification is (202) 426-2675. When a call is received by the National Response Center, the duty officer will ask for information including the name, address, and telephone number of the reporting individual; the identity, location, and nature of the release (e.g., the source, cause, quantity, and duration of the release); the identity of the transporter or owner of the facility or vessel; the nature of injuries or property damage; any other relevant circumstances such as weather conditions; and any corrective actions taken. The National Response Center relays release information directly to either an On-Scene Coordinator at the appropriate EPA regional office or an On-Scene Coordinator at the U.S. Coast Guard district office. The On-Scene Coordinator evaluates the situation, gives the information to appropriate state and local officials, and decides whether and how the federal government should respond to the release.

II. Persons Covered by This Notice

The Act defines broadly the key terms of the notification requirements. The word "person" includes not only individuals, but private, public, and governmental entities as well (see Section 101(21)). "Vessel" includes essentially anything "used, or capable of being used, as a means of transportation on water" (see Section 101(28)). "Facility" is also defined broadly:

> "facility" means (A) any building, structure, installation, equipment, pipe or pipeline (including any pipe into a sewer or publicly owned treatment works), well, pit, pond, lagoon, impoundment, ditch, landfill, storage container, motor vehicle, rolling stock, or aircraft, or (B) any site or area where a hazardous substance has been deposited, stored, disposed of, or placed, or otherwise come to be located; but does not include any consumer product in consumer use or any vessel (see Section 101(9); see also Sections 101(17) ("offshore facility") and 101(18) ("onshore facility")).

The definition of "facility" excludes consumer products in consumer use. Releases from consumer products by consumers, therefore, are not releases from a facility into the environment and, consequently, do not have to be reported. Although the Act does not define the term "consumer product," the Consumer Product Safety Act defines that term as, generally, any article sold to a consumer for the person's use, consumption or enjoyment in or around a household, residence, school, in recreation, or otherwise (15 U.S.C. 2052). This definition will apply for notification under CERCLA.

For notification purposes, EPA will consider the entire contiguous plant or installation and contiguous grounds under common ownership to be the reporting facility rather than each vent, pipe, or piece of equipment at such a plant. This will avoid unnecessary and burdensome multiple calls where such a plant is experiencing more than one reportable release. A single notification will suffice for multiple concurrent releases within a facility.

The "person in charge" of a particular vessel or facility will vary according to the nature of the incident. Examples of the "person in charge" of a facility, as the Act defines that term, include a truck driver, the shift supervisor of a treatment works, or a pipeline operator. The Agency does not intend to identify specific individuals within a business entity who are responsible for reporting releases. Persons in charge of private, public, and governmental entities are more familiar with their operations and, therefore, are better able to assign reporting responsibilities. When there has been a failure to notify, the government will decide on a case-by-case basis whether to seek appropriate

VOL 48 ISS 102 MAY 25 1983

remedies from either the entity or particular employees.

III. Releases Covered by This Notice

A. Hazardous Substances Subject to This Notice

Congress incorporated six lists of hazardous substances developed under environmental statutes in the Act's definition of hazardous substances (Section 101(14)). These lists are:

(1) Substances designated pursuant to Section 311 of the Clean Water Act ("CWA");

(2) Hazardous wastes [3] under Section 3001 of the Solid Waste Disposal Act (commonly known a the Resource Conservation and Recovery Act, "RCRA"), but excluding wastes the regulation of which has been suspended by Congress;[3]

(3) Toxic pollutants listed under CWA Section 307(a);

(4) Hazardous air pollutants listed under Section 112 of the Clean Air Act;

(5) Imminently hazardous chemicals or mixtures for which EPA has taken action under Section 7 of the Toxic Substances Control Act; and

(6) Substances designated pursuant to Section 102 of CERCLA.

Table 302.4 lists the hazardous substances, their regulatory synonyms, and the isomers of these substances that are subject to the notification requirements of Sections 103(a) and 103(b). The substances listed are those designated pursuant to other environmental acts only; no substances have been designated pursuant to Section 102 of CERCLA. The designation of substances pursuant to Section 102 is discussed in the ANPRM on designation also published in today's **Federal Register.**

Table 302.4 will not be static. If substances are added to or deleted from the lists of substances developed under the statutes which are incorporated in CERCLA Section 101(14), the CERCLA list of hazardous substances will change. **Federal Register** Notices reflecting changes to the lists referenced in Section 101(14) of CERCLA and to Table 302.4 will be published simultaneously.

Pursuant to Section 101(14)(C) of CERCLA, hazardous substances include any hazardous waste having the characteristics identified or listed pursuant to Section 3001 of RCRA (but not including any waste the regulation of which has been suspended by Act of Congress). These characteristics are: ignitability, corrosivity, reactivity, or extraction procedure toxicity (ICRE) (see 40 CFR 261.20 *et seq.*). A person generating a solid waste must determine, in accordance with 40 CFR 262.11(c) of the RCRA regulations, if a waste meets these characteristics. If a waste is hazardous under the RCRA regulations, it is a hazardous substance under CERCLA. These hazardous substances, hereinafter referred to as ICRE wastes, are not (and by their nature cannot be) specifically listed. Persons who release such unlisted hazardous wastes in quantities equal to or exceeding the reportable quantities delineated in Table 302.4 for those wastes will be required, unless specifically exempted, to notify the NRC.[4]

The Act excludes certain energy-related substances from the definition of hazardous substances, and these substances are thereby exempted from the notification requirements of Section 103. These substances are petroleum, including crude oil and any fraction thereof (unless otherwise listed in Table 302.4), natural gas, natural gas liquids, liquified natural gas, synthetic gas usable for fuel, or mixtures of natural gas and such usable synthetic gas (see Section 101(14)). The notification requirements as set forth in 33 CFR Part 153 and 40 CFR Part 110 for certain discharges of oil remain in effect.

Chemical substances are often known by several different names. The names are derived from different origins, which include systematically applied nomenclatures, such as the Chemical Abstracts Collective Index System (e.g., propanenitrile, 2-hydroxy-2-methyl-); trivial names (e.g., aldrin, DDT); common chemical names (e.g., lead acetate, nitrotoluene); and trade names (e.g., Diazinon, Kepone). The substances listed in Table 302.4 are indicated by the name(s) used to identify that substance under the environmental statutes and implementing regulations incorporated in the definition of hazardous substance (Section 101(14)). Because no single nomenclature is used consistently throughout these statutes and implementing regulations, the CERCLA substances are not listed pursuant to one nomenclature. Consequently, duplicate entries appear for hazardous substances which are listed by different names under the statutes (and their implementing regulations) incorporated into Section 101(14). For example, lindane, designated under CWA Section 311, and hexachlorocyclohexane, gamma-BHC, designated under CWA Section 307(a), are different names for the same compound and both names appear in Table 302.4

It is possible, because of the numerous names for some materials, that a substance listed is not identified by a name with which all persons who handle that substance are familiar. Such a material is considered to be a hazardous substance regardless of how it is named or identified. To facilitate identification of substances in Table 302.4, the Chemical Abstracts Service (CAS) Registry Numbers are also used in listing the CERCLA hazardous substances.

EPA is considering several alternatives for developing a nomenclature system for the promulgated list of CERCLA hazardous substances. The first alternative would be to adopt the method used in Table 302.4, i.e., to use those names which appear in the environmental statutes (and their implementing regulations) incorporated in the CERCLA definition of hazardous substances. Another option would be to use only one system of nomenclature, such as the Chemical Abstracts Collective Index System name (either the 8th or 9th Collective Index). A third option would be to list all the major synonyms for each substance, including the name under the Chemical Abstracts Collective Index System. EPA requests comments on these options.

Table 302.4 contains many broad, generic classes of organic and metallic compounds designated as toxic pollutants under CWA Section 307(a), such as "chlorinated phenols," "phthalate esters," and "zinc and compounds." Many of the broad, generic classes of compounds encompass hundreds of specific compounds. Consequently, it would be virtually impossible for the Agency to develop a reportable quantity for a generic class of compounds which would take into account the characteristics of all of the specific compounds, each with different characteristics. Therefore, in publishing Table 302.4, EPA has included the specific compounds developed in implementing Section 307(a) or Section 311 of the Clean Water Act, but no adjusted RQ is proposed for these broad, generic classes. The notification requirements apply to those specific compounds for which RQs are listed in Table 302.4, rather than to the generic listings. This does not, however, preclude liability with respect to releases of specific compounds which are within one of these generic listings but which are not listed in Table 302.4 for reporting purposes.

The Agency is not requiring notification of releases of massive forms of the solid metals originally listed under CWA Section 307(a) when the diameter of the pieces of metal released equals or exceeds 100 micrometers (0.004 inches). Releases of these metals are excluded form CERCLA reporting requirements because they are large enough to be neither respirable nor to react rapidly with air or water. The substances to which this rule applies are indicated by a "†" in Table 302.4. They are antimony, arsenic, beryllium, cadmium, chromium, copper, lead, nickel, selenium, silver, thallium, and zinc. EPA requests comments on the notification requirements for metals, particularly on the appropriate cutoff size for massive forms of these solid metals.

B. Definition of Releases Subject to this Notice

Congress defined the term "release" to include within its scope virtually all ways that substances may enter the environment:

> "release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment * * * (Section 101(22)).

Four types of releases are specifically excluded from the definition of release in CERCLA Section 101(22). They are:

(1) Releases which result in exposures to persons solely within a workplace for which claims against the employer or other persons are available;

(2) Emissions from engine exhaust from a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station;

(3) Releases of source, byproduct, or special nuclear material from a nuclear incident subject to requirements of the Nuclear Regulatory Commission for financial responsibility under Section 170 of the Atomic Energy Act [5]; and

(4) The normal application of fertilizers.

A key element of the definition of "release" is the phrase "into the environment." Although the word "environment" is broadly defined in Section 101(8), some releases of hazardous substances may not enter the environment. For example, the spill of a hazardous substance onto the concrete floor of a manufacturing facility may not, for notification purposes, be "into the environment" if wholly contained in the facility. If part of the substance does enter the environment, e.g., seeps into the ground or volatilizes into the atmosphere, there would be a release into the environment and, if released in a quantity equal to or greater than the reportable quantity for that substance, the release would be subject to notification requirements of Sections 103 (a) and (b).

The legislative history of the Act indicates that the "workplace exposure" exclusion was apparently intended to limit the potential scope of third-party actions for personal injuries under the Act (see Sen. Rep. 96–848, 96th Cong., 2d Sess. 94 (1980)). The third-party action provision was subsequently deleted; however, the "workplace exposure" provision remained. Whether the release results in exposures to persons solely within a workplace does not appear to be relevant in determining whether notification is appropriate. For notification, the Agency believes that the distinction between "facility" (or "vessel") and "environment" is the determining factor; releases from a facility (or vessel) that enter the environment are reportable events. The Agency requests comments on this interpretation.

C. Determination of When a Reportable Quantity Has Been Released

Pursuant to Section 103(a) of the Act, notification must be given as soon as the person in charge of a vessel or facility has knowledge that a release of a hazardous substance equal to or greater than a reportable quantity has occurred. Under Section 311 of the CWA, EPA set 24 hours as the period to determine, for purposes of notification, whether a reportable quantity of hazardous substances had been released. Since the 24-hour period has been successfully used in the CWA Section 311 program and the regulated community is familiar with this time period, EPA proposes to use this 24-hour period under CERCLA to determine whether the reportable quantity of a substance has been released. When the amount of a substance released within a 24-hour period equals or exceeds its reportable quantity, the National Response Center must be notified immediately.

Under regulations implementing Section 311 of the CWA, EPA interpreted the application of RQs to mixtures and solutions containing hazardous substances: "[d] discharges of mixtures and solutions are subject to these regulations only where a component hazardous substance of the mixture or solution is discharged in a quantity equal to or greater than its RQ" (44 FR 50767 (August 29, 1979)). This interpretation will apply to releases of hazardous substances under the Act as well. Thus, a release of 10 pounds of a solution which contains 1 pound of hazardous substance A and 9 pounds of non-hazardous substance B is not reportable if the RQ of hazardous substance A is 10 pounds. Similarly, a release of a mixture containing 70% of an RQ of hazardous substance A and 60% of an RQ of hazardous substance B is not subject to the notification requirements of Sections 103 (a) and (b).

An alternative approach is to apply the RQ to the mixture or solution as a whole. Under this approach, a release of 10 pounds of a solution which contains 1 pound of hazardous substance A and 9 pounds of non-hazardous substance B would be reportable if the RQ of hazardous substance A is 10 pounds or less. Similarly, the release of a mixture containing 70% of an RQ of hazardous substance A and 60% of an RQ of hazardous substance B would be reportable. This approach was not adopted because it would result in over-reporting. The Agency instead intends to focus its attention on those releases which are potentially most environmentally significant, [6] such as those releases in which the component hazardous substance is released in an amount that equals or exceeds the assigned RQ.

Any person in charge of a vessel or facility who is unsure as to whether any of the components in a released mixture exceed their RQs is strongly encouraged to report the release.

IV. Exemptions From the CERCLA Notification Requirements

There are four types of statutory exemptions from the notification requirements for releases of hazardous substances in reportable quantities:

---

[3] Substances listed under Appendix VIII to 40 CFR Part 261 that are not designated under any one of the statutes referenced in CERCLA Section 101(14) are not CERCLA hazardous substances because Appendix VIII substances are not hazardous wastes under RCRA. The Appendix VIII substances will be considered for designated pursuant to Section 102 at a later date.

[3] Even if a state properly delists, deletes, or exempts a RCRA hazardous waste pursuant to authority granted it by EPA, that waste will remain a hazardous substance for purposes of CERCLA.

[4] The ICRE characteristics apply only to hazardous substances which are RCRA wastes prior to their release. The release of a substance which exhibits one of the RCRA characteristics but is not a waste is not a reportable event, unless that substance is listed in 40 CFR Part 302 as a hazardous substance. Since the purpose of notification is to trigger consideration of a response, however, the reporting of a release of any material that may require action by the federal government is strongly encouraged.

[5] A release of source, byproduct, or special nuclear material from a processing site designated under Sections 102(a)(1) or 302(a) of the Uranium Mill Tailings Radiation Control Act of 1978 is not a "release" for purposes of response actions under CERCLA but is subject to the notification requirements of Sections 103 (a) and (b) (Section 101(22)).

[6] As noted in the preamble to 40 CFR Part 117 of the CWA, it may not be valid to assume that the toxic properties of all different hazardous substances can be considered additive (44 FR 50767 (August 29, 1979)).

UMI

VOL 48 ISS 102 1983 MAY 25

(1) Federally permitted releases as defined in Section 101(10);

(2) Applicaton of pesticide products registered under the Federal Insecticide, Fungicide, and Rodenticide Act ("FIFRA");

(3) certain releases of hazardous wastes which are required to be reported under the provisions of the Resource Conservation and Recovery Act and which are reported to the NRC; and

(4) certain releases which are determined to be "continuous" under the provisions of Section 103(f)(2).

This section discusses EPA's proposed interpretation of the scope of these statutory exemptions from the notification requirements of Sections 103(a) and (b).

A. Federally Permitted Releases

Congress did not intend for the notification requirements in Sections 103(a) and (b) of CERCLA to apply to the federally permitted releases defined in Section 101(10).

> The laws authorizing the permit and regulations that control these releases provide for notification and such notification procedures should provide the same public benefits—especially regarding timely response—as would be provided in S. 1480. Notice is crucial to the removal and remedial operations which are central to the reported bill. The federally permitted release exceptions are not directed at avoiding notice, but rather to make it clear which provisions of law apply to discharging sources. (Sen. Rep. 96–848, 96th Cong., 2d Sess. 50 (1980)).

This section discusses the federally permitted releases.

1. Releases from Point Sources with National Pollutant Discharge Elimination System (NPDES) Permits. Section 101(10) identifies three types of releases from point sources with NPDES permits as federally permitted releases:

> (A) discharges in compliance with a permit uder section 402 of the Federal Water Pollution Control Act, (B) discharges resulting from circumstances identified and reviewed and made part of the public record with respect to a permit issued or modified under section 402 of the Federal Water Pollution Control Act and subject to a condition of such permit, (C) continuous or anticipated intermittent discharges from a point source, identified in a permit or permit application under section 402 of the Federal Water Pollution Control Act, which are caused by events occuring within the scope of revelant operating or treatment systems * * *.

This language is identical to that used in Section 311(a)(2) of the CWA to exclude these releases from the term "discharge" with respect to EPA's hazardous substance spill response and prevention program. Under regulations implementing Section 311 of the CWA, EPA has interpreted this language to exclude basically all discharges of hazardous substances from an NPDES point source that are associated with manufacturing or treatment processes and that were identified and considered in the issuance of the permit. This exemption also applies to discharges from NPDES point sources permitted by a state authorized to operate the NPDES permit program (40 CFR 117.12; 44 FR 58910 (October 12, 1979)). As Congress indicated, the interpretation of these provisions under Section 311 of the CWA and the implementing regulations will be continued for federally permitted releases under CERCLA (see Sen. Rep. 96–848, 96th Cong., 2d Sess. 47 (1980)).

2. Releases Subject to CWA Section 404 Permits. Discharges which comply with a legally enforceable permit for dredge or fill materials under Section 404 of the CWA are also federally permitted releases exempt from the notification requirements of CERCLA Sections 103(a) and (b). Before issuing these permits, the government reviews the substances to be discharged. The permits allowing the discharge of hazardous substances are issued only if no significant degradation of the aquatic environment will result. This exemption applies to discharges in compliance with the terms and conditions of either an individual or a general CWA Section 404 permit.

In regulations implementing Section 311 of the CWA, EPA exempted from the notification requirement not only those releases which were in compliance with Section 404 permits but also those which were not subject to permit requirements under Section 404 of the CWA (Sections 404(f) and 404(r)). These latter releases are not "federally permitted releases" for purposes of CERCLA; therefore, they must be reported. Releases in compliance with a legally enforceable permit under Section 404 of the CWA need not be reported.

3. Releases from Facilities with Final RCRA Permits. Releases from hazardous waste management facilities which have legally enforceable final permits under Section 3005 of RCRA are also exempted from notification if the permit specifically identifies the hazardous substances released and makes those substances subject to "a standard of practice, control procedure or bioassay limitation or condition, or other control on the hazardous substances in such releases" (Section 101 (10)(E)). Releases from hazardous waste management facilities with final RCRA permits issued by a state are also considered federally permitted releases for purposes of CERCLA.

EPA is presently in the process of promulgating regulations implementing the permit provisions of RCRA. Final standards have been set for existing storage facilities and incinerators and land disposal facilities (46 FR 2802 (January 12, 1981); 46 FR 7666 (January 23, 1981); 46 FR 12414 (February 13, 1981); 47 FR 32274 (July 26, 1982)). This exemption does not apply to hazardous waste management facilities which are in "interim status" pursuant to Section 3005(e). "Sites or facilities which have interim status under Section 3005(e) do not adequately utilize acceptable levels of technology, and do not qualify for this exclusion" (see Sen. Rep. 96–848, 96th Cong., 2d Sess. 48 (1980)). However, although Section 101(10)(E) does not exempt hazardous waste management facilities with interim status from the notification requirements if they release hazardous substances, such releases may fall within one of the limited exemptions to the notification requirements (e.g., Section 103(f)(1)) discussed below.

4. Releases pursuant to Marine Protection, Research, and Sanctuaries Act Permits. Section 101(10)(F) of CERCLA includes, in the definition of a federally permitted release, releases in compliance with legally enforceable permits issued under Section 102 (EPA ocean dumping permits) and Section 103 (Corps of Engineers permits for ocean dumping of dredged materials) of the Marine Protection, Research, and Sanctuaries Act. Pursuant to EPA regulations, applicants for ocean dumping permits must identify the physical and chemical properties of the materials to be discharged, and the permit must identify the materials which may be discharged (see 40 CFR Parts 221, 223). Similar procedures and criteria apply to issuing ocean dredging permits (see 33 CFR Part 324). These ocean dumping and ocean dredging permits cover substances that can be lawfully discharged. Releases of hazardous substances not specifically permitted are subject to the notification requirements of CERCLA Sections 103 (a) and (b).

5. Underground Injections Authorized pursuant to the Safe Drinking Water Act. Also exempted from the notification requirements by the definition of federally permitted release is "any injection of fluids" authorized under federal injection control programs or state programs submitted for federal approval pursuant to Part C of the Safe Drinking Water Act (and not disapproved by EPA) (Section 101(10)(G)).

EPA has published regulations establishing technical standards and criteria (40 CFR Part 146) and regulations governing approval of state programs and permit procedures (40 CFR Parts 122–124). Under the Safe Drinking Water Act, the states are to take the primary role in implementing the underground injection control program; EPA is to administer the program only if the state fails to submit an approvable program within a specified time period. Any underground injection wells permitted under a state program approved by EPA or under an EPA-administered program are considered federally permitted for purposes of CERCLA notification.

6. Emissions Subject to Clean Air Act Controls. Section 101(10)(H) of CERCLA includes in the definition of federally permitted release:

> any emission into the air subject to a permit or control regulation under section 111, section 112, title I part C, title I part D, or State implementation plans submitted in accordance with section 110 of the Clean Air Act (and not disapproved by the Administrator of the Environmental Protection Agency), including any schedule or waiver granted, promulgated, or approved under these sections * * *.

Air emissions permits or control requirements focus on a limited number of pollutants: criteria pollutants and, in certain cases, designated hazardous pollutants. Stationary sources may emit hazardous substances that are not subject to a permit or control regulation, and therefore must be reported under CERCLA.

These substances may be hazardous substances under CERCLA because they were designated under some other environmental statute, rather than the Clean Air Act. The Agency recognizes that reporting of such releases may be required, even though the releases have been reviewed and permitted by EPA or a state, and are very unlikely to warrant federal response.

Controls on air releases of hazardous substances under the Clean Air Act may vary from state to state, so that the application of the federally permitted release exemption for air releases from the CERCLA notification provisions may also vary from state to state. For example, site-specific controls under state implementation plans may not contain requirements for controlling emissions of certain specific organic compounds that are emitted during the normal operation of stationary sources.

The Senate committee that drafted this exemption acknowledged that the Clean Air Act allows control of air pollutants to be achieved in various ways:

> In the Clean Air Act, unlike some other Federal regulatory statutes, the control of hazardous air pollutant emissions can be achieved through a variety of means: express emissions limitations (such as control on the pounds of pollutant that may be discharged from a source during a given time); technology requirements (such as floating roof tanks on hydrocarbons in a certain vapor pressure range); operational requirements (such as start up or shut down procedures to control emissions during such operations); work practices (such as the application of water to suppress certain particulates); or other control practices. Whether control of hazardous substance emissions is achieved directly or indirectly, the means must be specifically designed to limit or eliminate emissions of a designated hazardous pollutant or a criteria pollutant. (Sen. Rep. 96–848, 96th Cong., 2d Sess. 49 (1980)).

The exemption applies to releases subject to a permit or control regulation and, as noted by the Committee, control mechanisms can take a variety of forms. There is a suggestion at the end of the passage that the control must be "specifically designed to limit or eliminate emissions of a designated hazardous pollutant or a criteria pollutant." EPA solicits comments on the extent to which this exclusion should apply to pollutants limited or eliminated by these control practices, but not explicitly mentioned as part of any requirements.

More generally, EPA is uncertain of the extent to which emissions from permitted stationary souces, if they contain CERCLA-designated substances, qualify for the federally permitted release exemption. The Agency solicits comments on the appropriateness of exempting emissions from permitted stationary sources from CERCLA's notification requirements on the grounds that they are federally permitted releases.

The Agency intends to conduct a more detailed investigation of this issue prior to promulgation of final RQ adjustments, to identify the extent of problems and potential solutions. Potential areas of investigation include:

- The kinds and quantities of CERCLA-designated substances released by stationary sources, to determine the extent to which the adjusted RQs proposed today would require stationary sources to notify the NRC under CERCLA;
- Whether such releases can appropriately be considered federally permitted releases under CERCLA;
- The scope of the term "continuous release," to determine the degree to which air releases from stationary sources may qualify for reporting under the continuous release provisions of Section 103(f)(2); and
- Separate air-release RQs for stationary sources, to determine whether higher RQs for air releases from stationary sources may reduce reporting burdens, since EPA recognizes that the impact of releases from elevated sources (e.g., stacks) may be different than that from releases onto the ground or into water.

Air releases that are "continuous" and "stable in quantity and rate" may qualify for reporting under Section 103(f)(2). This section requires initial reporting "for a period sufficient to establish the continuity, quantity, and regularity of such release," and thereafter "annually, or at such time as there is any statistically significant increase in the quantity of any hazardous substance released." Among the types of releases the Agency is considering as falling within the scope of the term "continuous" are routine, anticipated, intermittent releases of hazardous substances that are incidental to the normal manufacturing or treatment processes or operations of facilities or vessels (see Section IV.D. of the Notification section of this preamble for further discussion).

The Agency has proposed only one RQ for each hazardous substance, regardless of the medium into which the substance is released. The rationale for this approach is discussed in the Reportable Quantity Adjustments section of this preamble. EPA might consider different RQs for releases into air, if an RQ adjustment procedure that specifically addressed impacts from air releases can be developed, and if such a change will significantly reduce the reporting burden associated with the current proposed RQ adjustments without undue environmental impact. The Agency solicits information concerning specific hazardous substances for which these proposed RQs may be particularly burdensome and comments on approaches to make the notification requirements for air releases of hazardous substances more appropriate.

Pending implementation of Section 103(f)(2), EPA will focus its enforcement efforts on episodic releases that may present a serious risk of harm to public health or welfare or the environment, rather than on continuous releases.

7. Injections of Materials Related to Development of Crude Oil or Natural Gas Supplies. CERCLA also considers as a federally permitted release:

> any injection of fluids or other materials authorized under applicable state law (i) for the purpose of stimulating or treating wells for the production of crude oil, natural gas, or water, (ii) for the purpose of secondary, tertiary, or other enhanced recovery of crude oil or natural gas, or (iii) which are brought to the surface in conjuction with the production

UMI

of crude oil or natural gas and which are reinjected * * *. (Section 101(10) (I)).

EPA interprets this provision to include only those activities or materials which are specifically authorized by state law—rather than simply not prohibited—and to cover only those activities whose sole purpose is the production of crude oil, natural gas, or water, the recovery of crude oil or natural gas, or the reinjection of fluids brought to the surface from such production.

8. Introduction of Pollutants into Publicly Owned Treatment Works. Section 101(10) (J) of CERCLA exempts, as a federally permitted release, the introduction of pollutants into a publicly owned treatment work if two conditions are satisfied: (1) The pollutant is specified in pretreatment standards and is in compliance with the standards of Section 307 (b) and (c) of the CWA, and (2) the pollutant is specified in and is in compliance with enforceable requirements in a pretreatment program submitted by the state or local government for EPA approval. Pretreatment standards under Section 307 (b) and (c) of the CWA are of two types: pollutant-specific standards for certain industrial categories and a generic prohibition against discharges which may inhibit or upset the continued safe operation of the municipal treatment system.

There are at present few industries with established pretreatment standards. Many industrial facilities would, therefore, be unable to qualify for this exemption, despite their compliance with the generic prohibitions and local pretreatment standards.

Under Section 311 of the CWA, EPA published regulations which narrowly define the manner in which mobile sources are authorized to discharge hazardous substances into publicly owned treatment works (40 CFR 117.13(b)). This regulation remains effective under this Act.

9. Releases of Source, Byproduct, or Special Nuclear Materials. Federally permitted releases also include any releases of source, byproducts, or special nuclear material, as defined by the Atomic Energy Act of 1954, which comply with a legally enforceable license, permit, regulation, or order issued pursuant to the authority of the Atomic Energy Act (see Section 101(10) (K)).

Radionuclides are generically listed as hazardous air pollutants under Section 112 of the Clean Air Act and therefore are hazardous substances under CERCLA. Radionuclides include source, special nuclear, and byproduct material. Releases of these materials in quantities equal to or greater than the RQ are generally subject to the notification requirements, unless they are federally permitted releases.[7]

The Nuclear Regulatory Commission and states in which federal authority has been discontinued pursuant to agreement with the Nuclear Regulatory Commission issue a variety of general and specific licenses which govern the handling, use, storage, and disposal of source, byproduct, and special nuclear material [see generally 10 CFR Parts 20, 30–35, 40, 50, 60, 61, 70, 71, and 150]. These activities, if in compliance with legally enforceable state or federal licenses, are not subject to the notification requirements of Sections 103(a) and (b) of CERCLA.

The Nuclear Regulatory Commission regulations provide for reporting differences in inventories of these materials (see 10 CFR Part 70). To avoid duplicate reporting, EPA is not requiring notification of inventory differences to the National Response Center under CERCLA. The Nuclear Regulatory Commission also provides for reporting releases of radioactive material (10 CFR Part 20). As discussed below, EPA is currently reviewing these requirements to identify areas of duplicate reporting.

The regulations of the Nuclear Regulatory Commission contain several important exemptions from its provisions, based generally on the small quantities of materials involved or the low levels of radioactivity they emit. Persons handling these exempted materials are not subject to legally enforceable regulations and, therefore, releases of these materials into the environment are not "federally permitted" releases. Notification is therefore required under CERCLA; however, the Agency does not anticipate that such releases will frequently exceed the one-pound reportable quantity currently applicable to radionuclides under the statute.

B. Pesticide Products

Section 103(e) of CERCLA exempts from the notification provisions of the Act "the application of a pesticide product registered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (and) the handling and storage of such a pesticide product by an agricultural producer." EPA interprets the application of pesticides to refer to the normal application of registered pesticides (and pesticides used in accordance with FIFRA Section 5 experimental use permits or FIFRA Section 18 emergency exemptions) in ways which are not inconsistent with the pesticides' labeling. This interpretation is consistent with the existing regulations promulgated under the authority of Section 311 of the CWA (40 CFR 117.11(c)). Congress did not intend a broad exemption covering all possible uses, disposals, or applications of pesticides—particularly since EPA and the states have found that pesticides are often found at uncontrolled hazardous waste sites. The Senate Committee on Environment and Public Works, for example, explained:

> It should also be clear that the notice and penalty provisions do not apply to such routine field applications. Accidents or international disposals which result in the release of a pesticide in other than its intended field application would, of course, be subject to the notice provision of this bill. Only in this manner could the preventive response mechanisms of the bill operate to protect human health. (Sen. Rep. 96–848, 96th Cong., 2d Sess. 50 (1980)).

One of the environmental incidents repeatly mentioned in support of the bill involved contamination of drinking water supplies by waste pesticides (see 126 Cong. Rec. S14967 (daily ed. November 24, 1980) (remarks of Sen. Stafford)). Spills, improper application, and improper disposal of pesticides are within the scope of notification provisions if hazardous substances are released in reportable quantities.

Accidents which release pesticides into the environment are subject to the notification provisions of Sections 103 (a) and (b). In discussing federally permitted releases, Senator Randolph pointed out that "[a]ccidents—whatever their cause—which result in, or can reasonably be expected to result in releases of hazardous pollutants would not be exempt from the requirements and liabilities of this bill" (126 Cong. Rec. S14965 (daily ed., November 24, 1980)). This reasoning applies with equal force to the exemption for pesticides under Section 103(e).

C. Releases Reported Under RCRA

Section 103(f)(1) of CERCLA exempts from the notification requirements of Sections 103 (a) and (b) releases of hazardous substances which are subject to reporting requirements (or specifically exempted from such reporting) under Subtitle C of RCRA and have been reported to the NRC.

Congress recognized that regulations may be necessary to integrate fully the RCRA reporting provisions with the

[7] Releases of source, byproduct, or special nuclear material resulting from a nuclear incident subject to the financial protection requirements of Section 170 of the Atomic Energy Act are excluded from the Act's definition of release. [See Section 101 (22).]

notification requirements of CERCLA Section 103 (see 126 Cong. Rec. S14965 (daily ed., November 24, 1980) (Remarks of Sen. Randolph)). The RCRA regulations create extensive reporting and recordkeeping requirements for persons handling hazardous waste (40 CFR Parts 260–267). For example, 40 CFR 265.56 requires owners and operators of hazardous waste facilities with interim status to report all releases which could threaten human health, or the environment, outside the facility, to either the NRC or the government official designated as the On-Scene Coordinator for that geographical area (pursuant to 40 CFR Part 300). When releases are reported to the NRC pursuant to this RCRA requirement, CERCLA notification requirements have been fulfilled. The Agency is examining RCRA reporting requirements in connection with CERCLA's notification requirements to determine whether adjustments to either RCRA's or CERCLA's notification requirements are appropriate. The Agency requests comments on the impact of the RCRA regulations on the CERCLA notification requirements.

D. Continuous Releases

Section 103(f)(2) of CERCLA exempts certain releases from the general notification requirements of Sections 103(a) and 103(b). Releases may be exempted if they are "continuous," "stable in quantity and rate," and notification has been given under Sections 103 (a) and (b) "for a period sufficient to establish the continuity, quantity, and regularity" of the release or under Section 103(c) (which relates to notification of the existence of certain facilities that are or have been used for storage, treatment, or disposal of hazardous wastes). Notification of continuous releases must be given "annually, or at such a time as there is any statistically significant increase" in the quantity of the hazardous substance being released.

The main function of CERCLA's notification requirements is to alert government officials to the existence of a situation that may require a government response to protect the public health or welfare or the environment. Since episodic releases are by definition "unanticipated," they must be reported as they occur. Continuous releases, on the other hand, may be predictable and can either be literally continuous or recurring. Congress recognized in Section 103(f)(2) that CERCLA's objectives would be satisfied—in the case of continuous releases—by less frequent notification.

Thus, instead of reporting every release as it occurs, persons in charge are allowed to report certain continuous releases less often under Section 103(f)(2). The purpose of this section is to reduce unnecessary reports of releases. The rationale for this approach is that when a release is regular and of stable quantity, the Agency does not need to be notified each time such a release occurs in order to have the information necessary to decide whether a response to the release is necessary. Section 103(f)(2) provides, however, that notification must still be given (1) under Section 103(c) or "for a period sufficient to establish the continuity, quantity, and regularity of such release" and (2) "annually, or at such time as there is any statistically significant increase in the quantity of any hazardous substance or constituent thereof released, above that previously reported or occurring."

The Agency is considering development of a policy to identify:

- The types of releases that qualify for the limited exemption under Section 103(f)(2), and
- The Section 103(f)(2) notification scheme.

Pending implementation of Section 103(f), EPA will focus its enforcement efforts on episodic releases (e.g., accidental, one-time, non-routine releases) exceeding the RQs proposed today which may present a serious risk of harm to human health or welfare or the environment, rather than on continuous releases (e.g., routine, continuous, or anticipated intermittent releases which are incidental to normal manufacturing or treatment processes or operations of facilities or vessels).

1. Types of Releases. The Agency is considering defining releases that are "continuous" and "stable in quantity and rate" to include:

- Literally continuous releases that enter the environment 24 hours a day, 365 days a year. Examples include hazardous substances leaking from pipes or lagoons into surface water, leaching into the soil or groundwater, or evaporating;
- Releases continuous during operating hours, such as releases from some continuous industrial processes;
- Releases from batch operations; and
- Routine, anticipated, intermittent releases of hazardous substances that are incidental to the normal manufacturing or treatment processes or operations of facilities or vessels. Examples include releases from relief valves, the maintenance of pollution control equipment, charging of coke oven batteries, and tank cleaning operations.

In order for a continuous release which is stable in quantity and rate to be subject to Section 103(f)(2), notification must be given pursuant to Section 103(c), or under Sections 103 (a) and (b) for a "period sufficient to establish the continuity, quantity, and regularity" of the release. Reporting under Section 103(c) is addressed in 46 FR 22144 (April 15, 1981) and will not be discussed further here. The Agency is considering several approaches for defining the "period sufficient," including:

- Establishing a single period (such as a week, a month, six months, or a year) of reporting that will be required for all releases; or
- Specifying the number of reports, instead of a specific time period, to establish the "period sufficient."

EPA solicits comments on these or any other approaches for implementing the Section 103(f)(2) notification provisions.

2. Section 103(f) Notification Scheme. The Agency intends to develop a notification system for continuous releases. An approach under consideration involves an annual written notification identifying the hazardous substance being released, the quantity and rate of such release, and the environmental media affected. The Agency does not anticipate that this written notification would be necessarily costly or elaborate; it does not anticipate that sophisticated analysis to determine the constituents of a release or that special monitoring to determine the quantity or rate of a release will be needed. A new notification (either written or by telephone) would be required if there is a statistically significant increase in the amount, or statistically significant change in the type, of hazardous substance being released. EPA is also considering whether applications for federal permits containing information on the nature of these releases might suffice to show that a release qualifies for the continuous release exemption.

Three alternatives for defining "statistically significant increase" are under consideration:

- Requiring reporting whenever a release falls outside some expected range based on statistical tests, such as the "Student's t" test;
- Requiring reporting whenever the amount released exceeds the amount ordinarily released by some pre-established factor, such as 2, 5, or 10 times the daily average; or
- Letting the releaser determine what is a statistically significant increase.

EPA requests comments specifically on the most feasible approach for continuous release notification, the information to be required, what the Agency should consider a statistically significant increase in the release, and

VOL 48 ISS 102 MAY 25 1983 UMI

any other relevant issues. EPA hopes that such information will enable it to develop a system which imposes a minimal burden on both the regulated community and the government, while achieving the underlying statutory objectives.

V. Duplicate Reporting

CERCLA reporting requirements may duplicate or overlap with reporting requirements for some hazardous substance releases under other federal or state statutes. For example, a possible area of overlap exists between CERCLA and the Nuclear Regulatory Commission's requirements for reporting releases of certain radioactive substances. Another potential area of duplicative reporting is the overlap between CERCLA and the reporting requirements associated with the ground water monitoring requirements for facilities with interim status pursuant to RCRA (see 40 CFR 265.93). Overlaps may also exist with reporting systems established under state law.

Congress did not intend that the CERCLA reporting requirements duplicate existing notification procedures (see 126 Cong. Rec. S14965 (daily ed., November 24, 1980) (remarks of Sen. Randolph)). To ensure that the notification requirements established by CERCLA will be neither duplicative nor unduly burdensome, EPA is currently reviewing other relevant federal and state reporting requirements to identify areas where it may be possible, in the future, to eliminate redundancy and enhance the overall effectiveness of the notification procedures. For example, permit applications under other environmental statutes may supply sufficient information to show that a releaser qualifies for the alternative form of notification under Section 103(f)(2).

If reporting requirements under other statutes do not fully address the goals of CERCLA, the CERCLA notification provisions would be applicable. For example, a federal notification system for releases of hazardous materials as defined by the Department of Transportation (DOT) exists under the Hazardous Materials Transportation Act (see 49 CFR 171.15). Under the DOT regulations, immediate telephone notification to the NRC is triggered by severe accidents that cause death, injury, or serious property damage, or by release of etiologic and radiologic materials, poisons, and other agents (46 FR 17738 (March 19, 1981)). Written reports are required for all other releases. Because the DOT requirements do not cover all releases encompassed by CERCLA, the Sections 103 (a) and (b) reporting requirements currently apply and those releases must be reported to the National Response Center.

The Agency recognizes that shippers and carriers of hazardous substances, in order to comply with CERCLA notification requirements, will rely on the U.S. Department of Transportation's ("DOT's") regulatory mechanisms. The Agency intends to coordinate today's rulemaking with DOT regulations under the Hazardous Materials Transportation Act and DOT's regulatory responsibility under Section 306 of CERCLA. EPA will work with DOT to develop a cordinated and integrated set of regulations so that shippers and carriers of hazardous substances will be subject to only one set of regulations. The Agency requests comments on the proper manner of coordinating the various regulations governing releases of hazardous substances.

Reportable Quantity Adjustments

I. Introduction

Section 102(b) establishes a reportable quantity of one pound for all hazardous substances other than those with different RQs established under Section 311 of the Clean Water Act. Congress enacted this provision in part to ensure that reporting of releases would begin immediately upon enactment of CERCLA, because reporting is essential for response.

The statutory RQs were intended to be of temporary duration pending EPA review and adjustment of those RQs. To that effect, EPA committed to Congress in late 1980 to revise those reportable quantities (126 Cong. Rec. H11792 (December 3, 1980)). This rulemaking proposes adjustments to the statutory RQs based upon specific scientific and technical criteria which correlate with the possibility of hazard or harm upon the release of a substance in a reportable quantity. These revised RQs, therefore, enable the Agency to focus its resources on those releases which are most likely to pose potential threats to public health and welfare and the environment. Such RQ adjustments will also relieve the regulated community from the burden of making reports of releases which are unlikely to pose such threats.

Analysis is complete for 387 of the 696 hazardous substances designated under CERCLA. Of these 387 substances,today's rule proposes to raise 177 of the RQs established under CERCLA, to lower 28 of the RQs, and to leave the remaining 182 RQs unchanged. Eighty-nine of the 696 hazardous substances are hazardous waste streams under RCRA, rather than specific or generic substances. Analysis of 26 of these hazardous waste streams is complete. Today's rule proposes to raise the RQs of 15 of these waste streams and to leave the other 11 unchanged. These 26 are included in the 387 mentioned above. Adjustments to the statutory RQs for the other 309 substances will be proposed, if appropriate, when further analysis is complete.

The primary purpose of notification is to ensure that releasers notify the government so that the government can assess the need to respond to the release. The different RQ levels do not reflect a determination that a release of a substance will be hazardous at the RQ level and not hazardous below that level. EPA has not attempted to make such a determination because the actual hazard will vary with the unique circumstances of the release, and extensive scientific data and analysis would be necessary to determine the hazard presented by each substance in a number of plausible circumstances. Instead, the RQs reflect the Agency's judgment that the federal government should be notified of releases to which a response might be necessary. The reportable quantities, in themselves, do not represent any determination that releases of a particular size are actually harmful to public health or welfare or the environment.

Many other considerations besides the quantity released affect the government's decision concerning whether and how it should respond to a particular release. The location of the release, its proximity to drinking water supplies or other valuable resources, the likelihood of exposure or injury to nearby populations, and other factors must be assessed on a case-by-case basis. The reporting requirement is, however, the trigger for assessments of these considerations to be made.

Because CERCLA's RQ adjustment methodology differs from that used pursuant to Section 311 of the Clean Water Act ("CWA"), some of the RQs being proposed today are not the same as those under the CWA. A person in charge need not report a release twice: one report to the NRC suffices. As discussed later in this preamble, EPA is also proposing today to adjust the CWA Section 311 RQs to be identical with those proposed under CERCLA.

II. Summary of Methodology Underlying the Reportable Quantity Adjustments

The Agency has wide discretion in adjusting the statutory RQs for hazardous substances under CERCLA:

In determining reportable quantities under this paragraph (Section 3(a)(2) of S. 1480), the President may consider any factors deemed relevant to administering the reporting requirements or the President's other responsibilities under this Act. Administrative feasibility and practicality should be primary factors. In addition, the President may revise such regulations from time to time if under-reporting of over-reporting is occurring under existing regulations (Sen. Rep. 96-848, 96th Cong., 2d Sess. 29 (1980)).

The Agency found that it was practical to use portions of the RQ methodology established pursuant to Section 311 of the Clean Water Act in adjusting the CERCLA RQs because the regulated community and government response agencies are familiar with the CWA Section 311 reporting requirements. Section 311(b)(4) of the CWA requires reporting of discharges of certain hazardous substances into navigable waters (see 44 FR 50766 (August 29, 1979); 40 CFR Part 117). Pursuant to CWA Section 311, EPA determined reportable quantities for discharges by correlating aquatic animal toxicity ranges with five reporting categories, i.e., 1-, 10-, 100-, 1000-, and 5000-pound levels. The approach proposed today utilizes these five RQ levels but applies other criteria in addition to aquatic toxicity. The six "primary criteria" which are used to adjust RQs are:

- Aquatic Toxicity;[a]
- Mammalian Toxicity;[a]
- Ignitability;
- Reactivity;
- Other Toxic Effects;[b] and
- Carcinogenicity.

Certain of the Section 101(14) hazardous substances have been identified as potential carcinogens using the Monographs of the International Agency for Research on Cancer and the Annual Report on Carcinogens of the National Toxicology Program. Some of these are known human carcinogens. RQs are not currently being adjusted on the basis of carcinogenicity because the Agency has not completed collecting and analyzing data on carcinogenicity. When the analysis is completed, it will be published in a separate notice of proposed rulemaking. Until final promulgation of adjusted RQs for carcinogens, their RQs (like those for all other CERCLA hazardous substances) will be left at the statutory level.

In addition, the analysis of other toxic effects is not yet complete for all hazardous substances. For those substances for which this analysis is still underway, RQs are not being adjusted by today's rulemaking. Adjusted RQs will be proposed when this analysis is complete.

Each substance is evaluated according to the applicable "primary criteria" and an RQ value is determined for each applicable criterion (see Exhibits 1 through 5). The "primary criteria" RQ for each hazardous substance is the lowest value of all the applicable criteria. For example, if the Agency is able to evaluate hazardous substance A for aquatic toxicity and mammalian toxicity and sets an RQ of 100 pounds on the basis of aquatic toxicity and 1000 pounds on the basis of mammalian toxicity, the 100-pound value will be the applicable "primary criteria" RQ. This procedure is consistent with the purpose of the RQ as a trigger for notification.

The Agency then evaluates each substance according to the following "secondary criteria," which are natural dissipation processes:

- Biodegradability;
- Hydrolysis; and
- Photolysis.

The applicable "primary criteria" RQ is raised one level if an analysis of these "secondary criteria" indicates that the substance naturally dissipates when released into the environment.

The criteria selected to adjust RQs correlate with the potential harm to public health or welfare or the environment upon the release of a hazardous substance in a reportable quantity. The likelihood of harm presented by a release of these substances is a major consideration in EPA's adjustments of the RQs. No attempt has been made to correlate the RQ adjustments with actual harm or hazard. Actual harm will vary with the circumstances of the release.

Simply because two substances have the same proposed RQ does not mean that they may pose the same danger to the public health or welfare or the environment. A substance with a 100-pound RQ on the basis of mammalian toxicity may not pose the same potential hazard as a substance with a 100-pound RQ set on the basis of ignitability. The RQ only reflects the Agency's determination that the government needs to know about releases of substances which are equal to or exceed that RQ so that a decision can be made concerning the appropriate response action, if any.

Table 302.4 lists the CERCLA hazardous substances, the statutory RQs for those substances, and the proposed RQs for many of those substances. The Agency has not proposed adjusted RQs for known or suspected human carcinogens and radionuclides, as well as for some substances undergoing evaluation for other toxic effects. The Agency is currently collecting and evaluating data on carcinogenicity, radionuclides, and substances which exhibit other toxic effects. Adjusted RQs for these substances will be proposed, as appropriate, in a future rulemaking. Until final rules are promulgated, the statutory RQs apply, rather than the proposed RQs.

The method proposed to adjust RQs is discussed in greater detail below and in the Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b), available for inspection at Room S-398, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

III. Number of Reportable Quantity Levels and their Values

For purposes of RQ adjustments under CERCLA, EPA has adopted the five RQ levels of 1, 10, 100, 1000 and 5000 pounds originally established pursuant to CWA Section 311 (see 40 CFR Part 117). The Agency adopted the CWA five-level system primarily because (1) it has been successfully used pursuant to the CWA, (2) the regulated community is already familiar with these five levels, and (3) it distinguishes the broad range of potential harm posed by CERCLA hazardous substances.

The Agency considered adopting a notification system with either two or three RQ levels, because of the possibility that such a system would be easier to understand and to administer. EPA rejected these alternatives because it found that the data correlating the RQs with potential harm were so wide-ranging that a five-level ranking system was necessary. It would not be equitable to assign substances to only two or three RQ levels; a five-tier system more adequately reflects the relative differences in potential harm presented by the hazardous substances than would a two- or three-tier system.

EPA has decided to designate pounds (kilograms) as the unit of measurement for all RQs proposed today. RQs for hazardous substances were designated in pounds in CERCLA Section 102 and pursuant to CWA Section 311. Pounds provide a uniform measure not only for solids, but also for liquids and gases. EPA considered setting the RQs for hazardous substances in different units of measurement corresponding to the form of the substance released, i.e.,

[a] Toxicity is used here to refer to acute toxicity, specifically lethality.

[b] Other toxic effects considered here include toxicity due to single, repeated, or continuous exposure from a single release or multiple releases of a hazardous substance.

VOL 48 ISS 102 MAY 25 1983 UMI

gallons for liquids, pounds for solids, or cubic feet for gaseous materials. This alternative was rejected because it would be much more confusing for a releaser to determine whether a reportable quantity had been released if different units were used for different forms of the same hazardous substance. The only exceptions to this approach are radionuclides, which are discussed elsewhere in this preamble.

Section 102(a) of CERCLA authorizes, and the legislative history encourages, the Administrator to set a single reportable quantity for any hazardous substance, regardless of the medium into which that substance is released. In order to develop simple and practical notification provisions, the Agency is establishing a single RQ for each hazardous substance. As the legislative history indicates:

> The provision intentionally omits from the requirement to determine "reporting" quantities any reference to harm or hazard. A single quantity is to be determined for each hazardous substance, and this single quantity requires notification upon release into any environmental medium. It would be virtually impossible to determine a single quantity applicable to all media while at the same time linking such quantity to any subjective concept of harm.
>
> It is essential that such quantities be relatively simple for those subject to notification requirements to understand and comply with. Since releases in such quantities trigger notification requirements, but do not, in and of themselves, give rise to other liabilities under this Act, the Presidents' broad discretion to select quantities will not unfairly burden those persons subject to the Act (Sen. Rep. 96–848, 96th Cong., 2d Sess. 29 (1980)).

If multiple RQs which vary in accordance with the environmental media into which the substance in released were established, it would be more difficult for the regulated community to comply with the reporting requirements. Since releases often occur into more than one medium, the releaser, under a multi-RQ format, would be uncertain which RQ would apply. Consequently, the multiple RQ approach is not being used by the Agency in this proposal. The Agency solicits comments concerning situations where different RQs may be appropriate for different media.

IV. Use of Criteria to Adjust Reportable Quantities

This section discusses the six primary criteria and the three secondary criteria used to propose adjusted RQs.

A. Primary Criteria

The proposed strategy consists of six primary criteria:

1. Aquatic Toxicity;
2. Mammalian Toxicity (including oral, dermal, and inhalation toxicities);
3. Ignitability;
4. Reactivity;
5. Other toxic effects; and
6. Carcinogenicity.

Originally, the Agency considered using only aquatic toxicity for RQ adjustments because aquatic toxicity had been used to establish RQs pursuant to the CWA. The Agency determined, however, that additional characteristics of potential hazard to human health or welfare or the environment should be taken into account. Consequently, in addition to aquatic toxicity, five other primary criteria and three secondary criteria are being applied.

1. Aquatic Toxicity. For aquatic toxicity, the categories established pursuant to Section 311 of the CWA are used (see Exhibit 1). Each of these categories is linked to one of the five RQ levels (1, 10, 100, 1000, or 5000 pounds). The RQ value based on aquatic toxicity is identical to the RQ promulgated under CWA Section 311 except where the use of updated aquatic toxicity data has resulted in different RQs. For 22 substances, the Agency has updated the aquatic toxicity data used to set the CWA Section 311 RQs. For 11 of these 22 substances, RQs are being proposed on the basis of this updated data. Four of these would have been lowered on the basis of other criteria even in the absence of revised aquatic toxicity data. For 10 other of these substances, adjusted RQs are not proposed because analysis is still underway for other toxic effects and/or carcinogenicity. One other RQ is not lowered because of the application of the secondary criteria.

A lower RQ is proposed for PCBs on the basis of revised aquatic toxicity data. Under CWA Section 311, the RQ for PCBs was originally set at 10 pounds; in today's proposed rulemaking, a 1-pound RQ is assigned. Because of the widespread use of PCBs, the Agency is concerned about the effect of this change on the number of release notifications made by the regulated community. Increased notification may result from reports of ruptures of transformers and capacitors containing PCBs in electrical transmission systems. The Agency requests data, information, and comments on the likely number of notifications and on the effect of these notifications on protection of public health and welfare and the environment.

EXHIBIT 1.—CATEGORIES FOR REPORTABLE QUANTITY ASSIGNMENTS PURSUANT TO CWA SECTION 311

RQ pounds	Aquatic toxicity	Category
1	LC^{a}_{50} < 0.1mg/liter	X
10	0.1 mg/liter < LC_{50} < 1 mg/liter	A
100	1 mg/liter < LC_{50} < 10 mg/liter	B
1,000	10 mg/liter < LC_{50} < 100 mg/liter	C
5,000	100 mg/liter < LC_{50} < 500 mg/liter	D

[a] "LC_{50}" refers to that concentration of material which is lethal to one-half of the test population of aquatic animals upon continuous exposure for 96 hours. (See 40 CFR 116.14).

Source: 43 FR 10492 (March 13, 1978).

2. Mammalian Toxicity. Three types of mammalian toxicity were evaluated: oral, dermal, and inhalation toxicities. A five-level scale was devised for each. (see Exhibit 2). The RQ chosen for mammalian toxicity represents the lowest of the values derived from these three scales.

A substance was rated as toxic on the basis of its LC_{50} or LD_{50} value, which is the concentration or dose of a substance which causes the death of 50% of a defined experimental animal population. Upper-bound toxicity values were identified for each of the three scales. These values were correlated with a 5000-pound RQ value. The upper-bound toxicity limit of 200 mg/kg for dermal toxicity was adopted from toxicity screening criteria considered for designating hazardous substances under the Clean Water Act (40 FR 59966 (December 30, 1975)). The upper-bound toxicity limit of 2,000 ppm for inhalation toxicity was adopted from a study performed by the National Academy of Sciences for the U.S. Coast Guard (USCG–D–113–74, System for Evaluation of the Hazards of Bulk Water Transportation of Industrial Chemicals, February 1974). An upper-bound oral (ingestion) toxicity value of 500 mg/kg was adopted based on the assumption of a "standard man" (70 kg body weight, swallow volume of 21 cubic centimeters) being exposed to a situation which would allow him to take one swallow of a hazardous substance. (The one swallow assumption for a 15 kg child also yields a 500 mg/kg upper oral toxicity limit.)

Once the upper-bound toxicity levels were chosen, the toxicity ranges in Exhibit 2 for the 1-, 10-, 100-, 1000-, and 5000-pound reportable quantity categories were scaled for mammalian toxicity in the same ratios as the ranges for aquatic toxicity in Exhibit 1. High RQs (1000 or 5000 pounds) were assigned to substances with low toxicity, while low RQs (1 or 10 pounds) were assigned to substances with high toxicity.

EXHIBIT 2.—CATEGORIES FOR REPORTABLE QUANTITY ADJUSTMENTS BASED ON MAMMALIAN TOXICITY [a]

RQ (pounds)	Mammalian Toxicity (oral)	Mammal Toxicity (dermal)	Mammalian Toxicity (inhalation)
1	LD_{50} [b] < 0.1 mg/kg	LD_{50} < 0.04 mg/kg	LC_{50} [c] < 0.4 ppm.
10	0.1 mg/kg < LD_{50} < 1 mg/kg	0.04 mg/kg < LD_{50} < 0.4 mg/kg	0.4 ppm < LC_{50} < 4 ppm.
100	1 mg/kg < LD_{50} < 10 mg/kg	0.4 mg/kg < LD_{50} < 4 mg/kg	4 ppm < LC_{50} < 40 ppm.
1,000	10 mg/kg < LD_{50} < 100 mg/kg	4 mg/kg < LD_{50} < 40 mg/kg	40 ppm < LC_{50} < 400 ppm.
5,000	100 mg/kg < LD_{50} < 500 mg/kg	40 mg/kg < LD_{50} < 200 mg/kg	400 ppm < LC_{50} < 2000 ppm.

[a] For a detailed explanation of the derivation of these categories, see Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b).
[b] "LD_{50}" refers to that dose of a substance expected to cause the death of 50 percent of a defined experimental mammal population.
[c] "LC_{50}" refers to that concentration of a substance in the air that is expected to cause the death of 50 percent of a defined experimental mammal population.

Although the three mammalian toxicity scales and their respective RQ categories and poundage levels are included in Exhibit 2, this does not imply that the individual scales are equivalent to each other. Each scale is independent; the same ranking on different scales does not necessarily represent equivalent potential danger to public health or welfare or the environment.

3. Ignitability. A five-level scale was also developed for ignitability (see Exhibit 3). The Agency adopted, in large part, the ignitability scale developed by the National Academy of Sciences (NAS) for the U.S. Coast Guard (see USCG–D–113–74, System for Evaluation of the Hazards of Bulk Water Transportation of Industrial Chemicals, February 1974). The NAS ignitability scale provides the following five categories:

- Extremely Hazardous—Flash Point (FP) (cc) [10] < 100° F (37.8° C) and Boiling Point (BP) [10] < 100° F (37.8° C).
- Highly Hazardous—FP (cc) < 100° F (37.8° C) and BP > 100° F (37.8° C).
- Hazardous—100° F (37.8° C) < FP(cc) < 140° F (60° C).
- Slightly Hazardous—FP (cc) > 140° F (60° C).
- Insignificant Hazard—Noncombustible.

EXHIBIT 3.—CATEGORIES FOR REPORTABLE QUANTITY ADJUSTMENTS BASED ON IGNITABILITY [a]

RQ (pounds)	Ignitability (fire)
1	No 1-pound RQs on the basis of ignitability.
10	Pyrophoric or self-ignitable.
100	FP_{cc} [b] < 100° F, BP_{cc} < 100° F.
1000	FP_{cc} < 100° F, BP > 100° F.
5000	100° F < FP_{cc} < 140° F.

[a] For a detailed explanation of the derivation of these categories, see Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b).
[b] "FP_{cc}" refers to the flash point, the temperature at which a substance forms an ignitable mixture with the air at the surface of the substance, measured using the closed cup test.
[c] "BP" refers to the boiling point, the temperature at which a liquid boils.

This scale does not correlate these categories with RQ levels; the Agency established the correlation between ignitability categories and RQ levels as described below.

[10] These terms are defined in Exhibit 3.

The Agency adjusted the NAS scale by adding a new category, "pyrophoric" substances (those substances capable of igniting spontaneously). The "pyrophoric" category was added because the Agency believes that spontaneous ignitability is an important potential hazard that should be considered in adjusting RQs. The Agency also modified the NAS scale by deleting the "non-combustible" and "slightly hazardous" categories. The Agency did not use the "non-combustible" category because releases of non-combustible materials do not warrant government response on the basis of ignitability. The "slightly hazardous" (flash point > 140° F) category was deleted because the RCRA regulations use 140° F as the cut-off point for regulating liquid hazardous wastes on the basis of ignitability. (See 40 CFR § 261.21.) Therefore, the Agency has determined that substances with a flash point above 140° F do not pose a sufficient potential hazard to warrant a 5000-pound RQ on the basis of ignitability.

The Agency decided to use four rather than five RQ levels for ignitability. The 1-pound RQ level was abandoned because small releases (less than 10 pounds) of flammable substances, if ignited, will generally be consumed so quickly that any federal government response action would be infeasible. Since notification of these releases would generally not trigger any federal government response activities, the Agency eliminated the 1-pound RQ level for the ignitiability criterion. The Agency then assigned RQ values of 10, 100, 1000 and 5000 pounds to the revised NAS ignitability scale.

4. Reactivity. Five-level scales were developed for reactivity (see Exhibit 4) based in large part upon NAS scales developed for the U.S. Coast Guard. The NAS established two scales for reactivity: reactivity with water and self-reaction. The NAS scales provide these categories:

	Water reaction	Self-reaction
Extremely hazardous.	e.g., SO_3	Self-reaction may cause explosion or detonation.
Highly hazardous.	e.g., oleum, chlorosulfonic acid.	May polymerize, requires stabilizer.
Hazardous.	e.g., NH_4, HCl	Contamination may cause polymerization, no inhibitor required.
Slightly hazardous.	e.g., Cl_2	May polymerize with low heat evolution.
Insignificant hazard.	No appreciable reaction.	No appreciable self-reaction.

The Agency established the correlation between these categories and RQ levels as described below.

The Agency adjusted the NAS reactivity with water scale by adding a new category, "inflames" with water. The "inflames" with water category was added because the Agency believes that the potential hazard caused by inflaming with water should be considered in adjusting RQ values. The Agency further modified the reactivity with water scale by deleting the "no appreciable reaction" and "slightly hazardous" categories. The "no appreciable reaction" category was deleted because the federal government need not be informed of releases on the basis of their reactivity with water if no appreciable reaction will occur. The "slightly hazardous" category was deleted because substances falling into this category, such as chlorine, do not pose a sufficient potential hazard to warrant a 5000-pound RQ on the basis of reactivity with water.

EXHIBIT 4.—CATEGORIES FOR REPORTABLE QUANTITY ADJUSTMENTS BASED ON REACTIVITY [a]

RQ (pounds)	Reactivity [b]	
	With water	Self-reaction
1	No 1 pound RQs on the basis of reactivity.	
10	Inflames e.g., Na, CaC_2.	Extreme self-reaction; may cause explosion or detonation.
100	Extreme reaction e.g., SO_3.	High; may polymerize; requires stabilizer.
1,000	High reaction e.g., oleum.	Moderate; contamination may cause polymerization; no inhibitor required.

VOL 48 ISS 102 MAY 25 1983 UMI

EXHIBIT 4.—CATEGORIES FOR REPORTABLE QUANTITY ADJUSTMENTS BASED ON REACTIVITY [a]—Continued

RQ (pounds)	Reactivity [b]	
	With water	Self-reaction
5,000	Moderate reaction e.g., NH_3.	Slight; may polymerize with low heat release.

[a] For a detailed explanation of the derivation of these categories, see Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b).
[b] Based on heat release.

Similarly, the Agency adjusted the NAS self-reaction scale by deleting the "no appreciable reaction" category because the Agency believes that releases of substances would not warrant response on the basis of their self-reaction when no appreciable reaction will occur.

For both the reactivity with water and self-reaction scales, only four (rather than five) RQ levels were utilized by the Agency. The 1-pound RQ level was not used for adjusting RQs on the basis of reactivity because small releases (less than 10 pounds) of reactive substances will generally be consumed so quickly that any federal government response action would be infeasible and they are generally handled adequately by appropriate local or state response personnel. Therefore, the Agency has assigned RQ values of 10, 100, 1000 and 5000 pounds to both of the reactivity scales.

5. Other Toxic Effects. Data on other toxic effects have been used to adjust the statutory RQs for some of the hazardous substances, while for other hazardous substances, data on other toxic effects are still being evaluated by the Agency. RQ adjustments for the 221 hazardous substances which are still being analyzed for this criterion will be proposed, where appropriate, once the analysis is complete. Proposed RQs are not shown in Table 302.4 for these substances. The procedure for analyzing the other toxic effects of a substance is based upon the following data:

- The minimum effective dose (MED) levels for repeated exposures (mg/day for 70 kg man); and
- The type of effect (liver necrosis, birth defects, etc.) likely to be caused by repeated or continuous exposure.

Toxic effects, such as reproductive abnormalities, from single exposures will be considered in adjusting RQs when sufficient data are available.

The adjusted MED levels, the dose rating, range from 1 to 10, and are inversely proportional to the minimum effective dose (MED). Therefore, a substance which has an effect only when a very large dose is administered was assigned a rating of 1, and one which has an effect after a very small dose is administered was assigned a rating of 10. A logarithmic transformation has been employed to adjust the MED levels (which actually cover six orders of magnitude) to a scale of 1 to 10.

The type of effect likely to be caused by repeated or continuous exposure to each hazardous substance was also scored on a scale ranging from 1 to 10. A score of 1 was assigned to such minor effects as enzyme induction or other biochemical change with no pathological change or organ weight change, while scores of 9 and 10 were assigned for pronounced pathological changes, organ dysfunction, neuropathy with loss of motor control, behavior control, or sensory ability, reproductive dysfunction, teratogenic effects, pronounced life-shortening, or death.

Each substance is assigned a final composite score based on the product of the adjusted MED (dose rating) and effects score. The composite score can thus range from 1 to 100, and RQs are assigned by equating the 5000-pound level to low composite scores, the 1-pound level to high composite scores, and the other RQ levels to the intermediate ranges of composite scores as shown in Exhibit 5. In this manner, a substance that has a minor effect and requires a high dose for such an effect will be assigned a high RQ, while a substance that may present more danger because of major effects manifested at low dose levels will be assigned a low RQ.

Some commenters claimed that it was inappropriate for the Agency to use toxicity data from repeated or continuous exposures in developing RQs for hazardous substances because most one-time spill situations and/or episodic releases do not result in repeated or continuous exposures. EPA decided to use this criterion because episodic releases which are not totally cleaned up may indeed cause repeated or continuous exposures to a toxic substance. For example, a spill of a hazardous substance may contaminate an aquifer which could lead to repeated exposure through drinking water. Moreover, CERCLA covers both episodic and continuous releases. Continuous releases, by their very nature, may lead to repeated or continuous exposure to toxic substances.

The procedure for other toxic effects has not been applied to all hazardous substances. EPA limited its analysis to substances that might exhibit other toxic effects and did not evaluate substances already at the proposed 1-pound RQ level, the lowest RQ level.

EXHIBIT 5.—CATEGORIES FOR REPORTABLE QUANTITY ADJUSTMENTS BASED ON OTHER TOXIC EFFECTS [a]

RQ (pounds)	Composite score
1	81–100
10	41–80
100	21–40
1,000	6–20
5,000	1–5

[a] For a detailed explanation on the derivation of these categories, see Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b).

6. Carcinogenicity. The Agency has identified carcinogencity as one of the primary criteria to be used in setting RQs. The Agency is currently collecting and evaluating data on the carcinogenicity of the 192 CERCLA hazardous substances that have been identified as known or suspected human carcinogens using the International Agency for Research on Cancer (IARC) Monographs and the National Toxicology Program's Annual Report on Carcinogens (see the "Second Annual Report on Carcinogens," U.S. Department of Health and Human Services, December 1981). Of these 192 substances, 104 are also in the process of being analyzed for other toxic effects. EPA has developed a procedure for RQ adjustments for carcinogens. This assessment procedure utilizes a carcinogen hazard ranking based on a substance's strength as a carcinogen using potency factor estimates and the strength of evidence for carcinogenicity using the IARC criteria. It will be fine-tuned after the data collection and evaluation is completed and it will be discussed in detail in the forth coming proposal to adjust RQs for carcinogens. While a different approach will be used for carcinogenicity than for other toxic effects, it will be no less protective of public health and welfare and the environment.

7. Combining the Primary Criteria. Many substances may pose a threat to human health or welfare or the environment based upon several of the primary criteria listed above. If a substance poses a potential hazard based on more than one of the criteria, the "primary criteria" RQ selected is the lowest value identified for any of the applicable criteria. This procedure helps assure that the government will be notified of the most serious potential hazards to the public health or welfare or the environment. The use of the lowest value for the "primary criteria" RQ is appropriate because the RQ is merely the trigger for alerting the government to a release; the government will not necessarily respond to all reported releases.

The methodology used to develop an RQ for the hazardous substance crotonaldehyde (CAS Nos. 4170–30–3 and 123–73–9) demonstrates how the primary criteria are combined. Under today's proposal, crotonaldehyde's aquatic toxicity correlates with a 100-pound RQ while its mammalian toxicity would suggest an RQ of 5000 pounds. Its ignitability correlates with a 1000-pound RQ. It is not sufficiently reactive to assign it an RQ on the basis of the reactivity criterion. It does not exhibit other toxic effects nor has it been identified by the sources discussed above as a known or suspected human carcinogen. Pursuant to the strategy discussed above, the "primary criteria" RQ of crotonaldehyde is 100 pounds.

Some commenters have suggested that RQs should be selected on the basis of the criterion associated with the medium into which releases of a particular substance most frequently occur. For example, it has been suggested that ammonia [11] is usually released into the air, yet it is very toxic in water. Setting the RQ for ammonia based on aquatic toxicity, then, may result in an RQ lower than necessary for most releases of ammonia. EPA is not selecting this approach because (1) data are not generally available to identify the most prevalent release medium for most CERCLA hazardous substances; (2) even where data are available, it is difficult to determine the prevalent medium of release for substances that are released into more than one medium; and (3) setting RQs on the basis of the most prevalent release medium may prevent the government from learning of releases into other media that pose greater hazards.

B. Secondary Criteria

Certain of the primary criteria RQs have been further adjusted using factors, referred to here as secondary criteria, that reflect natural dissipation processes which may reduce the risk posed by the release of a hazardous substance.

Three processes—biodegradability, hydrolysis, and photolysis—have been used as secondary criteria for adjusting the proposed RQs:

- Biodegradability is the degree to which a substance is capable of being degraded into less complex chemicals by biological means (e.g., enzyme-catalyzed degradation of chemicals by microorganisms in aquatic and soil environments);
- Hydrolysis is a chemical reaction resulting from the addition of water that splits a bond between chemical units, and that introduces a hydroxyl group (—OH) into the chemical structure (i.e., $RX + H_2O \rightarrow ROH + HX$); and
- Photolysis is a process that occurs when a chemical absorbs light and then undergoes an energy transformation by any one of several mechanisms (e.g., dissociation, rearrangement, or oxidation).

If a hazardous substance is subject to transformation into a less hazardous form by one of these processes once it is released into the environment, the "primary criteria" RQ was raised one level (e.g., from 10 pounds to 100 pounds). A hazardous substance is considered to be subject to this transformation if either its biodegradation is demonstrated by standard biological oxygen demand tests or the substance is identified, in "Water Related Environmental Fate of 129 Priority Pollutants," EPA–440/4–79–029 a and b, as subject to hydrolysis or photolysis. If natural processes in the environment mitigate the effect of releases of certain hazardous substances, EPA believes that small releases of these substances would be less likely to merit notification to the NRC. The one-level increase in RQs reflects the Agency's judgment that the danger posed by the release of certain substances will be minimized due to these dissipation processes.

The application of the secondary criteria resulted in raising the RQs of 28 substances. The secondary criteria are not used in this proposal to raise RQs that are based on other toxic effects. The "primary criteria" RQ is the proposed RQ for these substances.

C. Results of the Proposed Methodology

Data were available to assign RQs on the basis of the primary criteria for most of the CERCLA hazardous substances. Six substances [12] on which little data were available on the primary criteria were assigned RQs based on the proposed RQs for hazardous substances similar in structure and substituents. The specific cases are detailed in the Background Document to Support the Notice of Proposed Rulemaking Pursuant to Section 102(b).

In addition, because releases of hazardous substances are often exposed to water, the RQs of a few substances were set based on the potential hazards posed by the products resulting from the substances' reaction with water. For example, ammonium bifluoride dissolves in water to form hydrofluoric acid and, therefore, the proposed RQ for ammonium bifluoride is based on the application of the primary and secondary criteria to hydrofluoric acid. See the Background Document to Support the Notice of Proposed Rulemaking Pursuant to Section 102(b).

Table 302.4 lists all of the CERCLA hazardous substances, together with their statutory RQs and their proposed RQs where applicable. The first part lists the individual hazardous substances regulated under the statutes cited in CERCLA Section 101(14). The generic groups of chemicals designated under CWA Section 307(a), such as "SILVER AND COMPOUNDS," are printed in all capital letters and have no RQ assigned to them. [13] These generic groups of chemicals could potentially encompass hundreds of specific compounds with varying toxicities. Consequently, it is not appropriate to establish one RQ for each generic group.

The second part contains the 89 hazardous waste streams designated under 40 CFR 261.31 and 261.32 (RCRA F and K lists). The Agency designated many of these waste streams as hazardous under RCRA because of the presence of specific hazardous constituents in the waste streams as set forth in Appendix VII of 40 CFR Part 261. The Agency is proposing RQs for these waste streams based on these hazardous constituents. The primary and secondary criteria, discussed above, were applied to each hazardous constituent in order to derive an RQ value. If a waste stream in 40 CFR 261.31 and 261.32 has more than one hazardous constituent, the RQ assigned the particular waste stream represents the lowest RQ associated with the hazardous constituents present in that waste stream. To illustrate this process, assume that a hypothetical waste stream has three hazardous constituents—X, Y, and Z— and that the RQs associated with these hazardous constituents are: X=10 pounds, Y=100 pounds, and Z=5000 pounds. The RQ for this hypothetical waste stream is, therefore, 10 pounds—the lowest RQ associated with any of its hazardous constituents.

EPA has proposed an RQ for each of the RCRA F001 through F005 waste streams. The Agency has also proposed individual adjusted RQs for many of the hazardous solvents listed under these

[11] An adjusted RQ for ammonia is not proposed in this rulemaking because it is being examined for other toxic effects.

[12] The substances are:
1. Methane, dibromo- (methylene bromide)
2. Nitrophenols
3. Dinitrophenol
4. Hexachlorocyclohexane (all isomers)
5. Dichloropane
6. 4-Chlorophenyl phenyl ether

[13] The one exception to this approach is the RQ for PCBs. PCBs are assigned an RQ because they were previously designated under Section 311 of the CWA.

VOL 48 ISS 102 MAY 25 1983 UMI

waste streams. Adjusted RQs are not proposed for certain solvents that are undergoing analysis for other toxic effects or carcinogenicity. The waste stream RQ is the lowest RQ assigned to any individual solvent listed under that waste stream. A releaser may use the RQ for the individual solvent, rather than the RQ for the waste stream, if he can establish the indentity of the specific solvents which have been released. When the releaser is unsure of the identity of the solvents that have been released, the RQ for the waste stream must be used. For example, assume that a hypothetical waste stream, FOOX, has three solvents listed under it in Table 302.4, Solvent A, Solvent B, and Solvent C. The RQs associated with these solvents are: A=10 pounds, B=100 pounds, and C=1000 pounds. Therefore, the RQ for the waste stream FOOX is 10 pounds, the lowest RQ associated with any of the individual solvents identified under FOOX. This RQ must be used unless the releaser knows which specific solvents are being released.

D. Special Types of Substances

Several types of substances, notably unlisted ICRE wastes and radionuclides, pose special problems for RQ adjustment and require separate discussion.

1. Unlisted RCRA Wastes (ICRE Wastes). As noted previously, the CERCLA hazardous substances include hazardous wastes which exhibit the characteristics of ignitability, corrosivity, reactivity, and extraction procedure toxicity, but which are not specifically listed as hazardous wastes. These are commonly known as unlisted ICRE wastes (see 40 CFR 261.20 through 40 CFR 261.24). These wastes were all given a statutory RQ of one pound under CERCLA.

The Agency is proposing an RQ of 100 pounds for the unlisted hazardous wastes exhibiting the characteristics of ignitability, corrosivity, and reactivity (40 CFR 261.21, 261.22, and 261.23). Because the constituents of these unlisted wastes are generally unknown, it is impossible to apply the primary and secondary criteria to these wastes. The Agency has arrived at the 100-pound RQ by assuming that these wastes will, on the average, fall within the middle level of the five RQ levels, i.e., 100 pounds.

An alternative approach to setting RQs for unlisted ignitable, corrosive, and reactive wastes is to base the RQs on the RQs assigned to similar substances, namely listed hazardous wastes. The RQ proposed most often for hazardous wastes assigned on the basis of reactivity is 10 pounds while the RQ proposed most often for hazardous wastes on the basis of ignitability is 1000 pounds. Under this alternative approach, unlisted wastes that are reactive would be assigned an adjusted RQ of 10 pounds, while ignitable unlisted wastes would have a 1000-pound RQ. Corrosivity is not a primary or secondary criterion, so this approach could not be used to set an RQ for unlisted corrosive wastes. Another problem with this approach is that EPA has not determined that listed and unlisted hazardous wastes pose similar potential hazards. The Agency, therefore, has selected the 100-pound RQ for unlisted ignitable, corrosive, and reactive wastes. Comments on the proposed RQ for unlisted ignitable, corrosive, and reactive wastes are requested.

Although the primary and secondary criteria cannot be applied to the unlisted wastes exhibiting ignitability, corrosivity, or reactivity, they can be applied to the wastes exhibiting extraction procedure (EP) toxicity. Because EP toxicity is defined in 40 CFR 261.24 as the presence of certain minimum concentrations of 14 specific materials (contaminants) in the extract from the waste after performing a defined extraction procedure, the primary and secondary criteria have been applied to each contaminant. Thus, there are separately listed RQs for each of the 14 different EP toxic wastes. For wastes containing one of the 14 contaminants, the corresponding proposed RQ is found in Table 302.4 under the entry "Unlisted Wastes, Characteristic of EP Toxicity," unless RQ adjustment is being deferred for the contaminant because an analysis of other toxic effects or carcinogenicity must still be performed (i.e., arsenic, cadmium, chromium (VI), lead, and selenium).

If more than one contaminant is found in an EP toxic hazardous waste, the EP toxicity RQ is based on the lowest RQ for any EP toxic contaminant present. If an unlisted hazardous waste exhibits the characteristics of EP toxicity, as well as one of the other characteristics, it will be assigned the lowest applicable RQ.

Comments on the proposed RQs for unlisted ICRE wastes are requested.

2. Radionuclides. Radionuclides are hazardous substances under CERCLA because they were designated as hazardous air pollutants pursuant to Section 112 of the Clean Air Act. Today's proposed rule does not adjust the RQ for radionuclides. The Agency will adjust the RQ for radionuclides in a future rulemaking; until that time, the statutory 1-pound RQ is applicable.

The Agency is considering several issues for future adjustments to radionuclide RQs. Two major related issues are:

- The units the Agency should use to measure RQs; and
- Whether one RQ should be set for all radionuclides or whether different RQs for specific radionuclides should be used.

EPA recognizes that the pound is not a suitable unit in which to measure the RQ for radionuclides, because releases much smaller than one pound can seriously threaten public health or welfare or the environment. EPA is currently considering two alternative types of measurement units for radionuclide RQs, dose-equivalents and activity levels. Dose-equivalents (usually measured in rems) are used for comparing biological effects of radiation on tissue. The activity level of a radionuclide release (measured in becqerels or curies), on the other hand, is the actual number of disintegrations of radionuclide atoms per unit time.

The category of radionuclides includes over a hundred specific substances. The Agency is considering whether to set one RQ for all radionuclides, or different RQs for specific radionuclides. A generic RQ for all radionuclides might be established in the form of a dose-equivalent. If the Agency list RQs for specific radionuclides, then the RQs will be listed in the form of activity levels. The potential effects of a radionuclide release and subsequent exposure depend not only on the number of disintegrations, but also on the kinds of radiation (alpha, beta, or gamma) and the energies of each, as well as the unique circumstances of the release. Thus, different hazards are posed by individual radionuclides depending upon the different types of radiation emitted, and different RQs in activitiy levels are appropriate if individual radionuclides are listed.

In order to select an approach, EPA is considering its prior experience as well as the experiences of other federal, state, and international agencies. For a discussion of radionuclides, see Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b), Supplementary Report: Radionuclides, available for inspection at Room S-398, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

E. Additional Criteria Considered But Not Currently Used for Adjusting Reportable Quantities

As noted earlier, EPA has wide discretion in adjusting reportable quantities. The legislative history indicates that:

> In determining reportable quantities under this paragraph (Section 3(a)(2) of S. 1480), the President may consider any factors deemed relevant to administering the reporting requirements or the President's other responsibilities under this Act. Administrative feasibility and practicality should be primary factors. In addition, the President may revise such regulations from time to time if under-reporting or over-reporting is occurring under existing regulations (Sen. Rep. 96-848, 96th Cong., 2d Sess. 29 (1980)).

EPA is considering using the criteria discussed below to adjust RQs, but has not incorporated these criteria into the RQ adjustments proposed today. This criteria include:

- Release History
- Release Potential
- Corrosivity

The Agency solicits comments on whether and how to use these or other feasibility or practicality criteria in implementing a simple notification system. In particular, the Agency solicits comment on the purely administrative criteria discussed under release history and release potential and on any additional administrative criteria which may be used to adjust RQs. More generally, EPA is interested in soliciting comments from persons who are familiar with characteristics of hazardous substances and common industry practices for handling these substances, in order to identify additional factors not currently used by EPA that might be appropriate for adjusting RQs. The Agency will consider such criteria in promulgating final RQ adjustments, if appropriate.

1. Release History. As the Agency gains experience in handling reports of releases of CERCLA hazardous substances, it may find that some substances are frequently released in situations that require an emergency response. Such release history might be used to adjust RQs. For example, if EPA has in the past responded to 100-pound releases of hazardous substances, an RQ of 100 pounds may be appropriate.

In an analysis of release history, EPA would evaluate past releases to determine how often a response was necessary, and, if so, what type of response was required. This analysis would include consideration of the medium into which the releases take place, the frequency with which releases occur, the geographic location and circumstances of releases, the kind of equipment or techniques necessary to eliminate the hazard after releases have occurred, the cost of response, the type of terrain on which the releases of the substance occur, and estimates of the success of the responses. If analysis of these factors indicates that federal response has generally not occurred or is not necessary for reported releases of a particular substance, the RQ for that substance could be raised. The legislative history, which states that regulations may be revised if under-reporting or over-reporting occurs, encourages such an approach.

Although the National Response Center and EPA and Coast Guard districts have received hazardous substance spill notifications for several years, the data on release history are limited. The CWA Section 311 substances released into navigable waters and transportation-related releases provide a substantial history of release patterns, but not all the CERCLA hazardous substances have been subject to reporting requirements pursuant to CWA Section 311. Similarly, until passage of CERCLA, not all releases of CERCLA hazardous substances have been uniformly subject to DOT reporting requirements. Even in the absence of systematic and comprehensive records concerning release history, RQ adjustments might be based on the experience and and judgment of On-Scene Coordinators familiar with the type of response appropriate for releases of hazardous substances.

2. Release Potential. Several factors may be used to predict the likelihood that hazardous substances will be released into the environment. These include: (a) distribution mode, (b) transportation mode, and (c) packaging and containerization. The Agency might raise the proposed RQs for substances that are less likely to be released and lower the RQs for substances that are more likely to be released.

(a) *Distribution mode.* Some hazardous substances are produced exclusively as intermediates for use in the same plant location which produces the intermediates. Other hazardous substances may be produced at locations that are fairly close to the plants at which they are consumed and converted into other substances. Where only a few plants produce the hazardous substance or where the consuming plants are either at the same site or nearby, the RQ suggested on the basis of the primary and secondary criteria may be relaxed because of the relatively small risk of release from the limited distribution of the hazardous substance.

(b) *Transportation mode.* The mode of transportation, e.g., rail, truck, or barge, may have an influence on the likelihood of a release. If some hazardous substances are generally shipped by a transportation mode that exposes them to a particularly high risk of large releases, the RQ may be reduced; hazardous substances which are primarily shipped by safer modes of transportation might have their RQs increased.

(c) *Packaging and containerization.* The method of packaging a hazardous substance could be used to modify its RQ. Substances that are usually packaged in a fashion that substantially reduces the likelihood of release (such as very high-priced substances) may be assigned RQs on the basis of the smallest package size. There is also likely to be some correlation between the size of a container normally used for shipping and the amount of a hazardous substance that is likely to be released because a release from only one container is more likely than a release from a number of containers simultaneously. RQs might therefore be set on the basis of container sizes for some substances.

It is not clear that adjustment of RQs on the basis of release potential would result in a significant reduction in reporting burden. If a substance is rarely released because of special handling, packaging, or distribution, then reporting costs may be insignificant regardless of whether the RQ is low or high. Therefore, raising the RQs of substances that have a low release potential may not affect the reporting burden. Moreover, regardless of how likely or unlikely a release is, notification may be necessary for releases that may pose a significant threat to the public health or welfare or the environment.

EPA solicits comments on the appropriateness of using feasibility or practicality criteria for adjusting RQs, in light of EPA's authority to consider any factors deemed relevant to administering the CERCLA reporting requirements.

3. Corrosivity. Corrosivity is one of the four criteria RCRA uses as a basis for regulating unlisted hazardous wastes (ignitability, corrosivity, reactivity, and EP toxicity) and therefore was considered for setting RQs under CERCLA. Corrosivity may be important in determining the potential hazard of a release because corrosive substances can cause injury and property damge.

Corrosivity has not been used as a criterion for assigning RQs under CERCLA because EPA has not developed or identified an appropriate

VOL 48 ISS 102 MAY 25 1983 UMI

scale for rating corrosivity. The RCRA regulations define the characteristic of corrosivity in terms of pH ranges and rate of attack on steel (40 CFR 261.22; 45 FR 33122 (May 19, 1980) and 46 FR 35247 (July 7, 1981)). The pH ranges apply only to aqueous wastes and the rate of attack on steel test applies only to liquids. If EPA used a corrosivity scale based on these tests, corrosivity could not be used to adjust RQs when the hazardous substances were neither in aqueous solutions nor were liquids, despite the fact that such substances might pose potential hazards due to corrosivity. The Agency attempted to apply other tests and exisiting data in developing a corrosivity scale, but was unable to establish a five-level scale that addressed the corrosivity of all of the CERCLA hazardous substances. Accordingly, corrosivity was not used as a criterion in adjusting RQs.

F. Additional Criteria Considered, But Rejected

EPA considered, but rejected, using the additional criteria discussed below to adjust RQs. The Agency solicits comment on whether these criteria should be used to adjust RQs.

1. Ease or Difficulty of Cleanup. When a substance is easy to clean up, the releaser may be more willing to take cleanup action. Notification might therefore be unnecessary, since the government would not need to respond. If, however, a substance is particularly difficult to clean up or presents unique cleanup requirements, the releaser may be less likely to clean up even small releases of the substance unless required to do so and given assistance. One possible criterion for setting RQs, then, is to determine the ease or difficulty of cleanup and adjust RQs for certain substances so that easily-cleaned up substances receive higher RQs and substances with unique cleanup requirements receive lower RQs.

EPA has not included ease or difficulty of cleanup as a criterion because ease of cleanup does not guarantee that the releaser will actually take cleanup action nor do unique cleanup requirements necessarily mean that proper reponse will not taken by the releaser. Thus, it has not been possible to correlate the ease or difficulty of cleanup with the government's need to know of a release in order to determine what response action to take, if any.

2. Volatilization. RQs could be adjusted based upon a substance's tendency to volatilize, the process by which a substance vaporizes into the air. Volatilization is a transport process that could be used as a criterion for RQ adjustments along with biodegradability, hydrolysis, and photolysis.

EPA is not using this criterion in the RQ adjustment process because the hazard posed by a release of a hazardous substance does not necessarily decrease when the substance moves from soil or water into the air. Only the medium changes, not the hazardous characteristics of the substance.

V. Alternative Methodologies Considered

The Agency has considered several other methodologies for adjusting RQs but is not currently using them for the reasons given below. The Agency solicits comments on these methodologies, particularly any additional data that could facilitate a more complete evaluation of any of them.

A. Hazard Index

A hazard index (HI) can be used to assign to each hazardous substance a single number that represents the potential hazard of that substance when released to all media. Low RQs could be assigned to substances with high HI numbers, and high RQs to substances with low HI numbers. The HI number could be calculated by:

(1) Identifying the criteria that would be used to rate the potential hazards associated with each substance;

(2) Rating each substance on the basis of each criterion according to the potential hazard posed by the substance for that criterion; and

(3) Combining the ratings in an equation that reflects the weight to be given to each criterion.

The rating of the various criteria would be based on existing data and can take into consideration any or all of the primary and secondary criteria, as well as other criteria. The criteria can be grouped into five general categories, as outlined in Exhibit 6. The following are examples of different ways the ratings can be combined to form two unique hazard index equations:

HI = (Health Effects)x (Aggravating Characteristics) + (Welfare Effects)x (Mitigating Transformation Charteristics)

or

HI = (Health Effects) + (Welfare Effects) + (Aggravating Characteristics) + (Environmental Mobility).

Many other equations are possible. After the ratings are combined and a single numerical value obtained for each hazardous substance, reportable quantities would be assigned to groups of chemicals with similar hazard index scores.

EXHIBIT 6—POSSIBLE CATEGORIES OF CRITERIA FOR DEVELOPING A HAZARD INDEX

Health effects
- Carcinogenicity
- Mutagenicity
- Teratogenicity
- Toxicity

Welfare Effects
- Ignitability
- Explosivity
- Corrosivity
- Reactivity
- Aquatic Toxicity

Aggravating Characteristics
- Persistence
- Bioaccumulation
- Toxic Combustion Products

Mitigating Transformation Characteristics
- Biodegradation
- Hydrolysis
- Photolysis
- Oxidation

Environmental Mobility
- Volatility
- Solubility

There are major differences between using a hazard index and using the methodology being proposed today. Under the proposed methodology, the primary criteria are evaluated independently and the proposed RQ is based on the primary criterion that yields the lowest RQ value identified for any of the applicable criteria. Under a hazard index, the same criteria could be independently evaluated, but the proposed RQ is based on all the criteria, not just the most sensitive one. The results of the two different approaches could be significantly different.

Under the proposed methodology, it is possible that the federal government may receive many reports that do not require a response, while under a hazard index, it is possible that the federal government will not receive reports concerning certain releases which might warrant a response. Notification is a trigger for determining whether a response may be necessary, and the legislative history, in discussing response authority, indicates that:

Because delay will often exacerbate an already serious situation, the bill (S. 1480) authorizes the President to respond when a substantial threat of release may exist. This standard is intended to be a flexible one and holds that it is preferrable to err on the side of protecting public health, welfare, and the environment in administering the response authority of the Fund. (Sen. Rep. 96-848, 96th Cong., 2d Sess. 56 (1980)).

Advantages of the hazard index system are that the system can relate to all media and that it can accommodate a wide variety of criteria which can provide a relative measure of a substance's potential harm or hazard.

EPA would face several problems in implementing a hazard index system. Under this strategy, each substance must be ranked for each criterion. Because the necessary data are not available for each substance with respect to each criterion, relative rankings would have to be based on default values used to replace necessary data. Conservative default values could be chosen, pending development of further data. Second, there is no general agreement as to how criteria are to be combined to form a scientifically-acceptable hazard index. Specific examples of different hazard index algorithms are included in the Background Document to Support the Notice of Proposed Rulemaking Pursuant to CERCLA Section 102(b). The report applied these algorithms to 27 sample substances and compared the results. Any number of plausible equations can be developed, yielding different hazard indices and different RQs for the substances examined. There is no single established method for determining how to weight different criteria, so an additional level of subjective judgment would be introduced into the RQ adjustment process.

B. Scenarios

Scenarios can be used to develop a model of the behavior of substances after they are released, based on specific sets of circumstances that describe the events likely to follow a release. For instance, data can be assembled to describe what would happen if a release to the soil led to contamination of underground sources of drinking water. On the basis of rough projections of potential harm under scenarios of differing probabilities, alternative RQs can be set.

This alternative was rejected because of its scientific complexity; scenarios which attempt to model the effects of hazardous substances in a comprehensive manner are by their nature highly complex, require extensive analysis, and can be subject to considerable controversy. Furthermore, developing RQs on a case-by-case basis using scenarios requires extensive data that are not generally available.

C. Fate and Effects Research

This strategy is based on the fate and effects of hazardous substances released into the environment. It involves obtaining a complete understanding of how each designated hazardous substance interacts with the environment, what products may be formed under various circumstances surrounding a release, and how the designated hazardous substance and its environmental products each result in a specific hazard to public health or welfare or the environment. This differs from scenario development in that it is more comprehensive and specific; it does not focus only on those events which are likely to follow a release, but instead attempts to describe all potential effects of a release. The available data and scientific techniques will not support the broad and uniform application of such an approach at this time, making the utility of this approach very limited.

RQ Adjustments Under Section 311 of the Clean Water Act

EPA is also proposing in this rulemaking to revise certain of the reportable quantities established under Section 311(b)(4) of the Clean Water Act (40 CFR Part 117) for discharges of hazardous substances into navigable waters, so that the CWA Section 311 RQs will be identical to those proposed under CERCLA. While CERCLA requires reporting of releases of hazardous substances into the environment, CWA Section 311 covers a smaller list of hazardous substances and applies only to discharges into navigable waters. Section 311(b)(5) of the CWA requires any person in charge of a vessel or an onshore or offshore facility to notify the appropriate agency of the United States government as soon as he knows of any discharge of a hazardous substance from that vessel or facility that equals or exceeds the applicable RQ. The hazardous substances which must be reported under the CWA are all listed as hazardous substances under CERCLA, and reporting under CERCLA is required for every type of release of a hazardous substance that is subject to reporting requirements under CWA Section 311. Thus, notification will be simplified considerably by making the requirements under both statutes the same.

Reportable quantities which have been promulgated under CWA Section 311 differ from the adjusted RQs proposed under CERCLA for several reasons. First, the CERCLA RQ adjustment methodology adjusts RQs on the basis of other primary criteria in addition to aquatic toxicity, which was the basis for establishing reportable quantities under CWA Section 311. Second, the proposed CERCLA RQs use some updated data on aquatic toxicity. Third, the CERCLA methodology provides for RQs to be raised one level on the basis of secondary criteria, which represent natural dissipation processes operating on substances released into the environment.

EPA believes that the CERCLA methodology meets the requirement of Section 311(b)(4) of the CWA, that:

The President shall by regulation determine for the purposes of this section those quantities of * * * any hazardous substances the discharge of which may be harmful to the public health or welfare of the United States, including but not limited to fish, shellfish, wildlife, and public and private property, shorelines, and beaches.

A single report to the National Response Center will satisfy the notification requirements of both statutes. If the CWA Section 311 RQs were not adjusted, certain releases would be subject to CERCLA and not CWA Section 311, and others subject to CWA Section 311 and not CERCLA. Notification requirements will be simpler for the regulated community to understand and for the federal government to administer when they are identical. Reportable quantities under both statutes are set forth in Table 302.4. 40 CFR Part 117 remains otherwise unchanged, because it contains provisions governing notification procedures, penalties, and jurisdiction. EPA solicits comments on the appropriateness of adjusting the CWA Section 311 RQs to be identical with the CERCLA RQs.

Summary of Supporting Analyses

I. Classification and Regulatory Impact Analysis

Rulemaking protocol under Executive Order 12291 requires that proposed regulations be classified as major or non-major for purposes of review by the Office of Management and Budget. According to the E.O. 12291, major rules are regulations that are likely to result in:

(1) An annual effect on the economy of $100 million or more; or

(2) A major increase in costs or prices for consumers, individual industries, federal, state, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Regulatory Impact Analysis, available for inspection at Room S-398, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, shows that today's proposed regulation is non-major because it

VOL 48 ISS 102 MAY 25 1983 UMI

results in a net cost savings of approximately $19.3 million.[14]

II. Certification Why a Regulatory Flexibility Analysis Is Not Necessary

The Regulatory Flexibility Act of 1980 requires that a Regulatory Flexibility Analysis be performed for all rules that are likely to have "significant impact on a substantial number of small entities." EPA certifies that this regulation will not have a significant impact on a substantial number of small entities. See Chapter 7, Regulatory Impact Analysis.

III. Information Impact Analysis

EPA requires an Information Impact Analysis to be carried out for all rules that impose a paperwork burden on the public. This analysis estimates the burden imposed on parties outside EPA for activities such as recordkeeping or notification. It is anticipated that RQ adjustments will change the paperwork burden imposed on the regulated community for information collection associated with reporting releases. As estimated in the Regulatory Impact Analysis, the paperwork burden of notification and recordkeeping on private parties will be reduced by 57,000 hours by the rule proposed today.

In accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. Section 3501 *et seq.*, the reporting or recordkeeping provisions that are included in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under Section 3504(h) of the Paperwork Reduction Act. Any final rule will include an explanation of how the reporting or recordkeeping provisions contained therein respond to any comments by OMB and the public.

List of Subjects in 40 CFR Part 302

Administrative practice and procedure, Air pollution control, Chemicals, Hazardous materials, Hazardous materials transportation, Hazardous substances, Hazardous wastes, Intergovernmental relations, Liabilities, Natural resources, Nuclear materials, Penalties, Pesticides and pests, Radioactive materials, Reporting and recordkeeping requirements, Superfund, Waste treatment and disposal, Water pollution control, Water supply.

1. It is proposed to amend 40 CFR by adding Part 302 as follows:

[14] This figure does not include the costs or benefits associated with continuous releases.

PART 302—DESIGNATION, REPORTABLE QUANTITIES, AND NOTIFICATION

Sec.
302.1 Applicability.
302.2 Abbreviations.
302.3 Definitions.
302.4 Designation of hazardous substances.
302.5 Determination of reportable quantities.
302.6 Notification requirements.
302.7 Penalties.

Authority: Sections 101 and 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9601 *et seq.*); Sections 311 and 501(a) of the Federal Water Pollution Control Act (33 U.S.C. 1251 *et seq.*).

§ 302.1 Applicability.

This regulation lists those substances designated as hazardous substances under Section 101(14) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("the Act"), identifies reportable quantities for these substances, and sets forth the notification requirements for releases of these substances. This regulation also sets forth reportable quantities for hazardous substances designated under Section 311(b)(2)(A) of the Clean Water Act.

§ 302.2 Abbreviations.

CAS Registry No.=Chemical Abstracts Service Registry Number.
RCRA=Resource Conservation and Recovery Act of 1976, as amended.
lb=pound.
Kg=kilogram.
RQ=reportable quantity.

§ 302.3 Definitions.

As used in this part, all terms shall have the meaning set forth below:

(a) "The Act", "CERCLA", or "Superfund" means the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (Pub. L. 96–510);

(b) "Administrator" means the Administrator of the United States Environmental Protection Agency ("EPA");

(c) "Consumer product" shall have the meaning stated in 15 U.S.C. 2052;

(d) "Environment" means (1) the navigable waters, the waters of the contiguous zone, and the ocean waters of which the natural resoruces are under the exclusive management authority of the United States under the Fishery Conservation and Management Act of 1976, and (2) any other surface water, ground water, drinking water supply, land surface or subsurface strata, or ambient air within the United States or under the jurisdiction of the United States;

(e) "Facility" means (1) any building, structure, installation, equipment, pipe or pipeline (including any pipe into a sewer or publicly owned treatment works), well, pit, pond, lagoon, impoundment, ditch, landfill, storage container, motor vehicle, rolling stock, or aircraft, or (2) any site or area where a hazardous substance has been deposited, stored, disposed of, or placed, or otherwise come to be located; but does not include any consumer product in consumer use or any vessel;

(f) "Federally permitted release" means (1) discharges in compliance with a permit under section 402 of the Federal Water Pollution Control Act, (2) discharges resulting from circumstances identified and reviewed and made part of the public record with respect to a permit issued or modified under section 402 of the Federal Water Pollution Control Act and subject to a condition of such permit, (3) continuous or anticipated intermittent discharges from a point source, identified in a permit or permit application under section 402 of the Federal Water Pollution Control Act, which are caused by events occurring within the scope of relevant operating or treatment systems, (4) discharges in compliance with a legally enforceable permit under section 404 of the Federal Water Pollution Control Act, (5) releases in compliance with a legally enforceable final permit issued pursuant to section 3005(a) through (d) of the Solid Waste Disposal Act from a hazardous waste treatment, storage, or disposal facility when such permit specifically identifies the hazardous substances and makes such substances subject to a standard of practice, control procedure or bioassay limitation or condition, or other control on the hazardous substances in such releases, (6) any release in compliance with a legally enfoceable permit issued under section 102 or section 103 of the Marine Protection, Research, and Sanctuaries Act of 1972, (7) any injection of fluids authorized under Federal underground injection control programs or state programs submitted for Federal approval (and not disapproved by the Administrator of the Environmental Protection Agency) pursuant to part C of the Safe Drinking Water Act, (8) any emission into the air subject to a permit or control regulation under section 111, section 112, title I part C, title I part D, or State implementation plans submitted in accordance with section 110 of the Clean Air Act (and not disapproved by the Administrator of the Environmental Protection Agency), including any schedule or waiver granted, promulgated, or approved under these sections, (9) any injection of fluids or other materials authorized under applicable State law (i) for the purpose of stimulating or treating wells for the production of crude oil, natural gas, or water, (ii) for the purpose of secondary, tertiary, or other enhanced recovery of crude oil or natural gas, or (iii) which are brought to the surface in conjunction with the production of crude oil or natural gas and which are reinjected, (10) the introduction of any pollutant into a publicly owned treatment works when such pollutant is specified in and in compliance with applicable pretreatment standards of section 307(b) or (c) of the Clean Water Act and enforceable requirements in a pretreatment program submitted by a State or municipality for Federal approval under section 402 of such Act, and (11) any release of source, special nuclear, or byproduct material, as those terms are defined in the Atomic Energy Act of 1954, in compliance with a legally enforceable license, permit, regulation, or order issued pursuant to the Atomic Energy Act of 1954;

(g) "Hazardous substance" means any substance designated pursuant to 40 CFR Part 302;

(h) "Hazardous waste" shall have the meaning provided in section 1004 of the Solid Waste Disposal Act;

(i) "Navigable waters" or "navigable waters of the United States" means waters of the United States, including the territorial seas;

(j) "Normal application of pesticides" means application pursuant to the label directions for application of a pesticide product registered under section 3 or section 24 of the Federal Insecticide, Fungicide, and Rodenticide Act as amended (7 U.S.C. 136 *et seq.*) (FIFRA), or pursuant to the terms and conditions of an experimental use permit issued under section 5 of FIFRA, or pursuant to an exemption granted under section 18 of FIFRA;

(k) "Offshore facility" means any facility of any kind located in, on, or under, any of the navigable waters of the United States, and any facility of any kind which is subject to the jurisdiction of the United States and is located in, on, or under any other waters, other than a vessel or a public vessel;

(l) "Onshore facility" means any facility (including, but not limited to, motor vehicles and rolling stock) of any kind located in, on, or under, any land or non-navigable waters within the United States;

(m) "Person" means an individual, firm, corporation, association, partnership, consortium, joint venture, commercial entity, United States Government, State, municipality, commission, political subdivision of a State, or any interstate body;

(n) "Release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment, but excludes (1) any release which results in exposure to persons solely within a workplace, with respect to a claim which such persons may assert against the employer of such persons, (2) emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine, (3) release of source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the Atomic Energy Act of 1954, if such release is subject to requirements with respect to financial protection established by the Nuclear Regulatory Commission under section 170 of such Act, or, for the purposes of section 104 of CERCLA or any other response action, any release of source byproduct, or special nuclear material from any processing site designated under section 102(a)(1) or 302(a) of the Uranium Mill Tailings Radiation Control Act of 1978, and (4) the normal application of fertilizer;

(o) "Reportable quantity" means that quantity, as set forth in this part, the release of which requires notification pursuant to this part;

(p) "United States" include the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, the Commonwealth of the Northern Marianas, and any other territory or possession over which the United States has jurisdiction; and

(q) "Vessel" means every description of watercraft or other artificial contrivance used, or capable of being used, as a means of transportation on water.

§ 302.4 Designation of hazardous substances.

(a) *Listed Hazardous Substances.* The elements and compounds and hazardous wastes appearing in Table 302.4 are designated as hazardous substances under Section 101(14) of the Act.

(b) *Unlisted Hazardous Substances.* A solid waste, as defined in 40 CFR 261.2, which is not excluded from regulation as a hazardous waste under 40 CFR 261.4(b), is a hazardous substance under Section 101(14) of the Act if it exhibits any of the characteristics identified in 40 CFR 261.20 through 261.24.

4 - indicates the statutory source for designation of this substance under CERCLA is RCRA Section 3001

VOL 48 ISS 102 25 1983 MAY UMI

§ 302.5 Determination of reportable quantities.

(a) *Listed Hazardous Substances.* The quantity in the column "Proposed RQ" for each substance in Table 302.4 is the reportable quantity for that substance.

(b) *Unlisted Hazardous Substances.* Unlisted hazardous wastes designated by 40 CFR § 302.4(b) have the reportable quantity of 100 pounds, except for those unlisted hazardous wastes exhibiting the characteristic of EP toxicity identified in 40 CFR § 261.24. Unlisted hazardous wastes which exhibit EP toxicity have the reportable quantities listed in Table 302.4 for the contaminant on which the characteristic of EP toxicity is based. If an unlisted hazardous waste exhibits EP toxicity on the basis of more than one contaminant, the reportable quantity for that waste shall be the lowest of the reportable quantities listed in Table 302.4 for those contaminants. If an unlisted hazardous waste exhibits the characteristic of EP toxicity and one or more of the other characterstics referenced in 40 CFR § 302.4(b), the reportable quantity for that waste shall be the lowest of the applicable reportable quantities.

§ 302.6 Notification requirements.

Any person in charge of a vessel or an offshore or an onshore facility shall, as soon as he has knowledge of any release (other than a federally permitted release or normal application of a pesticide) of a hazardous substance from such vessel or facility in a quantity equal to or exceeding the reportable quantity determined by this part in any 24-hour period, immediately notify the National Response Center ((800) 424–8802; in Hawaii, Alaska, and the Washington, D.C. metropolitan areas (202) 426–2675).

§ 302.7 Penalties.

(a) Any person

(1) In charge of a vessel from which a hazardous substance is released, other than a federally permitted release, into or upon the navigable waters of the United States, adjoining shorelines, or into or upon the waters of a contiguous zone,

(2) In charge of a vessel from which a hazardous substance is released, other than a federally permitted release, which may affect natural resources belonging to, appertaining to, or under the exclusive management authority of the United States (including resources under the Fishery Conservation and Management Act of 1976), and who is otherwise subject to the jurisdiction of the United States at the time of the release, or

(3) In charge of a facility from which a hazardous substance is released, other than a federally permitted release, in a quantity equal to or greater than that reportable quantity determined under this part who fails to notify immediately the National Response Center as soon as he has knowledge of such release shall, upon conviction, be fined not more than $10,000 or imprisoned for not than one year, or both.

(b) Notification received pursuant to this paragraph or information obtained by the exploitation of such notification shall not be used against any such person in any criminal case, except a prosecution for perjury or for giving a false statement.

(c) This section shall not apply to the application of a pesticide product registered under the Federal Insecticide, Fungicide, and Rodenticide Act or to the handling and storage of such a pesticide product by an agricultural producer.

2. It is proposed to revise 40 CFR 117.3 as follows:

§ 117.3 Determination of reportable quantities.

The quantity listed with each substance in Table 302.4, in 40 CFR 302.4 is determined to be reportable quantity for that substance.

Dated: April 26, 1983.

Lee L. Verstandig,

Administrator.

[FR Doc. 83-13985 Filed 5-24-83; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 302

[SWH-FRL 2207-5a]

Designation of Additional Hazardous Substances

AGENCY: Environmental Protection Agency.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: Under Section 102(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA" or "Superfund"), the Environmental Protection Agency ("EPA" or "the Agency") is considering proposal of regulations to designate hazardous substances in addition to those already designated under Section 101(14) of CERCLA. Section 102(a) requires the Administrator to promulgate regulations designating as hazardous substances those substances that, when released into the environment, may present substantial danger to public health or welfare or the environment. This Advance Notice of Proposed Rulemaking ("ANPRM") discusses and solicits comments on various approaches that the Agency may use to determine what additional substances, if any, should be proposed for designation as hazardous.

DATES: To be considered, written comments must be submitted in triplicate on or before July 25, 1983.

ADDRESS: Send written comments to: Emergency Response Division, Docket Clerk, Attn: Docket No. 102 ADD, U.S. Environmental Protection Agency, 401 M Street, S.W., WH–548B, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

For general information contact: RCRA/Superfund Hotline, (800) 424–9346 ((202) 382–3000 in Washington, D.C.).

For specific information contact: Dr. K. Jack Kooyoomjiam, Chief, Regulation Development Section, Emergency Response Division (WH–548B), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, or the RCRA/Superfund Hotline (800) 424–9346, in Washington, D.C. (202) 382–3000.

SUPPLEMENTARY INFORMATION:

1. Background Information

Substances are designated as hazardous under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, CERCLA (Pub. L. 96–510), 42 U.S.C. Section 9601 *et seq.*, in two ways. Section 101(14) defines "hazardous substance" to include substances designated under certain provisions of other environmental statutes: Sections 307(a) and 311(b)(2)(A) of the Federal Water Pollution Control Act (Clean Water Act), Section 112 of the Clean Aif Act, Section 3001 of the Solid Waste Disposal Act (commonly known as the Resource Conservation and Recovery Act, "RCRA"), and Section 7 of the Toxic Substances Control Act. In addition, Section 102(a) requires the EPA Administrator to promulgate regulations to designate as hazardous substances other elements, compounds, mixtures, solutions, and substances that may present substantial danger to public health or welfare or the environment when released into the environment.

The consequences of designation can be substantial. First, Section 103(a) of CERCLA requires that releases of designated hazardous substances that equal or exceed reportable quantities ("RQs") be reported to the National Response Center unless the release is federally permitted or otherwise exempted. (For a further discussion of reportable quantities and release notification see the Notice of Proposed Rulemaking ("NPRM") on Superfund Notification Requirements and Reportable Quantity Adjustments, published elsewere in today's **Federal Register.)** This notification allows the federal government to determine whether a response is necessary. In addition, Section 103(b) establishes penalties, including criminal sanctions, for persons in charge of vessels or facilities who fail to report releases of hazardous substances which equal or exceed reportable quantities. Any such person who, as soon as he has knowledge of a reportable release, fails to report the release pursuant to Section 103 (a) or (b) shall, upon conviction, be fined no more than $10,000 or imprisoned for not more than one year, or both.

Regardless of whether a reportable quantity of the hazardous substance is released and proper notification is given, any person responsible for a release of hazardous substances may be liable for:

(A) All costs of removal or remedial action incurred by the United States Government or a State not inconsistent with the national contingency plan;

(B) Any other necessary costs of response incurred by any other person consistent with the national contingency plan; and

(C) damages for injury to, destruction of, or loss of natual resources, including the reasonable costs of assessing such injury, destruction, or loss resulting from such a release (see Section 107 of CERCLA).

Finally, substances designated as hazardous under CERCLA must also be listed as hazardous materials under the Hazardous Materials Transportation Act (see Section 306(a) of CERCLA).

EPA intends to consider carefully these economic impacts in developing its designation strategy.

II. Major Alternatives Under Consideration and Requests for Public Comment

EPA contemplates that the designation process will involve two distinct steps. First, the Agency will identify a candidate list or lists of substances to be considered for designation. Second, the Agency will identify the criteria to be applied to determine which substances on the candidate list or lists will be designated as hazardous substances. EPA is considering several alternatives for both of these steps. The first section below discusses the potential candidate lists and the second section discusses possible criteria for designating substances from these candidate lists.

The Agency has conducted several preliminary economic and technical analyses in support of this ANPRM. These analyses are part of the rulemaking record: "Analysis of the Economic Effects of Regulatory Strategies for Sections 102 and 103 of the Comprehensive Environmental Response, Compensation, and Liability Act," November 2, 1981; and "Strategies for Designation of Additional Hazardous Substances pursuant to CERCLA Section 102(a)," September 17, 1982.

Public comment is solicited on the alternatives discussed below and on other alternatives that commentors may want the Agency to consider.

A. Candidate Lists

EPA has identified a number of candidate lists that might be considered for designating hazardous substances. These lists are briefly described below. They are divided into two groups: specific lists developed under other environmental statutes or programs, and general data bases which include broader lists of potential hazardous substances. EPA is soliciting comments on which lists are appropriate for EPA to review in designating hazardous substances, particularly information on the scope of coverage of these candidate lists and the availability of data for substances on these lists. EPA may also decide to designate hazardous substances in several phases, rather than complete the designation process in one rulemaking. EPA solicits comments on which of the candidate lists should be given highest priority and solicits information concerning other candidate lists not mentioned below that should be considered.

The presence of a substance on a candidate list does not in itself determine whether the substance will be designated as a hazardous substance under CERCLA. Part II(B) of this notice discusses the types of criteria that might be applied to determine whether substances on these candidate lists are sufficiently hazardous to warrant designation. The Agency anticipates that substances on the candidate lists will be ranked on the basis of factors such as production volume, potential for release, and the availability of data in conjunction with the application of the criteria discussed in part II(B).

Specific Lists:

(1) Certain pesticide or pesticide active ingredients identified under the Federal Insecticide, Fungicide, and Rodenticide Act ("FIFRA"). One potential candidate list is the list of about 600 pesticide active ingredients identified by EPA after a review of about 40,000 pesticide formulations ("Pesticide Active Ingredients Standards Ranking Scheme Results" produced by the EPA Office of Pesticide Programs: see 47 FR 3770–3771, January 27, 1982). These ingredients will be evaluated by EPA to determine their possible effects on man and the environment. It may not be possible for EPA to analyze all of these pesticides and pesticide active ingredients to determine whether they should be designated as hazardous substances under CERCLA. EPA solicits comments on methods for setting priorities for analysis of these substances.

(2) Chemicals listed under RCRA. 40 CFR Part 261, Appendix VIII, excluding those already listed under Section 101(14). These substances are hazardous constituents of RCRA wastes (45 FR 33132–33133, May 19, 1980).

(3) Materials listed under the Department of Transportation ("DOT") regulations issued under the Hazardous Materials Transportation Act, excluding those already listed under Section 101(14). These lists designate materials considered hazardous for the purpose of transportation (49 CFR 172.101, 172.102).

(4) Substances determined by the International Agency for Research on Cancer ("IARC") to demonstrate carcinogenic characteristics, excluding those already listed under Section 101(14). IARC has assessed the evidence for carcinogenicity of substances from experimental animal studies and classified these substances into five groups according to the extent of evidence of carcinogenicity: (1) sufficient evidence, (2) limited evidence, (3) inadequate evidence, (4) negative evidence, and (5) no data. Substances might be included on the candidate list if the IARC has determined that there is sufficient or limited evidence of carcinogenicity. Sufficient evidence indicates a causal association between exposure and human cancer, while limited evidence indicates a possible carcinogenic effect in humans, although the data are not sufficient to demonstrate a causal association (Table 1, International Agency for Research on Cancer, monograph supplement, September 1979).

(5) The 1982 list of explosive materials subject to regulation under 18 USC Chapter 40, 47 FR 40974–40976 (September 16, 1982). This list of explosive materials is designated by the Director of the Bureau of Alcohol, Tobacco and Firearms.

(6) The Toxic Substances Control Act (TSCA) Section 4(e) list. This is the list of chemical substances and mixtures recommended for priority consideration

VOL 48 ISS 102 MAY 25 1983 UMI

in regard to testing requirements under TSCA Section 4(a) (see the TSCA Chemicals in Progress Bulletin, Volume 3, Number 1, April 1982).

General Lists

(1) *Chemical Activities Status Report ("CASR").* This data base identifies substances that the Agency has already regulated, that it is proposing for regulation, or that it otherwise is considering. CASR covers other substances in addition to those already regulated or proposed for rulemaking; it also includes those substances for which the Agency has demonstrated some concern, even if no rulemaking has begun. CASR is limited to EPA activities and does not reflect the activities of other agencies or departments (e.g., DOT, Coast Guard). CASR has been issued as a two-volume Agency report, EPA 560/13–80–040a&b, but the candidate list would be the actual CASR data base, which is constantly updated and may differ slightly from this report.

(2) *The Suspect Chemicals Sourcebook.* This list already includes chemical substances derived from regulatory lists or other publications that have been issued not only by EPA but also by DOT, the Department of Health and Human Services, the Occupational Safety and Health Administration, and IARC. It does not go beyond substances that have already been regulated, considered for regulation, or listed for testing. This list was prepared by Executive Enterprise Publications Company, Inc., in cooperation with the Synthetic Organic Chemical Manufacturers Association.

(3) *Toxic Substances Control Act Chemical Substance Inventory.* This list includes approximately 55,000 chemicals. It is likely that most known potentially hazardous chemicals would be included and considered for designation if this list is used. The Agency, however, could have difficulty in establishing priorities and applying designation criteria in a timely fashion to this list, and data on these substances may be insufficient.

B. Criteria for Designation

The Agency has identified four alternative sets of criteria for designating candidate substances as hazardous for purposes of CERCLA. Comment is specifically solicited on these alternatives, and on combinations of them.

Designation Alternative 1: Critical Value Strategy. This approach resembles the primary and secondary criteria used to adjust RQs. [See today's NPRM on Superfund Notification Requirements and Reportable Quantity Adjustments, published elsewhere in todays **Federal Register**, for a more detailed explanation of this process.] To assign RQs to designated hazardous substances, the Agency would evaluate whether substances exhibit any of the following characteristics: aquatic toxicity, mammalian (oral, dermal, or inhalation) toxicity, ignitability, reactivity, other toxic effects, carcinogenicity, and a tendency to dissipate into the environment. These characteristics or criteria are used to adjust reportable quantities in the accompanying NPRM. In applying this approach to designation, the Agency would establish a critical value for each of the above criteria. Substances would be designated if the rating of the substances were above the critical value for any criterion. If there were insufficient evidence to judge, the substance could be retained as a candidate pending the collection of further data. The data gathered in the designation process would also be used to establish RQs for substances once they have been designated.

EPA specifically solicits comments on the following issues:

(1) Are the critical values developed to adjust reportable quantities also appropriate for designation of hazardous substances? (These critical values are discussed in the accompanying Notice of Proposed Rulemaking on Superfund Reportable Quantity Adjustments, Part IV.)

(2) Are other critical values more appropriate for designation of hazardous substances?

Designation Alternative 2: A Combination of Production Level and Critical Value Strategy. This alternative would identify substances on the candidate list for further analysis if their annual production level exceeded some specified amount. The critical value methodology would then be applied to these substances to determine whether they should actually be designated. This method treats production volume as an indication of release potential. It assumes that there is less chance of a release if a substance is produced in relatively small quantities. For imported substances, the amount imported would be added to the domestic production level.

Section 311 of the Clean Water Act screened substances by production level. The Clean Water Act's final promulgated list of hazardous substances includes those hazardous substances produced at a level of 10 million pounds per year or more. The Agency has found that the materials most commonly encountered (i.e., spilled most frequently) in Section 311 spill situations are those produced in high volumes. Screening by production levels results in fewer candidate substances than Alternative 1, which means that the Agency may be able to analyze for possible designation the substances most likely to be released. If this approach is taken, however, certain potentially hazardous substances that may be released will not be considered for possible designation because thay are no longer produced or they are produced in low volumes.

The Agency specifically requests comments on the following points: (1) if production level is used to screen substances for analysis, what production level should be selected as the cutoff point, and (2) what problems could occur when substances with low production volumes that might otherwise be considered hazardous are not designated.

Designation Alternative 3: Hazard Index. This approach involves a scoring system to evaluate the relative potential threat posed to public health or welfare or the environment when candidate substances are released to the air, ground water, surface water, or soil. A variety of rating factors (e.g., toxicity, reactivity, bioaccumulation, persistence, carcinogenicity) would be used to determine the kinds of hazards that would result and, insofar as possible, the degree of hazard posed. EPA solicits comments concerning the appropriate rating factors. An equation would be used to combine these several factors into a single number. A substance's hazard index value derived in this fashion could be compared to the values determined for other substances, and a ranking of substances would be possible. A cutoff point for designation could then be determined.

A hazard index approach provides a quantative ranking of hazard that facilitates setting a cutoff point, and it uses all available data. It is possible, however, that (1) data gaps may make a substance appear less hazardous than it is and may make relative ranking difficult to develop, (2) a cutoff point could not be easily determined, (3) there would be no general agreement in the scientific community on how rating factors are to be combined to form an acceptable hazard index for a broad listing of chemicals, and (4) different but equally defensible equations would result in different rankings for the same subtance.

Designation Alternative 4: Combination of Release History and Critical Value Strategy. This approach would identify all candidate substances with a history of release problems. For example, substances would be considered for designation if their release had required frequent or extraordinary response (e. g., rapid evacuation) in the past, or if they had frequently been identified at sites undergoing remedial action under CERCLA. The critical value strategy would then be applied to determine which substances pose a threat to public health or welfare or the environment.

This approach identifies for CERCLA designation those substances that pose a threat to public health or welfare or the environment and that have a proven history of release problems. Designation of substances that have not historically been a problem is avoided. It may be appropriate, however, to designate substances that are rarely, if ever, released because of the potential hazard they pose. In addition, non-regulated substances are not usually monitored when releases of hazardous substances occur, so that there may be no release record of a substance that is released in potentially significant amounts.

III. Other Issues

Several issues will arise regardless of the alternatives selected. The issues include designation under other statutes and the use of categorical designation.

A. Effects of Designation Under Other Statutes

Substances may be added to or deleted from the lists identified under Section 101(14) of CERCLA: Sections 307(a) and 311(b)(2)(A) of the Clean Water Act, Section 112 of the Clean Air Act, Section 3001 of RCRA, and Section 7 of TSCA. Substances added to these lists will be added to the CERCLA list and substances deleted from these lists will be deleted from the CERCLA list (unless they are also designated under some other provisions). In proposing any additions to these other lists, EPA will reference the fact that these substances will automatically be designated under CERCLA. EPA anticipates proposing RQs for these substances at that time. EPA solicits comments on any other arrangements that might be helpful to inform the public concerning additions to or deletions from these lists.

B. Categorical Versus Individual Designation

Hazardous substances could be designated as categories of substances (e.g., acids) or as individual substances (e.g., sulfuric acid). If designation is by category, however, the designation may be too broad. Although such an approach guarantees that all truly hazardous substances in that category are designated, it could impose an unnecessary burden on the regulated community and might prevent EPA from focusing on the most serious releases. In addition, RQ assignment might be complicated if individual substances covered by a single categorical designation required different RQs. Individual designation, on the other hand, is a time-consuming process, and designation of particular substances as hazardous under CERCLA may take longer than if the categorical designation approach had been used. A delay or a failure to designate substances as hazardous may adversely affect public health or welfare or the environment.

The Agency requests public comment on the relative merits of categorical versus individual designation.

IV. Public Comment

To summarize the previous discussion, public comment is specifically requested on the following:

(1) The alternatives presented for developing a list of candidate substances;

(2) The alternatives presented for selecting substances from the candidate list for designation as hazardous for purposes of CERCLA;

(3) The option of designating no new hazardous substances;

(4) The relative merits of designating substances categorically or individually;

(5) Data bases or techniques that could be used by the Agency to fill data gaps about substances being considered for designation.

[AD-FRL-2334-1]

Standards of Performance for New Stationary Sources; Appendix B; Performance Specifications 2 and 3 for SO_2, NO_x, CO_2, and O_2 Continuous Emission Monitoring Systems

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule

SUMMARY: Revisions to the performance specifications for continuous monitoring of sulfur dioxide (SO_2), oxides of nitrogen (NO_x), carbon dioxide (CO_2), and oxygen (O_2), were proposed in the **Federal Register** on January 26, 1981 (46 FR 8352). This action promulgates the revisions to the performance specifications for continuous emission monitoring systems (CEMS's) for sources currently subject to Performance Specifications 2 and 3 (PS's 2 and 3). These include fossil-fuel-fired steam generators for which construction is commenced after August 17, 1971; electric utility steam generating units for which construction is commenced after September 18, 1978; nitric acid plants; sulfuric acid plants; petroleum refineries; primary copper smelters; primary zinc smelters; primary lead smelters; kraft pulp mills; and sources subject to Appendix P of 40 CFR Part 51. The intended effect of the revisions to PS's 2 and 3 is to require all new, modified, and reconstructed affected facilities and other sources mentioned above which are required to monitor SO_2, NO_x, CO_2, or O_2 to use these updated specifications when conducting CEMS performance evaluations as required in the regulations.

EFFECTIVE DATE: May 25, 1983.

ADDRESSES: Summary of Comments and Responses. The summary of comments and responses for the proposed revisions to the PS's may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777. Please refer to "Revisions to Continuous Emission Monitoring Systems Performance Specifications 2 and 3 (Proposed January 26, 1981, 46 FR 8352)—Summary of Comments and Responses, EPA–450/3–82–022."

CEMS Guidelines: A document entitled, "Gaseous Continuous Emission Monitoring Systems Performance Specifications Guidelines—SO_2, NO_x, CO_2, and O_2, and TRS," is available from the Emission Measurement Branch (MD–19), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Docket. A docket, number OAQPS–79–4, containing information considered by EPA in the development of the revisions is available for public inspection between 8:00 a.m. and 4:00 p.m. Monday through Friday, at EPA's Central Docket Section (A–130), West Tower Lobby, Gallery 1, 401 M Street, S.W., Washington, D.C. 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Roger T. Shigehara, Emission Measurement Branch, Emission Standards and Engineering Division (MD–19), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–2237.

Public Participation

The revisions to the PS's where proposed and published in the **Federal Register** on January 26, 1981 (46 FR 8352). Public comments were solicited at the time of proposal. To provide interested persons the opportunity for oral presentation of data, views, or arguments concerning the proposed specifications, a public hearing was scheduled for February 19, 1981, beginning at 9:00 a.m. The hearing, however, was not held because no one requested to speak. The public comment period was from January 26, 1981, to March 27, 1981.

Twelve comment letters concerning issues relative to the proposed revisions were received. The comments have been carefully considered; and, where determined to be appropriate by the Administrator, changes have been made in the proposed revisions.

Significant Comments and Changes to the Proposed Revised Performance Specifications

Comments on the proposed revision to the PS's were received from industry, Federal agencies, State air pollution control agencies, trade associations, and equipment manufacturers. A detailed discussion of these comments and responses can be found in the document, referred to in the **ADDRESSES** section of this preamble. The summary of comments and responses serves as the basis for the revisions that were made between proposal and promulgation. The major comments and responses are summarized in this preamble. Most of the comment letters contained multiple comments. The comments have been divided in the categories cited below.

Section 60.13 of the General Provisions

One commenter stated that in over 300 relative accuracy (RA) tests, the accuracy was well within ±20 per percent although the span drift exceeded ±2.5 percent of span. The commenter suggested that adjustments be required only when the drift exceeds twice the specified amount. The EPA considered the suggestion to be reasonable and has revised the subparagraph accordingly.

Installation and Measurement Location Specifications

Two Commenters pointed out that the specifications address only the location of outlet monitor systems and must address inlets as well. Section 3.1 of PS 2 has been revised to address both inlets and outlets of control devices.

A third commenter had several comments on this section. First, the commenter felt that the statement, "If the cause of failure to meet the RA test is determined to be the measurement location, the CEMS may be required to be relocated," should be deleted and that data correction should be allowed in all cases where RA results can be applied to generate a correction factor. Second, the commenter felt that (1) when pollutant concentration changes are due solely to diluent leakage and (2) the diluent and pollutant are simultaneously measured at the same location, the "two equivalent diameter" requirement should be excluded. Third, the commenter noted that the use of the 0.4, 1.2, and 2.0 meter points for large stacks would not guarantee that the samples will be representative of the facility's emissions and recommended that the 16.7, 50.0, and 83.3 percent points be used unless another configuration can be shown to be representative.

First, EPA agrees that data correction should be allowed in those cases where RA results can be applied to generate a correction factor. The exact procedure must be established between the Administrator and the source owner on a case-by-case basis. The statement cited above was intended to take care of those cases where a practical solution for correcting the data cannot be reached. The statement has been revised to read as follows: "If the cause of failure to meet the RA test is determined to be the measurement location and a satisfactory correction technique cannot be established, the Administrator may require the CEMS to be relocated."

Second, Section 3.2 of PS has been revised to allow a "one-half equivalent diameter" to be used in lieu of the "two

diameter" criterion under the stated conditions. Third, the use of the large-diameter stack criterion is an option, not a mandatory requirement, and was intended as a practical measure for those cases where pollutant stratification is not expected. Section 3.2 has been revised to reflect this concept, and a statement has been added to prevent the option from being used after wet scrubbers or at points where two streams with different pollutant concentrations are combined.

A fourth commenter felt that in large-diameter stacks a single point or points nearer the centroid of the stack would be just as representative as three sample points. Studies conducted by EPA show that a single point could be −11 percent off from the average emission rate and a single point at the centroid could be +9 percent off. The use of three points allows measurements within ±3 percent of the average.

Instrument Zero and Span

The proposed specification in Section 4.1 of PS 2 requires the recorder span to be set at 90 to 100 percent of recorder full-scale using a span level of 90 to 100 percent of the span value.

One commenter stated that it would be more appropriate to set the span at the expected range of operation. Another suggested that a 50 to 100 percent of span value would provide more flexibility without significant loss in accuracy. A third commenter felt that a span level at about 50 percent of full-scale would be more appropriate for nonliner instruments, and a fourth suggested using a minimum of 1.5 times the emission limit. A fifth commenter suggested the use of a span level of 80 to 100 percent of the span value because gas cylinder concentrations can be provided only to within ±10 percent.

The span level was selected to allow the majority of the measurements to be accomplished without going off-scale. However, the selected span levels cause the majority of the measurements to occur at about 10 to 40 percent of full-scale, which in turn can cause the CEMS to become less accurate. If lower span levels are used, then high emissions would cause the recorder to go off-scale. The EPA has re-evaluated the objectives and determined that some compromises are needed between accuracy and the loss of some information. Section 4.1 has been revised to allow the recorder span to be set at 90 to 100 percent of full-scale using a high-level value between 1.5 times the pollutant concentration corresponding to the emission standard level and the span value specified in an applicable subpart of the regulations. As another option, a calibration gas, cell, or optical filter value between 50 and 100 percent of the high level is allowed provided that the data recorder full-scale requirements are met. These options are allowed in order to improve the accuracy of measurements well below the emission standard; however, the revisions to PS 2 note that should emissions exceed the full-scale value, the source operator must provide some means to measure these values in accordance with the requirements of the applicable regulation. The Agency recognizes that some inaccuracies may be incurred by expanding the scale in such cases, but believes that increased accuracy at levels near the emission standard is of greater benefit. In addition, there is instrumentation available from at least two manufacturers that would satisfy these options.

Affected Facility Operation

Several commenters objected to restricting the calibration drift (CD) test while the affected facility is operating at more than 50 percent capacity. One commenter felt that there should be no restriction at all. Another felt that the load should be conducted under normal operation. A third commenter said that some units are overdesigned by more than 100 percent for future considerations and suggested that the "capacity" be changed to "normal load." The purpose for the restriction was to prevent tests from being conducted under an abnormally low load condition. The EPA has concluded that 50 percent of normal load condition is reasonable and has thus revised Sections 5.2 and 5.3 accordingly.

The CEMS Relative Accuracy

A number of commenters felt that the RA specification of ±20 percent of the mean value of the reference method (RM) test data in terms of the units of the emission standard or 10 percent of the applicable standard, whichever is greater, was too stringent. One commenter stated that he has successfully used such a standard, but it was "not clear that this is economically reasonable or technologically feasible." Another commenter felt the specification was "overly demanding, considering that the RM's are far from absolute and that there is less intrinsic value associated with the accuracy of an emission level as it approaches zero and is well under basic requirements." Two of these commenters felt that CEMS's have too many operational problems to meet and that the proposed specification should reinstate the 10 percent location error "allowed" in the October 1979 proposal. A fifth commenter felt that it is unlikely that any CEMS would be able to maintain the ±20 percent error at the minimum detectability of the CEMS.

The combined accuracy requirement for the pollutant diluent monitor system is more restrictive than separate accuracy requirements, but not unattainable. The EPA has reviewed a number of RA tests in which the combined systems were checked. Of the 24 tests that were reviewed, 13 showed improved RA and 11 got worse. Only two would have failed as a result of the combined specification, and five would have passed while previously failing the pollutant monitor RA. The EPA feels that a CEMS not capable of meeting the combined RA during the initial PS test is unacceptable. Relaxing the RA requirement would tend to encourage unacceptable CEMS's to be placed on the market.

The EPA agrees that the RM's are far from being absolute. The ±20 percent criterion has allowed for the variability of the RM measurements. In addition, PS 2 proposed the ±10 percent of emission standard to account for errors at the minimum detectability of the CEMS, and the RA specification has been changed for very low SO_2 emission limits.

The ±10 percent criterion used in the definition of stratification was not an allowance for error, but merely a criterion used to define stratification. The entire context of Section 4 of the October 5, 1975, specification (40 FR 46250) is that the sampling location should be representative of the emissions. Section 4.1 states, "For sampling locations where effluent gases are * * * nonstratified, a point or path of *average* emissions may be monitored." Section 3.2 of the October 10, 1979, proposal (44 FR 58602) states, "The tester may * * * conduct the stratification check * * * to select the point, points, or path of *average* gas concentration."

Correlation of RM and CEMS Data

One commenter suggested that when NO_x concentration varies with time, the average RM values should be compared to the average CEMS values recorded at the time each grab sample. Another commenter recommended that simultaneous measurements be required unless the source operator can show that temporal variations are insignificant. A third commenter suggested that the required measurements be determined as nearly simultaneously as possible.

Section 7.2.2 was revised to allow the use of the arithmetic average of the CEMS values recorded at the time of each grab sample. This option can be

VOL 48 ISS 102 MAY 25 1983

used when the pollutant concentration is temporal in nature.

Quality Assurance

A number of commenters were concerned with the lack of quality assurance (QA) procedures in the specifications and the lack of a guarantee on continued CEMS accuracy. One commenter felt that the present PS's should be retained and made mandatory. Another commenter felt that the performance specification test (PST) period should be made several months long. A third commenter felt that a "dynamic" calibration that checks all the active components used or referenced in the normal stack gas measurement cycle using National Bureau of Standards traceable gases should be made mandatory and, if such procedures can "validly" check the accuracy of the CEMS, they should be allowed. A fourth commenter felt that he must understand the QA procedures to be able to determine whether the PS's provide a guarantee of continued CEMS accuracy. Three of these commenters mentioned that a linearity check should be part of the specifications. Two of these commenters felt that the PST should be conducted over a representative set of operating conditions.

The many concerns are understandable. However, the specifications were not and are not designed to evaluate the CEMS over a long period of time. Nor are they designed to establish the adequacy of QA procedures to insure "valid" short-term and long-term monitoring data. The specifications merely state what is expected of the instrument, e.g., in PS 2, the calibration curve used initially to characterize the CEMS should remain stable and the measurements should be accurate within ±20 percent when compared to the RM results or ±10 percent of the emission standard, whichever is larger. The PST is designed to provide the initial check to determine whether the CEMS is within the requirements at the time of the initial installation. Because EPA recognizes that neither the PST nor the PS's guarantee continued monitor accuracy, EPA is developing QA procedures to evaluate CEMS accuracy over longer periods of time.

The suggestions mentioned in the comments are not prohibited by the specifications. The user may include an evaluation of the CEMS over a longer period of time or institute other procedures in addition to the required one. He may also choose to include additional tests to evaluate its acceptability over a representative set of operating conditions. He may also wish to investigate alternative procedures that would "validly" check the CEMS in lieu of the RM tests. After the demonstration, he can apply for an alternative procedure under § 60.13(i) of 40 CFR part 60.

Docket

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docket is a dynamic file, since material is added throughout the rulemaking development. The docketing system is intended to allow members of the public and industries involved to identify readily and locate documents so that they can intelligently and effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated PS's and EPA responses to significant comments, the contents of the docket will serve as the record in case of judicial review [Section 307(d)(7)(A)].

Miscellaneous

This rulemaking does not impose any additional monitoring requirements on facilities affected by this rulemaking. Rather, this rulemaking revises monitoring requirements and specifications to which the affected facilities are already subject. If future standards impose continuous monitoring requirements, the impacts of the revised monitoring requirements and specifications promulgated today will be evaluated during development of these standards.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a regulatory impact analysis. This regulation is not major because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices; and there will be no significant adverse efffects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that the attached rule will not have a significant economic impact on small entities because the revisions do not impose additional costs in tests.

Under Section 307(b)(1) of the Clean Air Act, judicial review of these revisions to the CEMS PS's is available *only* by the filing of a petition for review in the U.S. Courts of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under Section 307(b)(2) of the Clean Air Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

List of Subjects in 40 CFR Part 60

Air pollution control, Aluminum, Ammonium sulfate plants, Asphalt, Cement industry, Coal copper, Electric power plants, Glass and glass products, Grains, Intergovernmental relations, Iron, Lead, Metals, Metallic minerals, Motor vehicles, Nitric acid plants, Paper and paper products industry, Petroleum, Phosphate, Sewage disposal, Steel sulfuric acid plants, Waste treatment and disposal, Zinc, tires.

This final rulemaking is issued under the authority of Sections 111, 114, and 301(a) of the Clean Air Act, as amended [42 U.S.C. 7411, 7414, and 7601(a)].

Dated: May 16, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 60—[AMENDED]

§§ 60.13, 60.73, 60.84, 60.105, 60.165, 60.175, and 60.185 and Appendix B of 40 CFR Part 60 are amended as follows:

1. By revising §§ 60.13(b) and 60.13(d)

§ 60.13 Monitoring Requirements

* * * * *

(b) All continuous monitoring systems and monitoring devices shall be installed and operational prior to conducting performance tests under § 60.8. Verification of operational status shall, as a minimum, include completion of the manufacturer's written requirements or recommendations for installation, operation, and calibration of the device.

* * * * *

(d)(1) Owners and operators of all continuous emission monitoring systems installed in accordance with the provisions of this part shall check the zero (or low-level value between 0 and 20 percent of span value) and span (50 to 100 percent of span value) calibration drifts at least once daily in accordance with a written procedure. The zero and span shall, as a minimum, be adjusted whenever the 24-hour zero drift or 24-hour span drift exceeds two times the limits of the applicable performance specifications in Appendix B. The system must allow the amount of excess zero and span drift measured at the 24-hour interval checks to be recorded and quantified, whenever specified. For continuous monitoring systems measuring opacity of emissions, the optical surfaces exposed to the effluent gases shall be cleaned prior to performing the zero and span drift adjustments except that for systems using automatic zero adjustments. The optical surfaces shall be cleaned when the cumulative automatic zero compensation exceeds 4 percent opacity.

(2) Unless otherwise approved by the Administrator, the following procedures shall be followed for continuous monitoring systems measuring opacity of emissions. Minimum procedures shall include a method for producing a simulated zero opacity condition and an upscale (span) opacity condition using a certified neutral density filter or other related technique to produce a known obscuration of the light beam. Such procedures shall provide a system check of the analyzer internal optical surfaces and all electronic circuitry including the lamp and photodetector assembly.

* * * * *

§§ 60.73, 60.84, 60.105, 60.165, 60.175, and 60.185 [Amended]

2. By removing the words and comma "paragraph 2.1," in the following places:

(a) 40 CFR 60.73(a).
(b) 40 CFR 60.84(a).
(c) 40 CFR 60.105(a)(3).
(d) 40 CFR 60.165(b)(2)(ii).
(e) 40 CFR 60.175(a)(2)(ii).
(f) 40 CFR 60.185(a)(2)(ii).

3. By revising Performance Specification 2 and Performance Specification 3 of Appendix B of 40 CFR Part 60 to read as follows:

APPENDIX B—PERFORMANCE SPECIFICATIONS

* * * * *

Performance Specification 2—Specifications and Test Procedures for SO_2 and NO_x Continuous Emission Monitoring Systems in Stationary Sources

1. *Applicability and Principle.*

1.1 Applicability. This specification is to be used for evaluating the acceptability of SO_2 and NO_x continuous emission monitoring systems (CEMS's) at the time of or soon after installation and whenever specified in the regulations. The CEMS may include, for certain stationary sources, a diluent (O_2 or CO_2) monitor.

This specification is not designed to evaluate the installed CEMS performance over an extended period of time nor does it identify specific calibration techniques and other auxiliary procedures to assess the CEMS performance. The source owner or operator, however, is responsible to properly calibrate, maintain, and operate the CEMS. To evaluate the CEMS performance, the Administrator may require, under Section 114 of the Act, the operator to conduct CEMS performance evaluations at other times besides the initial test. See § 60.13(c).

1.2 Principle. Installation and measurement location specifications, performance and equipment specifications, test procedures, and data reduction procedures are included in this specification. Reference method tests and calibration drift tests are conducted to determined conformance of the CEMS with the specification.

2. *Definitions.*

2.1 Continuous Emission Monitoring System. The total equipment required for the determination of a gas concentration or emission rate. The system consists of the following major subsystems:

2.1.1 Sample Interface. That portion of the CEMS used for one or more of the following: sample acquisition, sample transportation, and sample conditioning, or protection of the monitor from the effects of the stack effluent.

2.1.2 Pollutant Analyzer. That portion of the CEMS that senses the pollutant gas and generates an output proportional to the gas concentration.

2.1.3 Diluent Analyzer (if applicable). That portion of the CEMS that senses the diluent gas (e.g., CO_2 or O_2) and generates an output proportional to the gas concentration.

2.1.4 Data Recorder. That portion of the CEMS that provides a permanent record of the analyzer output. The data recorder may include automatic data reduction capabilities.

2. Point CEMS. A CEMS that measures the gas concentration either at a single point or along a path equal to or less than 10 percent of the equivalent diameter of the stack or duct cross section.

2.3 Path CEMS. A CEMS that measures the gas concentration along a path greater than 10 percent of the equivalent diameter of the stack or duct cross section.

2.4 Span Value. The upper limit of a gas concentration measurement range specified for affected source categories in the applicable subpart of the regulations.

2.5 Relative Accuracy (RA). The absolute mean difference between the gas concentration or emission rate determined by the CEMS and the value determined by the RM's plus the 2.5 percent error confidence coefficient of a series of tests divided by the mean of the RM tests or the applicable emission limit.

2.6 Calibration Drift (CD). The difference in the CEMS output readings from the established reference value after a stated period of operation during which no unscheduled maintenance, repair, or adjustment took place.

2.7 Centroidal Area. A concentric area that is geometrically similar to the stack or duct cross section and is no greater than 1 percent of the stack or duct cross-sectional area.

2.8 Representative Results. As defined by the RM test procedure outlined in this specification.

3. Installation and Measurement Location Specifications.

3.1 The CEMS Installation and Measurement Location. Install the CEMS at an accessible location where the pollutant concentration or emission rate measurements are directly representative or can be corrected so as to be representative of the total emissions from the affected facility or at the measurement location cross section. Then select representative measurement points or paths for monitoring in locations that the CEMS will pass the RA test (see Section 7). If the cause of failure to meet the RA test is determined to be the measurement location and a satisfactory correction technique cannot be established, the Administrator may require the CEMS to be relocated.

Suggested measurement locations and points or paths that are most likely to provide data that will meet the RA requirements are listed below.

3.1.1 Measurement Location. It is suggested that the measurement location be (1) at least two equivalent diameters downstream from the nearest control device, the point of pollutant generation, or other point at which a change in the pollutant concentration or emission rate may occur and (2) at least a half equivalent diameter upstream from the effluent exhaust or control device.

3.1.2 Point CEMS. It is suggested that the measurement point be (1) no less than 1.0 meter from the stack or duct wall or (2) within or centrally located over the centroidal area of the stack or duct cross section.

3.1.3 Path CEMS. It is suggested that the effective measurement path (1) be totally within the inner area bounded by a line 1.0 meter from the stack or duct wall, or (2) have at least 70 percent of the path within the inner 50 percent of the stack or duct cross-sectional area, or (3) be centrally located over any part of the centroidal area.

3.2 Reference Method (RM) Measurement Location and Traverse Points. Select, as appropriate, an accessible RM measurement point at least two equivalent diameters downstream from the nearest control device, the point of pollutant generation, or other point at which a change in the pollutant concentration or emission rate may occur, and at least a half equivalent diameter upstream from the effluent exhaust or control device. When pollutant concentration changes are due solely to diluent leakage (e.g., air heater leakages) and pollutants and diluents are simultaneously measured at the same location, a half diameter may be used in lieu of two equivalent diameters. The CEMS and RM locations need not be the same.

Then select traverse points that assure acquisition of representative samples over the stack or duct cross section. The minimum requirements are as follows: Establish a "measurement line" that passes through the centroidal area and in the direction of any expected stratification. If this line interferes with the CEMS measurements, displace the line up to 30 cm (or 5 percent of the equivalent diameter of the cross section, whichever is less) from the centroidal area. Locate three traverse points at 16.7, 50.0, and 83.3 percent of the measurement line. If the measurement line is longer than 2.4 meters and pollutant stratification is not expected, the tester may choose to locate the three traverse points on the line at 0.4, 1.2, and 2.0 meters from the stack or duct wall. This option must not be used after wet scrubbers or at points where two streams with different pollutant concentrations are combined. The tester may select other traverse points.

1983

UMI

VOL 48 ISS 102 MAY 25 1983 UMI

provided that they can be shown to the satisfaction of the Administrator to provide a representative sample over the stack or duct cross section. Conduct all necessary RM tests within 3 cm (but no less than 3 cm from the stack or duct wall) of the traverse points.

4. Performance and Equipment Specifications.

4.1 Data Recorder Scale. The CEMS data recorder response range must include zero and a high-level value. The high-level value is chosen by the source owner or operator and is defined as follows:

For a CEMS intended to measure an uncontrolled emission (e.g., SO_2 measurements at the inlet of a flue gas desulfurization unit), the high-level value must be between 1.25 and 2 times the average potential emission level, unless otherwise specified in an applicable subpart of the regulations. For a CEMS installed to measure controlled emissions or emissions that are in compliance with an applicable regulation, the high-level value must be between 1.5 times the pollutant concentration corresponding to the emission standard level and the span value. If a lower high-level value is used, the source must have the capability of measuring emissions which exceed the full-scale limit of the CEMS in accordance with the requirements of applicable regulations.

The data recorder output must be established so that the high-level value is read between 90 and 100 percent of the data recorder full scale. (This scale requirement may not be applicable to digital data recorders.) The calibration gas, optical filter, or cell values used to establish the data recorder scale should produce the zero and high-level values. Alternatively, a calibration gas, optical filter, or cell value between 50 and 100 percent of the high-level value may be used in place of the high-level value provided the data recorder full-scale requirements as described above are met.

The CEMS design must also allow the determination of calibration drift at the zero and high-level values. If this is not possible or practical, the design must allow these determinations to be conducted at a low-level value (zero to 20 percent of the high-level value) and at a value between 50 and 100 percent of the high-level value. In special cases, if not already approved, the Administrator may approve a single-point calibration-drift determination.

4.2 Calibration Drift. The CEMS calibration must not drift or deviate from the reference value of the gas cylinder, gas cell, or optical filter by more than 2.5 percent of the span value. If the CEMS includes pollutant and diluent monitors, the calibration drift must be determined separately for each in terms of concentrations (see PS 3 for the diluent specifications).

4.3 The CEMS RA. The RA of the CEMS must be no greater than 20 percent of the mean value of the RM test data in terms of the units of the emission standard or 10 percent of the applicable standard, whichever is greater. For SO_2 emission standards between 130 and 86 ng/J (0.30 and 0.20 lb/million Btu), use 15 percent of the applicable standard; below 86 ng/J (0.20 lb/million Btu), use 20 percent of emission standard.

5. Performance Specification Test Procedure.

5.1 Pretest preparation. Install the CEMS, prepare the RM test site according to the specifications in Section 3, and prepare the CEMS for operation according to the manufacturer's written instructions.

5.2 Calibration drift Test Period. While the affected facility is operating at more than 50 percent of normal load, or as specified in an applicable subpart, determine the magnitude of the calibration drift (CD) once each day (at 24-hour intervals) for 7 consecutive days according to the procedure given in Section 6. To meet the requirement of Section 4.2, none of the CD's must exceed the specification.

5.3 RA Test Period. Conduct the RA test according to the procedure given in Section 7 while the affected facility is operating at more than 50 percent or normal load, or as specified in an applicable subpart. To meet the specifications, the RA must be equal to or less than 20 percent of the mean value of the RM test data in terms of the units of the emission standard or 10 percent of the applicable standard, whichever is greater. For instruments that use common components to measure more than one effluent gas constituent, all channels must simultaneously pass the RA requirement, unless it can be demonstrated that any adjustments made to one channel did not affect the others.

The RA test may be conducted during the CD test period.

6. The CEMS Calibration Drift Test Procedure.

The CD measurement is to verify the ability of the CEMS to conform to the established CEMS calibration used for determining the emission concentration or emission rate. Therefore, if periodic automatic or manual adjustments are made to the CEMS zero and calibration settings, conduct the CD test immediately before these adjustments, or conduct it in such a way that the CD can be determine.

Conduct the CD test at the two points specified in Section 4.1. Introduce to the CEMS the reference gases, gas cells, or optical filters (these need not be certified). Record the CEMS response and subtract this value from the reference value (see example data sheet in Figure 2–1).

7. Relative Accuracy Test Procedure.

7.1 Sampling Strategy for RM Tests. Conduct the RM tests in such a way that they will yield results representative of the emissions from the source and can be correlated to the CEMS data. Although it is preferable to conduct the diluent (if applicable), moisture (if needed), and pollutant measurements simultaneously, the diluent and moisture measurements that are taken within a 30- to 60-minute period, which includes the pollutant measurements, may be used to calculate dry pollutant concentration and emission rate.

In order to correlate the CEMS and RM data properly, mark the beginning and end of each RM test period of each run (including the exact time of the day) on the CEMS chart recordings or other permanent record of output. Use the following strategies for the RM tests:

7.1.1 For integrated samples, e.g., Method 6 and Method 4, make a sample traverse of at least 21 minutes, sampling for 7 minutes at each traverse point.

7.1.2 For grab samples, e.g., Method 7, take one sample at each traverse point, scheduling the grab samples so that they are taken simultaneously (within a 3-minute period) or are an equal interval of time apart over a 21-minute (or less) period. A test run for grab samples must be made up of at least three separate measurements.

Note.—At times, CEMS RA tests are conducted during new source performance standards performance tests. In these cases, RM results obtained during CEMS RA tests may be used to determine compliance as long as the source and test conditions are consistent with the applicable regulations.

7.2 Correlation of RM and CEMS Data. Correlate the CEMS and the RM test data as to the time and duration by first determining from the CEMS final output (the one used for reporting) the integrated average pollutant concentration or emission rate for each pollutant RM test period. Consider system response time, if important, and confirm that the pair of results are on a consistent moisture, temperature, and diluent concentration basis. Then, compare each intergrated CEMS value against the corresponding average RM value. Use the following guidelines to make these comparisons.

7.2.1 If the RM has an integrated sampling technique, make a direct comparison of the RM results and CEMS integrated average value.

7.2.2 If the RM has a grab sampling technique, first average the results from all grab samples taken during the test run and then compare this average value against the integrated value obtained from the CEMS chart recording or output during the run. If the pollutant concentration is varying with time over the run, the tester may choose to use the arithmetic average of the CEMS value recorded at the time of each grab sample.

7.3 Number of RM Tests. Conduct a minimum of nine sets of all necessary RM tests. Conduct each set within a period of 30 to 60 minutes.

Note.—The tester may choose to perform more than nine sets of RM tests. If this option is chosen, the tester may, at his discretion, reject a maximum of three sets of the test results so long as the total number of test results used to determine the RA is greater than or equal to nine, but he must report all data including the rejected data.

7.4 Reference Methods. Unless otherwise specified in an applicable subpart of the regulations, Methods, 3, 4, 6, and 7, or their approved alternatives, are the reference methods for diluent (O_2 and CO_2), moisture, SO_2, and NO_x, respectively.

7.5 Calculations. Summarize the results on a data sheet. An example is shown in Figure 2–2. Calculate the mean of the RM values. Calculate the arithmetic differences between the RM and the CEMS output sets. Then calculate the mean of the difference, standard deviation, confidence coefficient, and CEMS RA, using Equations 2–1, 2–2, 2–3, and 2–4.

6. *Equations.*

8.1 Arithmetic Mean. Calculate the arithmetic mean of the difference, $\bar{d}$, of a data set as follows:

$$\bar{d} = \frac{1}{n}\sum_{i=1}^{n} d_i \qquad \text{(Eq. 2–1)}$$

Where:

n = Number of data points.

$\sum_{i=1}^{n} d_i$ = Algebraic sum of the individual differences d_i.

When the mean of the differences of pairs of data is calculated, be sure to correct the data for moisture, if applicable.

8.2 Standard Deviation. Calculate the standard deviation, S_d, as follows:

$$S_d = \left[\frac{\sum_{i=1}^{n} d_i^2 - \frac{\left(\sum_{i=1}^{n} d_i\right)^2}{n}}{n-1}\right]^{1/2} \qquad \text{(Eq. 2–2)}$$

8.3 Confidence Coefficient. Calculate the 2.5 percent error confidence coefficient (one-tailed), CC, as follows:

$$CC = t_{0.975}\frac{S_d}{\sqrt{n}} \qquad \text{(Eq. 2–3)}$$

Where:

$t_{0.975}$ = t-value (see Table 2–1)

TABLE 2–1.—T-VALUES

n*	$t_{0.975}$	n*	$t_{0.975}$	n*	$t_{0.975}$
2	12.706	7	2.447	12	2.201
3	4.303	8	2.365	13	2.179
4	3.182	9	2.306	14	2.160
5	2.776	10	2.262	15	2.145
6	2.571	11	2.228	16	2.131

* The values in this table are already corrected for n-1 degrees of freedom. Use n equal to the number of individual values.

8.4 Relative Accuracy. Calculate the RA of a set of data as follows:

$$RA = \frac{|\bar{d}| + |CC|}{\overline{RM}} \times 100 \qquad \text{(Eq. 2–4)}$$

Where:

$|\bar{d}|$ = Absolute value of the mean of differences (from Equation 2–1).

$|CC|$ = Absolute value of the confidence coefficient (from Equation 2–3).

$\overline{RM}$ = Average RM value or applicable standard.

9. *Reporting.*

At a minimum (check with the appropriate regional office, or State or local agency for additional requirements, if any) summarize in tabular form the CD tests and the RA tests. Include all data sheets, calculations, and charts (record of data outputs) necessary to substantiate that the performance CEMS met the PS.

10. *Bibliography.*

Performance Specification 3. Specifications and Test Procedures For O_2 and CO_2 Continuous Emission Monitoring Systems in Stationary Sources

1. Applicability and Principle.

1.1 Applicability. This specification is to be used for evaluating acceptability of O_2 and CO_2 continuous emission monitoring systems (CEM's) at the time of or soon after installation and whenever specified in an applicable subpart of the regulations. The specification applies to O_2 or CO_2 monitors that are not included under Performance Specification 2 (PS 2).

This specification is not designed to evaluate the installed CEMS performance over an extended period of time, nor does it identify specific calibration techniques and other auxiliary procedures to assess the CEMS performance. The source owner or operator, however, is responsible to calibrate, maintain, and operate the CEMS properly. To evaluate the CEMS performance, the Administrator may require, under Section 114 of the Act, the operator to conduct CEMS performance evaluations in addition to the initial test. See Section 60.13(c).

The definitions, installation and measurement location specifications, test procedures, data reduction procedures, reporting requirements, and bibliography are the same as in PS 2, Sections 2, 3, 5, 6, 8, 9, and 10, and also apply to O_2 and CO_2 CEMS's under this specification. The performance and equipment specifications and the relative accuracy (RA) test procedures for O_2 and CO_2 CEMS do not differ from those for SO_2 and NO_x CEMS, except as noted below.

1.2 Principle. Reference method (RM) tests and calibration drift tests are conducted to determine conformance of the CEMS with the specification.

2. Performance and Equipment Specifications.

2.1 Instrument Zero and Span. This specification is the same as Section 4.1 or PS 2.

2.2 Calibration Drift. The CEMS calibration must not drift by more than 0.5 percent O_2 or CO_2 from the reference value of the gas, gas cell, or optical filter.

2.3 The CEMS RA. The RA of the CEMS must be no greater than 20 percent of the mean value of the RM test data or 1.0 percent O_2 or CO_2, whichever is greater.

3. Relative Accuracy Test Procedure.

3.1 Sampling Strategy for RM Tests, Correlation of RM and CEMS Data, Number of RM Tests, and Calculations. This is the same as PS 2, Sections 7.1, 7.2, 7.3, and 7.5, respectively.

3.2 Reference Method. Unless otherwise specified in an applicable subpart of the regulations, Method 3 of Appendix A or any approved alternative is the RM for O_2 or CO_2.

(Section 114 of the Clean Air Act, as amended (42 U.S.C. 7414))

Authority: Section 111, 114, and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7411, 7414, and 7601(a)).

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 71

Implementation of Coastal Barrier Resources Act

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: This proposed rule implements section 11 of the Coastal Barrier Resources Act of 1982 (Pub. L. 97–348) which prohibits new flood insurance coverage on or after October 1, 1983, for new construction or substantial improvements of structures located on coastal barriers within the Coastal Barrier Resources System established by section 4 of the Coastal Barrier Resources Act.

DATES: Comment due date: July 25, 1983.

ADDRESS: Send comments to Rules Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, Room 840, 500 C Sts., SW., Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT: John Scheibel, Assistant General Counsel, Federal Emergency Management Agency, 500 C Street SW., Wahington, D.C. 20472, Telephone: (202) 287–0380.

SUPPLEMENTARY INFORMATION: Section 11 of the Coastal Barrier Resources Act of 1982 (Pub. L. 97–348) (CBRA) amends section 1321 of the National Flood Insurance Act of 1968 (Pub. L. 90–448) by providing in pertinent part:

> No new flood insurance coverage may be provided under this title on or after October 1, 1983, for any new construction or substantial improvements of structures located on any coastal barrier within the Coastal Barrier Resources System established by section 4 of the Coastal Barrier Resources Act.

It is the intention of this regulation to define the key terms of section 11 of CBRA, and to identify the documentation which will be required to demonstrate that a structure is not covered by the terms of CBRA and is eligible to receive new flood insurance coverage.

The regulation defines "new construction" as structures other than those fully completed prior to October 1, 1983, which meet 3 specified criteria. It was not the intent of CBRA to deny flood insurance to a structure which was fully completed prior to October 1, 1983, unless, subsequent to September 30, 1983, it is substantially improved. Absent subatantial improvement, there can be no question but that the structure was existing construction rather than new construction, and section 11 CBRA does not apply.

If construction had not yet started on October 1, 1983, then the structure is considered "new construction." However, if the start of construction (see 44 CFR 59.1 for complete definition) had taken place prior to October 1, 1983, but the structure was not fully completed as of that date, an allowance will be made. If the first placement of permanent construction of a structure on a site, such as the pouring of slabs or footings or any work beyond the stage of excavation, took place prior to October 1, 1983, the structure is eligible for the sale of flood insurance provided that: (1) A legally valid building permit or its equivalent was obtained prior to October 1, 1983, for the construction; and (2) the structure constituted an insurable building, having walls and a roof no later than April 1, 1984.

It is important that construction start prior to October 1, 1983, and progress sufficiently so that the building has walls and a roof by April 1, 1984. Without a requirement that construction proceed, those who would seek to circumvent the intent of CBRA could put down foundations with no present intention of constructing a building. It was not the intention of Congress in passing the Omnibus Reconciliation Act of 1981 (OBRA) in which the flood insurance prohibition first appeared (and the terms of which were later incorporated into CBRA), nor of CBRA, to make flood insurance available at any point in the distant future when an individual decided to proceed with construction. As it was, OBRA allowed over two years grace period before the flood insurance prohibition would take effect. Therefore, where construction has begun before October 1, 1983, in order to be eligible for flood insurance, there must be an insurable building in place by April 1, 1984.

CBRA also prohibits new flood insurance coverage for substantial improvements of structures occurring after October 1, 1983. The regulations of the National Flood Insurance Program define "substantial improvement" in pertinent part as any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either (a) before the improvement or repair is started, or (b) if the structure has been damaged and is being restored before the damaged occurred. For the purposes of this definition, "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor, or other structural part of the building commences whether or not that alteration affects the external dimensions of the structure (see 44 CFR 59.1 for complete definition).

Where a structure is substantially improved either by expansion, or by restoration when it has been damaged, no new flood coverage may be provided for such structure. Since a new policy and a renewal policy constitute new coverage, the substantially improved structure would not be eligible for either. If a structure is expanded by 50 per cent or more, or is damaged and the repairs equal or exceed 50 per cent of its pre-damage value, such structure is not eligible to receive a new or renewed policy of flood insurance.

To enable FEMA to implement these provisions in a responsible manner, the Agency is requiring some basic documentation.

In order to obtain flood insurance coverage on or after October 1, 1983, for a structure the construction of which was commenced prior to October 1, 1983, and completed by April 1, 1984, the owner must submit the following documentation:

a. A legally valid building permit or its equivalent for the construction of the structure, dated prior to October 1, 1983. If the community did not have a building permit system at the time the structure was built, a sworn and notarized affidavit to this effect by the responsible community official will be accepted in lieu of the building permit. If the community had a building permit system in effect but the permit was lost or destroyed, a sworn and notarized affidavit to this effect by the responsible community official will be sufficient. This latter affidavit must also include a certification stating that the official has inspected the structure and found no evidence that the structure is not in compliance with the building code at the time the structure was built:

b. A sworn and notarized affidavit signed by the community official responsible for building permits, attesting to the fact that he/she knows of his/her own knowledge or from official community records that:

(1) The start of construction of such structure took place prior to October 1, 1983;

(2) The structure has not been substantially improved since September 30, 1983; and

(3) The structure constituted an insurable building, having walls and a roof permanently in place no later than April 1, 1984.

c. A community issued final certificate of occupancy or other use permit, or equivalent proof, certifying that the building was completed (walled and roofed) by April 1, 1984. Equivalent proof may include, for example, evidence of final inspection of the building's electrical system; a deed, together with closing or settlement documents establishing that the title was transferred as to the land and improvement by April 1, 1984, etc.

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 and the implementing regulations of the Council on Environmental Quality (40 CFR Parts 1500–1508), the Federal Emergency Management Agency (FEMA) has prepared an environmental assessment of the issuance by FEMA of this proposed rule.

The assessment concludes that there will be no significant impact on the natural or manmade environment as a result of the definitions proposed in the rule or the documentation proposed to be required.

It is, therefore, found that the action will not have a significant impact on the natural or manmade environment. On this basis, an Environmental Impact Statement will not be prepared.

Copies of the environmental assessment are available for inspection at the Federal Emergency Management Agency, Room 840, 500 C St. SW., Washington, D.C. 20472, telephone (202) 287–0395.

This regulation will not have a significant impact on a substantial number of small entities, and thus no regulatory flexibility analysis will be prepared. Further, the rule is not a major rule for purposes of Executive Order 12291, and thus no regulatory impact analysis will be prepared.

However, the documentation requirement in § 71.4 are collections of information, and have been submitted to OMB for review under section 3505(L) of the Paper Work Reduction Act. Comments on this collection of information should be sent to the Office of Information and Regulatory Affairs, OMB, Room 3201, New Executive Office Building, Washington, D.C. 20503, ATTN: FEMA Desk Office. List of Subjects in 44 CFR Part 71, Flood Insurance, Coastal Zone.

List of Subjects in 44 CFR Part 71

Flood plains, Flood insurance.

Accordingly, it is proposed that Chapter 1 of Title 44, Code of Federal Regulations, be amended by adding a new part 71 as follows:

PART 71—IMPLEMENTATION OF COASTAL BARRIER RESOURCES ACT

Sec.
71.1 Purpose of part.
71.2 Definitions.
71.3 Denial of Flood Insurance.
71.4 Documentation.

Authority: Sec. 1306, 82 Stat. 575 (42 U.S.C. 4013). Reorganization Plan No. 3 of 1978 (43 FR 41943), Executive Order 12127, dated March 31, 1979 (44 FR 19367), sec. 11, Pub. L. 97–348.

§ 71.1 Purpose of part.

This part implements section 11 of the Coastal Barrier Resources Act (Pub. L. 97–348) as that act amends the National Flood Insurance Act of 1968 (Pub. L. 90–448).

§ 71.2 Definitions.

(a) Except as otherwise provided in this part, the definitions set forth in part 59 of this subchapter are applicable to this part.

(b) For the purpose of this part a structure is "new construction" *unless* it was fully completed prior to October 1, 1983, or it meets the following criteria:

(1) A legally valid building permit or equivalent documentation was obtained for the construction of such structure prior to October 1, 1983;

(2) The start of construction (see Part 59) took place prior to October 1, 1983; and

(3) The structure constituted an insurable building, having walls and a roof permanently in place no later than April 1, 1984.

(c) For the purpose of this part, a structure, is a "substantial improvement" if the substantial improvement (see Part 59) of such structure took place on or after October 1, 1983.

(d) For the purpose of this part, "new flood insurance coverage" means a new or renewed policy of flood insurance.

§ 71.3 Denial of flood insurance.

No new flood insurance coverage may be provided on or after October 1, 1983, for any new construction or substantial improvement of structures located on any coastal barrier within the Coastal Barrier Resources System established by section 4 of the Coastal Barrier Resources Act.

§ 71.4 Documentation.

(a) In order to obtain flood insurance for a structure which is not covered by a policy of flood insurance as of October 1, 1983, the owner of the structure must submit the documentation described in this section in order to show that such structure is eligible to receive flood insurance.

(b) The documentation must be submitted to the Federal Insurance Administration.

(c) The documentation shall consist of:

(1) A legally valid building permit or its equivalent for the construction of the structure dated prior to October 1, 1983;

(i) If the community did not have a building permit system at the time the structure was built, a sworn and notarized affidavit to this effect by the responsible community official will be accepted in lieu of the building permit;

(ii) If the building permit was lost or destroyed, a sworn and notarized affidavit to this effect by the responsible community official will be accepted in lieu of the building permit. This affidavit must also include a certification that the official has inspected the structure and found no evidence that the structure was not in compliance with the building code at the time it was built;

(2) A sworn and notarized affidavit signed by the community official responsible for building permits, attesting to the fact that he or she knows of his/her own knowledge or from official community records, that:

(i) The start of construction of such structure took place prior to October 1, 1983;

(ii) The structure has not been substantially improved since September 30, 1983; and

(iii) The structure constituted an insurable building, having walls and a roof permanently in place no later than April 1, 1984; and

(3) A community issued final certificate of occupancy or other use permit or equivalent proof certifying that the building was completed (walled and roofed) by April 1, 1984.

Dated: May 11, 1983.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Last Listing May 23, 1983

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

S. 287 / Pub. L. 98–32 To establish the Harry S Truman National Historic Site in the State of Missouri, and for other purposes. (May 23, 1983; 97 Stat. 193) Price: $1.75

H.J. Res. 219 / Pub. L. 98–31 Declaring the support of the United States Government for efforts of the United States Soccer Federation to bring the World Cup to the United States in 1986, designating the Secretary of Commerce as the official representative of the United States Government to the Federation Internationale de Football Association, and for other purposes. (May 20, 1983; 97 Stat. 192) Price: $1.75

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5064 of May 25, 1983

Missing Children Day, 1983

By the President of the United States of America

A Proclamation

Each year hundreds of thousands of American families are confronted with a unique tragedy—a missing child. While most of these children return home safely, far too many are exposed to serious danger and exploitation. Often the child's fate is never known. During the child's disappearance, the family faces an ordeal of imagined horrors and unknown consequences. Finding and safely returning these children to their homes has become a national problem.

Our children are the Nation's most valuable and most vulnerable asset. They are our link to the future, our hope for a better life. Their protection and safety must be one of our highest priorities.

The striking mobility of our society has created special difficulties for the law enforcement agencies that must deal with crimes involving children. The solution to this problem demands the attention and cooperation of all our law enforcement agencies, city, State, and local.

The date of May 25 has particular significance in the cause of missing children. On that day in 1979, six year old Etan Patz disappeared from his home in New York City. Unfortunately, Etan has never been found. His brave parents have fought to increase our awareness of this tragedy and to improve the agencies that work to solve this unique type of crime.

As a Nation and as individuals, we all have a responsibility to direct our resources and our efforts to this worthy goal.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim May 25, 1983 as Missing Children Day. I urge officials at all levels of government to take decisive action to ensure the safety and protection of the children in their respective jurisdictions, and I urge all our law enforcement agencies to take particular notice of the danger that threatens any child who has lost his or her home. I urge every American family to take the proper precautions to protect their children.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of May, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends for the months of May through August 1983 some of the diverted milk provisions of the Paducah Federal milk order. The action was requested by Associated Milk Producers, Inc., Southern Region, a cooperative association representing a substantial proportion of the producers supplying milk to the market. The suspension removes the limits on the amount of milk not needed for fluid (bottling) use that may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The cooperative stated that the suspension is needed to assure the continued association with the marketwide pool of producers who supply milk to the market.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–382–9369.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Proposed Suspension: Issued May 2, 1983; published May 6, 1983 (48 FR 20425).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the issuance of the suspension in time to include May 1983 in the suspension period. The initial request for this action was received April 27, 1983. A notice of proposed suspension was issued on May 2, 1983, inviting interested parties to comment on the proposed action by May 13, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service has certified that this action would not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq*), and of the order regulating the handling of milk in the Paducah, Kentucky area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 20425) concerning a proposed suspension of certain provisions of the order. Interested parties were afforded opportunity to file data, views, and arguments thereon. Three comments were received. Another cooperative association that represents a substantial proportion of producers who supply milk to the market filed a comment supporting the proposal and two comments in opposition to the suspension were received from dairy farmers.

After considering all relevant material, including the proposal in the notice, and other available information, it is hereby found and determined that for the months of May 1983 through August 1983 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1099.13(c), paragraphs (2) and (3) in their entirety.

Statement of Consideration

This action makes inoperative the limits on the percentage of a handler's milk supply that may be diverted from pool plants to nonpool plants during the months of May through August 1983. The order now provides that during each of those months a cooperative or a handler may not divert a quantity of milk in excess of 33 percent of the milk received at a pool plant.

The suspension was requested by a cooperative association that supplies milk to a handler regulated by the order. The suspension is needed due to a substantial increase in milk production by all producers who supply the one fully regulated plant under the Paducah Federal milk order. The problem is compounded because the association's share of milk receipts at this plant has been declining. This requires the association to divert more reserve milk to nonpool manufacturing plants. Several suppliers of milk to the regulated plant divert little or no milk to nonpool manufacturing plants. This places a greater burden on the proponent cooperative association to dispose of reserve milk for the market.

If the provisions are not suspended for the months of May through August 1983, Associated Milk Producers, Inc., Southern Region would not be able to pool all of the milk supplies that it has associated with the Paducah fluid market. This would disrupt the orderly marketing of milk in the Paducah marketing area.

In view of these circumstances, it is concluded that the aforesaid provisions should be suspended to ensure the orderly marketing of milk supplies. This action will eliminate the possibility that producers of milk for the fluid market would lose their producer status because of the present pooling provisions and thus not have their milk priced under the order.

Several dairy farmers opposed the proposed suspension. Their comments were directed against the operations of the proponent cooperative rather than to an analysis of the current marketing conditions for the Paducah market. Their comments do not provide an adequate basis for denying the proposed suspension.

It is hereby found and determined that thirty day's notice of the effective date

VOL 48 ISS 103 MAY 26 1983 UMI

hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that the most efficient method of handling milk not needed for fluid market is by direct movements from producers' farms to manufacturing outlets. This suspension allows for such economical movements of milk while the dairy farmers involved retain producer status;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

Milk marketing orders, Milk, Dairy products.

PART 1099—[AMENDED]

It is therefore ordered, That the aforesaid provisions in § 1099.13(c), paragraph (2) and (3) of the order are hereby suspended for May through August 1983.

Effective Date: May 26, 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Signed at Washington, D.C. on: May 20, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410–02–M

Farmers Home Administration

7 CFR Part 2003

Functional Organization of the Farmers Home Administration

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations regarding organization and functions to show that loans under the Agency's Business and Industry loan program are made and serviced by FmHA's State offices, rather than by its District Offices. The intended effect of this action is to keep the public informed of the Agency structure. This action is taken to correct an error in the regulation and it was previously published.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Leonard Hardy, Acting Director, Organization Management and Training Division, 6525 Belcrest Road, Suite 531, Hyattsville, MD 20782, telephone (301) 436–6544.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291, and has been determined to be exempt from those requirements because it involves only internal Agency management and organization. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This action, however, is not published for proposed rulemaking since the purpose of the changes involves internal agency management and publication for comment is unnecessary.

Note.—This regulation does not directly affect any FmHA programs or projects which are subject to A–95 clearinghouse review. This document has been reviewed in accordance with FmHA Instruction 1901–G, "Environmental Impact Statements." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required.

List of Subjects in 7 CFR Part 2003

Organization and functions (government agencies).

Accordingly, Exhibit A of Subpart A of Part 2003, Chapter XVIII, Title 7, Code of Federal Regulations is amended by revising the paragraph under the headings 07 01 State Offices and 07 01 District Offices to read as follows:

PART 2003—ORGANIZATION

Exhibit A—U.S. Department of Agriculture—Farmers Home Administration

* * * * *

07 01 STATE OFFICES

Assignment of Functions

Provides overall direction of FmHA program operations at the State level, ensures adherence to program plans approval for the State by the Administrator, and renders staff advisory and manpower support to frontline operating personnel in the District and County Offices. Has full responsibility for making and servicing business and industry loans.

07 01 DISTRICT OFFICES

Assignment of functions

Provides overall direction of FmHA program operations at the District level, ensures adherence to program plans approved for the district by the State Director and renders supervisory and advisory support to frontline operating personnel in the county offices. Has full responsibility for making and servicing multi-family housing and community program loans and grants.

BILLING CODE 3410–07–M

Animal and Plant Health Inspection Service

9 CFR Part 78

[Docket No. 83–065]

Quarantined Areas

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document amends the regulations by quarantining the State of Texas because of the existence of brucellosis, a contagious disease of cattle, other bovine and swine. This action is necessary on an emergency basis to prevent interstate dissemination of this disease and protect the livestock of the other States.

DATES: Effective date of this interim rule is June 1, 1983.

Written comments must be received on or before July 25, 1983.

ADDRESS: Written comments concerning this interim rule should be submitted to T. O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Billy G. Johnson, VS, APHIS, USDA, Room 814, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8144.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 78, regulate the interstate movement of certain animals in order to eradicate brucellosis, a contagious disease of cattle, other bovine and swine. Among other things, these regulations govern the interstate movement of certain animals from quarantined areas. Section 78.22 lists those areas within the United States which are quarantined due to the existence of brucellosis.

The regulations in Part 78 form the basis of the national program to eradicate brucellosis. This program is administered by means of individual cooperative agreements between the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture (APHIS) and the individual States. The State of Texas has agreed to cooperate with APHIS in this program and to promulgate certain rules and regulations designed, among other things, to prevent the interstate spread of brucellosis from Texas.

There is a high incidence of brucellosis in Texas and the measures in effect in that State to eradicate brucellosis are not deemed adequate to prevent the interstate spread of the disease. This is because Texas Animal Health Commission regulations concerning brucellosis are not being enforced against all people in the State, since State Courts have held that these regulations are unenforcable (R. J. Nunley v. Texas Animal Health Commission, Cause No 12506, Dist. Ct., Uvalde County, TX, 1979; and Pan American Livestock Exposition, et al. v. Texas Animal Health Commission and R. J. Nunley, Cause No. 314, 470, Dist. Ct., Travis County, TX, 1982). Further, it does not appear at this time that the Texas State Legislature is willing to give the Texas Animal Health Commission the authority necessary to promulgate appropriate enforceable regulations concerning brucellosis as to all persons in the State. It has therefore been determined that the interstate movement of cattle from Texas without further restriction constitutes a threat to the livestock of the United States. Therefore, the entire State of Texas is quarantined under 78.22 of the regulations to prevent the interstate spread of brucellosis from the State.

Emergency Action

John K. Atwell, Deputy Administrator of the Animal and Plant Health Inspection Service for Veterinary Services, has determined that an emergency situation exists which warrants publication of this interim rule without opportunity for public comment. Immediate action is necessary to prevent the interstate spread of brucellosis from Texas.

Further, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this interim rule are impracticable and contrary to the public interest and good cause is found for making this interim rule effective less than 30 days after publication of this document in the **Federal Register**. Comments have been solicited for 60 days after publication of this document and a final document discussing comments received and any amendments required will be published in the **Federal Register** as soon as possible.

Executive Order and Regulatory Flexibility Act

The emergency nature of this action makes it impracticable for the Agency to follow the procedure of Executive Order 12291 with respect to this interim rule. Immediate action is necessary to establish provisions in accordance with the statutory mandate to prevent the interstate spread of brucellosis from Texas.

The emergency situation also makes compliance with Section 603 and timely compliance with section 604 of the Regulatory Flexibility Act impracticable. Since this action may have a significant economic impact on a substantial number of small entities, the Final Regulatory Impact Analysis, if required, will address the issues required by section 604 of Pub. L. 96–354, the Regulatory Flexibility Act.

BILLING CODE 3410–34–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83–NM–27–AD; Amdt. 39–4654]

Airworthiness Directives; Canadair CL–44D4 and CL–44J Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) applicable to Canadair CL–44D4 and CL–44J cargo airplanes which requires repetitive inspections and repair, as necessary, of the horizontal stabilizer rear spar attachment fittings and reinforcing channel. This action is required because of reports of cracks in the fittings which, if allowed to go undetected, could compromise the structural integrity of the stabilizer.

DATE: Effective June 6, 1983.

ADDRESSES: The service bullettin specified in this Airworthiness Directive may be obtained upon request to Canadair Ltd., Commercial Aircraft Technical Services, Box 6087, Station A, Montreal, Canada PQ H3C 3G9 or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Harold N. Wantiez, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The Canadian Department of Transport (DOT) has issued an airworthiness directive which requires a repetitive inspection of the horizontal stabilizer rear attachment fittings and reinforcing channel for cracks on all CL–44D4 and CL–44J airplanes. Cracks have been found in these members which compromise the structural integrity of the horizontal stabilizer. To correct this

VOL 48 ISS 103 MAY 26 1983 UMI

the DOT, which is the civil aviation authority for Canada, is requiring inspections in accordance with Canadair Service Information Circular No. 379–CL44.

This airplane model is manufactured in Canada and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, the FAA has determined that an AD is necessary which requires the previously mentioned inspections.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Canadair: Applies to all Canadair Model CL–44D4 and CL–44J airplanes. Compliance required as indicated unless previously accomplished. To detect cracks in the horizontal stabilizer rear attachment fittings, accomplish the following:

1. Within the next 200 hours time in service and thereafter at intervals not to exceed 2000 hours time in service, inspect the horizontal stabilizer rear spar attachment fittings, Part Numbers 44–A45022A and 44–A45022B, for cracks in accordance with Paragraphs 3.5 and 3.6 of Canadair Service Information Circular No. 379–CL44, Issue 3, dated February 23, 1982. Ensure that the lugs are properly shimmed in accordance with paragraph 4.1 of the circular. If a crack is found the length of which is less than half the width of the lug, repeat the inspection every 100 hours time in service and replace the fitting within the next 500 hours time in service. When a crack is found the length of which extends to or beyond half the width of the lug, replace the fitting prior to further flight in accordance with the circular.

2. Within the next 200 hours time in service and thereafter at intervals not to exceed 2000 hours time in service, inspect the reinforcing channels, Part Numbers 28–A24559A and 22–A24559B, for cracks in accordance with paragraph 3–11 of Canadair Service Information Circular No. 379–CL44, Issue 3, dated February 23, 1982. If a crack is found in the reinforcing channel, replace the part prior to further flight in accordance with the circular. Terminating action for this inspection consists of replacement of the reinforcing channels with steel reinforcements, Parts Numbers 28–21312–2, –3, –4, and –5 in accordance with paragraphs 3.13 and 3.14 of the Service Information Circular.

3. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

4. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

This amendment becomes effective June 6, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption "For Further Information Contact."

Issued in Seattle, Washington on May 16, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

[FR Doc. 83-13999 Filed 5-25-83; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83–NM–01–AD; Amdt. 39–4652]

Airworthiness Directives; Fokker B.V. Model F28 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This document amends an existing Airworthiness Directive (AD) 82–16–04 which required the accomplishment of specified flight control and landing gear service bulletins on certain F28 airplanes. During the processing of the AD, all of the required corrections which were gathered during a Notice of Proposed Rulemaking action were not incorporated into the final rule. This amendment adds the corrections which were inadvertently left out.

DATE: Effective June 6, 1983.

ADDRESSES: The service bulletins specified in this Airworthiness Directive may be obtained upon request to the Manager, Maintenance and Engineering, Fokker B.V., Product Support, P.O. Box 7600, 1117ZJ Schipol Oost, The Netherlands, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Harold N. Wantiez, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: AD 82–16–04, Amendment 39–4426, issued July 16, 1982, (47 FR 32704) requires the accomplishment of specific flight control and landing gear service bulletins on certain F28 airplanes. An NPRM had been previously published on January 18, 1982, (47 FR 2485) requesting comments from the public concerning these items. The manufacturer provided several comments which the FAA had intended to incorporate in the final rule but some of which were inadvertently left out. The purpose of this amendment is to correct the final rule by including the corrections which had been provided by the manufacturer.

This amendment corrects an existing AD and has no economic impact and imposes no additional burden on any person. Therefore, notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by correcting AD 82–16–04, Amendment 39–4426, (47 FR 32704) as follows:

1. Paragraph F: Delete "F28/24–27" and add "F28/27–47" in the last sentence.

2. Paragraph G: Delete "VFW" and add "BV" in the last sentence.

3. Paragraph H: Delete "11056" and add "11064" in the first sentence. Delete "11994" and add "11993" in the first sentence. Delete "F28/27–A82" and add "F–28/27–82A" in the last sentence.

This amendment becomes effective June 6, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 135(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The Federal Aviation Administration has determined that this document involves an amendment that corrects an existing AD and does not impose any additional burden on any person. Therefore: (1) it is not major under Executive Order 12291 (46 FR 13193; February 19, 1981) and (2) it is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Because its anticipated impact is so minimal, it does not warrant preparation of a regulatory evaluation. I certify that it will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act because it is corrective in nature and because it involves few, if any, small entities.

Issued in Seattle, Washington, on May 16, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

[FR Doc. 83-14001 Filed 5-25-83; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83–NM–35–AD; Amdt. 39–4653]

Airworthiness Directives; Messerschmitt-Bolkow-Blohm GMBH HFB–320 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new Airworthiness Directive (AD) applicable to certain HFB–320 airplanes which requires visual inspections of the internal horizontal stabilizer attach fittings corrosions and cracks and, if necessary, reworking or replacement of parts. Corrosion and cracks have been found on some HFB–320 stabilizers which, if allowed to progress, could weaken the attach fittings to the point of failure.

DATE: Effective June 6, 1983.

ADDRESSES: The service bulletin specified in this Airworthiness Directive may be obtained upon request to Messerschmitt-Bolkow-Blohm GMBH, Department HV 117, Kreetalag 10, D–2103, Hamburg 95, Germany, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767–2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The German Airworthiness Authority (LBA) has classified HFB–320 Hansa Service Bulletin 55–7 as mandatory. This service bulletin specifies inspection of the structural components of the horizontal stabilizer. Corrosion and cracks have been reported in the horizontal stabilizer attach fittings of some HFB–320 Hansa airplanes. Investigation indicated that the attach fitting bolted connections on certain airplanes were fitted with washers which were bearing on the edge of an adjacent spotface causing uneven stress distributions which lead to the formation of cracks.

This airplane model is manufactured in West Germany and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since this condition is likely to exist or develop on airplanes of this model registered in the United States, the FAA has determined that an AD is necessary which requires inspection and reworking or replacement of the horizontal stabilizer attach fittings and associated hardware.

Further, since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

Messerschmitt-Bolkow-Blohm GMBH: Applies to HFB–320 airplanes serial numbers 1021–1023, 1026, 1027, 1030–1040, 1045, and 1049–1057. To prevent failure of the horizontal stabilizer attachment fittings accomplish the following, unless already accomplished:

1. Visually inspect the horizontal stabilizer attachment fittings and adjacent structure for corrosion and cracks in accordance with paragraph I of the "Accomplishment Instructions" of Messerschmitt-Bolkow-Blohm GMBH Service Bulletin 55–7 dated September 7, 1979, within 300 hours time in service or one year, whichever occurs first, for airplanes with a maximum of 1500 hours on the horizontal stabilizer on the effective date of this AD, and within 50 hours time in service or two months, whichever occurs first, for airplanes with more than 1500 hours on the horizontal stabilizer.

2. Rework the horizontal stabilizer in accordance with paragraph 7.1 or 7.2, as appropriate, of the service bulletin within the time intervals specified in the service bulletin.

3. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

4. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspection and/or modifications required by this AD.

This amendment becomes effective June 6, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

Issued in Seattle, Washington, on May 16, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 82–CE–40–AD; Amdt. 39–4655]

Airworthiness Directives; Cessna Models 172M, 172N, 172P, R172K, F172 and FR172 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD)

VOL 48 ISS 103 MAY 26 1983 UMI

which requires modification of the right-hand control wheel yoke in certain Cessna Models 172M, 172N, 172P, R172K, F172 and FR172 airplanes. Inflight jamming of the control system has occurred. The AD will eliminate this condition by incorporating a stop in the control system.

DATE: Effective June 30, 1983.

Compliance: Within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

ADDRESSES: Cessna Service Information Letters SE82–38 dated August 13, 1982, and SE82–38 Revision #1 dated October 29, 1982, applicable to this AD may be obtained from Cessna Aircraft Company, P.O. Box 1521, Wichita, Kansas 67201, Telephone No. (316) 685–9111. A copy of this service information is also contained in the Rules Docket, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Douglas W. Haig, Aerospace Engineer, Wichita Aircraft Certification Office, Room 238, Terminal Building 2299, Mid-Continent Airport, Wichita, Kansas 67209, Telephone No. (316) 269–7005.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring compliance with Cessna Service Information Letters SE82–38 dated August 13, 1982 and SE82–38 Revision #1 dated October 29, 1982, on certain Cessna Models 172M, 172N, 172P, R172K, F172 and FR172 airplanes was published in the **Federal Register** on January 13, 1983, (48 FR 1514 and 1515). The Service Information Letter as revised, recommended installation of a retaining bolt in the right-hand control wheel yoke assembly which will prevent the control wheel guide roller from becoming dislodged and restricting control travel. The AD action resulted from an occurrence when a student pilot froze at the control with full up elevator. The instructor was attempting to overpower the student when the student let go of the control wheel. The instructor then jammed the control full forward with a side force which forced the centering bearing out of the guide assembly. This caused a complete loss of control until the instructor was able to force the centering bearing back into the guide assembly. At this point control was regained and an uneventful landing was made. Failure to force the centering bearing back into the guide assembly could result in the loss of the airplane.

Interested persons have been afforded an opportunity to comment on the proposal.

One commentor responded expressing concurrence with the NPRM. No other comments or objections were received on the proposal or the FAA determination of the related cost to the public. Therefore, the amendment is being adopted as proposed in the notice.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

Cessna: Applies to the following airplanes certificated in any category:

Model	Serial Nos.
172M	17266940 through 17267584.
172N	17267585 through 17274009.
172P	17274010 through 17275782, 17275784, 17275785, 17275788, 17275770, 17275786, 17275782, 17275793, 17275798, 17275796, 17275800 through 17275803, 17275806, 17275818.
R172K	R1722000 through R1723454.
F172	F17201445 through F17202194.
FR172	FR17200591 through FR17200675.

Compliance: Required as indicated unless already accomplished. To prevent possible jamming of the elevator control, accomplish the following:

(a) Within the next 100 hours time-in-service, modify the right-hand control wheel yoke guide in accordance with the instructions in Cessna Single-Engine Customer Care Service Information Letter SE82–38, dated August 13, 1982, and SE82–38 Revision #1 dated October 29, 1983.

(b) Airplanes may be flown in accordance with FAR 21.197 to a base where this AD may be accomplished.

(c) An equivalent method of compliance with this AD may be used if approved by the Manager, Wichita Aircraft Certification Office, Federal Aviation Administration, Room 238, Terminal Building 2299, Wichita, Kansas 67209, Telephone (316) 269–7000.

This amendment becomes effective on June 30, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note. The FAA has determined that this regulation only involves 10,300 airplanes at an approximate one-time cost of $55.00 for each or a total one-time fleet cost of $566,500. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket.

Issued in Kansas City, Missouri, on May 16, 1983.

John E. Shaw,

Acting Director, Central Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-CE-52-AD; Amdt. 39-4656]

Pilatus Britten-Norman Ltd.; Models BN-2, BN-2A, BN-2B Islander Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to Pilatus Britten-Norman Ltd. Models BN–2, BN–2A, and BN–2B Islander Series airplanes, which supersedes AD 83–07–03, Amendment 39–4602. This superseded AD required visual inspection of the elevator trim tabs for cracks, loose fasteners, excessive tab hinge wear and excessive backlash in the operating system. Subsequent to the issuance of AD 83–07–03, an alternate method of inspection compliance has been established, an ambiguity has been noted in the modification nomenclature and the manufacturer has issued additional service instructions which expand the applicability of the inspection and modification procedures. The superseding AD will incorporate the applicable inspection and modification procedures and make the necessary corrections for identification of the modifications.

EFFECTIVE DATE: June 2, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Pilatus Britten-Norman Ltd. Service Bulletin (SB) No. BN–2/SB.142, Issue 2, dated June 29, 1981, SB No. BN–2/SB.142, Issue 3, dated March 14, 1983, and SB No. BN–2/SB.156, dated March 14, 1983, applicable to this AD may be obtained from Pilatus Britten-Norman Ltd., Bembridge, Isle of Wight, England. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. A. Astorga, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium, Telephone 513.38.30; or Mr. L. Werth, FAA, ACE–109, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–6932.

SUPPLEMENTARY INFORMATION: The manufacturer issued SB Nos. BN–2/SB.16, BN–2/SB.45, BN–2/SB.46, BN–2/SB.47, BN–2/SB.49, BN–2/SB.127 which address the detection and correction of cracks, rivet failures, hinge wear and backlash in the elevator trim tab system used on Pilatus Britten-Norman Ltd., Model BN–2, BN–2A and BN–2B Islander Series airplanes. The FAA made compliance with portions of SB Nos. BN–2/SB.16 and BN–2/SB.49 mandatory by issuing AD 71–19–03, Amendment 39–1285, as revised by Amendment 39–1902. After issuing SB BN–2/SB.49, the manufacturer received three reports of excessive elevator trim tab vibration. Also during 1978/1979, the FAA received one report of excessive slack in the elevator trim jack, one report of lost elevator trim and one report of a cracked elevator trim tab spar.

After reviewing the service history of the elevator trim tabs, Pilatus Britten-Norman Ltd. issued SB No. BN–2/SB.142, Issue 2, dated June 29, 1981, which stresses the importance of repetitive inspections for structural defects to prevent rapid crack growth or other structural defects in the elevator trim tabs and introduces a new design elevator trim tab, incorporated by Mod NB/M/1117 which will allow the repetitive inspection interval to be increased from 10 hours time-in-service to 50 hours time-in-service.

The FAA found that the condition addressed by this Service Bulletin was an unairworthy condition likely to exist on airplanes certificated for operation in the United States and issued AD 83–07–03 which required periodic inspection and correction, if required, of the elevator trim tab system. Subsequently, an alternate method of inspection compliance has been established and it has become necessary to clarify the nomenclature of the repair modifications. In addition, the manufacturer has developed modification procedures which now allow the incorporation of repair scheme Mod NB/M/1117 on airplanes equipped with a Collins AP107 autopilot system. As a result Pilatus Britten-Norman Ltd. issued SB No. BN–2/SB.142, Issue 3, dated March 14, 1983, and SB No. BN–2/SB.156, dated March 14, 1983, which allow for airplanes equipped with a Collins AP107 autopilot system to incorporate Mod NB/M/1117. The United Kingdom, Civil Aviation Authority (UKCAA), who has responsibility and authority to maintain the continuing airworthiness of these airplanes in the United Kingdom, has classified these Service Bulletins and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under United Kingdom registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of the UKCAA combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of SB No. BN–2/SB.142, Issue 3, dated March 14, 1983, and SB No. BN–2/SB.156, dated March 14, 1983, and the mandatory classification of these Service Bulletins by the UKCAA.

Based on the foregoing, the FAA has determined that the condition addressed by SB No. BN–2/SB.142, Issue 3, dated March 14, 1983, and SB No. BN–2/SB.156, dated March 14, 1983, is an unsafe condition that may exist on other products of the same type design certificated for operation in the United States.

Therefore, an AD superseding AD 83–07–03 is being issued which, in addition to retaining the inspection criteria of AD 83–07–03, adds an alternate method of inspection compliance, corrects the identification of the modifications, and expands the applicability of the modification procedures on Pilatus Britten-Norman Ltd. Models BN–2, BN–2A, and BN–2B Islander Series airplanes.

Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

Pilatus Britten-Norman Ltd: Applies to Models BN–2, BN–2A and BN–2B Islander Series (all serial numbers) airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent structural failure of the elevator trim tabs, accomplish the following:

(a) For those airplanes not incorporating Mod NB/M/1117, within the next 10 hours time-in-service after the effective date of this AD or within 10 hours time-in-service from the last inspection per AD 83–07–03 and thereafter at intervals not to exceed 10 hours time-in-service:

(1) Visually inspect using a 5X power magnifying glass the elevator trim tab skins, front channel member (spar) and drive ribs for cracks in accordance with the instructions contained in the "Inspection" section of Pilatus Britten-Norman Ltd. Service Bulletin (SB) No. BN–2/SB.142, Issue 3, dated March 14, 1983 (hereinafter referred to as the SB), or an FAA-approved equivalent.

(2) Visually inspect elevator trim tabs for loose or broken rivets.

(3) Visually inspect elevator trim tab hinges for damage or excessive wear.

(4) Visually inspect the trim tab operating system for backlash in accordance with the instructions provided in the "Inspection" section of the SB.

(5) Before further flight, repair any defects found during accomplishment of paragraphs (a)(1), (a)(2), (a)(3), or (a)(4) of this AD, in accordance with the instructions contained in the "Rectification (Pre-Mod NB/M/1117 Long Span Tabs)" section of the SB and/or instructions provided by Pilatus Britten-Norman Ltd., Bembridge, Isle of Wight, England, and approved by the Manager, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, Brussels, Belgium.

(6) The actions required by paragraphs (a)(1) through (a)(4) of this AD may be performed by the pilot, providing:

(i) The pilot's logbook has been endorsed by a properly rated mechanic stating that the pilot has been trained to conduct these inspections in accordance with this AD, and

(ii) These inspections are performed at least once each 50 hours time-in-service by a properly rated mechanic.

(b) For those airplanes which have incorporated Mod NB/M/1117, the intervals between repetitive inspections specified in paragraph (a) of this AD may be increased to 50-hour time-in-service (as prescribed in the Airplane Maintenance Schedules (Pub. Ref. MS/1 and MS/4) and with the instructions in the Airplane Maintenance Manual (Pub. Ref. MM/1)).

(c) Any airplane which incorporates a Collins AP107 Autopilot (Mod NB/M/911) is not eligible for incorporation of Mod NB/M/1117 unless the autopilot system has been modified to conform with Appendix 6 (Issue 11 or later) of Mod NB/M/911 in accordance with SB No. BN–2/SB156, dated March 14, 1983.

(d) The intervals between the repetitive inspections required by this AD may be adjusted up to 10 percent of the specified interval to allow accomplishing these

VOL 48 ISS 103 MY 26 1983 UMI

inspections concurrent with other scheduled maintenance of the airplane.

(e) Aircraft may be flown in accordance with FAR 21.197 to a location where this AD can be accomplished.

(f) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium.

This AD supersedes Ad 83–07–03, Amendment 39–4602.

This amendment becomes effective on June 2, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); § 11.89 of the Federal Aviation Regulations (14 CFR 11.89))

Note.—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

Issued in Kansas City, Missouri, on May 18, 1983.

John E. Shaw,

Acting Director, Central Region.

14 CFR Part 71

[Airspace Docket No. 83–AEA–3]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Control Zone, Morristown, New Jersey

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Final rule

SUMMARY: This amendment deletes the reference to Somerset Hills Airport, Basking Ridge, New Jersey, as it appears in the description of Morristown, New Jersey Control Zone. This deletion will cause a small indentation approximately ½ mile in the southwest extension of the control zone to be erased and made a part of the controlled airspace. This action is necessitated by the closing of Somerset Hills Airport.

EFFECTIVE DATE: June 27, 1983.

ADDRESS: Send comments on the rule in triplicate to: Glenn A. Bales, Manager, Airspace and Procedures Branch, AEA–530, Federal Aviation Administration, Fitzgerald Federal Building (Formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430, Telephone: (212) 917–1228.

The official docket may be examined in the Office of the Regional Counsel, Federal Aviation Administration, Fitzgerald Federal Building (Formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours at the Airspace and Procedures Branch, AEA–530, Federal Aviation Administration, Fitzgerald Federal Building (Formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT:
Glenn A. Bales, Manager, Airspace and Procedures Branch, AEA–530, Federal Aviation Administration, Fitzgerald Federal Building (Formerly Federal Building), John F. Kennedy International Airport, Jamaica, New York 11430; (212) 917–1228.

SUPPLEMENTARY INFORMATION:

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the description of the Morristown, New Jersey Control Zone by deleting any reference to Somerset Hills Airport, Basking Ridge, New Jersey.

Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is no burden imposed on any person due to the minimal amount of airspace being controlled.

Therefore, I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary and that good cause exists for making this amendment effective in less than thirty (30) days after its publication in the **Federal Register.**

List of Subjects in 14 CFR Part 71

Control zon , Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t. as follows:

Morristown, New Jersey, Amended: "excluding a 1-mile radius of the center lat. 40°41'28" W, long 74°32'08" N of Somerset Hills Airport, Basking Ridge, New Jersey.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Jamaica, New York, on May 5, 1983.

Joseph M. Del Balzo,

Director, Eastern Region.

BILLING CODE 4910–13–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 375

[Docket No. RM83–65–000; Order 302]

Delegation of the Commission's Authority to the Director of the Office of Pipeline and Producer Regulation

May 20, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is amending § 375.307 of its regulations to delegate to the Director of the Office of Pipeline and Producer Regulation the authority to pass upon uncontested applications for authorization of off-system sales by interstate pipelines pursuant to the Statement of Policy issued April 25, 1983, in Docket No. PL83–2–000. This delegation will permit a more efficient discharge of the Commission's responsibilities.

DATES: Final rule effective May 20, 1983. Comments due June 27, 1983.

ADDRESS: All comments should refer to Docket No. RM83–65–000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:
Barbara K. Christin, Office of the General Counsel, (202) 357–8033.

SUPPLEMENTARY INFORMATION:

I. Background

On April 25, 1983, the Federal Energy Regulatory Commission (Commission) issued a Statement of Policy in Docket No. PL83–2–000 regarding off-system sales by interstate pipelines. The purpose of the policy statement is to provide guidance as to the types of off-system sales that the Commission is prepared to authorize, for the most part, on a routine basis.[1]

This final rule delegates to the Director of the Office of Pipeline and Producer Regulation (Director) the authority to pass upon uncontested applications for authorization of off-system sales pursuant to the Commission's statement of policy.

The authority delegated by this final rule involves only limited discretion which is consistent with established Commission policy with respect to delegations. As previously noted, this delegation relates only to uncontested applications. As defined in § 375.301(c), "uncontested" means that "no motion to intervene, or notice of intervention, in opposition to the pending matter made under § 385.214 (intervention) has been received by the Commission." In addition, as provided in § 375.301(a), any staff action may be appealed to the Commission pursuant to § 385.1902.

The Commission issues this final rule in order to more efficiently use the resources at its disposal and expedite the disposition of applications for off-system sales. The Commission has developed a system whereby responsible staff personnel exercise limited authority to carry out certain routine functions for which the Commission is responsible or to take routine actions which are considered essential to an efficient discharge of the Commission's responsibility. These delegations, which are contained in Subpart C of Part 375 of the Commission's regulations (18 CFR Part 375), have allowed the Commission to devote its energies to the less routine, more complex issues of policy and law that come before it. This creates benefits for both regulated entities and affected members of the public that rely on efficient and thoughtful Commission action.

[1] Of course, in particular cases, both the underlying validity of the policy and its application to particular facts may be challenged and are subject to further consideration.

Moreover, as already noted, any delegated action is appealable to the Commission itself.

II. Summary of The Rule

Section 375.307(a)(17) is added to allow the Director to pass upon uncontested applications for certificates of public convenience and necessity for off system sales, pursuant to the Statement of Policy issued in Docket No. PL83–2–000.

III. Effective Date

The Commission waives the notice and comment provisions of the Administrative Procedure Act, 5 U.S.C. 553(b), because the rule is one of agency procedure and practice. Prior public procedure is, therefore, unnecessary. In addition, the Commission finds good cause to make the rule effective immediately, pursuant to 5 U.S.C. 553(d). The Commission currently faces the task of having to make a number of decisions regarding off-system sales which can fairly be classified as routine or ministerial. This delegation will permit a more efficient discharge of the Commission's responsibilities, thereby enabling the Commission to devote greater attention to the issues that require studied consideration and policy determinations while assuring the public of expeditious action on items of concern.

IV. Comments

Although this rule is effective May 20, 1983, the Commission invites interested members of the public to submit comments or suggestions regarding the rule. The Commission and its staff will evaluate any information received from interested persons and will consider appropriate revisions to the regulations as a result of comments received. An original and 14 copies should be submitted to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Comments must be submitted no later than 30 days after publication in the **Federal Register.** All comments should refer to Docket No. RM83–65–000.

(Natural Gas Act, as amended, 15 U.S.C. 717–717w; Department of Energy Organization Act, 42 U.S.C. 7107–7352; E.O. 12009, 3 CFR 142 (1978))

List of Subjects in 18 CFR Part 375

Authority delegations (Government agencies), Seals and insignia, Sunshine Act.

In consideration of the foregoing, the Commission amends Part 375 of Chapter I of Title 18, Code of Federal Regulations, as set forth below, effective May 20, 1983.

By the Commission, Commissioner Sheldon concurred.

Kenneth F. Plumb,

Secretary.

PART 375—[AMENDED]

Section 375.307 is amended by removing the word "and" after the semicolon in paragraph (a)(15), changing the period at the end of paragraph (a)(16) to a semicolon and inserting the word "and" after the semicolon at the end of paragraph (a)(16), and adding a new paragraph (a)(17), to read as follows:

§ 375.307 Delegations to the Director of the Office of Pipeline and Producer Regulation.

The Commission authorizes the Director of the Office of Pipeline and Producer Regulation or the Director's designee to:

(a) * * *

(17) Applications for certificates of public convenience and necessity for off-system sales, pursuant to the Statement of Policy issued April 25, 1983 in Docket No. PL83–2–000.

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Amendments to interim final rule; extension of comment period.

SUMMARY: The FHWA is amending its Buy America interim final rule, published on January 17, 1983 (48 FR 1946) to: eliminate the waiver provision which exempted projects costing less than $450,000; clarify what was intended by allowing more stringent State Buy America requirements; and clarify the use of alternate bidding procedures. The amendments are based on a review of comments submitted to the public docket to date. The comment period on the interim final rule as amended is being extended from July 1, 1983, to August 1, 1983. In order to further clarify the provision allowing more stringent State Buy America requirements, the

VOL 48 ISS 103 26 1983 MAY UMI

existing Buy America regulation is also being amended to reference the restriction upon materials used contained in 23 CFR 635.409(a).

DATES: These amendments are effective June 10, 1983 and will expire September 30, 1983. The comment period in the interim final rule is continued. Comments on the interim final rule as amended must be received on or before August 1, 1983.

ADDRESS: Submit written comments, preferably in triplicate, to FHWA Docket No. 83–2, Federal Highway Administration, Room 4205, HCC–10, 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m., ET, Monday through Friday. Those desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. P. E. Cunningham, Chief, Construction and Maintenance Division, (202) 426–0392, or Ms. Ruth R. Johnson, Office of the Chief Counsel (202) 426–0781, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: On January 6, 1983, the President signed into law the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424, 96 Stat. 2136) (STAA of 1982). Section 165 sets forth revised Buy America requirements which supersede the previous requirements contained in Section 401 of the 1978 Surface Transportation Assistance Act. Since the former Buy America provisions as implemented in 23 CFR 635.410, Subpart D, were in conflict with the provisions of the STAA of 1982, immediate revision of this regulation was required. On January 17, 1983, the FHWA published an interim final rule (48 FR 1946) revising the provisions in 23 CFR 635.410 to reflect changes mandated by the STAA of 1982. However, the FHWA determined that it was in the public interest and not inconsistent with legislative intent to temporarily waive the provisions of Section 165 as they applied to projects estimated to cost less than $450,000. It was believed that this waiver would reduce administrative burdens by exempting a large number of projects, but that it would not have a significant impact on quantities of material covered by the regulation. The FHWA specifically requested comments on this waiver provision.

Since publication of the January 17 interim final rule, a substantial number of comments have been submitted to the public docket addressing the various provisions of the interim final rule. Based on a review of the comments received, the FHWA is amending the interim final rule by eliminating the $450,000 threshold figure and by providing clarifying amendments to the provisions on more stringent State requirements and alternate bidding procedures.

Discussion of Changes

As of May 2, 1983, a total of 196 comments to the docket had been received. About two-thirds of the comments (124 comments) have recommended that the temporary waiver for projects costing less than $450,000 either be lowered or removed entirely. Most of these comments have come from companies involved in the steel industry. Another 16 comments have recommended implementation of the law without any exception which would, of course, include the total elimination of the $450,000 waiver provision. Only two commenters, including one State DOT, have specifically indicated support of the $450,000 waiver provision. We have not received any comments or evidence to date to indicate that a reduced threshold would present a significant administrative burden or create any other problems. However, the Department of Transportation is conducting a study to determine the administrative costs of processing federally-assisted projects under the Buy America provisions. The findings of that study will be incorporated into the text of the final regulation which is expected to be issued by September 30, 1983.

The FHWA considered reducing the waiver provision to $100,000 or $50,000, but these alternatives were rejected. It was concluded that the $450,000 waiver provision should be completely eliminated from the interim final rule since there is no conclusive indication as yet that such a provision is needed. Elimination may, in fact, simplify the plan development phase since States may develop a standard Buy America provision for use on all Federal-aid highway projects. It is possible that any unacceptable administrative burdens, excessive red tape, or other negative effects associated with elimination of the waiver provision will only become evident through actual experience. It should be noted that the interim rule does contain a waiver for foreign steel and cement if its value is less than one-tenth of one percent of the total contract cost or $2,500 whichever is greater. Therefore, § 635.410(b)(1) is being deleted in its entirety. The change is being made at this time so that information based on experience with the new requirement can be obtained before the final rule is implemented. The FHWA is particularly interested in receiving comments on this change before the end of the extended comment period on August 1, 1983.

Impacts of $450,000 Threshold

Steel Impacts

We have made preliminary estimates of the effects the $450,000 waiver has on the domestic steel industry. Source material for the following information may be obtained from the updated regulatory evaluation/regulatory flexibility analysis which FHWA will prepare and place in the public docket as soon as practicable.

Approximately 60 percent of all Federal-aid highway contracts are for $500,000 or less, and these contracts account for about 10 percent of the total dollar amount of Federal-aid highway construction contracts and about 6 percent of all the steel used in Federal-aid highway construction.

We estimate that about 1.7 percent of all steel shipments produced in the U.S. will be used in Federal-aid highway construction in FY 1983. The direct use of domestic steel stemming from Federal-aid highway funds on projects under $500,000 in 1983 would, therefore, be 71,000 tons or about one-tenth of a percent of domestic steel shipments. It should be noted that the amount of steel actually affected by the waiver would be considerably less than this because many of these low-cost projects would use domestic steel regardless of the waiver. Also, much of the work in the FY 1983 highway program will involve improvements to existing facilities rather than new construction.

Cement Impacts

The waiver provision is expected to have an effect on the cement industry similar to that on steel. We estimate that the cement to be used on Federal aid highway projects under $500,000 in 1983 will represent slightly over one-half of one percent of total domestic production. This estimate assumes that total cement use on highways in FY 1983 could rise to 5.5 million tons, which would represent a major increase over the usage in the previous year.

Although domestic resources of raw materials are adequate to meet the domestic requirements, a small percentage of the cement currently being used in highway construction is foreign. This is generally limited to coastal areas and/or locations remote from domestic cement market areas. Because of cement's bulk and weight, it is only imported when the foreign source is near the construction site.

Procedural Changes

There are two procedural changes that need to be made in the interim final rule. The first involves confusion with the provisions in Section 165(d) of STAA of 1982. This provision reads as follows:

> The Secretary of Transportation shall not impose any limitation or condition on assistance provided under this Act, the Urban Mass Transportation Act of 1964, the Surface Transportation Assistance Act of 1978, or title 23, United States Code, which restricts any State from imposing more stringent requirements than this section on the use of articles, materials, and supplies mined, produced, or manufactured in foreign countries in projects carried out with such assistance or restricts any recipient of such assistance from complying with such State imposed requirements.

Several comments have been received which showed that this provision was being misunderstood. Specifically, State legislatures were considering "Buy-State materials and products preference" for Federal-aid highway work. Such a provision in Federal-aid contracts would be in violation of the longstanding prohibition contained in 23 CFR 635.409(a) against State restrictions on the use of articles or materials made or produced in any other State, territory, or possession of the United States. The issue addressed in Section 165 of the STAA of 1982 is that certain materials must be produced in the United States rather than in foreign countries. This is obvious from the inclusion of the words "foreign countries" in the aforementioned provision regarding more stringent State requirements. Section 635.410(a) is being revised to clarify this matter.

The second procedural change is necessary to clarify the application of the alternate bid provisions. The previous regulation required alternate bids for foreign and domestic structural steel. This requirement was retained in the interim final rule; however, since the cost differential was increased from 10 percent to 25 percent, the alternate bid requirement was revised to apply only to projects which contain an amount of structural steel equal in cost to at least 60 percent of the total project estimated cost. The intent of this revision was to minimize administrative burdens by requiring alternate bid procedures only for projects where foreign sources may truly compete in view of the 25 percent cost differential.

There has been some confusion regarding the exact meaning of the "60 percent" provision in § 635.410(b)(5), and there have been questions regarding the overall effect of the alternate bid requirements.

Since the STAA of 1982 permits States to impose more stringent Buy America requirements than are imposed by Section 165, it has been pointed out that a State could elect to prohibit the use of foreign structural steel even on projects which would require alternate bids under § 635.410(b)(5). Therefore, the interim final rule can be simplified by replacing the alternate bid requirement with a statement that alternate bids for foreign and domestic materials may be included on any Federal-aid highway project at the State's election. In doing so, the "60 percent" provision can be eliminated. Section 635.410(b)(5), renumbered as § 635.410(b)(4), has been revised accordingly. The provisions regarding the 25 percent cost differential have been retained since they still would apply to any project on which the State elects to include alternate bids. The FHWA still encourages States to consider alternate bids on projects where foreign materials are likely to be competitive even with the 25 percent cost differential.

The FHWA has determined that this document does not contain a major rule under Executive Order 12291. However, under the regulatory policies and procedures of the Department of Transportation, this rulemaking action is considered significant based on the public interest involved.

The January 17 interim final rule provided for a comment period through July 1, 1983. Prior to the preparation of the amendments included in this document, the comment period had been open to the public for approximately 90 days. Within this period, numerous substantive comments have been received and a review of these comments formed the basis for this rulemaking action. For this reason, it has been determined that additional notice and comment on this amendment are not necessary.

Since the interim final rule, as well as the amendments contained in this document expire on September 30, 1983, comments are continued to be requested on the interim final rule as amended so as to form a basis for future final rulemaking.

Due to the interim nature of this action, the draft regulatory evaluation, which is available for inspection in the public docket, and the regulatory impacts assessed in this document will be periodically updated as comments are received and experience gained on projects processed under these amendments.

A 15, rather than 30-day, delay in the effective date is being provided so that information based on experience from processing projects under the interim final rule as amended can be obtained before the comment period terminates. For the same reason the comment period for the interim final rule as amended is extended to August 1, 1983.

In consideration of the foregoing, and under the authority of 23 U.S.C. 315, section 165, Surface Transportation Assistance Act of 1982, Pub. L. 97–424, 96 Stat. 2136, and 49 CFR 1.48(b), the FHWA is amending Part 635, Subpart D, of title 23, Code of Federal Regulations to read as set forth below:

(Catalog of Federal Domestic Assistance Program Number 20–205, Highway Research Planning and Construction. The procedures provided in OMB Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs apply to this program)

List of Subjects in 23 CFR Part 635

Buy America, Government contracts, Grant programs—transportation, Highways and roads.

Issued on: May 23, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

PART 635—CONSTRUCTION AND MAINTENANCE

§ 635.410 [Amended]

1. In § 635.410, paragraph (a) is amended by adding a sentence at the end of the paragraph to read as follows:

(a) * * * However, nothing in this section shall be construed to be contrary to the requirements of § 635.409(a) of this subpart.

* * * * * *

2. In § 635.410, paragraph (b)(1) is removed and paragraphs (b)(2) through (b)(6) are redesignated as paragraphs (b)(1) through (b)(5) respectively and redesignated paragraph (b)(4) is revised to read as follows:

§ 635.410 [Amended]

* * * * * *

(b) * * *

(4) The State elects to include alternate bid provisions for foreign and domestic steel and/or cement materials which comply with the following requirements. Where utilized, the contract provisions must require all bidders to submit a bid based on furnishing domestic steel and/or cement materials and the provisions must clearly state that the contract will be

VOL 48 ISS 103 MAY 26 1983 UMI

awarded to the bidder who submits the lowest total bid based on furnishing domestic steel and/or cement materials unless such total bid exceeds the lowest total bid based on furnishing foreign steel and/or cement materials by more than 25 percent. Any procedure for obtaining alternate bids based on furnishing foreign steel and/or cement materials which is acceptable to the Division Administrator may be used. The alternate bid provision may apply to steel, cement or both steel and cement.

BILLING CODE 4310-22-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 942

Approval of Modification of the Tennessee Permanent Regulatory Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: OSM is announcing final approval of a modification of the Tennessee permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA) which redesignates the State agency authorized to implement, administer and enforce the approved regulatory program.

By executive order effective February 15, 1983, Governor Lamar Alexander transferred the Division of Surface Mining in the Department of Conservation and its responsibilities and authorities for administration of the Tennessee surface coal mining regulatory program to the Department of Public Health. OSM is approving a modification of the Tennessee permanent program under SMCRA to designate the Department of Public Health as the regulatory authority authorized to implement, administer and enforce the State regulatory program which was approved by the Secretary on August 10, 1982.

EFFECTIVE DATE: February 15, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James Curry, Field Office Director, Office of Surface Mining Reclamation and Enforcement, 530 Gay Street, S.W., Suite 400, Knoxville, Tennessee 37902, phone (615) 523-0523.

SUPPLEMENTARY INFORMATION: The Tennessee program under SMCRA was conditionally approved by the Secretary on August 10, 1982 (47 FR 34724-34754). Information pertinent to the general background, revisions, modifications and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and explanation of the conditions of approval of the Tennessee program can be found in the August 10, 1982 Federal Register (47 FR 34724-34754).

By letter dated January 25, 1983, Tennessee notified OSM that Governor Lamar Alexander was expected to issue an Executive Order to take effect February 15, 1982, which would direct a transfer of the Division of Surface Mining in the Department of Conservation and its responsibilities and authorities for administration and enforcement of the Tennessee Surface Coal Mining and Reclamation Program under SMCRA to the Tennessee Department of Public Health.

On February 15, 1983, Tennessee transmitted to OSM a copy of Executive Order No. 40 effecting the transfer of February 15, 1983.

On February 23, 1983, OSM announced interim final approval of an amendment to the Tennessee program to redesignate the Department of Public Health as the regulatory authority authorized to implement the approved State program (48 FR 7577). Comment on this action was solicited for 30 days. The comment period ended March 25, 1983.

Findings

Section 723.17(b)(2) of OSM's regulations stipulates that the State shall promptly notify the Director, in writing, of any changes in the authority of the regulatory authority to implement, administer or enforce the approved program. As noted above, in accordance with this provision, Tennessee notified OSM of the impending transfer of the Division of Surface Mining from the Department of Conservation to the Department of Public Health by letter dated January 25, 1983. On February 15, 1983, the State provided OSM with a copy of the Executive Order signed by the Governor on that date which officially authorized the transfer.

After reviewing these documents, OSM has determined that the transfer of the Division of Surface Mining from one agency to another requires that an amendment be made to the approved Tennessee program to designate the Department of Public Health and Environment rather than the Department of Conservation as the regulatory authority authorized to implement, administer and enforce the approved regulatory program under SMCRA.

Accordingly, 30 CFR 942 is amended as set forth herein to reflect the redesignation of the regulatory authority. The Director has found that this modification of Tennessee's program meets the criteria for approval of State program amendments set forth under 30 CFR 732.17 and 732.15(b). The Executive Order stipulates that the Department of Health shall assume *all* authorities and responsibilities for administration of the regulatory program previously held by the Department of Conservation, including all appropriate State and Federal laws, rules and regulations, investigation and enforcement activities, memorandums of agreement with other agencies and the appropriate requirements outlined in the November 5, 1982, Memorandum of Understanding between the Division of Surface Mining of the Department of Conservation and OSM.

Further, the Division of Surface Mining, which administered the program under the Department of Conservation, has been transferred, intact, to the Department of Health and Environment and will continue to administer the program under that agency. Therefore, the Director has determined that the newly designated regulatory authority has the capability to implement, administer and enforce the approved program provisions consistent with 30 CFR 732.15(b).

The approval of this modification to the Tennessee program is being made effective as of February 15, 1983. This retroactive approval will ensure that there was no lapse in the State's authority to implement and enforce its approved program.

Public Comment

In response to OSM's notice announcing interim final approval of a modification to the Tennessee regulatory program to redesignate the Department of Public Health as the regulatory authority, OSM received the following comments and questions from Save Our Cumberland Mountains (SOCM). The comments were taken into consideration by the Director in making the decision to give final approval of the program modification.

1. SOCM questioned if the transfer of functions and responsibilities from the Department of Conservation to the Department of Public Health would affect the Division of Surface Mining's (DSM) Memoranda of Agreement with other agencies.

DSM has revised the Memoranda of Agreement with other agencies to reflect the Division of Surface Mining's transfer from the Department of Conservation to the Department of Public Health. These revised Memoranda of Agreement were included in material submitted to OSM by Tennessee on May 2, 1983. The material submitted is intended to satisfy nine of the Secretary's conditions of approval of Tennessee's program, including condition "i", which pertains to the State's systems and procedures for permitting, inspection and enforcement, and condition "j", which pertains to staffing and funding for Tennessee's regulatory program. In a separate notice OSM will announce a comment period on the material submitted by the State.

2. SOCM questioned if the present structure of Public Health would require any changes in the Division of Surface Mining's systems.

The Assistant Director of the Division of Surface Mining has advised OSM that any changes in DSM's systems due to the transfer to Public Health will be minor. All modifications to DSM's regulatory systems are outlined in the material mentioned in the above paragraph which Tennessee submitted to OSM to satisfy conditions of approval. As previously noted, the public will be provided an opportunity to comment on the material submitted by the State.

3. SOCM questioned the effect on DSM's operations of leaving the Abandoned Mine Lands program under the jurisdiction of the Department of Conservation.

This action will have little or no effect on DSM's administration of the regulatory program. The State AML program is distinct from the State regulatory program and the staff who will continue to work on the AML program under the Department of Conservation have not previously and will not in the future perform any functions directly related to the State's regulatory program.

4. SOCM questioned how the responsibilities of DSM personnel will change with the transfer from the Department of Conservation to the Department of Public Health.

The Assistant Director of the Division of Surface Mining has stated that changes in personnel responsibilities as a result of the transfer will be minimal. Any changes that have been or will be made will be reflected in the program modifications recently submitted to OSM by DSM to satisfy conditions of approval.

5. SOCM questioned if the transfer to the Department of Public Health would affect the procedures that the legal staff would follow.

The Assistant Director of the Division of Surface Mining has advised OSM that the DSM legal staff now has dual reporting responsibilities to the Division of Surface Mining and to the Department of Public Health's Office of General Counsel. The DSM attorneys will continue to handle DSM legal work but will receive technical advice and assistance from the Office of General Counsel. These changes are reflected in the State's recent submission to satisfy conditions of approval.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 942

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, 30 CFR Part 942 is amended as set forth herein.

Dated: May 20, 1983.

J. Steven Griles,
Acting Director, Office of Surface Mining.

PART 942—[AMENDED]

1. 30 CFR 942.10 is revised to read as follows:

§ 942.10 State regulatory program approval.

The Tennessee State program, as submitted on February 28, 1980, as amended and clarified on June 11, 1980 and June 19, 1980, and revised in material submitted May 13, 1982, was conditionally approved, effective August 10, 1982. Beginning on that date, the Tennessee Department of Conservation was deemed the regulatory authority in Tennessee for all surface coal mining and reclamation operations and all exploration operations on non-federal and non-Indian lands. By executive order effective February 15, 1983, Governor Lamar Alexander transferred all authorities and responsibilities for administering the Tennessee State program from the Department of Conservation to the Department of Public Health. Effective February 15, 1983, the Director approved a modification of Tennessee's program to designate the Department of Health and Environment as the regulatory authority starting on that date. Only surface coal mining and reclamation operations on non-federal and non-Indian lands shall be subject to the provisions of the Tennessee permanent regulatory program. Copies of the approved program, together with copies of the letter of the Department of Conservation agreeing to the conditions of 30 CFR 942.11, are available at:

Administrative Record Room, Office of Surface Mining, Room 5315, 1100 "L" Street, N.W., Washington, D.C. 20240

Division of Surface Mining, Dempster Building, 305 West Springdale Avenue, Knoxville, Tennessee 37919

(Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.))

[FR Doc. 83-14099 Filed 5-25-83; 8:45 am]
BILLING CODE 4310-05-M

30 CFR Part 942

Extension of Deadline for Satisfaction of Condition of Approval of the Tennessee Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: OSM is announcing its decision to extend the deadline for Tennessee to meet a condition of the Secretary's approval of the State's permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

VOL 48 ISS 103 MAY 26 1983

The condition relates to procedures for hearings and appeals under the State's surface coal mining program. In accordance with the request of the Tennessee Division of Surface Mining (DSM) the Secretary is extending the deadline for Tennessee to resolve the condition from April 30, 1983, to September 30, 1983. This extension will allow DSM sufficient time to carry out negotiations with the Office of the State Attorney General which are a requisite step in resolving the condition.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James Curry, Field Office Director, Office of Surface Mining Reclamation and Enforcement, 530 Gay Street, S.W., Suite 400, Knoxville, Tennessee 37902. Telephone 615–523–0523.

SUPPLEMENTARY INFORMATION: The Tennessee program was conditionally approved by the Secretary on August 10, 1982 (47 FR 34724–34754). The approval was conditioned on the State's correction of 11 minor deficiencies in its program.

Information pertinent to the general background, revisions, modifications and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and explanation of the conditions of approval of the Tennessee program can be found in the August 10, 1982 **Federal Register** (47 FR 34724–34754).

On March 2, 1983, Tennessee requested an extension of the deadline to satisfy condition (k) of the Secretary's approval of the Tennessee program as listed at 30 CFR 932.11(k) from April 30, 1983 to June 30, 1983. By letter dated March 23, 1983, Tennessee modified its request and asked for an extension until September 30, 1983.

Condition (k) of the Secretary's approval of Tennessee's program stipulates that the State must submit copies of promulgated regulations, policy statements, Attorney General's opinions or other sufficient proof that the State program is no less effective than 43 CFR 4.1103, 4.1122, 4.1154, 4.1163, 4.1166, 4.1260 and 4.1281. The first four sections generally relate to administrative hearings and functions of administrative appellate bodies. The last two sections regard the State's Small Operators Assistance Program (SOAP). Tennessee's permanent program submission of February 3, 1982, contained regulations which were counterparts to the above listed sections of 43 CFR Part 4. Tennessee's Attorney General, however, removed these regulations from the program submission because the State's system of administrative boards does not parallel the Federal Government's and the regulations proposed did not, apparently, fit the State's system. Tennessee indicated that satisfaction of condition (k) would require the Division of Surface Mining (DSM) to work with the Attorney General's Office to reach a satisfactory solution. Because the remedy will most likely require an Attorney General's opinion, DSM indicated it would be unable to meet the April 30, 1983, deadline and, thus, requested an extension to September 30, 1983, to meet condition (k).

On April 1, 1983, OSM published a notice in the **Federal Register** (48 FR 14013) to propose an extension of the deadline for Tennessee to meet condition "k" to September 30, 1983. Comment on that proposal was solicited for 30 days. No comments were received by the close of the comment period on May 2, 1983.

Secretary's Determination

The Secretary has determined that an extension of the deadline for Tennessee to satisfy condition "k" is warranted. As noted above, a resolution of the program deficiencies cited in condition "k" will require DSM to work with the Attorney General's Office. An Attorney General's opinion may be needed to clarify how the State can adopt procedures for hearings and appeals which satisfy the Federal requirements within the context of the State's established administrative and judicial systems.

DSM was recently transferred from the Department of Conservation to the Department of Public Health. The additional time allowed the State to meet the condition will provide the new management of DSM the necessary time to negotiate with the Attorney General's Office to develop a satisfactory resolution of the program deficiencies which are the subject of condition "k".

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule does not impose any new requirements; rather, it ensures that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act.* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 942

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, 30 CFR Part 942 is amended as set forth herein.

Dated: May 18, 1983.

William P. Pendley,

Acting Assistant Secretary for Energy and Minerals.

PART 942—[AMENDED]

§ 942.11 [Amended]

1. 30 CFR 942.11 is amended by modifying paragraph (k) by substituting September 30, 1983, for April 30, 1983.

(Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*))

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 110

[CCGD3–82–31]

Anchorage Grounds; Delaware Bay and River

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the regulations governing Anchorage A (Big Stone Anchorage) in the Delaware Bay off the entrance to the Mispillion River. The superseded regulation for this anchorage stated that the specific purpose of the anchorage is to allow deep draft tankers to anchor and lighter their cargoes. This rule eliminates all references to tanker lightering and designates Anchorage A as a general anchorage. This action permits shippers transporting commodities other than oil to use Anchorage A as both a holding anchorage and an anchorage for lightering.

EFFECTIVE DATE: June 27, 1983.

FOR FURTHER INFORMATION CONTACT: Captain Daniel B. Charter, Jr., Captain of the Port, Philadelphia, U.S. Coast Guard Base, Gloucester City, New Jersey 08030 (Tel: (609) 456–1370 or (215) 923–4320) between 7:00 a.m. and 4:30 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: On 20 December 1982 the Coast Guard published a notice of proposed rulemaking in the **Federal Register** for these regulations (47 FR 56661). Interested persons were given an opportunity to submit written comments to the Coast Guard concerning the proposal until 18 February 1983. Fourteen comments were received during the comment period and will be addressed below. Five comments were received following the close of the comment period and were also considered; however, they will not be separately addressed as they offered no substantive material not already contained in other comments. No public hearing was held. A copy of the Environmental Assessment and Finding of No Significant Impact relating to this regulation change is available for examination at the Third Coast Guard District Planning Office, Building 125, Governors Island, NY 10004 and the Captain of the Port, Philadelphia Office, U.S. Coast Guard Base, Gloucester City, NJ 08030.

Drafting Information

The drafters of this regulation are LTJG George Arbutina, project manager, COTP Philadelphia and LCDR James J. D'Alessandro, project attorney, Legal Office, Third Coast Guard District.

Discussion of Comments

The proposed regulations were promulgated at the request of the Delaware River Port Authority and the Delaware River & Bay Authority to allow vessels carrying commodities other than oil to utilize Big Stone Anchorage. The main reason for their request is to permit the use of the anchorage to "top-off" deep draft colliers. These vessels are presently limited to 40–45 foot channel depths in Philadelphia, Baltimore, and Hampton Roads and thus cannot be fully loaded. By topping off in Big Stone Anchorage, east coast coal exporting companies will be more economically competitive with other major coal exporting countries elsewhere in the world. This anchorage is the only anchorage capable of accommodating deep draft vessels in the Delaware Bay and River system and recent statistics show underutilization of Big Stone Anchorage as a tanker lightering anchorage.

Seven commenters unconditionally endorsed the proposed regulation change for a variety of economic reasons. Included in this group of comments were several letters from coal, coal transport, barge and shipbuilding concerns who wished to see the anchorage used for topping off colliers. The Commonwealth of Pennsylvania also endorsed the proposed change because the potential for economic growth through increased coal exports would be enhanced.

Four commenters endorsed the basic proposal but expressed concern that the broad language of the proposal would allow too many vessels to use the anchorage to the detriment of deep draft vessels that require anchorage at Big Stone for lightering purposes. While this rule may indeed increase the number of vessels in the anchorage, the Captain of the Port of Philadelphia maintains supervision over the anchoring of vessels and will ensure that oil tankers and other deep draft vessels conducting cargo operations are afforded top priority in the anchorage and allotted sufficient space to conduct operations safely. If anchorage management is required, first priority would be given to deep draft oil tankers since regulations specifically prohibit oil lightering outside the anchorage. Second priority would be given to coal lightering operations followed by other deep draft vessels.

The commenters expressed concern that changing the designation of Anchorage A will create a crowding problem in the anchorage hazarding tankers involved in oil transfer operations, and noted that this problem may intensify when the economic climate improves. The Coast Guard does not agree with these comments. Anchorage A was enlarged to three times its previous size in May of 1982 to accommodate a larger number of lightering operations and reduce the possibility of collisions, rammings, and groundings. Current statistics indicate that Anchorage A is utilized by an average of only two vessels at any given time while the enlarged anchorage is capable of accommodating twelve large vessels. These statistics indicate that crowding of this deep draft anchorage will not be a problem when operations expand to include cargoes other than oil. When the business environment improves any space management problems which might arise will be alleviated through use of the above mentioned management authority by the Captain of the Port of Philadelphia.

One commenter suggested setting aside a portion of the anchorage for the exclusive use of oil tankers to ensure the existence of safe conditions for tanker lightering. The Coast Guard does not perceive the need for segregation of various operations in the anchorage at this time. However, should a need for vessel operation segregation arise in the future on either a one-time or recurring basis, the Captain of the Port of Philadelphia may require segregation by utilizing the vessel management authority afforded him by this rule.

The State of Delaware expressed concern over several environmental aspects of this rule. One specific concern involved the increased possibility of spills of coal, oil, or other cargoes given the increased possibility of ships colliding due to a higher volume of ship traffic. Delaware also noted that various coal transfer methods pose differing potentials for water pollution involving acids, coal dust, heavy metals and other pollutants. The Coast Guard has conducted an Environmental Assessment and issued a Finding of No Significant Impact to address these concerns. After considering all available technical and environmental data, the Coast Guard has determined that this rule would not significantly impact upon the environment of the Delaware Bay and coastal areas.

The State of Delaware also commented that the U.S. Coast Guard may not possess sufficient manpower and equipment to effectively handle significantly increased traffic in the Big Stone Anchorage area brought about by this action. The Coast Guard does not agree with this comment. Big Stone Anchorage is regularly patrolled by vessels and aircraft from Coast Guard units in Gloucester City, NJ and Cape May, NJ. Both of these units have the resources to increase the frequency of these patrols if such action is made necessary by the implementation of this rule. The Coast Guard is prepared to handle pollution incidents of all types in this section of the Delaware Bay utilizing the response plan set forth in the Captain of the Port, Philadelphia, Subregional Area Oil and Hazardous Substance Pollution Contingency Plan.

A number of comments were received following the close of the public comment period. These comments were considered, but the issues that they addressed had been raised by comments received during the commenting period. The late comments are included in the public docket and are available for inspection.

UMI

VOL 48 ISS 103 MAY 26 1983 UMI

Economic Assessment and Certification

This regulation is considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be so minimal that a regulatory evaluation is not required. Based on this assessment, it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation will not have a significant impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

Anchorage grounds.

Final Regulation

In consideration of the foregoing, Part 110 of Title 33, Code of Federal Regulations is amended by revising 33 CFR 110.157(a)(1) to read as follows:

PART 110—ANCHORAGE REGULATIONS

§ 110.157 Delaware Bay and River

(a) *The anchorage grounds.*—(1) *Anchorage A off the entrance to the Mispillion River.* In Delaware Bay southwest of Brandywine Channel beginning at latitude 38°53'57" N., longitude 75°08'00" W., thence northwesterly to latitude 39°01'22" N., longitude 75°13'25" W., thence southwesterly to latitude 39°00'49" N., longitude 75°14'57" W., thence southeasterly to latitude 38°53'22" N., longitude 75°09'26" W., thence northeasterly to the point of beginning. Supervision over the anchoring of vessels and over all cargo transfer operations in Anchorage A is exercised by the Captain of the Port, Philadelphia. The regulations of paragraph (b)(1) and (b)(2) of this section do not apply to this anchorage.

BILLING CODE 4910-14-M

33 CFR Part 165

[Third Coast Guard District Reg. CCGD3-83-14]

Safety Zone Regulations; New Jersey, New York Harbor, Newark Bay

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone in the waters of the Newark Bay Southern Reach. The zone is needed to protect vessels from a safety hazard associated with the demolition of the CNJ Newark Bay Bridge. Entry into this zone is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATE: This regulation is effective on May 6, 1983. It terminates upon completion of the current demolition work being done on the CNJ Bridge.

FOR FURTHER INFORMATION CONTACT: Captain J. L. McDonald, Captain of the Port, New York (212)–668–7917.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to public interest since immediate action is needed to respond to potential hazards to the vessels involved.

Drafting Information

The drafters of this regulation are Lieutenant Junior Grade G. M. Jacobson, Project Officer for the Captain of the Port, and Lieutenant Commander J. J. D'Alessandro, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Regulation

The circumstances requiring this regulation result from the potential hazards to navigation resulting from the demolition operations on the CNJ Newark Bay Bridge.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

PART 165—[AMENDED]

Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by adding § 165.T–03–354 to read as follows:

§ 165.T–03–354 Safety Zone: New Jersey, New York Harbor, Newark Bay.

(a) *Location.* The following area is a safety zone: The waters of Newark Bay, Southern Reach within a boundary extending from Newark Bay Lighted Channel Buoy 3A (LLNR 1828.50), thence north on a course of 054 degrees True approximately 270 yards to the southeastern corner on the center island of the CNJ Bridge; thence northwest, from the northeast corner on the center island of the CNJ Newark Bay Bridge on a course of 340 degrees True approximately 175 yards to longitude 74 degrees 08 minutes 47 seconds west, latitude 40 degrees 39 minutes 22.1 seconds north; thence south to the starting point is established as a Safety Zone from May 6, 1983 until completion of the current demolition work being done on the CNJ Bridge.

(b) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port.

(33 U.S.C. 1225 and 1231; 49 CFR 1.46; 33 CFR 165.3)

Dated: May 6, 1983.

J. L. McDonald,

Captain, U.S. Coast Guard, Captain of the Port, New York.

BILLING CODE 4910-14-M

33 CFR Part 165

[COTP Los Angeles-Long Beach Reg. 83-04]

Safety Zone Regulations; San Pedro Bay, California

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone around oil Island Esther. The zone is needed to protect vessels from a safety hazard associated with debris in and under the water from Island Esther. Entry into this zone is prohibited unless authorized by the captain of the port.

EFFECTIVE DATES: This regulation becomes effective on 11 March 1983 and remains in effect until further notice.

FOR FURTHER INFORMATION CONTACT: ICDR Dean HARDER, Coast Guard Marine Safety Office, Los Angeles/Long Beach, (213) 590–2315.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication.

Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent potential damage to vessels transiting the area.

Drafting Information

The drafters of this regulation are LCDR D. L. HARDER, project officer for the captain of the port, and LT C. M. McNALLY, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Regulation

The circumstances requiring this regulation resulted from the destruction of oil island Esther, and related navigational aids on the Island by recent storms.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

PART 165—[AMENDED]

Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by adding a new § 165.T1128 to read as follows:

§ 165.T1128 Safety Zone: San Pedro Bay, California.

(a) *Location.* The waters bounded by the following coordinates are a safety zone: 33°43'15" N., 118°06'52" W.; 33°43'15" N., 118°06'39" W.; 33°43'03" N., 118°06'39" W.; 33°43'03" N., 118°06'52" W.

(b) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the captain of the port.

(33 U.S.C. 1225 and 1231; 49 CFR 1.46; 33 CFR 165.3)

Dated: April 7, 1983.

J. H. Guest,

Captain of the Port, Los Angeles/Long Beach.

BILLING CODE 4910-14-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6390

[ES 30968]

Minnesota; Partial Revocation of Executive Order No. 5003

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes an Executive order insofar as it affects 20,471.67 acres of public land withdrawn as a watershed management area. This action will restore these lands to surface entry and mineral leasing. The lands remain closed to mining.

EFFECTIVE DATE: June 24, 1983.

FOR FURTHER INFORMATION CONTACT: Barry E. Crowell, Eastern States Office, 703–235–2846.

By virtue of the authority vested in the Secretary of the Interior by Section 204(a) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Executive Order No. 5003 of December 3, 1928, which withdrew the following described public lands for use in connection with the Rainy Lake Watershed is hereby revoked as to the following described lands:

Fourth Principal Meridian

T. 69 N., R. 22 W.
T. 70 N., Rs. 22, 23, 24, 25, 26, 27 W.
T. 71 N., Rs. 22, 23, 24 W.

Fifth Principal Meridian

T. 158 N., R. 25 W.
T. 159 N., Rs. 25, 26 W.
T. 160 N., Rs. 25, 26, 27, 28, 29, 30, 31 W.
T. 161 N., Rs. 31, 32 W.
T. 162 N., R. 32 W.

Less and excepting the following described land which shall remain subject to the terms of the withdrawal and under the administrative jurisdiction of the Corps of Engineers:

Fifth Principal Meridian

T. 162 N., R. 32 W.
Sec. 16, lot 3 (5.85 acres).

The lands aggregate approximately 20,471.67 acres in Koochiching and Lake of the Woods Counties.

2. At 8:00 a.m. on June 24, 1983, the lands will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid applications received at or prior to 8:00 a.m. on June 24, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands will be open to applications and offers under the mineral leasing laws at 8:00 a.m. on June 24, 1983. The lands remain closed to mining.

Inquiries concerning the lands should be addressed to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304.

Dated: May 19, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

[FR Doc. 83-14112 Filed 5-25-83; 8:45 am]

BILLING CODE 4310-84-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 81 and 83

[Docket No. 21349; FCC 83-196]

Amendment To Implement Changes in Frequencies, Operating Procedures, and Other Criteria Relating To Radiotelephony in the Band 4000 to 23000 kHz in the Maritime Mobile Services Adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action implements a frequency allotment plan for HF maritime radiotelephone utilization. Essentially, a temporary assignment plan which has been in effect since 1978, is made permanent. This action results from changes adopted at the World Maritime Administrative Radio Conference, Geneva, 1974. These amendments will bring the rules into conformance with international frequency allotments.

EFFECTIVE DATE: June 17, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Nicholas Bagnato, Private Radio Bureau (202) 632–7175.

List of Subjects

47 CFR Part 81

Coast stations, Radio, Telephone.

47 CFR Part 83

Ship stations, Radio, Telephone.

Report and Order (Proceeding Terminated)

Amendment of Parts 81 and 83 to implement changes in frequencies, operating procedures and other criteria relating to radiotelephony in the band 4000 to 23000 kHz in the maritime mobile services adopted at the ITU World Maritime Administrative Radio Conference, Geneva, 1974; Docket No. 21349.

Adopted: April 27, 1983.
Released: May 11, 1983.

By the Commission. Commissioner Jones absent.

1. In this Report and Order we are adopting the frequency assignment plan

VOL 48 ISS 103 MAY 26 1983 UMI

which had been proposed for high seas ship and coast radiotelephony stations. We are also treating applications for new high seas coast radiotelephony services filed during the pendency of this proceeding. Further, two petitions for reconsideration filed in Docket Nos. 20449 and 20906 are in effect mooted by the actions taken herein and, therefore, are being dismissed.

Background

Frequency Assignment Plan

2. The World Maritime Administrative Radio Conference, Geneva, 1974, (WARC) amended the high frequency (HF) spectrum plan allotting frequencies for ship-shore radiotelephony in the international Radio Regulations. Although the total number of channels was increased from 137 to 176 worldwide, the number of nations sharing the channels was also increased in the revised allotment plan which went into effect in January 1978. The United States notified the International Frequency Registration Board of the use by coast stations of all frequencies it is allotted. (The frequency allotment for the United States is divided between Government and non-Government stations.)

3. Subsequent to the WARC's revised allotment plan, the Commission issued a Notice of Inquiry [1] in this proceeding seeking comments concerning the assignment of the HF radiotelephone frequencies to non-Government ship and coast stations. After reviewing the comments, a Temporary Frequency Assignment Plan was adopted [2] which essentially provided a one-for-one replacement of the frequencies previously utilized by coast stations. In some cases where additional frequencies were available, coast stations which had been required to share frequencies with other U.S. coast stations, were assigned frequencies without such U.S. sharing arrangements. The Temporary Plan was designed to meet the WARC implementation date while providing time to investigate potential problem areas.

4. After implementation of the Temporary Plan, the Commission requested the existing licensees of HF radiotelephony coast stations to provide utilization data for all assigned frequencies.[3] Upon preliminary review of the utilization data submitted and noting the lack of complaints from the user community, the Commission proposed to finalize the Temporary Plan in the Notice of Proposed Rule Making (NPRM)[4] with minor modifications. Additionally, reorganization and clarification of several rule sections were proposed.

New Station Applications

5. Additionally, the Commission has four pending applications seeking new HF radiotelephone frequency assignments:

(a) RadioCall Corporation (RadioCall), the licensee of VHF public coast stations KGW423, Honolulu, and KLU758 Wailuku, Hawaii, seeks authority (File No. 237–M–L–31) to provide high seas radiotelephone service on four frequencies previously assigned to Honolulu station KQM which closed in 1978.

(b) Gulf Coast Communications Corporation (Gulf Coast), Palmetto, Florida, the licensee of public coast station KUZ383 providing local area service in the 156–162 MHz (VHF) band, requests (File No. 81–M–L–93) assignment of a frequency in the 4 MHz band to serve the Gulf of Mexico and the Caribbean Sea.

(c) Global Communications, Inc. (Global), St. Thomas, U.S. Virgin Islands, a licensee of public coast station WAH requests authority (File No. 8–M–ML–110) to modify its license to provide high seas radiotelephone service in the Caribbean area on twelve specified frequencies.

(d) WJG Telephone Company, Inc. (WJG), Memphis, Tennessee, the licensee of a number of public coast stations providing local (VHF) and regional (MF) service on the Mississippi River System, requests authority (File No. 276–M–ML–22) to provide high seas radiotelephony service on HF frequencies.

The NPRM noted that applications were pending from Gulf Coast, Global and General Telephone Company. The General Telephone Company's application has been withdrawn. WJG filed its application after the NPRM was issued. RadioCall's application preceded the NPRM but was inadvertently omitted from that document. Thus, the four applications described above are currently pending before the Commission.

Comments

6. Comments in this proceeding were filed by the following:

—AMCOM, Inc. (AMCOM);
—American Telephone and Telegraph Company (AT&T);
—Mobile Marine Radio, Inc. (MMR);
—WCM Radio Pittsburgh, Inc. (WCM); and
—WJG Telephone Company, Inc. (WJG).

Reply comments were received from AMCOM, AT&T, Global Communications, Inc. (Global), MMR, and WJG.

Frequency Assignment Plan

7. All the commenters generally supported the finalization of the Temporary Assignment Plan. AT&T requested a minor modification in the assignment of frequencies among its three stations. Additionally, all the commenters argued that additional frequency assignments were required to alleviate interference problems experienced from the co-channel operations of foreign stations, and/or to provide frequencies for new entries in this service.[5] In essence, they suggest that the Commission seek additional frequencies from existing Government assignments and allocate International Fixed Public Radio Service (IFPRS) frequencies to the Maritime Mobile Service on a secondary basis.

8. In view of the successful performance of the Temporary Assignment Plan and the support of the commenters, we conclude that at this time the plan should be implemented substantially as proposed. Minor modifications are being made, however, to accommodate suggestions and clarifications as well as to provide for assignments to certain stations as a result of the actions taken on pending applications specified below.

New Station Applications

RadioCall

9. RadioCall applied for four frequencies to provide high seas service in the Hawaiian Islands. This service was previously provided by public coast station KQM which has discontinued service. No opposition was received concerning RadioCall's application. Further, it appears no interference will result from the assignment of these frequencies as requested. Accordingly, we conclude that it is in the public interest to grant RadioCall's application.

Gulf Coast

10. Gulf Coast applied for assignment of a 4 MHz frequency to augment the primarily local service it provides in the Tampa, Florida area. However, the Commission found Gulf Coast unqualified to remain a licensee and denied its applications for license renewal and an additional channel in a separate proceeding.[6] Gulf Coast has filed an appeal of this decision in the U.S. Court of Appeals for the District of Columbia.[7] We will hold Gulf Coast's application for a 4 MHz frequency assignment pending action on its appeal by the Court.

Global

11. Although Global initially requested assignment of twelve specified HF frequencies, it withdrew its request for seven of these frequencies as a result of petitions to deny filed by AT&T and MMR. Essentially, these seven frequencies would cause unacceptable interference with AT&T's public coast station located at Miami, Florida, and MMR's public coast station located at Mobile, Alabama. AT&T also opposes Global operating on three of the remaining five HF frequencies for which it continues to seek authorization. AT&T argues that under certain conditions Global's use of 17236.0 kHz, 17239.1 kHz, and 22664.2 kHz would cause harmful interference to its public coast station location at San Francisco, California. Global, however, states that given the distance between its station in the Virgin Islands and AT&T's San Francisco station, as well as the time zone difference, no insurmountable barrier to sharing these three frequencies exists. Global indicates it is confident that technical and operating protocols can prevent interference and, therefore, requests assignment of the subject frequencies on a secondary basis.

12. We find that it is in the public interest to grant Global's application for modification of its station license (WAH, St. Thomas, U.S. Virgin Islands) to add the frequencies 6515.7 kHz and 6518.6 kHz, and on a secondary basis to station KMI (San Francisco, California) to add the frequencies 17236.0 kHz, 17239.1 kHz, and 22664.2 kHz. Global's utilization of the two 6 MHz frequencies is unlikely to cause harmful interference with the stations assigned these frequencies which are located on the island waterways. Also no opposition to such an assignment was received. Further, it appears that Global can reasonably share the use of the three remaining frequencies with station KMI. The assignment of these frequencies to Global on a secondary basis minimizes any potential interference.

WJG

13. After the NPRM was issued in this proceeding, WJG filed an application to provide high seas telephony service from its Memphis, Tennessee facilities. WJG simply requested that it be assigned a full complement of HF duplex frequencies in the 4, 6, 8, 12 and 16 MHz bands. At a minimum it requested that three duplex channels (Channels 803, 1202, and 1620) be assigned. One of the pair of frequencies forming each channel was assigned to WJG for simplex use on the inland waters.[8]

14. AMCOM, AT&T, MMR, and WCM all opposed WJG's application. In regard to WJG's request for a full complement of HF frequencies, the commenters argued that such a general request could only be satisfied by the availability of additional frequencies (e.g., from current Government assignments). It is pointed out that WJG itself at paragraph 3 of its comments recognizes that frequency availability is an impediment to its application. MMR states that WJG's mere generalized request for additional frequency assignments is clearly insufficient to justify reassigning frequencies from other stations to WJG.

15. Concerning WJG's specific request for assignment of Channels 803, 1202 and 1620, WCM and AMCOM object because they share assignments with WJG on frequncies which form one-half of the subject channels. MMR argues that WJG's inland location would result in an undue degradation of service in these bands and, further, questions whether WJG has a serious intent to provide such high seas service in light of its apparent proposal to utilize the same equipment employed to provide service on the inland waterways.

16. We are dismissing pursuant to § 81.27 of the rules, WJG's application for modification of its station authorization to provide high seas telephony service. As WJG itself tacitly recognizes, and as the comments argue vociferously, at this time frequency availability precludes the assignment of a full complement of frequencies in the 4, 6, 8, 12 and 16 MHz bands to WJG. Additionally, WJG fails to identify which specific frequences it seeks assignment in each megahertz order. Further, it appears that assignment of Channels 803, 1202 and 1602 would cause harmful interference to other stations providing service on the inland waterways. In fact, considering WJG's stated heavy use of its HF simplex frequencies (which form part of these Channels) it appears that proposed duplex operations would interfere with its own service on the inland waterways.

Future Action

17. Although we are adopting the Temporary Plan, we recognize that by assigning all of the available frequencies to existing stations, new entry into this service will be extremely limited. Therefore, we are exploring or intend to explore a number of potential solutions to this problem. First, we will investigate the possibility of the sharing of some existing Government frequency allotments by non-Government users. Second, implementation of the Final Acts of the 1979 World Administrative Radio Conference may offer some spectrum relief by making available new assignments for marine HF telephony in the 4 and 8 MHz bands.[9] We are also exploring with the National Telecommunications and Information Administration (NTIA) the possibility of obtaining additional frequency assignments through applications filed in the Experimental Service.[10] If these operations prove feasible, explansion of assignments in the Maritime Service may be possible.

18. Finally, our analysis of frequency utilization data supplied by licensees during the course of this proceeding indicates that more efficient utilization of these frequencies may be possible. The data does not dissuade us from the conclusion that the temporary frequency assignment plan should be made permanent. In this respect we agree with the commenters. But it is sufficient to convince us to explore, in a future proceeding, methods of improving the utilization of HF frequency assignments. We intend to investigate the possibility of establishing loading criteria for this

[1] FCC 77–810, released August 5, 1977, 42 FR 40224.

[2] Order, Docket No. 21349, FCC 77–785, released November 10, 1977, 42 FR 60145.

[3] The requests for utilization data were made by letters dated March 27, 1980, and July 8, 1980.

[4] Docket No. 21349, FCC 81–547, released December 11, 1981, 46 FR 42113.

[5] The Commission stated in the Report and Order in PR Docket No. 80–583, FCC 81–551, released December 10, 1981, 46 FR 60457, that it recognized the shortage of frequencies in the high seas radiotelephony service. Further, in the Final Protocol to both the World Maritime Administrative Radio Conference, Geneva, 1974 (at XII) and the World Administrative Radio Conference, Geneva, 1979 (at No. 38) the United States noted the inadequacy of the HF allotment plan for coast radiotelephone stations and reserved the right to make other assignments.

[6] See *Gulf Coast Communications, Inc.*, PR Docket Nos. 78–259 (File No. 40–M–RL–28) and 78–280 (File No. 179–M–ML–54), 81 FCC 2d 499 (Rev. Bd. 1980), *recon. denied*, FCC 81R–11, released February 4, 1981, *review denied*, FCC 82–128, released April 16, 1982, *Pet. for recon. dismissed*, FCC 82I–53, released June 7, 1982.

[7] *Gulf Coast Communications Inc. v. FCC*, D.C. Cir. No. 82–1760.

[8] Although WJG did not submit utilization reports as requested (WJG states that it did not receive the two letter requests), it did state that it used its existing HF simplex assignments for over eight hours per day on average, for communications with vessels.

[9] See, *Notice of Proposed Rule Making*, General Docket No. 80–739, FCC 82–508, released December 30, 1982, 48 FR 3790.

[10] MMR, AT&T, and Global have filed applications for experimental (research) authority for such cross-band operations.

VOL 48 ISS 103 MY 26 1983 UMI

service.[11] Frequencies that remain underutilized could become subject to reassignment or sharing. Additionally, we wish to look toward added flexibility in the types of service which can be provided on maritime frequencies (for example, data and facsimile) without increasing interference potential. Further, the traditional dichotomy between stations providing voice and record services may no longer be valid.[12] Thus, it may be advantageous to consider, in this subsequent proceeding, permitting International Record Carriers (IRC's) to provide voice services and allow AT&T to provide non-voice communications services.

Summary of Action

19. In summary, we are: (1) Amending the rules to adopt the proposed Assignment Plan with minor modifications and clarifications, (2) granting RadioCall's application to provide high seas service in the Hawaiian Islands, (3) retaining Gulf Coast's application for a 4 MHz frequency on file pending action by the U.S. Court of Appeals on its appeal, (4) granting Global's application for five HF frequencies to provide HF radiotelephony service in the U.S. Virgin Islands, and (5) dismissing WJG's application to provide HF high seas radiotelephony service at Memphis, Tennessee.

20. Additionally, we are dismissing as moot petitions for reconsideration filed by AT&T in Docket Nos. 20449 and 20906. These petitions relate to HF radiotelephony assignments to MMR which predate the Temporary Assignment Plan. The finalization of the Plan in this proceeding supersedes the issues raised by AT&T. Therefore, the petitions are moot.

21. The rule amendments proposed in this proceeding essentially implement changes adopted by the World Maritime Administrative Radio Conference, Geneva, 1974. In effect, the rules maintain the *status quo* among high seas radiotelephone coast stations, ship stations and stations on the inland waterways operating on HF frequencies. Therefore, the Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not aply to this rule making proceeding, because the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

22. Regarding questions on matters covered in this document contact Nicholas G. Bagnato or Robert H. McNamara (202) 632–7175.

23. Accordingly, *it is ordered*, That under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r), the Commission's rules *are amended* as set forth in the attached Appendix, effective June 17, 1983.

24. *It is further ordered*, That the application of RadioCall Corporation, File No. 237–M–L–31, for authority to operate a high seas public coast radiotelephony station located in Honolulu, Hawaii, *is granted*.

25. *It is further ordered*, That the application of Global Communications, Inc., File No. 8–M–ML–110, as amended to modify its authority to operate public coast station WAH to include high seas radiotelephony service on the frequencies 6515.7 kHz and 6518.8 kHz, and, on a secondary non-interference basis to station KMI, 17236.0 kHz 17239.1 kHz and 22664.2, *is granted*.

26. *It is further ordered*, That the application of WJG Telephone Company, Inc. (File No. 276–M–ML–22) to modify its authorization to operate public coast station WJG, *is dismissed*.

27. *It is further ordered*, That the Petition For Reconsideration filed by American Telephone and Telegraph Company in Docket No. 20449 *is dismissed* as moot.

28. *It is further ordered*, That the Petition For Reconsideration filed by American Telephone and Telegraph Company in Docket No. 20906 *is dismissed* as moot.

29. *It is further ordered*, that this proceeding is terminated.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

1. In § 81.134, paragraph (c)(1) is revised as follows:

§ 81.134 Transmitter power.

* * * * * *

(c) * * *

(1) For carrier frequencies other than 2638 kHz and those frequencies listed in § 81.361(a):

Frequency band (kHz)	Class of emission	Power (peak envelope power)
2000 to 4000	A3A, A3H,[2] A3J [1]	800 watts by day. 400 watts by night. 10 kilowatts.
4000 to 27,500	A3A, A3J	

[1] When using 2182 kHz for purposes other than distress calls and distress traffic, and urgency and safety signals and messages, the carrier power of limited coast stations shall not exceed 50 watts for A3J emission.
[2] Use of A3H on 2182 kHz is limited for communications with foreign ships.

* * * * * *

2. In § 81.186, paragraph (d) is revised as follows:

§ 81.186 Hours of service of stations on land.

* * * * * *

(d) Unless otherwise specified for particular stations, the hours of service of each public regional coast station or public local service (VHF) coast station shall, within the scope of its normal operation, be such as to meet the requirements of the particular region served by the station.

* * * * * *

§ 81.304 [Amended]

3. In § 81.304 the table in paragraph (a) is revised, and certain subparagraphs in paragraph (b) are redesignated and the remaining subparagraphs are removed.

Sections 81.304(b)(3), (4), (5), (10, (12), (13), (14), (15), (16), (17), (18), (19), (20), (23), (28), (30), (31), (32), (33), (34), (35), (36), (37), (38), (39), (40), (41), (42), (43), (45), (46), (47), (48), (49), (51), (53), (54), (55), (56), (57), (58), (59), (60), and (61) are removed.

4. In § 81.305 paragraph (a) is revised to read as follows:

§ 81.305 Frequencies for calling and distress.

(a) In the band 1605–4000 kHz, the frequency 2182 kHz is the international radiotelephone distress, safety and calling frequency and shall be assigned to all public coast stations operating on frequencies in the band 1605–4000 kHz. In the band 156–162 MHz, the frequency 156.800 MHz is the international distress, safety and calling frequency and shall be assigned to all public coast stations operating in the band 156–162 MHz. 2182 kHz and 156.8 MHz may be used by public coast stations solely for the transmission of:

* * * * * *

5. Section 81.306 is revised to read as follows:

§ 81.306 Frequencies available below 27.5 MHz.

(a) Frequencies between 4000 and 23000 kHz available for assignment to public coast stations:

St. Thomas Island, VI	2506	2009	

(1) Available on the condition that harmful interference is not caused to any ship station operating within 300 nautical miles of New Orleans, LA and is transmitting to a coast station in that port.

(2) Day only.

(3) Unlimited hours of use from December 15 to April 1, annually, and day only from April 1 to December 15, annually, on the condition that harmful interference shall not be caused to the service of any ship station in the Great Lakes area.

(4) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Boston, Massachusetts, or San Francisco-Eureka, California.

(5) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Norfolk-Quantico, Virginia.

(6) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Tampa, Florida.

(7) Authorized for use south of 51 degrees north latitude and east of 142 degrees west longitude exclusively during the following daily periods on the condition that harmful interference is not caused to the service of any station in the Alaska area to which this carrier frequency is assigned: Annually from April 1 to September 30, inclusive, from 5 a.m. to 9 p.m., P.s.t., only; and annually from October 1 to March 31, inclusive, from 6 a.m. to 11 p.m. P.s.t., only.

(8) The frequencies 2514, 2550 and 2582 kHz are authorized for use in the Great Lakes area on a shared basis with stations of Canada. Except in the case of distress, the frequency 2550 kHz shall not be used for transmission to ship stations of Canada since the associated ship station transmit frequency 2158 kHz is not available to Canada ship stations for transmission and 2582 kHz shall not be used for transmission to U.S. ship stations since the associated ship transmit frequency 2206 kHz is not available to U.S. ship stations for transmission.

6. Section 81.307 is amended by revising the heading and text to read as follows:

§ 81.307 Frequencies below 27.5 MHz available for assignment on the Mississippi River System.[1]

(a) The following frequencies are available for assignment to coast stations located on the inland waterways for use on a simplex basis, as indicated below:

Coast station location	Carrier frequency (kilohertz)
Jeffersonville, IN-Louisville, KY	[1] 2086.0
	2782.0
	4115.7
	6518.8
	8725.1
	13,103.9
	17,291.8
Memphis, TN	[1] 2086.0
	2782.0
	4087.8
	6209.3
	8201.2
	12,333.1
	16,518.9
Cincinnati, OH	[1] 2086.0
	2782.0
	4083.0
	6515.7
	8213.6
	12,333.1
	16,518.9
St. Louis, MO	[1] 2086.0
	2782.0
	4410.1
	6212.4
	8737.5
	13,103.9
	17,291.8

[1] Limited to a maximum output power of 150 watts (PEP)

7. Section 81.308 is revised as follows:

§ 81.308 Frequencies available in Alaska.

(a) The carrier frequencies set forth in the following table are authorized for use by common carrier public coast stations in Alaska for communication with ship stations.

Coast station location	Carrier frequency (kilohertz) [1]	
	Transmit	Receive
Cold Bay	2312	2134
Cordova	2397	2237
Juneau	2400	2240
Ketchikan	2397	2237
Kodiak	2399	2131
Nome	2400	2240
Sitka	2312	2134

[1] Subject to the limitations in § 81.304

[1] Mississippi River System means the Mississippi River and connecting waters other than the Great Lakes.

(b) The carrier frequencies set forth in the following table are authorized for use by public coast stations, other than common carrier, in Alaska as indicated below. Frequencies designated for use in a zone of the Alaska area are available only to coast stations located in that zone.

Alaska zone	Carrier frequency (kilohertz) [1]	Conditions of use	
		Section	Limitations

Sections 83.351(b)(2), (4), (5), (7), (14), (15), (16), (18), (19), (20), (21), (22), (24), (27), (28), (31), (32), (33), (35), (39), (42), (56), (60), (65), (69), (70), (71), (73) and (74) are removed.

2. Section 83.354, including its heading, is revised to read as follows:

§ 83.354 Frequencies available for communication with public coast stations on frequencies between 4000 and 23000 kHz.

The following frequencies are authorized for use by ship stations for communications with high seas public coast stations.

Coast station location	Channel designation	Ship carrier frequency (kilohertz)	
		Transmit	Receive
San Francisco, CA	401	4063.0	4357.4
	416	4109.5	4403.9
	417	4112.6	4407.0
	804	8204.3	8726.2
	809	8219.8	8743.7
	814	8235.3	8759.2
	822	8260.1	8784.0
	1201	12,330.0	13,100.8
	1202	12,333.1	13,103.9
	1203	12,336.2	13,107.0
	1229	12,416.8	13,187.6
	1230	12,419.9	13,190.7
	1602	16,463.1	17,236.0
	1603	16,466.2	17,239.1
	1616	16,506.5	17,279.4
	1624	16,531.3	17,304.2
	2214	22,040.3	22,636.3
	2223	22,068.2	22,664.2
	2228	22,083.7	22,679.7
	2236	22,108.5	22,704.5
New York, NY	410	4090.0	4385.3

Kahuku, HI	2134	2530	
St. Thomas Island, VI	2009	2506	8 a.m. to 9 p.m., A.s.t. only.

(1) Available on the condition harmful interference is not caused to the service of any coast station located in the vicinity of New Orleans, La.

(2) Day only.

(3) Unlimited hours of use from December 15, to April 1, annually, and day only for April 1 to December 15, annually, on the condition that harmful interference shall not be caused to the service of any ship station in the Great Lakes area.

(4) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Boston, Mass., or San Francisco-Eureka, California.

(5) Available on the condition that harmful interference is not caused to the service of any station located in the vicinity of Norfolk-Quantico, Va.

(6) Available on the condition that harmful interference is not caused to the service of any coast station located in the vicinity of Tampa, Fla., or any ship station located in the vicinity of New Orleans.

(7) Available on the condition that harmful interference is not caused to any ship station located in the vicinity of Los Angeles or San Diego, Calif.

(8) Authorized for use south of 51 degrees north latitude and east of 142 degrees west longitude exclusively during the following daily periods on the condition that harmful interference is not caused to the service of any station in the Alaska area to which this carrier frequency is assigned: Annually from April 1 to September 30, inclusive, from 5 a.m. to 9 p.m., P.s.t., only; and annually from October 1 to March 31, inclusive, from 6 a.m. to 11 p.m., P.s.t. only.

(9) Not available to U.S. ship stations for transmission, except in the case of a distress.

4. A new § 83.356 is added, to read as follows:

§ 83.356 Frequencies below 27.5 MHz available for use on inland waterways.

The following frequencies are authorized for use by ship stations in a simplex mode for communication with coast stations on inland waterways, as indicated below:

Coast station location	Carrier frequency (kilohertz)
Jeffersonville, IN; Louisville, KY	[1] 2086.0
	2782.0
	4115.7
	6518.8
	8725.1

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 367]

Railroad Transportation Contracts; Equipment Limitation Provisions

AGENCY: Interstate Commerce Commission.

ACTION: Amendment to final rules.

SUMMARY: The Commission is modifying its final rules promulgated in *Railroad Transportation Contracts*, 367 I.C.C. 9 (1982) published at 47 FR 50261 (November 5, 1982) as corrected at 47 FR 58274 (December 30, 1982), to comport with the provisions of Section 502 of the Rail Safety and Service Improvement Act of 1982 (Pub. L. No., 97–468). Section 502 exempts wood pulp, wood chips, pulpwood, and paper from the equipment limitation provisions of 49 U.S.C. 10713(k)(1). Therefore, that portion of the newly promulgated rules at 49 CFR 1039.6 which codify the equipment limitation provisions of 49 U.S.C. 10713(k)(1) must be modified to exclude the newly exempt commodities.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Alan Greenbaum, (202) 275–7322, or Donald J. Shaw, Jr., (202) 275–7656.

SUPPLEMENTARY INFORMATION: By decision served November 4, 1982, in *Railroad Transportation Contracts*, 367 I.C.C. 9 (1982) we promulgated final rules which prescribe procedures for filing and adjudicating rail contracts under 49 U.S.C. 10713. The rules which were published at 47 FR 50261 (November 5, 1982) as corrected at 47 FR 58274 (December 30, 1982) amend the contract and tariff regulations, respectively, at parts 1039 and 1300 of Title 49 of the Code of Federal Regulations.

On January 14, 1983, President Reagan signed into law the Rail Safety and Service Improvement Act of 1982 (Pub. L. No. 97–468). Section 502 of that legislation exempts wood pulp, wood chips, pulpwood, and paper from the equipment contract limitations of 49 U.S.C. 10713(k).[1] These contract limits may be exceeded only with Commission approval. See 49 U.S.C. 10713(k) (1) and (2). Thus, section 502 has eliminated those limitations as well as Commission jurisdiction under section 10713(k) as to the commodities named in section 502.

List of Subjects in 49 CFR Part 1039

Agricultural commodities, Intermodal transportation, Railroads.

This notice is being issued to amend that portion of the final rules codified at 49 CFR 1039.6 in order to comport with the new exemption provisions set forth in section 502.

[1] Section 502 reads as follows: Section 10713(k)(1) of Title 49, United States Code is amended, by striking "and paper)" and inserting in lieu thereof "but not including wood pulp, wood chips, pulpwood or paper."

PART 1039—CONTRACTS—[AMENDED]

Specifically, Part 1039 of Title 49 of the Code of Federal Regulations is amended as follows:

§ 1039.6 is amended by revising paragraph (a) to read as follows:

* * * * *

§ 1039.6 Limitation on agricultural equipment; and relief.

(a) A rail carrier may enter into contracts for the transportation of agricultural commodities (including forest products but not including wood pulp, wood chips, pulpwood or paper) that involve the use of carrier owned or leased equipment not in excess of 40 percent of the total number of the carrier's owned or leased equipment, by major car type, except as provided in paragraph (b) of this section.

* * * * *

We certify that this modification of rules will not have a significant economic impact on a substantial number of small entities. It merely codifies section 502 which has been in effect since its date of enactment, January 14, 1983.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

This modification is issued pursuant to 49 U.S.C. 10101a, 10713, and 5 U.S.C. 553.

Dated: May 19, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Proposed Rules

Federal Register
Vol. 48, No. 103
Thursday, May 26, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1446

General Regulations Governing 1982 Through 1985 Crops Peanut Warehouse Storage Loans and Handler Operations

Correction

In FR Doc. 83–13287 beginning on page 22318 in the issue of Wednesday, May 18, 1983 make the following corrections:

1. On page 22318, column three, **SUMMARY,** line seventeen, "June 28. 1982" should read "June 29, 1982."

2. On page 22319, column one **SUPPLEMENTARY INFORMATION,** paragraph two, line five, "use" should read "used."

3. On page 22319, column two, paragraph one, line three, "Agicultural" should read "Agricultural."

4. On page 22319, column two, paragargph one, line five, "tone" should read "ton."

BILLING CODE 1505-01-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 40

Uranium Mill Tailings Regulations; Proposed Suspension of Selected Provisions

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed suspension of regulations.

SUMMARY: The Nuclear Regulatory Commission is proposing to suspend selected portions of its regulations dealing with the disposal of uranium mill tailings. The provisions for which suspension is proposed are those which would be affected by recently published proposed Environmental Protection Agency (EPA) standards for protection of the environment from these wastes. The result of the suspension will be to place in abeyance certain Commission regulations that could have a significant cost impact on its licensees if the regulations are implemented before the Commission makes the anticipated rule changes necessary to conform the regulations to the EPA standard when it is finalized. This action is necessary to comply with recently enacted legislation.

DATE: The comment period expires on June 27, 1983. Because of the extremely limited period of time (90 days) allowed by the Congress for effecting the suspension under notice and comment procedure, late comments will not be considered.

ADDRESSES: Mail comments to Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or deliver comments to Room 1121, 1717 H Street NW, Washington, DC between 8:15 am and 5:00 pm weekdays.

FOR FURTHER INFORMATION CONTACT: Robert Fonner, Office of the Executive Legal Director, telephone (301) 492–8692, or Kitty Dragonett, Low-Level Waste Licensing Branch, Division of Waste Management, NMSS, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 427–4160.

SUPPLEMENTARY INFORMATION: Section 18(a) of Pub. L. 97–415, the Nuclear Regulatory Commission Authorization Act for fiscal years 1982 and 1983, requires the Commission to suspend implementation and enforcement of certain provisions of its regulations on uranium mill licensing promulgated as final rules on October 3, 1980 (45 FR 65521–65538). The suspension is to be accomplished by notice and comment procedures and be completed within 90 days after the Environmental Protection Agency (EPA) publishes proposed general environmental standards for uranium mill tailings pursuant to Section 275b of the Atomic Energy Act of 1954, as amended. Those portions of the Commission's regulations required to be suspended are those that would require a major commitment or major action by licensees which would be unnecessary if (1) the EPA proposed standards are promulgated in final form without modification, and (2) the Commission's regulations are modified to conform to the EPA standards. Under the legislative scheme, the suspension is a precursor to subsequent modification of the Commission's regulations. A prime objective of the suspension is to avoid a situation in which a licensee might undertake a major commitment that would not be required after a subsequent Commission rulemaking modifying its October 3, 1980 regulations. Congress also mandated that any suspension of portions of Appendix A of 10 CFR Part 40 (the October 3 regulations) be effective until April 1, 1984 or the effective date of rulemaking to change Appendix A to conform to any final EPA standards, whichever comes first.

On April 29, 1983, the EPA published its proposed environmental standards for uranium mill tailings at licensed commercial processing sites. *See* 48 FR 19584. The EPA proposes standards both for operating mill tailings disposal sites and for reclaimed and closed tailings disposal sites. The Standard for operating disposal sites (*see* proposed 40 CFR 192.32(a)) is predominantly a ground water quality protection standard based upon principles of ground water protection embodied in EPA's recently promulgated rules implementing the Resource Conservation and Recovery Act (RCRA) amendments to the Solid Waste Disposal Act (SWDA). These latter rules were published as final rules in the **Federal Register** on July 26, 1982, 47 FR 32274–32368. Persons commenting on the Commission's proposed suspension of rules are advised to examine the applicable EPA RCRA/SWDA rules as well as the EPA proposed tailings management standards, and not to rely totally on the description of the EPA rules given in this notice.

Proposed 40 CFR 192.32(a) expressly references 40 CFR 264.92–95, and 264.221 as applicable to operating uranium mill tailings disposal. 40 CFR 264.221 primarily requires that surface impoundments be lined in order to prevent migration of hazardous constituents to adjacent soil or ground water. Exemptions from the liner requirement are possible. 40 CFR 264.92–95 establish that hazardous constituents (as listed in 40 CFR Part 261, Appendix VIII) entering ground water must not be allowed to exceed the background limits for the constituent, or the listed concentration limits for 14 listed hazardous constituents in the National

VOL 48 ISS 103 MAY 26 1983 UMI

Interim Primary Drinking Water Standards. *See* 40 CFR 264.94, Table 1.2. (If background for any of the 14 listed hazardous constituents exceeds the listed limit, then the background concentration applies.) The proposed EPA rule would add uranium and molybdenum to the list of hazardous constituents in 40 CFR Part 261, Appendix VIII. Proposed 40 CFR 192.32(a) also adds limits for radioactivity in ground water: 5 picocuries of combined radium-226 and radium-228 per liter, and 15 picocuries of gross alpha activity per liter.

The referenced EPA RCRA standards are essentially nondegradation standards (except when background for the 14 listed constituents is below the listed concentrations) and are applied to the uppermost aquifer at the down-gradient edge of the surface impoundment. The EPA standard in proposed 40 CFR 192.32(a) contains a procedure and a reference to criteria for removing hazardous constituents from the list or changing concentration limits. Finally, the EPA standard requires application of Federal Radiation Protection Guidance to radon emissions from operating tailings disposal sites to achieve levels as low as reasonably achievable. (This requirement is already reflected in the Commission's rules in 10 CFR 20.1(c).)

Proposed 40 CFR 192.32(b) contains standards applicable after the tailings site is closed. First, compliance with the closure performance standards in 40 CFR 264.111 is expected for nonradiological hazards. (40 CFR 264.111 was published in 46 FR 2849, January 12, 1981). The performance standards referenced are that the closure (1) minimizes the need for further maintenance, and (2) controls, minimizes or eliminates to the extent necessary to prevent threats to human health and the environment, post-closure escape of hazardous waste, hazard waste constituents, leachate, contaminated rainfall, or waste decomposition products to the ground or surface waters or to the atmosphere.

Second, the measures for control of radiological hazards shall be design to be effective for 1,000 years, to the extent reasonably achievable, and in any case, for at least 200 years.

Third, it requires the operator to provide reasonable assurance in design of radiological control measures that releases to the atmosphere of radon-222 from the covered tailings not exceed an average rate of 20 picocuries per square meter per second. The release average is to be applied over the entire disposal area for at least 1 year. These standards need not be applied to areas where the radium-226 concentration is less than 5 picocuries per gram average in the first 15 centimeters of soil and no more than 15 picocuries per gram below 15 centimeters below the surface. Some of the factors EPA discussed in evaluating the effectiveness of covers to limit radon releases included the types and thickness of cover materials (e.g., soils, clays), the moisture content, the emission rate from the tailings, and reliability of the cover materials. The design of the cover should take into account these factors, some of which may vary (e.g., with the seasons) and some of which may not. By specifying an average over both time and area, EPA has recognized the need to consider factors such as seasonal moisture content, soild fissures, and variations in the composition of locally available cover materials.

The proposed EPA standard also includes standards for management of thorium tailings and wastes. Proposed 40 CFR 192.40–43 provide that the EPA standards for uranium wastes apply to thorium wastes with thorium substituted for uranium and radon-220 substituted for radon-222. Both the standards applicable during operation and closure and during post-closure are applied. Flexibility for substitute provisions is explicitly provided. The Commission's rules in Appendix A of 10 CFR Part 40 address requirements for disposal of thorium mill tailings wastes but do not address requirements applicable during operation of such mills. No licensed thorium mill is currently operating.

Commission Approach

The Commission has assumed that any licensee may at any time implement any part of the rule or use any part of the rule in siting or design efforts. For example, a licensee may enter into engineering design contracts based on the rule or a licensee may begin to operate a uranium mill tailings disposal site or to close one pursuant to the Commission's requirements. The Commission has also assumed that potential planning design, or engineering actions that might be taken by a licensee to implement or use the rule may be a major commitment of resources on the part of the licensee. The Commission's approach simplifies the task of deciding which of its affected regulations should be suspended since it assumes that each portion of the affected regulations has the potential for implementation by licensees. The Commission believes this approach is justified in light of the short statutory deadline for the required suspension action, the possible continuing Congressional suspension of all portions of the NRC's regulations, and the Commission's continuing authority to regulate uranium mill tailings disposal on a case-by-case basis until final EPA standards are issued and the Commission has adopted conforming changes to its regulations. The Commission has not tried to survey all of its uranium milling licensees to determine whether closed mills will reopen soon, whether expansion of existing disposal areas is planned, etc., in order to try to judge whether a specific provision could significantly impact a licensee but as a practical matter would not. The time constraints under which this suspension proceeding is undertaken preclude the gathering of this information from licensees under the Paperwork Reduction Act.

The Congressional mandate directs suspension of any provision that may result in a major action or major commitment by licensees. A major action or commitment by licensees resulting from reliance on Commission regulations can be affected by the proposed EPA standards that represent both more and less restrictive requirements. In general, the EPA standard is less restrictive on tailings covers and stability and more restrictive on ground water protection. Licensee implementation of NRC provisions that explicitly conflict with the EPA proposal (e.g., 2 versus 20 picocuries per square meter per second limits on radon releases) and that also directly impact such factors as the amount and type of cover material can obviously lead to major commitments. Not as obvious, but having the potential for comparable commitments, are provisions that require design or remedial action to NRC standards that would be unacceptable under the EPA standard because the NRC standards are less restrictive. For example, if a new impoundment is designed and built to only protect the use category of ground water, the impoundment would be unacceptable. Design resources would be wasted and the tailings might have to be removed and placed in a new impoundment. Accordingly, the Commission has considered such corrective measures or wasted engineering resources as a major commitment.

The suspension of rules in this notice is based upon the EPA standard as stated and does not take into account the fact that exemptions from EPA standards may be made on a case-by-case basis where justified with EPA concurrence. This approach leads to suspension of some provisions that EPA considered may be a preferred alternative in its discussion and supporting documents. The use of clay liners is a specific example. The same literal approach was applied to the Commission's rule. Goals are not always explicitly identified as goals in the text of Appendix A. Since the purpose of the suspension is to minimize misdirected and costly efforts, provisions have been suspended when a literal interpretation would mandate actions that would not be mandated by the EPA standard. In this manner, the Commission can provide licensees flexibility in meeting overall standards and goals while emphasizing important considerations which developed from its own rulemaking.

A second example of a literal approach concerns the differences between the EPA standard for effective lifetime for radiological hazard control measures which states that such control should be designed to "* * * be effective for one thousand years, to the extent reasonably achievable, and, in any case, for at least 200 years." The Commission's regulations in Appendix A are based on stability for "thousands of years" with "no active maintenance." The EPA standard itself is silent on maintenance for radiological hazard controls but requires minimized maintenance for nonradiological hazards. In many cases the siting and design provisions of Appendix A are very prescriptive and appear to provide limited flexibility to licensees whereas the EPA standard may be most achievable by allowing maximum design flexibility. Thus the actual wording in the two rules on the longevity, stability, and maintenance provisions is clearly different.

The practical significance of the differences is not as clear. The Commission intends to study the significance of these differences further. Thus, the Commission's proposed suspensions should be viewed as preliminary judgments subject to further review. In the interest of avoiding unnecessary and costly efforts on the part of licensees during the interim until a final EPA rule is promulgated and conforming NRC regulations are established, the Commission has conservatively assumed that the differences in language are significant for this suspension action and that the EPA standards do not require the application of all the siting and design provisions of Appendix A. Accordingly, those provisions of Appendix A which result from application of "thousands of years" and "no active maintenance" have been proposed for suspension pending further evaluation of the significance of the different control measure longevity requirements and the different approaches to maintenance in the two rules. For example, below-grade disposal as a prime option (Criterion 3) and specific requirements on the size and properties of rocks (parts of Criterion 4) are proposed for suspension.

These requirements are reasonable for very long term stability under conditions of no active maintenance but may not be essential or the only available alternative for satisfying the 1,000-year stability and minimize maintenance provisions in the proposed EPA standards. The reason for each suspended portion of the rule reflects whether timeframes and maintenance are factors in the decision to suspend. These suspension proposals represent only a very preliminary review of the differences between the proposed EPA standards and the NRC regulations. In its further consideration of conforming changes to Appendix A, the Commission may well conclude that, as a practical matter, the differences between the NRC and EPA standards do not affect those portions of the siting and design requirements in Appendix A proposed for suspension. The Commission may well conclude, for example, following further review, that some or all of the suspended portions of Appendix A represent the preferred method for satisfying the final EPA standards. Even where the suspended portions of Appendix A do not represent an essential or preferred means of satisfying the final EPA standard, the conforming changes ultimately adopted by the Commission may only need to provide licensees additional flexibility beyond that provided in Appendix A.

The Commission recognizes that some individual sentences remaining after suspension do not always make logical or grammatical sense. However, by publishing the full text of Appendix A in the proposed suspension, the meaning should be apparent. The suspension must be considered in its entirety so that the intent and meaning can be understood. The reasons behind the suspension are thus essential to understanding the suspension.

Finally, the proposed suspension of portions of Appendix A is not an expression of Commission opinion on the proposed EPA standards. The Commission's views on the EPA standards will be stated in the Commission's formal comments on the EPA proposed rule.

Suspension

In accordance with the approach outlined above, the Commission proposed to suspend the following portions of Appendix A to 10 CFR Part 40.

1. Criterion 1.

(a) In the first paragraph suspend the phrases "* * * for thousands of years * * *" and "* * * without ongoing active maintenance * * *."

Reason: The language appears to conflict with the 40 CFR 192.32(b) standard of designing the control measures to be effective for 1,000 years. Further, 40 CFR 264.111 requires for nonradiological hazards only that the need for maintenance be minimized, not totally eliminated. EPA considered and rejected alternative standards that relied on active maintenance to protect the public health and safety from the radiological hazards of tailings. The 1,000-year period in the preferred alternative exceeds the 100-year period EPA views as reasonable to rely on institutional controls to provide active maintenance. However, the EPA standard itself is silent on maintenance for radiological hazard control measures and could thus allow some limited reliance on active maintenance for limited periods of time. The Commission would discourage planned reliance on active maintenance and, based on the supporting documentation, EPA would also.

(b) In the second listed item of the first paragraph, suspend the word "usable."

Reason: Proposed 40 CFR 192.32(a) and 40 CFR 264.92 require isolation of contaminants from all qualities of water, not just usable ground water sources.

(c) Suspend the last paragraph reading, "Tailings shall be disposed of in a manner that no active maintenance is required to preserve conditions of the site."

Reason: 40 CFR 264.111 requires only that the need for maintenance be minimized, not totally eliminated for nonradiological hazards.

2. Criterion 3.

Suspend Criterion 3 in its entirety.

Reason: The thrust of Criterion 3 is to maximize below-grade disposal of all tailings. The intent was to establish that the most effective way to assure long-term stability with no maintenance is to restore the diposal area to its original contours and thus eliminate differential erosion over a long term of thousands of years. Since the EPA standard specifies a 1,000-year design objective rather than thousands of years and "minimized" rather than "eliminated" maintenance for nonradiological hazards, the entire criterion is suspended because the EPA standard can be met without below-grade disposal. The suspension does not mean that applicants or licensees should

VOL 48 ISS 103 MAY 26 1983 UMI

not seriously consider below-grade or partially below-grade disposal on a site-specific basis. The Commission continues to believe that below-grade disposal is a very good way to minimize erosion and provide reliable control measures. EPA also expressed the view that below-grade disposal is a preferred alternative but could not justify the extra costs for across the board application.

3. Criterion 4.

(a) Suspend paragraph (a) in its entirety.

Reason: Paragraph (a) states that "Upstream rainfall catchment areas must be minimized to decrease erosion potential and the size of the maximum possible flood which could erode or wash out sections of the tailings disposal area." Consideration of upstream catchment is an important factor in evaluating design lifetimes and its consideration would be included in demonstrating compliance with the EPA standard. The use of the EPA 1,000-year objective and 200-year minimum does not necessarily require minimization of upstream catchment areas. In addition, consideration of the "maximum possible" flood may mandate action that would exceed standard or normal design practices to meet the EPA requirements for surface impoundments (40 CFR 264.221 cited in proposed 40 CFR 192.32(a)(1)) and controls (proposed 40 CFR 192.32(b)). The Commission considers the Probable Maximum Flood (PMF) to be the appropriate design basis flood to meet the EPA requirements. See for example, NRC Regulatory Guide 1.59, "Design Basis Floods for Nuclear Power Plants."

(b) Suspend paragraph (b) in its entirety.

Reason: It may not be necessary for topographic features to provide good wind protection in order to meet the EPA longevity standard. For example, engineering methods (e.g., rock armoring) should be able to provide sufficient wind protection to meet the EPA design standard of 1,000 years of effective control.

(c) In the first sentence of paragraph (c), suspend the phrase "* * * be relatively flat after final stabilization to minimize erosion potential and to * * *"

Reason: The 1,000-year design lifetime objective and 200-year minimum lifetime in the proposed EPA standard might be met by engineering methods other than "relatively flat" features, particularly since "relatively flat" in Appendix A meant 10 horizontal to one vertical (10h:1v) slope steepness or less.

(d) Suspend the remainder of paragraph (c) beginning with "The broad objective * * *" and ending with "* * * identified."

Reason: See discusion under Criterion 3 and (c) above.

(e) Suspend the first sentence of paragraph (d), beginning "A full self-sustaining vegetative * * *" and ending "* * * to negligible levels."

Reason: The first sentence mandates a rock or vegetative cover to reduce erosion. Further language outlines possible exceptions but the standard is established by the first sentence. While a rock cover or vegetative cover is a very effective way to meet the EPA standard, it may not be the only way to meet the 1,000-year effective design objective.

(f) Suspend the second and third sentences of paragraph (d) beginning with "Where a full * * *" and ending with "* * * pile."

Reason: See (e) above. Also, the Commission assumes that the 1,000-year time frame for the control of radiological hazards specified in the EPA standard applies to all associated surface features such as slopes, embankments, and surface drainage measures.

(g) In the fourth sentence of paragraph (d) beginning "The following factors * * *," suspend the words "the final" in the phrase "* * * in establishing the final rock cover * * *."

Reason: See (e) above. Rock is not mandated with the words suspended as in (e) above. The words "the final" are suspended to emphasize this point.

(h) In the first listed item in paragraph (d), suspend the parenthetical phrase "(excepting bedding material average particles size shall be at least cobble size or greater)."

Reason: The phrase specifies technical requirements on rock size that may not be necessary to meet the proposed EPA design obective. They were based on stability for "thousands of years."

(i) Suspend the fourth paragraph of paragraph (d) beginning with "Individual rock fragments shall * * *" and ending with "* * * shall not be used." in its entirety.

Reason: The fourth paragraph specifies technical requirements on rock properties that may not be necessary to meet the proposed EPA design objective. The specified properties were based on stability for "thousands of years."

(j) In the fifth paragraph of paragraph (d) beginning with "Rock covering * * *" and ending with "* * * of this Criterion." suspend all of the text beginning with "* * * where top covers are very thick * * * and ending with "* * * of this Criterion."

Reason: The listing of requirements needed to support a justification for not using a rock cover in the paragraph exceed those that may not be required to meet the proposed EPA design lifetime standard.

(k) Suspend the first sentence of the last paragraph of paragraph (d) beginning "Furthermore, all impoundments * * *" and ending with "* * * slope gradient."

Reason: While contouring to minimize concentrated surface runoff or sharp changes in flow will enhance long term stability, such contouring to totally avoid problem areas may not be mandated in all cases by the proposed EPA design lifetime standard of 1,000 years to the extent practicable and 200 years in any case. The Commission still believes, however, that contouring is an important consideration in tailings management.

(l) In the second sentence of the last paragraph of paragraph (d) suspend "In addition to rock cover on slopes * * *" and "* * * with substantial rock cover (rip rap)."

Reason: See (e) and (f) above.

(4) Criterion 5.

(a) In the first paragraph, suspend the first two sentences beginning "Steps shall be taken * * *" and ending "* * * potential uses." and the phrase "* * * in order to accomplish this objective " in the third sentence.

Reason: The EPA ground water protection standards referenced in proposed 40 CFR 192.32(a) do not permit any seepage to ground water.

(b) In the first listed item under the first paragraph beginning with "Installation of * * *" suspend the reference to "low permeability" as a characteristic of bottom liners. Also suspend the last two sentences beginning with "Where clay liners * * *" and ending with "exposure).)"

Reason: The EPA ground water protection standard referenced in 40 CFR 192.32(a) requires a liner that prevents migration of wastes out of the impoundment into the adjacent soil. Low permeability implies that some migration is allowed.

The two sentences addressing tests to be performed on clay liners are suspended in view of the absolute containment design standard in the referenced EPA SWDA/RCRA regulations in 40 CFR 264.221. In the **Federal Register** notice (47 FR 32314, July 26, 1982), EPA explicitly stated "Synthetic liners are the only commonly used materials of which EPA is aware that would meet this standard." Thus under the regulations adopted by reference in the proposed tailings standards, EPA would allow reliance on clay liners only in the design of storage facilities where the wastes and clay into which wastes had seeped are to be removed. The EPA would permit use of both materials together and the Commission agrees that use of synthetic and clay materials is acceptable and may in fact be preferred if clay materials are available at the site. Use of both materials would provide clay as a backup system. Clay liners would also be expected to have longer effective lifetimes than synthetic liners. If licensees plan to rely on clay lining materials, the Commission believes that the tests indicated in the suspended text should be performed. The Commission also notes that it understands that EPA staff are re-examining this issue in light of information on the reliability of liners. For example, in the Supplementary Information section of the proposed tailings standard, EPA states "For specific waste/site combinations of this type it may be that clay liners, natural soils, or combinations thereof may afford an equivalent level of protection and provide substantial advantages in terms of cost." If EPA should clarify this position in the standard itself so that use of clay liners would not rely on exemptions to the § 264.221 design requirement "to prevent any migration," suspension of these two sentences would not be required. The Commission continues to believe, however, that properly designed and tested clay liners are an effective way to manage tailings.

(c) In the second paragraph beginning "Where ground water impacts * * *" suspend the phrase "to its potential use before milling operations began to the maximum extent practicable."

Reason: The EPA proposed standard in 40 CFR 192.33, by referencing 40 CFR 264.100, requires a corrective action program to restore ground water to standards established under 40 CFR 264.92–264.95. This standard is essentially background conditions and does not consider potential use.

(d) Suspend in its entirety the third paragraph beginning "While the primary method of protecting groundwater shall be isolation * * *" and ending "* * * from current or potential uses."

Reason: The EPA proposed standards for ground water protection in 40 CFR 192.32(a) protect ground water primarily on the basis of background limits for hazardous constituents, and not in terms of current or potential uses. The suspended sentence allowed consideration of tailings in contact with ground water. The proposed EPA standard permits no seepage to ground water.

(e) In the first sentence of the fifth paragraph beginning "This information shall be gathered * * *" suspend the word "usable" where it modifies "groundwater."

Reason: The proposed EPA standard in 10 CFR 192.32(a) does not diatinguish between "usable" and nonusable aquifers in applying its standard. The nondegradation standard applies to all aquifers.

5. Criterion 6.

(a) In the first sentence suspend the phrases "* * * but not less than three meters * * *," and "* * * to less than two picocuries per square meter per second."

Reason: The EPA proposed standard in 40 CFR 192.32(b) for environmental protection after closure does not stipulate a minimum cover, but rather a longevity period for whatever control measure is applied. The disposal method must also provide reasonable assurance that releases of radon–222 do not exceed 20 picocuries per meter squared per second, rather than 2 picocuries. Under the EPA standard the thickness of cover will be a function of longevity and radon release with no set minimum thickness.

(b) Suspend the fourth sentence, "The effects of any thin synthetic layer shall not be taken into account in determining the calculated radon exhalation level."

Reason: The mandatory language of this sentence precludes options that were considered by EPA. The EPA standard of 20 picocuries/m^2/sec does not preclude the use of thin synthetic layers for this purpose. However, the Commission advises that it questions whether thin synthetic layers such as plastic sheets have been or can be shown to be durable enough under construction and maintenance conditions to be relied on to be effective for 1,000 years. EPA expressed similar reservations. On the other hand, the thin layers may be more acceptable in view of the facts that an averaged 20 picocurie instead of a 2-picocurie radon limit is more forgiving of small failures, that thin layers may be used in combination with other materials, and that synthetic thin layers may be other than plastic sheets.

(c) Suspend the fifth sentence beginning "If non soiled (sic) materials are proposed to reduce tailings cover to less than three meters,* * *"

Reason: See paragraph (a) above and (b) under Criterion 4. Further, the specific technical requirements on materials listed were specified based on stability for "thousands of years." They may not be mandated by the proposed EPA design effective lifetime standard of 1,000 years and in any case 200 years for radiological control measures.

(d) Suspend the last and second to last sentences referring to near-surface cover materials not containing elevated levels of radium, and being, as far as radioactivity is concerned, essentially the same as surrounding surface soils.

Reason: The EPA proposed standards for post-closure environmental protection do not provide for, or characterize, the cover material in terms of radioactivity, but only in terms of durability and capacity to reduce radon release from the tailings. However, the EPA standard does indicate in a footnote that the characteristics of the cover material should be considered on a site-specific basis.

6. Criterion 12. Suspend the first sentence which states that final disposition of tailings should be such that ongoing active maintenance is not necessary to preserve isolation.

Reason: The referenced standard in the EPA proposal for control of radiological hazards, 40 CFR 284.111, only requires that further maintenance be minimized; it does not exclude the possibility of some maintenance following closure of a disposal site.

7. Criteria 2, 7, 8, 9, 10, and 11 are not affected by the EPA proposal and no suspension is necessary for any portion of those criteria.

NEPA Considerations

The Commission has determined that the suspension of specific portions of 10 CFR Part 40, Appendix A, as listed above does not involve a significant environmental impact and that no Environmental Impact Statement or Negative Declaration is needed for this action. As a practical matter, the suspension does not directly affect any ongoing licensing program of the Commission, nor any action of licensees with environmental consequences. This is due primarily to the fact that Appendix A has not been implemented in any licensing action. On December 4, 1981, the Commission was embargoed from spending any appropriated funds for the implementation or enforcement of Appendix A. *See* Title IV, Pub. L. 97–88, 97th Congress, 95 Stat. 1135. Although not totally free from ambiguity, this prohibition on expenditures of appropriated funds appears to have been continued in section 101(f) of Pub. L. 97–377, H.J. Res. 631, the Joint Resolution for Continuing Appropriations for fiscal year 1983. Because of the apparent embargo until October 1, 1983, on spending funds to implement and enforce Appendix A and the fact that the final suspension will end April 1, 1984 at the latest, the suspension will be effective for a maximum of 6 months. During this time period, the Commission does not foresee any actions flowing from the suspension

VOL 48 ISS 103 MAY 26 1983 UMI

itself that will have any significant environmental impact. Further, the responsibility of each source material milling licensee to operate and dispose of waste in an environmentally sound manner is established on a case-by-case basis in the conditions of the license after the site-specific full environmental review. Any change in license conditions with significant environmental consequences, or issuance of a new license, will receive a full environmental review under 10 CFR Part 51 of the Commission's regulations.

Suspension of portions of Appendix A is not an amendment of Appendix A. Suspension is a temporary procedural measure which neither modifies nor relaxes the actual requirements in the rule but only makes them inapplicable on a temporary basis, in accord with statutory guidelines. If and when substantive rule changes are proposed or promulgated, appropriate NEPA evaluations will be performed to support these actions.

Interim Licensing Policy

In all of the recently enacted legislation, it has been made clear that the Commission is to continue to regulate mill tailings wastes to protect the public health and safety and the environment but to do so on a licensee-by-licensee basis. Thus, the Commission has continued its licensing activities and in fact has three pending applications for new or expanded disposal sites. However, neither Appendix A nor the EPA standard will be implemented in review of these applications in keeping with their embargoed and proposed status, respectively, until they become legally available for use by the Commission.

Regulatory Flexibility Analysis

Since this suspension is not a rule change, the Regulatory Flexibility Act would not directly apply. Suspension has, however, the potential benefit of minimizing unnecessary licensee expenditure of resources by alerting licensees to those provisions of Appendix A that are either more or less restrictive than proposed EPA standards. Licensees can factor this notice into corporate plans and evaluations. Further, the Commission notes that EPA took the following position in their notice of proposed rules (EPA included both NRC and Agreement State licensees): "This regulation would not have a significant impact on a substantial number of small entities, as specified under Section 605 of the Regulatory Flexibility Act (RFA). Therefore, we have not performed a Regulatory Flexibility Analysis. The basis for this finding is that of the 27 licensed uranium mills, only one qualifies as a small entity and this mill will not be impacted by the standards. Almost all the mills are owned by large corporations. Three of the mills are partly owned by companies that could qualify as small businesses, according to the Small Business Administration generic small entity definition of 500 employees. However, under the RFA, a small business is one that is independently owned and operated. Since these three mills are not independently owned by small businesses, they are not small entities."

List of Subjects in 10 CFR Part 40

Nuclear materials, Reporting and recordkeeping requirements, Uranium.

Appendix A

In order to aid the public in commenting on the proposed suspensions, the text of 10 CFR Part 40, Appendix A is reprinted with the portions proposed for suspension enclosed in brackets.

Appendix A to Part 40—Criteria Relating to the Operation of Uranium Mills and the Disposition of Tailings or Wastes Produced by the Extraction or Concentration of Source Material From Ores Processed Primarily for Their Source Material Content

Introduction. Every applicant for a license to possess and use source material in conjunction with uranium or thorium milling or byproduct material at sites formerly associated with such milling is required by the provisions of § 40.31(h) to include in a license application proposed specifications relating to milling operations and the disposition of tailings or waste resulting from such milling activities. This appendix establishes technical, financial, ownership, and long-term site surveillance criteria relating to the siting, operation, decontamination, decommissioning, and reclamation of mills and tailings or waste systems and sites at which such mills and systems are located. As used in this appendix, the term "as low as is reasonably achievable" has the same meaning as in § 20.1(c) of 10 CFR Part 20 of this Chapter.

In many cases, flexibility is provided in the criteria to allow achieving an optimum tailing disposal program on a site specific basis. However, in such cases the objectives, technical alternatives and concerns which must be taken into account in developing a tailings program are identified. As provided by the provisions of § 40.31(h) applications for licenses must clearly demonstrate how the criteria have been addressed.

The specifications shall be developed considering the expected full capacity of tailings or waste systems and the lifetime of mill operations. Where later expansions of systems or operations may abe likely (for example, where large quantities of ore now marginally uneconomical may be stock-piled), the amendability of the disposal system to accommodate increased capacities without degradation in long term stability and other performance factors shall be evaluated.

Detailed programs meeting the technical and financial criteria in this Appendix, including appropriate supporting data, analyses, and alternatives, shall be developed by existing uranium milling licensees and filed with the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, in connection with license renewal applications or within nine months from the effective date of this Appendix, whichever occurs first.

I. Technical Criteria

Criterion 1—In selecting among alternative tailings disposal sites or judging the adequacy of existing tailings sites, the following site features, which will determine the extent to which a program meets the broad objective of isolating the tailings and associated contaminants from man and the environment during operations and [for thousands of years] thereafter [without ongoing active maintenance] shall be considered:

- Remoteness from populated areas;
- Hydrologic and other natural conditions as they contribute to continued immobilization and isolation of contaminants from [usable] groundwater sources; and
- Potential for minimizing erosion, disturbance, and dispersion by natural forces over the long term.

The site selection process shall be an optimization to the maximum extent reasonably achievable in terms of these features.

In the selection of disposal sites, primary emphasis shall be given to isolation of tailings or wastes, a matter having long term impacts, as opposed to consideration only of short term convenience or benefits, such as minimization of transportation or land acquisition costs. While isolation of tailings will be a function of both site and engineering design, overriding consideration shall be given to siting features given the long term nature of the tailing hazards.

[Tailings shall be disposed of in a manner that no active maintenance is required to preserve conditions of the site.]

Criterion 2—To avoid proliferation of small waste disposal sites and thereby reduce perpetual surveillance obligations, byproduct material from in situ extraction operations, such as residues from solution evaporation or contaminated control processes, and wastes from small remote above ground extraction operations shall be disposed of at existing large mill tailings disposal sites; unless, considering the nature of the waste, such as their volume and specific activity, and the costs and environmental impacts of transporting the wastes to a large disposal site, such offsite disposal is demonstrated to be impracticable or the advantages of onsite burial clearly outweigh the benefits of reducing the perpetual surveillance obligations.

Criterion 3—[The "prime option" for disposal of tailings is placement below grade, either in mines or specially excavated pits (that is, where the need for any specially constructed retention structure is eliminated).

The evaluation of alternative sites and disposal methods performed by mill operators in support of their proposed tailings disposal program (provided in applicants' environmental reports) shall reflect serious consideration of this disposal mode. In some instances, below grade disposal may not be the most environmentally sound approach, such as might by the case if a high quality groundwater formation is relatively close to the surface or not very well isolated by overlying soils and rock. Also, geologic and topographic conditions might make full below grade burial impracticable: For example, bedrock may be sufficiently near the surface that blasting would be required to excavate a disposal pit at excessive cost, and more suitable alternative sites are not available. Where full below grade burial is not practicable, the size of retention structures, and size and steepness of slopes of associated exposed embankments shall be minimized by excavation to the maximum extent reasonably achievable or appropriate given the geologic and hydrologic conditions at a site. In these cases, it must be demonstrated that an above grade disposal program will provide reasonably equivalent isolation of the tailings from natural erosional forces.]

Criterion 4—The following site and design criteria shall be adhered to whether tailings or wastes are disposed of above or below grade.

(a) [Upstream rainfall catchment areas must be minimized to decrease erosion potential and the size of the maximum possible flood which could erode or wash out sections of the tailings disposal area.]

(b) [Topographic features should provide good wind protection.]

(c) Embankment and cover slopes shall [be relatively flat after final stabilization to miminize erosion potential and to] provide conservative factors of safety assuring long term stability. [The broad objective should be to contour final slopes to grades which are as close as possible to those which would be provided if tailings were disposed of below grade; this could, for example, lead to slopes of about 10 horizontal to 1 vertical (10h:1v) or less steep. In general, slopes should not be stepper than about 5h:1v. Where steeper slopes are proposed, reasons why a slope less steep than 5h:1v would be impacticable should be provided, and compensating factors and conditions which make such slopes acceptable should be identified.]

(d) [A full self-sustaining vegetative cover shall be established or rock cover employed to reduce wind and water erosion to negligible levels.]

[Where a full vegetative cover is not likely to be self-sustaining due to climatic or other conditions, such as in semi-arid and arid regions, rock cover shall be employed on slopes of the impoundment system. The NRC will consider relaxing this requirement for extremely gentle slopes such as those which may exist on the top of the pile.]

The following factors shall be considered in establishing [the final] rock cover design to avoid displacement of rock particles by human and animal traffic or by natural processes, and to preclude undercutting and piping:

- Shape, size, composition, and gradation of rock particles [(excepting bedding material average particles size shall be at least cobble size or greater)]:
- Rock cover thickness and zoning of particles by size; and
- Steepness of underlying slopes.

[Individual rock fragments shall be dense, sound, and resistant to abrasion, and shall be free from cracks, seams, and other defects that would tend to unduly increase their destruction by water and frost actions. Weak, friable, or laminated aggregate shall not be used. Shale, rock laminated with shale, and cherts shall not be used.]

Rock covering of slopes may not be required [where top covers are very thick (on the order of 10m or greater); impoundment slopes are very gentle (on the order of 10h:1v or less); bulk cover materials have inherently favorable erosion resistance characteristics; and, there is negligible drainage catchment area upstream of the pile and good wind protection as described in points (a) and (b) of this Criterion].

[Furthermore, all impoundment surfaces shall be contoured to avoid areas of concentrated surface runoff or abrupt or sharp changes in slope gradient.] [In addition to rock cover on slopes,] areas toward which surface runoff might be directed shall be well protected [with substantial rock cover (rip rap).] In addition to providing for stability of the impoundment system itself, overall stability, erosion potential, and geomorphology of surrounding terrain shall be evaluated to assure that there are not ongoing or potential processes, such as gully erosion, which would lead to impoundment instability.

(e) The impoundment shall not be located near a capable fault that could cause a maximum credible earthquake larger than that which the impoundment could reasonably be expected to withstand. As used in this criterion, the term "capable fault" has the same meaning as defined in § III(g) of Appendix A of 10 CFR 100. The term "maximum credible earthquake" means that earthquake which would cause the maximum vibratory ground motion based upon an evaluation of earthquake potential considering the regional and local geology and seismology and specific characteristics of local subsurface material.

(f) The impoundment, where feasible, should be designed to incorporate features which will promote deposition. For example, design features which promote deposition of sediment suspended in any runoff which flows into the impoundment area might be utilized; the object of such a design feature would be to enhance the thickness of cover over time.

Criterion 5—[Steps shall be taken to reduce seepage of toxic materials into groundwater to the maximum extent reasonably achievable. Any seepage which does occur shall not result in deterioration of existing groundwater supplies from their current or potential uses.] The following shall be considered [in order to accomplish this objective]:

- Installation of [low permeability] bottom liners (Where synthetic liners are used, a leakage detection system shall be installed immediately below the liner to ensure major failures are detected if they occur. This is in additon to the groundwater monitoring program conducted as provided in Criterion 7. [Where clay liners are proposed or relatively thin in-situ clay soils are to be relied upon for seepage control, tests shall be conducted with representative tailings solutions and clay materials to confirm that no significant deterioration of permeability or stability properties will occur with continuous exposure of clay to tailings solutions. Tests shall be run for a sufficient period of time to reveal any effects if they are going to occur (in some cases, deterioration has been observed to occur rather rapidly after about nine months of exposure).)]
- Mill process designs which provide the maximum practicable recycle of solutions and conservation of water to reduce the net input of liquid to the tailings impoundment.
- Dewatering of tailings by process devices and/or in-situ drainage systems (At new sites, tailings shall be dewatered by a drainage system installed at the bottom of the impoundment to lower the phreatic surface and reduce the driving head for seepage, unless tests show tailings are not amenable to such a system. Where in-situ dewatering is to be conducted, the impoundment bottom shall be graded to assure that the drains are at a low point. The drains shall be protected by suitable filter materials to assure that drains remain free running. The drainage system shall also be adequately sized to assure good drainage).
- Neutralization to promote immobilization of toxic substances.

Where groundwater impacts are occurring at an existing site due to seepage, action shall be taken to alleviate conditions that lead to excessive seepage impacts and restore groundwater quality [to its potential use before milling operations began to the maximum extent practicable.] The specific seepage control and groundwater protection method, or combination of methods, to be used must be worked out on a site-specific basis. Technical specifications shall be prepared to control installation of seepage control systems. A quality assurance, testing, and inspection program, which includes supervision by a qualified engineer or scientist, shall be established to assure the specifications are met.

[While the primary method of protecting groundwater shall be isolation of tailings and tailings solutions, disposal involving contact with groundwater will be considered provided supporting tests and analyses are presented demonstrating that the proposed disposal and treatment methods will not degrade groundwater from current or potential uses.]

In support of a tailings disposal system proposal, the applicant/operator shall supply information concerning the following:

- The chemical and radioactive characteristics of the waste solutions.
- The characteristics of the underlying soil and geologic formations particularly as they will control transport of contaminants and

VOL
48
ISS
1
03
MY
26
1983
UMI

solutions. This shall include detailed information concerning extent, thickness, uniformity, shape, and orientation of underlying strata. Hydraulic gradients and conductivities of the various formations shall be determined.

This information shall be gathered from borings and field survey methods taken within the proposed impoundment area and in surrounding areas where contaminants might migrate to [usable] groundwater. The information gathered on boreholes shall include both geologic and geophysical logs in sufficient number and degree of sophistication to allow determining significant discontinuities, fractures, and channeled deposits of high hydraulic conductivity. If field survey methods are used, they should be in addition to and calibrated with borehole logging. Hydrologic parameters such as permeability shall not be determined on the basis of laboratory analysis of samples alone; a sufficient amount of field testing (e.g., pump tests) shall be conducted to assure actual field properties are adequately understood. Testing shall be conducted to allow estimating chemi-sorption attenuation properties of underlying soil and rock.

• Location, extent, quality, capacity and current uses of any groundwater at and near the site.

Furthermore, steps shall be taken during stockpiling of ore to minimize penetration of radionuclides into underlying soils; suitable methods include lining and/or compaction of ore storage areas.

Criterion 6—Sufficient earth cover [but not less than three meters] shall be placed over tailings or wastes at the end of milling operations to result in a calculated reduction in surface exhalation of radon emanating from the tailings or waste [to less than two picocuries per square meter per second.] In computing required tailings cover thicknesses, moisture in soils in excess of amounts found normally in similar soils in similar circumstances shall not be considered. Direct gamma exposure from the tailings or wastes should be reduced to background levels. [The effects of any thin synthetic layer shall not be taken into account in determining the calculated radon exhalation level.] [If non-soiled materials are proposed to reduce tailings covers to less than three meters it must be demonstrated that such materials will not crack or degrade by differential settlement, weathering, or other mechanism, over long term time intervals.] [Near surface cover materials (i.e., within the top three meters) shall not include mine waste or rock that contains elevated levels of radium; soils used for near surface cover must be essentially the same, as far as radioactivity is concerned, as that of surrounding surface soils. This is to ensure that surface radon exhalation is not significantly above background because of the cover material itself.]

Criterion 7—At least one full year prior to any major site construction, a preoperational monitoring program shall be conducted to provide complete baseline data on a milling site and its environs. Throughout the construction and operating phases of the mill, an operational monitoring program shall be conducted to measure or evaluate compliance with applicable standards and regulations; to evaluate performance of control systems and procedures; to evaluate environmental impacts of operation; and to detect potential long term effects.

Criterion 8—Milling operations shall be conduced so that all airborne effluent releases are reduced to levels as low as is reasonably achievable. The primary means of accomplishing this shall be by means of emission controls. Institutional controls, such as extending the site boundary and exclusion area, may be employed to ensure that offsite exposure limits are met, but only after all practicable measures have been taken to control emissions at the source. Notwithstanding the existence of individual dose standards, strict control of emissions is necessary to assure that population exposures are reduced to the maximum extent reasonably achievable and to avoid site contamination. The greatest potential sources of offsite radiation exposure (aside from radon exposure) are dusting from dry surfaces of the tailing disposal area not covered by tailings solution and emissions from yellowcake drying and packaging operations.

Checks shall be made and logged hourly of all parameters (e.g., differential pressures and scrubber water flow rates) which determine the efficiency of yellowcake stack emission control equipment operation. It shall be determined whether or not conditions are within a range prescribed to ensure that the equipment is operating consistently near peak efficiency; corrective action shall be taken when performance is outside of prescribed ranges. Effluent control devices shall be operative at all times during drying and packaging operations and whenever air is exhausting from the yellowcake stack. Drying and packaging operations shall terminate when controls are inoperative. When checks indicate the equipment is not operating within the range prescribed for peak efficiency, actions shall be taken to restore parameters to the prescribed range. When this cannot be done without shutdown and repairs, drying and packaging operations shall cease as soon as practicable. Operations may not be re-started after cessation due to off-normal performance until needed corrective actions have been identified and implemented. All such cessations, corrective actions, and re-starts shall be reported to the appropriate NRC regional office as indicated in Criterion 8A, in writing, within 10 days of the subsequent restart.

To control dusting from tailings, that portion not covered by standing liquids shall be wetted or chemically stabilized to prevent or minimize blowing and dusting to the maximum extent reasonably achievable. This requirement may be relaxed if tailings are effectively sheltered from wind, such as may be the case where they are disposed of below grade and the tailings surface is not exposed to wind. Consideration shall be given in planning tailings disposal programs to methods which would allow phased covering and reclamation of tailings impoundments since this will help in controlling particulate and radon emissions during operation. To control dusting from diffuse sources, such as tailings and ore pads where automatic controls do not apply, operators shall develop written operating procedures specifying the methods of control which will be utilized.

Criterion 8A—Daily inspections of tailings or waste retention systems shall be conducted by a qualified engineer or scientist and documented. The appropriate NRC regional office as indicated in Appendix D of 10 CFR Part 20, or the Director, Office of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, shall be immediately notified of any failure in a tailings or waste retention system which results in a release of tailings or waste into unrestricted areas, and/or of any unusual conditions (conditions not contemplated in the design of the retention system) which if not corrected could indicate the potential or lead to failure of the system and result in a release of tailings or waste into unrestricted areas.

II. Financial Criteria

Criterion 9—Financial surety arrangements shall be established by each mill operator prior to the commencement of operations to assure that sufficient funds will be available to carry out the decontamination and decommissioning of the mill and site and for the reclamation of any tailings or waste disposal areas. The amount of funds to be ensured by such surety arrangements shall be based on Commission-approved cost estimates in a Commission-approved plan for (1) decontamination and decommissioning of mill buildings and the milling site to levels which would allow unrestricted use of these areas upon the decommissioning, and (2) the reclamation of tailings and/or waste disposal areas in accordance with technical criteria delineated in Section I of this Appendix. The licensee shall submit this plan in conjunction with an environmental report that addresses the expected environmental impacts of the milling operation, decommissioning and tailings reclamation, and evaluates alternatives for mitigating these impacts. The surety shall also cover the payment of the charge for long term surveillance and control required by Criterion 10. In establishing specific surety arrangements, the licensee's cost estimates shall take into account total costs that would be incurred if an independent contractor were hired to perform the decommissioning and reclamation work. In order to avoid unnecessary duplication and expense, the Commission may accept financial sureties that have been consolidated with financial or surety arrangements established to meet requirements of other Federal or state agencies and/or local governing bodies for such decommissioning, decontamination, reclamation, and long term site surveillance and control, provided such arrangements are considered adequate to satisfy these requirements and that the portion of the surety which covers the decommissioning and reclamation of the mill, mill tailings site and associated areas, and the long term funding charge is clearly identified and committed for use in accomplishing these activities. The licensee's surety mechanism will be reviewed annually by the Commission to assure that sufficient funds would be available for completion of the reclamation plan if the work had to be performed by an independent contractor. The amount of surety liability should be adjusted to recognize any increases or decreases resulting from inflation, changes in engineering plans, activities performed, and any other conditions affecting costs. Regardless of whether reclamation is phased through the life of the operation or takes place at the end of operations, an appropriate portion of surety liability shall be retained until final compliance with the reclamation plan is determined.

This will yield a surety that is at least sufficient at all times to cover the costs of decommissioning and reclamation of the areas that are expected to be disturbed before the next license renewal. The term of the surety mechanism must be open ended, unless it can be demonstrated that another arrangement would provide an equivalent level of assurance. This assurance could be provided with a surety instrument which is written for a specified period of time (e.g., five years) yet which must be automatically renewed unless the surety notifies the beneficiary (the Commission or the State regulatory agency) and the principal (the licensee) some reasonable time (e.g., 90 days) prior to the renewal date of their intention not to renew. In such a situation the surety requirement still exists and the licensee would be required to submit an acceptable replacement surety within a brief period of time to allow at least 60 days for the regulatory agency to collect.

Proof of forfeiture must not be necessary to collect the surety so that in the event that the licensee could not provide an acceptable replacement surety within the required time, the surety shall be automatically collected prior to its expiration. The conditions described above would have to be clearly stated on any surety instrument which is not open-ended, and must be agreed to by all parties. Financial surety arrangements generally acceptable to the Commission are:

(a) Surety bonds;
(b) Cash deposits;
(c) Certificates of deposit;
(d) Deposits of government securities;
(e) Irrevocable letters or lines of credit; and
(f) Combinations of the above or such other types of arrangements as may be approved by the Commission. However, self insurance, or any arrangement which essentially constitutes self insurance (e.g., a contract with a state or Federal agency), will not satisfy the surety requirement since this provides no additional assurance other than that which already exists through license requirements.

Criterion 10—A minimum charge of $250,000 (1978 dollars) to cover the costs of long term surveillance shall be paid by each mill operator to the general treasury of the United States or to an appropriate State agency prior to the termination of a uranium or thorium mill license.

If site surveillance or control requirements at a particular site are determined, on the basis of a site-specific evaluation, to be significantly greater than those specified in Criterion 12 (e.g., if fencing is determined to be necessary) variance in funding requirements may be specified by the Commission. In any case, the total charge to cover the costs of long term surveillance shall be such that, with an assumed 1 percent annual real interest rate, the collected funds will yield interest in an amount sufficient to cover the annual costs of site surveillance. The total charge will be adjusted annually prior to actual payment to recognize inflation. The inflation rate to be used is that indicated by the change in the Consumer Price Index published by the U.S. Department of Labor, Bureau of Labor Statistics.

III. Site and Byproduct Material Ownership

Criterion 11—A. These criteria relating to ownership of tailings and their disposal sites become effective on November 8, 1981, and apply to all licenses terminated, issued, or renewed after that date.

B. Any uranium or thorium milling license or tailings license shall contain such terms and conditions as the Commission determines necessary to assure that prior to termination of the license, the licensee will comply with ownership requirements of this criterion for sites used for tailings disposal.

C. Title to the byproduct material licensed under this Part and land, including any interests therein (other than land owned by the United States or by a State) which is used for the disposal of any such byproduct material, or is essential to ensure the long term stability of such disposal site, shall be transferred to the United States or the State in which such land is located, at the option of such State. In view of the fact that physical isolation must be the primary means of long term control, and Government land ownership is a desirable supplementary measure, ownership of certain severable subsurface interests (for example, mineral rights) may be determined to be unnecessary to protect the public health and safety and the environment. In any case, however, the applicant/operator must demonstrate a serious effort to obtain such subsurface rights, and must, in the event that certain rights cannot be obtained, provide notification in local public land records of the fact that the land is being used for the disposal of radioactive material and is subject to either an NRC general or specific license prohibiting the disruption and disturbance of the tailings. In some rare cases, such as may occur with deep burial where no ongoing site surveillance will be required, surface land ownership transfer requirements may be waived. For licenses issued before November 8, 1981, the Commission may take into account the status of the ownership of such land, and interests therein, and the ability of a licensee to transfer title and custody thereof to the United States or a State.

D. If the Commission subsequent to title transfer determines that use of the surface or subsurface estates, or both, of the land transferred to the United States or to a State will not endanger the public health, safety, welfare, or environment, the Commission may permit the use of the surface or subsurface estate, or both, of such land in a manner consistent with the provisions provided in these criteria. If the Commission permits such land, it will provide the person who transferred such land with the right of first refusal with respect to such use of such land.

E. Material and land transferred to the United States or a State in accordance with this Criterion shall be transferred without cost to the United States or a State other than administrative and legal costs incurred in carrying out such transfer.

F. The provisions of this Part respecting transfer of title and custody to land and tailings and wastes shall not apply in the case of lands held in trust by the United States for any Indian tribe or lands owned by such Indian tribe subject to a restriction against alienation imposed by the United States. In the case of such lands which are used for the disposal of byproduct material, as defined in this Part, the licensee shall enter into arrangements with the Commission as may be appropriate to assure the long term surveillance of such lands by the United States.

IV. Long-Term Site Surveillance

Criterion 12—[The final disposition of tailings or wastes at milling sites should be such that ongoing active maintenance is not necessary to preserve isolation.] As a minimum, annual site inspections shall be conducted by the government agency retaining ultimate custody of the site where tailings, or wastes are stored to confirm the integrity of the stabilized tailings ow waste systems and to determine the need, if any, for maintenance and/or monitoring. Results of the inspection shall be reported to the Commission within 60 days following each inspection. The Commission may require more frequent site inspections if, on the basis of a site-specific evaluation, such a need appears necessary due to the features of a particular tailings or waste disposal system.

Dated at Washington, D.C. this 23 day of May, 1983

For the U.S. Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-NM-29-AD]

Airworthiness Directives; British Aerospace Corporation Model BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an amendment to an existing Airworthiness Directive (AD) that would require a more rigorous inspection method for the flap track attachment brackets to initially determine crack lengths more accurately on British Aerospace Corporation Model BAC 1-11 200 and 400 series airplanes. Service experience has shown that the currently used procedure may not accurately detect the actual crack length. Failure to detect cracks would result in failure of the brackets and possible loss of the flap.

DATE: Comments must be received no later than July 18, 1983.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041 or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foregin Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83-NM-29-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: The United Kingdom Civil Aviation Authority (CAA) has, in accordance with existing provisions of a bilateral agreement, notified the FAA of the existence of Issue 5 of British Aerospace Corporation BAC 1-11 Alert Service Bulletin 57-A-PM4948 which specifies a dye penetrant inspection for detecting flap track attachment bracket cracks and determining their lengths. The dye penetrant procedure will improve the detection of cracks over the currently required visual inspection method. AD 81-14-07 (46 FR 33223, June 29, 1981) specifies inspections of the flap track attachment brackets per issue 4 of British Aerospace Corporation BAC 1-11 Alert Service Bulletin 57-A-PM4948. The FAA is proposing to amend AD 81-14-07 to require inspections of the flap track attachment brackets in accordance with issue 5 of the service bulletin.

It is estimated that 63 U.S. registered airplanes will be affected by this AD, that it will take approximately 5 manhours per airplane to accomplish the additional requirement of a more detailed inspection and that the average labor cost will be $35 per manhour. Based on these figures, the total cost impact of the proposed amendment to the existing AD to U.S. operators is estimated to be $11,025. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by amending Airworthiness Directive (AD) 81-14-07, Amendment 39-4153 as follows:

A. Amend paragraph (e) by replacing "Alert Service Bulletin 57-A-PM4948, Issue 4, dated July 18, 1977" with "Alert Service Bulletin 57-A-PM4948, Issue 5, dated January 28, 1981".

B. Revise paragraphs (m) and (n) to read as follows:

"(m): Upon request of an operator and submission of substantiating data, the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region may adjust the inspection intervals.

(n): Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region."

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). It is further certified under the criteria of the Regulatory Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on May 17, 1983.

David E. Jones,

Acting Director, Northwest Mountain Region.

[FR Doc. 83-13996 Filed 5-25-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 83-NM-25-AD]

Airworthiness Directives; British Aerospace Corporation Model BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes an amendment of an existing Airworthiness Directive (AD) that would decrease the repetitive inspection interval for the emergency oxygen system on British Aerospace Corporation BAC 1-11 200 and 400 series airplanes from two years to one year. Service experience has shown that the inspection interval specified in the existing AD is inadequate to provide timely detection of cracked oxygen hoses. Damaged hoses were found close to electrical equipment, creating a potential fire hazard.

DATE: Comments must be received on or before July 15, 1983.

ADDRESSES: The applicable service information may be obtained from British Aerospace Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041, or may also be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted induplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rule Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83-NM-25AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: This notice proposes to further amend Amendment 39-2779 (41 FR 52292, November 29, 1976), AD 76-24-06 as amended by Amendment 39-2800 (42 FR 2054, January 10, 1977), which currently requires an oxygen system leak check and a bienniel inspection of all flexible oxygen hoses on British Aerospace Aircraft Group Model BAC 1-11 200 and 400 series airplanes. Service experience has shown that in order to assure timely detection of faulty oxygen system hoses, the required inspection should be performed on an annual basis. British Aerospace Corporation released Issue 3 of BAC 1-11 Service Bulletin 35-A-PM5394 which is classified as mandatory by the CAA, requires yearly inspections. Therefore, the FAA is proposing an amendment to AD 76-24-06 which would decrease the interval for required oxygen system inspection on British Aerospace Aircraft Group Model BAC 1-11 200 and 400 series airplanes from two years to one year.

Should this AD be adopted as proposed, it is estimated that 63 U.S. registered airplanes would be affected, that it would take approximately 13 manhours per airplane to accomplish the required actions, and that the average labor cost would be $35 per manhour. Repair parts are estimated at $100 per airplane. Based on these figures, the total cost impact of this AD to U.S. users would be $34,965. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by further amending Amendment 39-2779, AD 76-24-06, as amended by Amendment 39-2800, as follows:

A. In paragraph (a), replace "2500 hours" with "1500 hours" and, "Issue 2, dated February 2, 1976" with "Issue 3, dated June 29, 1979".

B. Replace the entire paragraph (c) with: "Inspect and rework the flexible hoses of the emergency oxygen system within the next 1000 hours time in service or six months after the effective date of this AD, whichever occurs sooner, unless already accomplished within the preceding 1500 hours time in service, and thereafter at intervals not to exceed one year, in accordance with paragraph 2.4, Figures 1 through 3 and Table 1 of the service bulletin."

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington, on May 16, 1983.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 83-NM-23-AD]

Airworthiness Directives; British Aerospace Corporation Model BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes a revision of an existing Airworthiness Directive (AD) that would require a more detailed inspection of the non-return valves in the auxiliary power unit (APU) of British Aerospace Model BAC 1-11 200 and 400 series airplanes. Service experience has shown that this will improve crack detection and allow a reduction in the inspection frequency of these components. This amendment also provides terminating action if certain modifications are incorporated.

DATE: Comments must be received no later than July 15, 1983.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, D.C. 20041, or may also be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 767-2530. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

VOL 48 ISS 103 MAY 26 1983 UMI

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to the address specified below. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83–NM–23–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion: The Civil Aviation Authority of the United Kingdom (CAA) has, in accordance with existing provisions of a bilateral agreement, notified the FAA of the existence of Issues No. 3 and No. 4 of BAC 1–11 Alert Service Bulletin 49–A–PM3122. The latest issue specifies a more complete inspection of the APU air delivery duct nonreturn valves, part numbers 1398B000 and 1398B999 by using a dye penetrant inspection method for crack detection while also extending the inspection interval. The service bulletin also specifies that incorporation of British Aerospace modifications PM3148, PM3177 and either PM3254 or PM4912 terminates the need for further inspections. The FAA is proposing a revision to AD 71–06–09 (36 FR 5034, March 17, 1971) which would require more detailed inspections of the APU nonreturn valves at a longer time interval. The revised AD would also specify that incorporation of modifications PM3148, PM3177 and either PM3254 or PM4912 Terminates the requirements of the AD.

This airplane model is manufactured in the United Kingdom and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since these conditions are likely to exist or develop on airplanes of this model registered in the United States, and AD is proposed that would require the actions described above.

It is estimated that 63 U.S. registered airplanes will be affected by this AD, that it will take approximately 2 additional manhours per airplane to accomplish the more detailed inspections, and that the average labor cost will be $35 per manhour. Based on these figures, the total cost impact of the proposed AD to the U.S. operators is estimated to be $4,410. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by revising Airworthiness Directive (AD) 71–06–09 Amendment 39–1177 to read as follows:

British Aerospace: Applies to BAC 1–11 200 and 400 series airplanes, certificated in all categories. Compliance is required as indicated. To prevent malfunction of the auxiliary power unit (APU) air delivery duct nonreturn valve, accomplish the following.

A. For airplanes having nonreturn valve P/N 525180 installed:

(1) Within the next 100 hours time in service after the effective date of this AD, unless already accomplished within the previous 60 hours time in service and thereafter at intervals not to exceed 160 hours time in service, perform the actions specified by paragraph 2.2, 2.3, 2.4 and 2.5, Accomplishment Instructions, of British Aerospace Alert Service Bulletin 49–A–PM3122, Issue 4, dated March 31, 1982. Incorporation of British Aerospace modification PM3254 terminates the requirements of paragraphs 2.3 and 2.4 of the service bulletin.

(2) Prior to further flight, unless already accomplished, install a placard adjacent to the APU control panel in clear view of the pilot, or amend the Airplane Flight Manual limitation Section 2, to read as follows: "Close APU air delivery valve when starting engine from the external supply or by cross-feeding air from an operating engine. Close APU air delivery valve and shut down APU for takeoff and flight operations. Operational use of the APU in flight is prohibited." The placard may be removed, or the amendment to the Airplane Flight Manual may be deleted, upon replacement of APU air delivery duct non-return valve P/N 525180 with non-return valve PN 1398B000 or 3031B000.

B. For airplanes having non-return valve P/N 1398B000 or 3031B000 installed, within the next 750 hours time in service after the effective date of this AD, unless already accomplished within the previous 1,500 hours time in service from the last inspection, and thereafter at intervals not to exceed those specified in the service bulletin, perform the actions described by paragraphs 4.1, 4.2 and 4.3 of the service bulletin.

C. Terminating action to this AD is accomplished by incorporating modifications PM3148, PM3177 and either PM3254 or PM4912.

D. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on May 16, 1983.

14 CFR Part 73

[Airspace Docket No. 83–ASO–18]

Proposed Alteration of Restricted Area R–6001

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to realign Restricted Area R–6001 located in the vicinity of Fort Jackson, S.C. The U.S. Army needs to expand the restricted area to the east and reduce the western portion to accommodate artillery and mortar firing training exercises. This action would increase safety by containing all artillery firing within Restricted Area R–6001.

DATE: Comments must be received on or before July 26, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Southern Region, Attention: Manager, Air Traffic Division, Docket No. 83–ASO–18, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Ben Driggs, Airspace Regulations and Obstructions Branch (AAT–230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ASO–18." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 73.60 of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to realign Restricted Area R–6001 to accommodate artillery and mortar firing points. This realignment will expand present restricted airspace on the eastern portion and reduce restricted airspace on the western portion. Presently, all artillery and most mortar firing points/range safety fans extend to or are located outside of current boundaries. The South Carolina Army National Guard is presently traveling to Fort Gordon, GA, Fort Stewart, GA, and Fort Bragg, NC, to conduct their artillery firing. This action would have a significant impact on saving travel time and funds. Section 73.60 of Part 73 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 73

Restricted areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 73.60 of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as follows:

R–6001A Fort Jackson, SC [Revised]

Boundaries. Beginning at lat. 33°59'30" N., long. 80°52'04" W.; to lat. 34°05'03" N., long. 80°52'12" W.; to northeast along Percival Road to lat. 34°06'15" N., long. 80°49'04" W.; to east along North Boundary Road to lat. 34°03'41" N., long. 80°42'13" W.; to lat. 34°01'40" N., long. 80°42'15" W.; to lat. 34°00'33" N., long. 80°44'24" W.; to lat. 34°01'00" N., long. 80°44'55" W.; to lat. 34°01'05" N., long. 80°47'00" W.; to lat. 34°00'54" N., long. 80°48'00" W.; to lat. 34°00'30" N., long. 80°48'57" W.; to lat. 34°00'12" N., long. 80°49'26" W.; to lat. 33°59'45" N., long. 80°50'00" W.; thence to point of beginning.

Designated altitudes. Surface to 3,200 feet MSL.

Time of designation. Intermittent, 0630 to 2400.

Controlling agency. FAA, Jacksonville ARTCC.

Using agency. Commanding General, Fort Jackson, SC.

R–6001B Fort Jackson, SC [New]

Boundaries. Beginning at lat. 33°59'30" N., long 80°52'04" W.;to lat. 34°05'03" N., long. 80°52'12" W.; to northeast along Percival Road to lat. 34°06'15" N., long. 80°49'04" W.; to east along North Boundary Road to lat. 34°03'41" N., long. 80°42'13" W.; to lat. 34°01'40" N., long. 80°42'15" W.; to lat. 34°00'33" N., long. 80°44'24" W.; to lat. 34°01'00" N., long. 80°45'55" W.; to lat. 34°01'05" N., long. 80°47'00" W.; to lat. 34°00'54" N., long. 80°48'00" W.; to lat. 34°00'30" N., long. 80°48'57" W.; to lat. 34°00'12" N., long. 80°49'26" W.; to lat. 33°59'45" N., long. 80°50'00" W.; thence to point of beginning.

Designated altitudes. 3,200 feet MSL to FL 230.

Time of designation. Intermittent, 0630 to 2400.

Controlling agency. FAA, Jacksonville ARTCC.

Using agency. Commanding General, Fort Jackson, SC.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is

VOL 48 ISS 103 MY 26 1983 UMI

certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on May 18, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

14 CFR Part 139

Discussions on Airport Certification Issues Affecting Part 139 of the Federal Aviation Regulations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Announcement of public meeting.

SUMMARY: This notice announces a public meeting to be held to discuss areas of concern and development pertaining to the Airport Certification Program as set forth in Part 139 of the Federal Aviation Regulations.

DATE: Date of Meeting: July 14, 1983; 9:00 a.m. e.d.s.t.

ADDRESS: Federal Aviation Administration, Third Floor Auditorium, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Mr. Jose Roman, Jr., Safety and Compliance Division, (AAS-300), Office of Airport Standards, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone (202) 426-3087.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to discuss with the public certain issues concerning Part 139 of the Federal Aviation Regulations which affect the airport certification program. It is becoming increasingly necessary to clarify, update, and amend specific provisions of Part 139 based on the FAA experience in the airport certification program and the results of studies and aviation industry recommendations. Approaches for such areas as airport crash, fire and rescue equipment requirements, snow removal, and extended runway safety areas will be discussed at the meeting. The FAA intends to issue a Notice of Proposed Rule Making on Part 139 this year.

Interested persons are invited to participate in the meeting by submitting data, views, or discussions as they may desire, either oral at the meeting or in writing addressed to the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Washington, D.C. on May 16, 1983.

Leonard E. Mudd,

Director, Office of Airport Standards.

BILLING CODE 4910-13-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 926

Montana Abandoned Mine Land Reclamation Plan Amendment

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: On April 20, 1983, the State of Montana submitted to OSM a proposed amendment to its Abandoned Mine Land Reclamation (AMLR) Plan. The proposed amendment relates to liens on noncoal projects, addition of one hundred noncoal sites to the Montana Abandoned Mine Land Inventory, provisions to conduct an emergency reclamation program, and revised Department of State Lands structural organization. OSM is seeking public comment on the proposed amendment.

DATES: Written comments on the amendment must be received on or before 5:00 p.m., June 27,1983. A public hearing will be held on the amendment if sufficient requests for such a hearing are received by 5:00 p.m., June 2, 1983.

ADDRESSES: Copies of the full text of the proposed amendment are available for review at the following locations:

State of Montana, Department of State Lands, Reclamation Division, 1625 Eleventh Avenue, Helena, Montana 59620

Office of Surface Mining Reclamation and Enforcement, P.O. Box 1420, 935 Pendell Blvd., Mills, Wyoming 82644

Office of Surface Mining Reclamation and Enforcement, Administrative Record—Rm. 5315, 1100 "L" Street NW., Washington, D.C. 20240

Written comments must be mailed or hand carried to: Office of Surface Mining Reclamation and Enforcement, P.O. Box 1420, 935 Pendell Blvd., Mills, Wyoming 82644. Comments received after 5:00 p.m., June 27, 1983, will not ordinarily be considered or included in the administrative record for this rulemaking.

The administrative record will be available for public review at the OSM Mills, Wyoming Office, on Monday through Friday, 8:00 a.m. to 4:00 p.m. excluding holidays.

FOR FURTHER INFORMATION CONTACT: William Thomas, Field Office Director, Office of Surface Mining Reclamation and Enforcement, P.O. Box 1420, 935 Pendell Blvd., Mills, Wyoming 82664. Telephone: (307) 261-5776.

SUPPLEMENTARY INFORMATION: Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95-87, 30 U.S.C. 1201 *et seq.*, establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under State or Federal law. Title IV provides that a State with an approved AMLR program has the responsibility and primary authority to implement an abandoned mine land reclamation program.

The Montana AMLR Plan was approved on October 24, 1980. On April 20, 1983, Montana submitted a proposed amendment to the Plan. An approved State AMLR Plan can be amended under the provisions of 30 CFR 884.15. Under these provisions, if the amendment or revision changes the objectives, scope, or major policies followed by the State in the conduct of its reclamation program, the Director should follow the procedures set out in 30 CFR 884.14 in approving an amendment or revision of a State reclamation plan. This notice of proposed rulemaking begins the process of review of the proposed amendment.

Representatives of OSM's Field Office Director will be available to meet Monday through Friday, excluding holidays, between 8:00 a.m. and 4:00 p.m. at OSM's office in Mills, Wyoming, indicated above under "Addresses", at the request of members of the public to receive their advice and recommendations concerning the proposed Montana amendment. Persons wishing to meet with representatives of the Field Director's Office during this time period may place such request with Ronald Bertram, telephone (307) 261-5776.

The Department intends to continue to discuss the State's amendment with representatives of the State throughout the review process. All contacts

between Departmental personnel and representatives of the State will be conducted in accordance with OSM's guidelines on contacts with States published September 19, 1979, at 44 FR 54444.

The Office of Surface Mining has examined this proposed rulemaking under Section 1(b) of Executive Order No. 12291 (February 17, 1981) and has determined that, based on available quantitative data, it would not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval would not have an effect on costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; and

2. Approval would not have adverse effects on competition, employment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* and the Office of Surface Mining has determined that the rule would not have significant economic effects on a substantial number of small entities. The reason for this determination is that approval would not have demographic effects, direct costs, nonquantifiable costs, competitive effects, enforcement costs or aggregate effects on small entities.

Further, the Office of Surface Mining has determined that the Montana amendment does not have a significant effect on the quality of the human environment because the decision relates only to the policies, procedures and organization of the State's Abandoned Mine Land Reclamation Program. Therefore, under the Department of the Interior Manual DM 5162.3(A)(1), the Assistant Secretary's decision on the Montana amendment is categorically excluded from the National Environmental Policy Act requirements.

As a result, no environmental asessment (EA) or environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Moreover, an EA or an EIS will be prepared for the approval of grants for the abandoned mine land reclamation projects under 30 CFR Part 886.

The Montana amendment can be approved if all the following occur:

1. The Assistant Secretary finds that the public has been given adequate notice and opportunity to comment, and the record does not reflect major unresolved controversies.

2. Views of other Federal agencies have been solicited and considered.

3. The State has the legal authority, policies and administrative structure to carry out the amendment.

4. The amendment meets all requirements of the OSM, AMLR Program provisions.

5. The State has an approved Surface Mining Regulatory Program.

6. It is determined that the amendment is in compliance with all applicable State and Federal laws and regulations.

Contents of the Montana amendment are:

1. Liens on noncoal projects;

2. Addition of one hundred noncoal sites to the Montana Abandoned Mine Land Inventory;

3. Provisions to conduct an emergency reclamation program; and

4. Revised Department of State Lands structural organization.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 90

[CGD 83-011]

Interpretative Rule for Inland Navigation Rules

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: The Coast Guard proposes to create a new Part 90 to Title 33 of the Code of Federal Regulations entitled "Inland Navigation Rules: Interpretative Rules." There is confusion among mariners regarding what is meant by "rigidly connected" vessels for purposes of application of Rule 24(b) of the Inland Navigation Rules. Pushing vessels and vessels being pushed ahead are connected by various secure means. Not all of these, however, form a rigid connection which would make the vessel and its tow a "composite unit". Therefore, specific guidance is necessary to determine when a composite unit exists. These rules would provide the necessary guidance.

DATE: The public is invited to comment on this rulemaking. Comments must be received on or before July 25, 1983.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/44), (CGD 83-011), U.S. Coast Guard, Washington D.C. 20593. Comments may be delivered to and will be available for inspection and copying at the Marine Safety Council, U.S. Coast Guard Headquarters, Room 4402, 2100 2nd St., S.W., Washington, D.C. between the hours of 8 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: LCDR Kent Kirkpatrick, (202) 245-0106.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Each person submitting a comment should include his or her name and address, identify this notice as CGD 83-011, and give the reasons for the comment. Persons desiring acknowledgment of receipt should enclose a stamped, self-addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned; but one may be held if written requests for a hearing are received and the Coast Guard determines that the opportunity to make oral presentations will be beneficial to this rulemaking.

Drafting Information

The principal persons involved in drafting this rulemaking are LCDR Kent Kirkpatrick, Project Manager, Office of Navigation, and Lieutenant Mark Hanlon, Office of Chief Counsel.

Discussion of Proposed Regulation

The various sets of navigation rules for our inland waters were unified into one set of rules in the Inland Navigational Rules Act 1980. On December 24, 1981, the new Inland Navigation Rules became effective upon the inland waters of the United States, except for the Great Lakes where the effective date was March 1, 1983. These rules are very similar to the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS).

Rule 24(b) of 72 COLREGS prescribes lighting requirements for composite units and is identical to Inland Rule 24(b). Rule 24(b) states: "When a pushing vessel and a vessel being

VOL 48 ISS 103 MAY 26 1983 UMI

pushed ahead are rigidly connected in a composite unit they shall be regarded as a power-driven vessel and exhibit the lights prescribed in rule 23."

Part 82 of Title 33 contains an interpretative rule which clarifies the term "composite unit" as it is used in 72 COLREGS. This rule limits composite units to the combinations of those vessels that are connected by mechanical means so they react to sea and swell as one vessel and precludes the use of lines, wires, hawsers, or chains as the means of connection. The Rules of the Road Advisory Council has recommended that the Coast Guard publish an interpetative rule for the Inland Rules similar to the one for 72 COLREGS. The Coast Guard agrees.

Navigation and Vessel Inspection Circular No. 2–81 with Change 1, entitled "Coast Guard Inspection Guidance Regarding Integrated Tug Barge Combinations", is consistent with the interpretative rule in Part 82 and supplements it.

Regulatory Analysis

These regulations were reviewed in accordance with the "Policies and Procedures for Simplification, Analysis and Review of Regulations" (DOT Order 2100.5 of 22 May 1980) and were determined to be non-significant since there are no costs associated with these regulations. Since the impact is expected to be minimal, a draft evaluation was not conducted. These regulations were also found to be non-major under the criteria established in Executive Order 12291 for the reasons stated above. Since no costs are imposed by these regulations, it is hereby certified pursuant to section 605(b) of the Regulatory Flexibility Act (94 Stat. 1164, Pub. L. 96–354) that this action will not have a significant economic impact upon a substantial number of small entities.

List of Subjects in 33 CFR Part 90

Navigation (water), Waterways.

For the reasons stated in the preamble, the Coast Guard proposes to add a new Part 90 of Title 33, Code of Federal Regulations, to read as follows:

PART 90—INLAND RULES: INTERPRETATIVE RULES

Sec.
90.1 Purpose.
90.3 Pushing vessel and vessel being pushed: Composite unit.

Authority: 33 U.S.C. 2071; 49 CFR 1.46(n)(14).

§ 90.1 Purpose.

This part contains the interpretative rules for the Inland Rules. These interpretative rules are intended as a guide to assist the public and promote compliance with the Inland Rules.

§ 90.3 Pushing vessel and vessel being pushed: Composite unit.

Rule 24(b) of the Inland Rules states that when a pushing vessel and a vessel being pushed ahead are rigidly connected in a composite unit, they are regarded as a power-driven vessel and must exhibit the lights prescribed in Rule 23. A "composite unit" is interpreted to be the combination of a pushing vessel and a vessel being pushed ahead that are rigidly connected by mechanical means so they react to sea and swell as one vessel. Mechanical means does not include lines, wires, hawsers, or chains.

Dated: May 4, 1983.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard Chief, Office of Navigation.

33 CFR Part 100

[CGD3–83–13]

Marine Parade; Night in Venice, Great Egg Harbor Bay, Ocean City, NJ

AGENCY: Coast Guard, DOE.

ACTION: Proposed rule.

SUMMARY: Special Local Regulations are being proposed for the Night in Venice Regatta being sponsored by the City of Ocean City, New Jersey. This event will be held on 23 July 1983 between the hours of 5:30 p.m. and 10:30 p.m. The Coast Guard is considering the issuance of these regulations in order to provide for the safety of the participants and spectators on navigable waters during this event.

DATE: Comments must be received on or before June 27, 1983.

ADDRESSES: Comments should be mailed to Commander (b), Third Coast Guard District, Governors Island, New York, NY 10004. The comments will be available for inspection and copying at the Boating Safety Office, Building 110, Governors Island, New York, NY. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this office.

FOR FURTHER INFORMATION CONTACT: LTJG D. R. Cilley, (212) 668–7974.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD3–83–13) and the specific section of the proposal to which their comments apply, and give reason for each comment. Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed. The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are LTJG D. R. Cilley, Project Officer, Boating Safety Office, and Ms. MaryAnn Arisman, Project Attorney, Legal Office, Third Coast Guard District.

Discussion of Proposed Regulations

The annual "Night in Venice" Marine Parade sponsored by the City of Ocean City, New Jersey is well known to the boaters in this area. Due to the large number of participating vessels and spectators alike, it is anticipated that there will be considerable congestion in this area during the festivities. In order to provide for the safety of life and property, the Coast Guard proposes restricting vessel movement in the area prior to and during the event. The parade route has not been altered from that of previous years and there have not been any problems in the past with the Special Local Regulations issued by the Coast Guard, therefore these regulations remain virtually unchanged in content from those issued last year.

Economic Assessment and Certification

This proposed regulation is considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since this event will draw a large number of spectator craft into the area for the duration of the event. This should easily compensate area merchants for the slight inconvenience of having navigation restricted. Based upon this assessment it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981 on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Proposed Regulation

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations, by adding a new § 100.35–301 to read as follows:

PART 100—[AMENDED]

§ 100.35–301 Night in Venice, Great Egg Harbor Bay, City of Ocean City, NJ.

(a) This regulation shall be in effect from 4:30 p.m. to 10:30 p.m. on 23 July 1983.

(b) The following area shall be closed to general navigation from 5:30 p.m. to 10:30 p.m. on 23 July 1983: The southwest side of Ship Channel from Buoy C, seaward to Point of Shoal Buoy (red and black nun), then south to Great Egg Waterway Daybeacon 28. No person or vessel may enter or remain in this area unless participating in the event, or authorized to be there by the sponsor of the event or U.S. Coast Guard patrol personnel.

(c) All persons or vessels not registered with the sponsor as participants or not part of the regatta patrol are considered spectators. Spectator vessels must be at anchor within a designated spectator area or moored to a waterfront facility in a way that will not interfere with progress of the event prior to 5:30 p.m. July 23, and 1983 and must remain there until released by U.S. Coast Guard patrol, or regatta patrol personnel. The following are established as spectator areas:

(1) Northwestward of a line of buoys and daybeacons between Great Egg Waterway Point of Shoal Buoy (red and black nun) and the 9th Street Route 52 Bridge in Ocean City, New Jersey, including Great Egg Waterway Daybeacons 2 and 4, but shall not extend northwestward of the Great Egg Waterway Point Buoy.

(2) Westward of a line of daybecons between Great Egg Waterway Daybeacons 10 and 14.

(3) Within the area around the shoals and islands in Beach Thoroughfare between Great Egg Waterway Daybeacons 15 and 21. This area shall at no point be closer than 150 yards from the line of bulkheads and lagoon entrances in Ocean City, New Jersey.

(d) Swimming, waterskiing and sailing are prohibited in spectator areas and in the area closed to general navigation.

(e) All persons and vessels shall comply with the instructions of U.S. Coast Guard patrol personnel. Upon hearing five or more blasts from a U.S. Coast Guard vessel, the operator of a vessel shall stop immediately and proceed as directed. U.S. Coast Guard patrol personnel include commissioned, warrant and petty officers of the Coast Guard. Members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation and other applicable laws.

(f) For any violations of these regulations the following maximum penalties are athorized by law:

(1) $500 for any person in charge of the navigation of a vessel.

(2) $500 for the owner of a vessel actually on board.

(3) $250 for any other person.

(4) Suspension or revocation of a license for a licensed officer.

(46 U.S.C. 454, 49 U.S.C. 1655(b)(1); 33 CFR 100.35, 49 CFR 1.46(b))

Dated: May 6, 1983.

W. E. Caldwell,

Vice Admiral, U.S. Coast Guard, Commander, Third Coast Guard District.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[AH–FRL 2371–6]

National Emission Standards for Hazardous Air Pollutants; Standards For Radionuclides

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of additional public hearing and extension of comment period.

SUMMARY: EPA has received a number of requests to extend the time for submission of public comments on proposed national emission standards for radionuclides. In addition, there have been several requests to conduct a public hearing on the proposed standards in the West, to accommodate persons who were unable to attend the public hearing in Washington, D.C., on April 28 and 29, 1983. In order to provide for maximum public participation and to allow adequate time for preparation of testimonies, EPA is extending the comment period and is announcing that an additional public hearing will be held in Denver, Colorado, on June 14, 1983.

DATES: *Written Comments.* Comments should be received on or before July 14, 1983. *Public Hearings.* An additional informal public hearing will be held on June 14, 1983, at the Denver Botanical gardens, 909 York Street, Denver, Colorado. Requests to participate in this hearing should be received on or before June 3, 1983.

ADDRESSES: *Written Comments.* Comments should be submitted to the Central Docket Section (A–130), U.S. Environmental Protection Agency, Washington, D.C. 20460, Attention: Docket No. A–79–11. This Docket is available for public inspection between 8 a.m. and 4 p.m., Monday through Friday at EPA's Central Docket Section, West Tower Lobby, Gallery One, Watersidfe Mall, 401 M Street S.W., Washington, D.C. 20460.

Separate sections of the Docket have been established for each category of radionuclide emissions to air. Comments specific to a particular category should be addressed to one of the following Docket Sections:

Section III A—Department of Energy Facilities
Section III B—Nuclear Regulatory Commission Licensed Facilities and non-DOE Federal Facilities
Section III C—Underground Uranium Mines
Section III D—Elemental Phosphorus Plants
Section III E—Coal-Fired Boilers
Section III F—Phosphate Industry
Section III G—Other Extraction Industries
Section III H—Uranium Fuel Cycle Facilities, Uranium Mill Tailings, and Management of High-Level Waste
Section III I—Low Energy Accelerators

Public Hearing. Requests to participate in the informal hearing should be made in writing to Richard J. Guimond, Director, Criteria and Standards Division (ANR–460), U.S. Environmental Protection Agency, Washington, D.C. 20460. All requests to participate should include the name(s) of the participants and an outline of the topic(s) to be addressed in the oral presentation. Presentations should be limited to 15 minutes.

Background Documents. Single copies of the **Federal Register** notice containing the proposed standards or of a Background Information Document containing pertinent technical information, may be requested in writing from the Program Management Office (ANR–458), U.S. Environmental Protection Agency, Washington, D.C. 20460, or by calling (703) 557–9351.

FOR FURTHER INFORMATION CONTACT: Terrence A. McLaughlin, Chief, Environmental Standards Branch (ANR–460), U.S. Environmental Protection

MAY
26
1983
UMI

Agency, Washington, D.C. 20460, (703) 557–8977.

SUPPLEMENTARY INFORMATION: EPA published proposed emission standards for radionuclides under Section 112 of the Clean Air Act in the Federal Register on April 6, 1983 (48 FR 15076). An informal public hearing on the proposed standards was held in Washington, D.C., on April 28 and 29. The close of the public comment period was scheduled to have been May 30, 1983.

EPA has received a number of requests to hold another public hearing and to extend the comment period. EPA would like to encourage maximum public participation in this rulemaking and to provide an additional forum for presentation of views.

Because of the complexity and potential impacts of this rulemaking, EPA has decided to conduct an additional public hearing in Denver, Colorado, on June 14, 1983, and to keep the rulemaking record open for public comment until July 14, 1983.

Dated: May 19, 1983.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

[AH–FRL 23 71–4]

Environmental Standards for the Management and Disposal of Spent Nuclear Fuel, High-Level and Transuranic Radioactive Wastes

AGENCY: Environmental Protection Agency.

ACTION: Request for post-hearing comments.

SUMMARY: On December 29, 1982, the Environmental Protection Agency requested public comments on the Proposed Standards for the Management and Disposal of Spent Nuclear Reactor Fuel and High-Level and Transuranic Wastes (47 FR 58196–206). The responses we received provided many useful evaluations and recommendations regarding our proposed rule. In particular, the public comments identified alternative approaches to seven issues upon which we request further public comment. These issues are: (1) The definition of "high-level radioactive waste;" (2) the need for the assurance and procedural requirements—§§ 191.14 and 191.15; (3) requirements for long-term monitoring of disposal facilities; (4) the definition of "accessible environment;" (5) extending the disposal standards beyond 10,000 years; (6) providing disposal standards which include exposure limits for individuals; and (7) the need for quantitative definitions of release probabilities in the disposal standards.

Specific questions regarding these issues were presented to participants in the public hearings that we held after comments were received (48 FR 13444). Copies of these questions have also been sent to persons and organizations which submitted substantive comments in response to our December 29, 1982 request. In order to provide an opportunity for further public participation in our rulemaking, we request additional public comments on the alternative approaches to the seven issues identified above.

DATE: Comments on these issues should be received on or before June 20, 1983.

ADDRESSES: Comments should be submitted (in duplicate if possible) to: Central Docket Section (LE–130), Environmental Protection Agency, Attn: Docket No. R–82–3, Washington, D.C. 20460.

Docket No. R–82–3, which contains all of the comments received on the proposed rule and the transcripts of the public hearings, is located in the West Tower Lobby, Gallery 1, Central Docket Section, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. The Docket may be inspected between 8 a.m. and 4 p.m. on weekdays. A reasonable fee may be charged for copying.

Copies of the detailed questions concerning the above issues, on which the Agency is requesting further comments, may be obtained by writing to: Director, Criteria and Standards Division (ANR–460), Office of Radiation Programs, Environmental Protection Agency, Washington, D.C. 20460; or, they may be obtained by contacting the individuals identified below.

FOR FURTHER INFORMATION CONTACT: Dan Egan or Ray Clark (703) 557–8610, Waste Management Standards Branch (ANR–460), U.S. Environmental Protection Agency, Washington, D.C. 20460.

Dated: May 20, 1983.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

[AH–FRL 2371–5]

Environmental Standards for Uranium and Thorium Mill Tailings at Licensed Commercial Processing Sites; Revised Hearing and Comment Schedules

AGENCY: Environmental Protection Agency.

ACTION: Notice of additional public hearing and extension of comment period.

SUMMARY: EPA has received several requests to conduct public hearings close to the uranium producing districts on this proposed rulemaking (48 FR 19584). Requests have also been received to extend the time for submittal of written comments. Accordingly, we are announcing that EPA will hold an additional public hearing in Denver, Colorado, beginning June 15, 1983. We are also extending the period for written comments to June 14, 1983. The hearing record will be kept open until June 30, 1983. Therefore, we expect to be able to fully consider any written comments received at the Docket by June 30, 1983. Public hearings will also be conducted in Washington, D.C., starting on May 31, 1983, as initially announced.

DATES:

Written Comments: Comments should be received on or before June 14, 1983. However, as noted above, we expect to be able to fully consider any written comments received at the Docket by June 30, 1983.

Public Hearings: Requests to participate in the Denver public hearing should be received on or before June 3, 1983. The Denver public hearing on this proposed rule will begin on June 15, 1983. The public hearing in Washington, D.C., will begin on May 31, 1983. All hearings will commence at 9:30 a.m.

ADDRESSES:

Written Comments: Comments should be submitted to Docket No. A–82–26 at the address specified for the Docket below. We would appreciate an additional copy sent to Mr. Jack Russell at the address listed below (see the heading "**FOR FURTHER INFORMATION**").

Public Hearings: Requests to participate in the Denver public hearing should be submitted in writing to the Director, Criteria and Standards Division (ANR–460), Office of Radiation Programs, Environmental Protection Agency, Washington, D.C. 20460. All requests for participation must include at least an outline of the topics to be addressed, the amount of time requested, and the names of the participants. The Denver public hearing on this proposed rule will be held at the Denver Botanical Gardens, 909 York Street, Denver, Colorado.

The Washington public hearing on this proposed rule will be held at the DuPont Plaza Hotel, Embassy Hall, 1500 New Hampshire Avenue, NW., Washington, D.C. 20036.

Background Documents: Background information is contained in the reports entitled *Draft Environmental Impact Statement for Standards for the Control of Byproduct Materials from Uranium Ore Processing (40 CFR 192)*, EPA Report 520/1–82–022; and *Regulatory Impact Analysis of Environmental Standards for Uranium Mill Tailings at Active Sites*, EPA Report 520/1–82–023. Single copies of these reports, as available, may be obtained from the Program Management Office (ANR–458), Office of Radiation Programs, U.S. Environmental Protection Agency, Washington, D.C. 20460; telephone number (703) 557–9351.

Docket. Docket Number A–82–26 contains the rulemaking record. The docket is available for public inspection between 8 a.m. and 4 p.m., Monday through Friday, at EPA Headquarters. The address is: Central Docket Section (LE–130), West Tower Lobby, 401 M Street, SW., Washington, D.C. 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION: Contact Mr. Jack Russell, Guides and Criteria Branch (ANR–460), Office of Radiation Programs, U.S. Environmental Protection Agency, Washington, D.C. 20460; telephone number (703) 557–8610.

Dated: May 20, 1983.

Kathleen M. Bennett,

Assistant Administrator for Air, Noise and Radiation.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[Gen. Docket No. 83–483; FCC 83–217]

Direct Remote Access to Commission Computer Data Bases

AGENCY: Federal Communications Commission.

ACTION: Notice of inquiry.

SUMMARY: The proposed Notice of Inquiry has been developed to address the desirability of authorizing direct electronic access by the public to the Commission's automated computer files. This action is the result of a petition submitted by the Association of Federal Communications Consulting Engineers.

DATES: Comments must be submitted on or before July 20, 1983, and replies on or before August 18, 1983.

ADDRESS: Comments may be mailed to the Secretary, Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mr. A. D. Enty, (202) 632–7581.

Notice of Inquiry

In the matter of allowing the public direct remote access to Commission computer data bases; Gen Docket No. 83–483.

Adopted: May 12, 1983.
Released: May 20, 1983.
By the Commission.

1. The Commission has before it a petition from the Association of Federal Communications Consulting Engineers (AFCCE) to amend § 0.455 of its Rules to permit the public remote access to the Commission's electronically filed data.[1] In order to gain a broader perspective of the implications of the AFCCE Proposal, we are initiating this inquiry seeking additional information from the public.

2. In addition, § 0.465 of the Rules provides the means for the public to obtain copies of materials which are available for public inspection. In general, paper products are available through the Commission's records duplication contractor. Computer data bases developed by the Commission for its own use are available through the National Technical Information Services (NTIS), Department of Commerce in the form of magnetic tape or microfiche. Extracts of these data bases are not provided by the Commission. Source programs, models, etc. developed by and for the Commission are also available through the Computer Applications Division. The Commission will not provide custom programming and updates to the public.

3. The petition notes that present methods of providing data are very time consuming and not in keeping with current state-of-the-art in data processing. Furthermore, data obtained in the above manner is often outdated when received. The AFCCE, therefore, requests direct remote access to several of the Commission's electronic data bases. Most of the requested files are currently not accessible in an on-line, interactive mode, however, two of the major files are on-line:

A. The Master File Search System (MFS) as described in the Commission's Report FCC/OCE–SA–79–02; and

B. The master frequency file retrieval system using the Data Base Management System of the Honeywell 6000 Series Computer.

Information concerning these systems can be obtained by contacting Phillip G. Tremper at (202) 653–8163 or John Giuli at (202) 254–7163. Briefly, these systems access the data contained in the non-government master frequency file. This file contains most information appearing on station likeness (except amateur, marine ship, aircraft, commercial and restricted permits, and citizens ban licenses.)

4. In the fall of 1983, the Commission expects to have implemented several new systems currently under development. These microcomputer based systems will include the following systems expected to be of interest to the public.

A. Citator;

B. Rules; and

C. Docket History.

Information related to these systems may be obtained by contacting Michael J. Gilbride at (202) 653–5720. Briefly, these systems will track the status of Commission Dockets and Rulemakings.

5. The data and systems described in paragraphs 3 and 4 above are/will be available to the public with:

A. documentation of the information contained in the systems, including record formats, data definitions, etc. via NTIS; and

B. documentation on the use of the systems, via NTIS.

6. A number of technical alternatives exist which would provide the public remote access to the Commission's electronically filed data. Dependent upon the public's particular requirements, the most appropriate alternative may be determined. Response to each of the following considerations will permit the identification of the appropriate alternative:

A. *Service Access Considerations*: At a minimum, comments should address the alternatives outlined below as well as others that you believe would satisfy your requirements. Please explain why the alternative you identify is preferred and explain whether and why any of the other alternatives would not satisfy your needs.

(1) Direct electronic access to the Commission's files.

(2) Access to the files through a public network system such as Telenet, Tymnet, etc; and

[1] Section 0.455 of the Rules states that certain records may be inspected "in the offices of the Bureau or Office which exercises responsibility over matters to which those records pertain."

VOL
48
ISS
103
MAY
26
1983
UMI

(3) Access to the files through a third party contractor.

B. *Data File Considerations:* As previously indicated, there are several computer files which are currently not accessible on-line, for example:

(1) TV Engineering Data Base
(2) FM Engineering Data Base
(3) AM Engineering Data Base
(4) FM Translator Engineering Data Base
(5) TV Translator Engineering Data Base
(6) NARBA List (Canadian and Mexican Notifications)
(7) Auxiliary Broadcast Services Data Base
(8) WARC Inventory List of Notifications

Which, if any, additional data files (include the above, as appropriate) do you wish to access directly?

C. *Timeliness and Currency Considerations:* For each alternative addressed, including those outlined above, comment on the following:

(1) What access period (EST) would be most appropriate to satisfy your requirements?

(2) The minimally acceptable level of currency of the data under each altenative?

(3) The response time required to make the service usable for both on-line and off-line processing?

D. *Expected Usage of the Service Considerations:* For each alternative addressed, including those outlined above, comment on the following:

(1) What terminal types, information interchange codes, and baud rates would best meet your needs?

(2) Estimated number of queries per day, per month;

(3) Estimated off-line pages to be printed per day, per month;

(4) The specific report types required;

(5) The specific utility programs required; and

(6) The estimated connect time per day, per month.

E. *Security, Fraud, and Abuse Considerations:* To adequately protect the Commission's files and to preclude unauthorize use of the Commission's computer resources, it will be necessary to establish safeguards. The public is invited to recommend measures by which the Commission could adequately protect sensitive information and safeguard its computer resources.

F. *Other Considerations:* The public is invited to submit for consideration any other related items of interest and special concern, including service cost considerations, which are not included herein.

7. This action is taken pursuant to Section 403 of the Communciations Act of 1934, as amended. Comments must be filed on or before *July 20, 1983* and reply comments on or before *August 18, 1983*. All relevant and timely comments will be considered.

8. In accordance with § 1.419 of the Rules, an original and six (6) copies of all comments, suggestions, briefs, or other documents will be furnished the Commission. The petition to amend § 0.455 of the Rules will be placed in the dockets file for reference by the public.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[PR Docket No. 83-464; FCC 83-212]

Implementation of Changes in the Alaska-Public Fixed Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rules.

SUMMARY: This document proposes to change certain existing rules in order to (1) increase monitoring of the Alaska Emergency Frequency, (2) clarify which frequencies are available to common carriers in the Alaska-Public Fixed Service, (3) remove unnecessary frequency zone regulations to make more frequencies available state-wide, and (4) create greater flexibility in station identification for Alaska Fixed and Coast licensees. This action is necessary because the existing rules are overly restrictive, partially obsolete, and deviate from accepted practice. These actions are intended to benefit all Alaska users alike by reducing regulation, creating greater flexibility, and increasing efficient use of their channels.

DATES: Comments must be submitted on or before November 1, 1983. Reply comments must be submitted on or before January 30, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Notice of Proposed Rule Making

In the matter of amendment of Parts 2, 81, 83, 87, 90, and 97 of the Commission's rules and regulations to implement changes in the Alaska-Public Fixed Service; PR Docket No. 83-464.

Adopted: May 2, 1983.
Released: May 5, 1983.

By the Commission: Commissioner Fogarty not participating.

Summary

1. This Notice of Proposed Rule Making ("NPRM" or "Notice") proposes to rewrite that portion of the Rules and Regulations ("rules") which governs the Alaska-Public Fixed Service (Part 81, Subpart Q). This service serves the unique needs of Alaska "bush" communities which have no form of conventional telephone available to them, and who must rely on the nearest cannery or fishing village's radio transceiver for communications facilities. The Alaska-Public Fixed Licensees operate on marine frequencies since most of them originally settled along the coasts of Alaska. The typical Alaska-Public Fixed licensee provides a communications link from the "bush" to the nearest population center with conventional telephone service. The proposed rules are less limiting than the current ones and should better accommodate the varied requirements of the Alaskan population. Because the Notice includes a proposal to change the Alaska Energency Frequency, the rules parts cited in the caption all require modification.

Background

2. The Alaska Communications System ("ACS") was a governmental communications system operated by the Air Force until 1969, when it was sold to RCA Alaska Communications, Inc., and then to Alascom, Inc., pursuant to the Alaska Communications Disposal Act. Alascom, Inc. ("Alascom") and other entities continue to provide communications to Alaska, although such of the ACS equipment has been replaced by systems using more sophisticated technology, such as satellites and microwave systems. In this proceeding, the Commission is proposing to modify or to delete certain rules which date back to the sale of the ACS. Additionally, the Commission is proposing to change the Alaska Emergency Frequency from 4383.8 kHz to 5167.5 kHz, and to make it available to licensees in a new Alaska-Private Fixed Service as a calling channel.

Discussion

3. The State of Alaska is presently divided into six zones in the rules for the purpose of frequency assignment. Many of the very desirable 4 and 5 MHz frequencies are available in only one zone, where they may or may not be used. This limitation is particularly frustrating to applicants in other zones where similar frequencies are either occupied or otherwise unavailable. The zones also restrict communication between individuals operating within proximity of each other but in separate zones. Because the zones no longer appear to serve any useful purpose, we are proposing to remove all reference to zones from the rules.

4. The Commission is also proposing to change the Alaska Emergency Frequency, in order to increase the number of radios which are able to monitor the frequency. An emergency channel can only be effective if it is closely monitored. Unfortunately, the frequency which was selected in 1974, 4383.8 kHz, is not always monitored and indeed many radios are not equipped to receive it. This lack of use is partly due to the Commission's previous prohibition against using the frequency as a calling channel. Conversely, the frequency 5167.5 kHz enjoys greater popularity in Alaska as it is used by the lodges and air taxis as a calling channel. We are therefore proposing to change the Alaska Emergency Frequency to 5167.5 kHz for all stations authorized in the amateur, fixed, and mobile services and to Government stations, within 50 nautical miles of the State of Alaska. Under the new rules, the Alaska-Private Fixed licensees will be allowed to continue calling and listening activities on 5167.5 kHz, but, as before, must switch to a working frequency as soon as communication is established. The large number of existing radios which are in use and are equipped with this channel, coupled with its availability as a calling frequency, should ensure much more efficient use (i.e., close monitoring) of the Alaska Emergency Frequency.

5. The existing Alaska-Public Fixed Service rules provide for two basic categories of licensees: common carriers and non-common carriers. However, due to confusion over eligibility requirements, certain non-carriers have been licensed to operate on common carrier frequencies and have charged their customers for interconnection service although their licenses indicate they do not charge. The Commission recognizes that these licensees are serving a vital need and does not wish to inhibit their operations in any way. However, if they charge their customers for communications service, they must comply with our rules. The rules as they exist are unclear and may cause confusion over eligibility requirements. In fact, two such licensees have been cited with rule violations by our field office in Alaska as a result of this situation.

6. This NPRM proposes to rewrite the rules governing common carriers and non-common carriers so that the situation described above will not recur. We are proposing two distant groups of frequencies: duplex frequencies for common carriers only and simplex frequencies for all others. To our knowledge, the impact of the proposed rule changes on existing carriers would be *de minimus*. For example, there are only six locations where licensees in this service continue to provide a common carrier service (Anchorage, Cordova, Fairbanks, Juneau, Ketchikan, and Kodiak). Frequencies, which were previously used by Alascom to provide communications to outlying communities which have since obtained other communications service(s), are not now utilized by the common carriers. We are therefore proposing to add these frequencies to the "pool" of simplex frequencies now available throughout Alaska to all other Alaska-Public Fixed licensees. The common carriers would be ineligible to use the simplex frequencies. Henceforth the Alaska Fixed Service would be comprised of two classes of stations: Alaska-Private Fixed licensees and Alaska-Public Fixed licensees.

7. The existing rules make provisions for radiotelegraphy operations on certain Alaska-Fixed channels. However, to the Commission's knowledge, none of these frequencies are used for manual radiotelegraphy. Indeed, the only discernible radiotelegraphy use appears to be radioteletypewriter, which is limited to five (5) frequencies. Since radioteletypewriter appears to be the only remaining radiotelegraphy requirement, the proposed rules would delete all other references to telegraphy and telephony, and all the frequencies (except the five mentioned above) would be made available for telephony.

8. Our final proposed change is a minor one involving Alaska Private and Public Fixed and Private and Public Coast station identification. Previously, licensees needed FCC approval in order to identify themselves over the air by approximate geographic location rather than by call sign. We are proposing to relax this rule to allow these licensees to use their approximate geographic location if they are the only licensee on that frequency at that location. Should there be more than one license issued for use of the same frequency in a given location, then the new relaxed rules would allow identification by licensee name followed by location. These stations are free to choose between the old method of voice station identification and the new method described above. This and all the other changes are specified in the attached Appendix.

Proposal

9. Accordingly, the Commission is issuing this Notice of Proposed Rule Making to amend certain portions of the rules governing Stations on Land in the Maritime Services and the Alaska-Fixed Service to better meet the needs of the public. These changes include (1) deleting the six zones in the State of Alaska, (2) changing the Alaska Emergency Frequency from 4383.8 kHz to 5167.5 kHz, (3) redefining the eligibility requirements for use of the simplex and duplex frequencies available to the Alaska-Public Fixed licensees, (4) moving certain frequencies, previously only available to common carriers, into the pool of frequencies only available to non-common carriers, and (5) relaxing the rules governing coast station and Alaska Fixed station identification.

10. The proposed amendments to Parts 2, 81, 83, 87, 90, and 97 of the rules, as set forth in the Appendix, are issued pursuant to the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

11. Pursuant to Section 605 of the Regulatory Flexibility Act (Pub. L. 96-354, September 19, 1980, 94 Stat. 1164; 5 U.S.C. 601 *et seq.*) the Commission certifies that the action proposed herein will not have a significant impact on a substantial number of small entities. Most of the proposed changes simplify the existing rules by removing unnecessary regulations and clarifying remaining ones. With the exception of the common carriers of which there are but a few, the changes do not significantly impact any entities, but should promote greater efficiency among all of them. Furthermore, the three common carriers who would be directly affected by the proposed changes

VOL 48 ISS 103 MAY 26 1983 UMI

already comply with the new requirements.

12. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may submit comments on or before November 1, 1983, and reply comments on or before January 30, 1984. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

13. For purposes of this non-restricted notice and comment rule making proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rule making until the time a public notice is issued stating that a substantive disposition of the matter is to be considerd at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the Public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231.

14. In accordance with the provisions of § 1.419 of the Commission's rules, an original and five copies of all statements, briefs or comments filed shall be furnished the Commission. Responses will be available for public inspection during business hours in the Commission's Public Reference Room in its headquarters in Washington, D.C.

15. For further information concerning procedures to follow with respect to this rule making proceeding, contact Maureen Cesaitis, (202) 632–7175. A summary of the Commission's procedures governing *ex parte* contacts in informal rule making is available from the Commission's Consumer Assistance Office, FCC, Washington, D.C. 20554, (202) 632–7000.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 2, 81, 83, 87, 90, and 97 of Chapter I of Title 47 of the Code of Federal Regulations are proposed to be amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

Section 2.106 is amended by adding an entry to the table for the band 5005–5450KHz and by revising footnote US212 to read as follows:

§ 2.106 Table of frequency allocations.

FEDERAL COMMUNICATIONS COMMISSION

Band (kHz)	Service	Class of Station	Frequency
7	8	9	10
5005–5450 (US212)	Fixed		

US Footnotes

US212 In the State of Alaska, the frequency 5167.5 kHz, is designated for emergency communications. This frequency may also be used in the Alaska-Private Fixed Service for calling and listening, but only for establishing communications before switching to another frequency.

* * * * *

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

1. Part 81 is amended in the heading by removing the hyphen and the word "Public".

2. Section 81.9, including its heading, is amended as follows: The "Note" at the end of paragraph (a) is removed, paragraph (b), including the map and note that follow it, is removed, paragraph (c) is redesignated (b), paragraph (d) is redesignated (c) and is revised to read as shown below, and a new paragraph (d) is added to read as shown below.

§ 81.9 Alaska-Private And Public Fixed.

* * * * *

(c) *Alaska-Public Fixed Station.* A fixed station in Alaska, which is open to public correspondence, and is licensed by the Commission for radio communication between specified fixed points within Alaska. These stations operate at geographical locations specified in § 81.711 on paired, duplex channels.

(d) *Alaska-Private Fixed Station.* A fixed station in Alaska which is licensed by the Commission for radio communication within Alaska, on simplex channels listed in § 81.709. Alaska-Private Fixed stations are also eligible to operate on secondary transmit frequencies to exchange communications with Alaska-Public Fixed stations in accordance with § 81.711.

3. Section 81.304 is amended by adding a line in numerical sequence (between 4428.6 and 6147.5) in paragraph (a) and by revising paragraph (b)(9) to read as follows:

§ 81.304 Frequencies available.

(a) * * *

CONDITIONS OF USE

Carrier frequency (kHz)	Section	Limitations
5167.5 Emergency		9

(b) * * *

(9) The frequency 5167.5 kHz, maximum power 150 watts PEP, may be used by any station authorized under this part to communicate with any other station authorized in the State of Alaska for emergency communications. This frequency may also be used by stations authorized in the Alaska-Private Fixed Service for calling and listening, but only for establishing communication before switching to another frequency.

* * * * *

4. Section 81.310 is revised to read as follows:

§ 81.310 Identification of station.

All radiotelephone emissions from a public (or private) coast station shall be clearly identified:

(a) By voice transmission of the official call sign;

(b) By voice transmission of the approximately geographic location of the station if there will be no conflict with identification of any other station; or

(c) By voice transmission of the licensee's name followed by the approximate geographic location of the station.

5. The Subpart Q heading is revised to read as follows:

Subpart Q—Alaska Fixed Stations

* * * * *

6. Section 81.706 is revised to read as follows:

§ 81.706 Station identification.

All emissions from an Alaska-Public or Private Fixed station shall be clearly identified:

(a) By voice transmission of the official call sign; or

(b) By voice transmission of the approximate geographic location of the station if only one licensee is on that frequency at that location; or

(c) By voice transmission of the licensee name followed by the approximate geographic location of the station.

7. Section 81.708 is revised as follows:

§ 81.708 Frequencies available.

(a) The following table indicates the authorized carrier frequencies for use by Alaska-Private and Public Fixed stations along with their specific conditions of use. The conditions of use consist of the pertinent section reference(s) and the specific assignment limitations, which are enumerated in paragraph (b) of this section. For single sideband radiotelephone emission, the assigned frequency will be 1.4 kHz above the authorized carrier frequency.

*EMERGENCY—CALLING—LISTENING.

(b) Authorization and use of the carrier frequencies set forth in paragraph (a) of this section shall be in accordance with the following limitations and conditions:

(1) Available for use with emission 2.8A3J.

(2) [Reserved].

(3) [Reserved].

(4) To be used exclusively for communication over distances of not less than 50 miles and only during the hours from 6 a.m. to 9 p.m. local standard time.

(5) To be used exclusively for communication over distances of not less than 200 miles and only during the hours from 6 a.m. to 6 p.m. local standard time.

(6) Available in response to an application which specifically requests authority to use these frequencies. These frequencies are available under the following limitations and conditions:

(i) The transmitter output power employed shall be the minimum necessary for satisfactory communication and in no event shall exceed a maximum of 1,000 watts peak envelope power.

(ii) Emission 2.8A3J shall be used.

(7) Use of the frequency 1680 kHz shall be coordinated to protect radiolocation operations on adjacent channels.

(8) To minimize interference to or from the operation of stations outside the Alaska area or U.S. Government stations within Alaska, this frequency is authorized for use annually only during the hours from 7 a.m. to 11 p.m. local standard time from May 15 to September 15, inclusive; and from 8 a.m. to 9 p.m. local standard time from April 1 to May 14, inclusive, and from September 16 to October 31 inclusive.

(9) This frequency may be authorized for use by Alaska-Private Fixed stations subject to the following limitations and conditions:

(i) The Alaska-Private Fixed frequencies are the same as those authorized to the licensee for use at the licensee's public coast station.

(ii) The Alaska-Private and Public Fixed frequencies are to be used in receiving and transmitting equipment which is installed at the same location as equipment used by the public coast station; and

(iii) The licensee is authorized in the Maritime Mobile Service.

(10) This frequency may be authorized for radioteletypewriter use.

(11) Insofar as is practicable, Alaska-Private Fixed stations shall limit their use of the frequencies 3258 and 3261 kHz to communication over distances which cannot be effectively covered by the use of a frequency below 2700 kHz or above 70 MHz.

(12) To minimize interference to or from the operation of stations outside the Alaska area, this frequency is authorized for use annually only during the hours from 6 a.m. to 11 p.m. local standard time, from April 1 to September 30, inclusive.

(13) For communication with common carrier stations located at Anchorage.

(14) For communication with common carrier stations located at Kodiak.

(15) For communication with common carrier stations located at Cordova.

(16) For communication with common carrier stations located at Juneau.

(17) For communication with common carrier stations located at Ketchikan.

(18) Use of this frequency for fixed services is on a secondary basis to its use under § 81.306(d).

8. Section 81.709 is revised to read as follows:

VOL 48 ISS 103 MAY 26 1983

§ 81.709 Frequencies available for simplex use by Alaska-Private Fixed licensees.

Each of the simplex carrier frequencies set forth in the following table, when authorized by station license, may be used by Alaska-Private Fixed stations, for communication with other licensed Alaska-Private Fixed stations. Alaska-Private Fixed stations many be interconnected with facilities of licensed common carriers to provide communications to the desired destination. Licensees are forbidden to levy a tariff or any other kind of a fee for use of these frequencies. The limitations and conditions of use applicable to each frequency are set forth in § 81.708.

Frequency (kHz)

§ 81.710 [Reserved]

9. Section 81.710 is removed and reserved.

10. Section 81.711 is revised to read as follows:

§ 81.711 Frequencies for duplex use in common carrier systems.

(a) The carrier frequencies in the table below are available for assignment and use, in duplex frequency operations, to Alaska-Public Fixed stations that provide essentially common carrier service. These stations must have effective tariffs on file with the Commission, pursuant to the requirement of Section 203 of the Communications Act and Part 61 of this chapter, if they engage in any interstate or international communications. (If a licensee offers solely intrastate communications, no tariff is required by the Commission; however, intrastate common carriers must comply with State and/or local tariff requirements.)

(b) The frequencies in column two below are available for assignment to Alaska-Public Fixed stations located in the geographical areas listed in column one. The frequencies listed in column three are paired with the frequencies listed in column two and are available for assignment to Alaska-Private Fixed stations which operate and exchange communications with the primary (Public-Fixed) stations. The frequencies listed in column three may not be used for any other purpose than that described above.

FREQUENCIES AVAILABLE

Location of primary station	Primary station transmit (kHz)	Secondary station transmit (kHz)
(1)	(2)	(3)

	3180	2776
Kodiak	2781	2474

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

§ 83.2 [Amended]

1. In § 83.2, paragraph (t) is amended by removing the "Note", and paragraph (u), including the diagram (Map), is removed.

2. In § 83.351, in paragraph (a) table, the line concerning the carrier frequency 4383.8 kHz is removed, and a new line is added in numerical sequence (between 4434.9 and 5680 kHz), and paragraph (b)(36) is added to read as follows:

§ 83.351 Frequencies available.

5167.5		83.370	15, 36

(b) • • •

(36) The frequency 5167.5 kHz, maximum power 150 watts PEP, may be used by any station authorized under this part within 50 nautical miles of the State of Alaska, to communicate with any other station authorized in the State of Alaska for emergency communications.

PART 87—AVIATION SERVICES

Section 87.295(c)(4) is amended by removing "[1] 4383.8" from the third column and replacing it with "[1] 5167.5", by redesignating present footnote 1 as footnote 2 and changing the references in columns 1 and 2 to footnote "1" to footnote "2", and by adding a new footnote 1 to read as follows:

§ 87.295 Frequency available for domestic HF service.

(c) • • •

(4) • • •

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

1. Section 90.253 including its heading is revised to read as follows:

§ 90.253 Use of frequency 5167.5 kHz.

The frequency 5167.5 kHz may be used by any station authorized under this part to communicate with any other station in the State of Alaska for emergency communications. The maximum power permitted is 150 watts peak envelope power (PEP). All stations operating on this frequency must be located in or within 50 nautical miles (92.6 km) of the State of Alaska. This frequency may also be used by stations authorized in the Alaska-Private Fixed Service for calling and listening, but only for establishing communication before switching to another frequency.

2. Section 90.555(b) is revised by removing the line for frequency 4383.8 from the kilohertz column and adding a line for frequency 5167.5 (in numerical order) to the kilohertz column to read as follows:

§ 90.555 Combined frequency listing.

(b) Combined frequency list:

5167.5	(2)	Alaska emergency frequency

PART 97—AMATEUR RADIO SERVICE RULES

1. Section 97.61 is amended by removing the line concerning the

[1] The frequency 5167.5 kHz may be used for emergency communications with any other authorized radio station in Alaska. However, no airborne operations are permitted. Maximum power is limited to 150 watts PEP. This frequency may also be used by stations authorized in the Alaska-Private Fixed Service for calling and listening, but only for establishing communication before switching to another frequency.

frequency 4383.8 and adding the following line in its place (between the bands 3775–4000 and 7000–7300) and by revising paragraph (b)(13):

§ 97.61 Authorized frequencies and emissions.

(a) • • •

Frequency band (kHz)	Emissions	Limitations [1]
5167.5	A3J,A3A	13

[1] See paragraph (b)

(b) • • •

(13) The frequency 5167.5 kHz, maximum power 150 watts, may be used by any station authorized under this part to communicate with any other station authorized in the State of Alaska for emergency communications. Additionally, all stations operating on this frequency must be located in or within 50 nautical miles of the State of Alaska. The frequency 5167.5 kHz may be used by licensees in the Alaska-Private Fixed Service for calling and listening, but only for establishing communication before switching to another frequency.

2. Section 97.107 is amended by revising a footnote to paragraph (b) as follows:

§ 97.107 Operation in emergencies.

(b) • • •

The frequency 5167.5 kHz may be used by any station authorized under this part to communicate with any other station in the State of Alaska for emergency communications. All stations operating on this frequency must be located in or within 50 nautical miles of the State of Alaska. The frequency 5167.5 kHz may be used by licensees in the Alaska-Private Fixed Service for calling and listening, but only for establishing communication before switching to another frequency.

[PR Docket No. 83-431; RM-2946; FCC 83-206]

Provisions for Implementation of the International Radio Consultative Committee (CCIR) Digital Selective Calling (DSC) System Within the Maritime Mobile Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This notice proposes to amend the rules to provide the parameters under which the CCIR Digital Selective Calling (DSC) system will be implemented by ships and coast stations operating within the Maritime Mobile Service. DSC is a system used to establish contact with a station or group of stations by means of radio. The primary reason for implementing such a system is to provide a standard and improved method for establishing radio contact in the marine environment which in turn will promote more efficient use of the radio frequency spectrum. A second consideration is the fact that the CCIR DSC system will be an integral part of the Future Global Maritime Distress and Safety System (FGMDSS) developed by the International Maritime Organization (IMO) and planned for final implementation in the next decade. The intended effect is to make the CCIR DSC system available to the maritime community on an optional basis at an early date.

DATES: Comments must be received on or before November 9, 1983, and reply comments must be received on or before December 27, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Robert E. Mickley, Private Radio Bureau, (202)632-7175.

List of Subjects in 47 CFR Parts 81 and 83

Coast stations, Communications equipment, Marine safety, Radio, Ship stations.

Proposed Rule Making And Order

In matter of digital selective calling system in the Maritime Mobile Service; PR Docket No. 83-431, RM 2946.

Adopted: April 27, 1983.
Released: May 9, 1983.

By the Commission: Commissioner Jones absent.

Summary

1. The Commission proposes to amend Parts 81 and 83 of its rules to provide for the implementation of the International Radio Consultative Committee (CCIR) digital selective calling (DSC) system within the Maritime Mobil Service. Selective calling provides the basis for direct-dial, automated communications in the maritime services, thus promoting more reliable and effective contact between ship and shore or between ships. CCIR DSC is designed to meet the operational requirements of the Maritime Service on an internationally compatible basis. Moreover, the requirements of the Future Global Maritime Distress and Safety System (FGMDSS) are based upon the use of the CCIR DSC system for distress alerting. Early optional use of CCIR DSC equipment, by ships and coast stations of the United States will promote increased efficiency of the radio frequency spectrum and facilitate the transition to possible mandatory use of the system when the FGDSS comes into force for the United States, now planned for the next decade. The DSC system should be applicable to all forms of radiotelephony and radiotelegraphy communications as well as all frequency bands.

Background

2. The development of a system to improve maritime communications calling procedures has long been recognized as essential to significant improvement of maritime mobile communications. Selective calling systems were described at the International Telecommunication Union's (ITU) Ninth Plenary Assembly of CCIR (CCIR, Los Angeles, 1959). Comparative tests were carried out by the Federal Republic of Germany and the United States. These and further tests were conducted prior to the 1963 and 1966 CCIR Plenaries by Study Group XIII of the CCIR.

3. The World Administrative Radio Conference for Maritime (WARC 1967) amended the ITU Radio Regulations to permit maritime selective calling and adopted the sequential single frequency code (SSFC) system to meet immediate operational requirements.

4. When SSFC was adopted, it was acknowledged that the system could meet a limited immediate requirement but that it could not meet the requirements for the anticipated number of future users. The SSFC was also limited to full voice bandwidth operation. In 1967, the ITU called for the development of a system with greater capability for future maritime use.

5. In 1967, and again at the CCIR Interim Meeting (Geneva, 1972), a digital system was proposed which utilizes a narrow bandwidth and is suitable for operation over all maritime communications channels. Further studies were recommended to develop supporting data on the performance of such a system.

6. In 1972, U.S. flag shipping companies requested the U.S. Maritime Administration to use its resources to coordinate and initiate the development of a selective calling system that would meet both the current and future

UMI

VOL 48 ISS 103 MAY 26 1983 UMI

industry needs. The Office of Telecommunications Policy, Office of the President and the Federal Communications Commission also supported the development of such a system. A Special Committee (SC–64) of the Radio Technical Commission for Marine Services, working in conjunction with interested agencies and the maritime community, established the requirements for the system. A digital technique was selected as being the most able to meet all future selective calling requirements. A feasibility model was developed and several units were constructed.

7. Tests were conducted in the laboratory, on ships-at-sea, and on the High Frequency (HF) Simulator at the Institute for Telecommunications Sciences, at Bolder, Colorado. Further tests were conducted by Norway and the United Kingdom. These tests provided confidence in the performance characteristics of the concept, and formed the basis for a proposal advocating international adoption.

8. The CCIR, at its meeting in 1974, recommended the adoption of the basic digital selective calling system. Technical characteristics were provisionally accepted, pending further evaluations of the message format, which was modified to accommodate the views of other member nations. The 1974 World Administrative Radio Conference established dedicated, digital selective calling frequencies and adopted the digital technique, subject to final definition of the technical characteristics by the CCIR.

9. The ITU's Fifteenth Plenary Assembly of the CCIR (CCIR, Geneva, 1982) adopted the DSC operational and technical characteristics which are contained in CCIR Recommendation 493–2. The same Plenary Assembly adopted the DSC operational procedures which are contained in CCIR Recommendation 541–1. These DSC-relevant CCIR Recommendations, in conjunction with Article 62 of the ITU Radio Regulations,[1] provide the basis and authority for the implementation of CCIR DSC within the United States maritime community.[2]

[1] We refer throughout the NPRM to Radio Regulations, edition of 1982, Geneva.

[2] On August 12, 1977, WJG Telephone Company, Inc. (WJG) filed a petition for rule making seeking authority in the rules to permit operation of direct dial operations and automatic signalling on the Mississippi River. This petition was assigned rule making number RM 2946. The lack of a signalling channel, various technical difficulties and a strong preference for a standardized system have precluded implementation of such a system. In subsequent discussion and studies, various alternatives have been explored. Most recently, in discussion with Commission staff, WJG has indicated that the promulgation of the standards we are proposing in this docket would adequately respond to its need. Accordingly, we will dismiss RM 2946 in the ordering paragraph below with the understanding that WJG will comment in this proceeding.

Present High Seas Limitations

10. Conventional communications, other than satellite, in the maritime services presently are subject to several hours of delay. This delay is due to several factors, including variations in radio propagation; limited watch duty hours; operating procedures; preoccupation of the radio operator with other duties; and other operational difficulties.

11. When a message is to be sent to a ship, it is first passed to a coast station for relay. The coast station generates a traffic list that includes the call signs of all ships for which there is traffic. The traffic list is transmitted on designated calling frequencies every two hours. The ship radio operator monitors the calling frequencies of the coast stations that normally handle traffic to and from the ship. If the call sign of the ship is heard, the operator will attempt to contact the coast station on one of the coast station working frequencies to request the message. The potential for contact under these calling conditions is very limited.

12. The variables that affect radio propagation are complex and are dependent on the time of day, frequency, location, time of year, sunspot activity, and wheather. Selection of frequency is about the only variable that is under the control of the operator. Experience plays a large part in the selection of the frequency for operation. Since the operator is usually limited to monitoring only one frequency at a time, calls are often missed.

13. The potential for contact is further reduced by the limited watch hours of the radiotelegraph operator. Most ships have only one radio operator and the radio room is unattended approximately two-thirds of the time. According to some estimates, contact is established in only about ten percent of the time when the call is first put on the traffic list. Even after the call has been on the traffic list three times, the contact success has only increased to approximately forty percent. A six hour delay in contacting a ship under these conditions is typical.

14. One of the prime faults in the present conventional system is the delay that is encountered in establishing contact with a ship at sea. The CCIR digital selective calling system promises to reduce this limitation by making it possible to contact a ship even when the radio operator is not on watch, and by maintaining a constant monitor of several calling frequencies, thus reducing the probability of missing a call.

Spectrum Efficiency

15. In recent years there has been a growing user demand from both coast and ship stations for a universal, automated, radiotelephone system and the matter has been the subject of considerable study effort. The Radio Technical Commission for Marine Services, while functioning as a Federal Advisory Committee, completed a study in 1981 on the subject of a "VHF Automated Radiotelephone System". The work of this advisory committee was the basis of United States recommendations to Interim Working Party 8/5, established by the CCIR. Currently, the newly-formed Radio Technical Commission for Maritime Services (RTCM) is studying Digital Selective Calling with a view toward coordinating operational testing of DSC and encouraging more efficient use of the frequency spectrum through the use of DSC.

Safety Considerations

16. The Inter-Governmental Maritime Consultative Organization, through its Subcommittee on Radiocommunications, commenced development of the Future Global Maritime Distress and Safety System (FGMDSS) in 1979. The FGMDSS is expected to become fully operational in the next decade. It is expected to replace the present system, which relies primarily on ship-to-ship distress alerting using Morse Code. The future system will, while retaining a ship-to-ship alerting system for distances of about 100 miles, rely mainly on ship-to-shore distress alerting, using polar-orbiting satellites, geostationary satellites and a high frequency terrestrial system employing the CCIR system of digital selective calling.

Equipment Compatibility

17. In the marine telecommunications community today there are various systems of selective calling in existence other than the CCIR DSC system. These systems range from simple to complex, depending upon the type of service and number of features provided. The most prominent existing domestic example of selective calling is the Great Lakes VHF Radiotelephone System operated by Lorain Electronics Corporation of Lorain, Ohio. This system is performing a definite public service, especially to vessels whose voyages are confined to the Great Lakes. The problem arises when vessels entering or exiting this VHF automated communications system are unable to effectively use their VHF equipment because of incompatible selective calling equipment and procedures or the absence of any selective calling system. The disadvantage of incompatible selective calling systems in the marine environment is obvious from the view point of a ship or boat operator transiting the service areas of several coast stations.

18. While we believe that there is an advantage in compatibility using a single selective calling system, especially in view of the role which this feature is expected to play in the FGMDSS, we will not at this point in the process foreclose the possibility of permitting incompatible equipment to coexist. The proposed rules are intended as a reference point for comments. We specifically invite discussion as to whether a single, uniform system is appropriate as well as whether the proposed CCIR DSC minimum features are adequate or excessive.

Proposal

19. The proposed rules which would implement the CCIR DSC system are contained in the Appendix. The proposed rules reflect the following concepts:

A. Definition:

CCIR Digital Selective Calling System—A system, used to establish contact with a station or group of stations automatically by means of radio, developed by the International Radio Consultative Committee (CCIR) based upon a synchronous ten-unit digital code consisting of seven information bits and an associated three bit binary code for error detection.

(Note.—The minimum operational characteristics, which we believe are necessary in order to transmit and receive DSC calls and provide a satisfactory degree of safety, are those contained in paragraph A.2. of the Appendix, for coast stations, and paragraph B.3. of the Appendix, for ship stations. Because of the differences in scope between the suggested minimum operational characteristics and the maximum operational characteristics available, it is recommended that the Appendix be compared with CCIR Recommendation 493–2. To facilitate this comparison, we have included numbers within brackets opposite pertinent portions of the Appendix. The numbers within the brackets refer to the applicable section of Annex I to CCIR Recommendation 493–2.)

B. Implementation:

(1) All coast and ship stations are authorized to install and use CCIR DSC compatible equipment on the effective date of the Report and Order in this proceeding. As a minimum, such equipment shall contain the minimum operational characteristics delineated in the Appendix.

(2) Coast and ship stations are authorized to install non-CCIR selective calling equipment until February 1, 1986.

(3) All coast and ship stations installing selective calling equipment subsequent to January 31, 1986, must install CCIR DSC compatible equipment.

(4) All coast and ship stations equipped with non-CCIR selective calling equipment on January 31, 1986, meeting the following conditions, may continue to use such equipment until a date to be established by FCC Order. Such date will not be within six years of the effective date of an FCC Order associated with this rulemaking proceeding and a minimum of one year's notice will be given when the date is established. The conditions are:

(a) Such selective calling equipment, which is not compatible with the CCIR DSC technical characteristics, must have been installed and operational by January 31, 1986, and such fact recorded in the radio station records along with information which will positively identify the equipment.

(b) Such equipment, incompatible with CCIR DSC techical characteristics, is used only at the same radio station where located and operational on January 31, 1986.

C. Technical Characteristics:

(1) The technical provisions of CCIR Recommendation 493–2 will be adopted by reference in the rules, except that a numeric only capability is required, and that a dot pattern will be used for distress calls in order to accommodate the use of scanning devices.

(2) The radio frequency tolerance of new transmitters designed for use with digital selective calling equipment in the MF and HF bands shall be ±10 Hertz after January 31, 1990. The recommended receiver 6 db bandwidth after January 31, 1990, will be 200 to 270 Hertz. (Note: The January 31, 1990, date is used because it is the earliest date envisioned for the full implementation of the FGMDSS. The equipment technical characteristics are consistent with CCIR Recommendation 493–2.)

D. Operational Characteristics:

(1) The operational provisions of CCIR Recommendations 493–2 and 541–1 will be adopted by reference in the rules. When the FGMDSS becomes operational, this will automatically provide for the following functions which heretofore had to be performed by other human or equipment means:

—Continuous watchkeeping on distress frequencies.

—Automatic recording of distress calls and distress messages.

—Alerting of operators on receipt of distress, urgency and other vital safety calls.

—Automatic/pushbutton transmission of distress calls and distress information.

—Continued watchkeeping on all required safety or commercial channels.

—Capability to get access to any coast station, including frequency and/or channel indications.

—Capabilities for acknowledgement of a call.

—Telecommand facilities allowing for unattended reception or unattended operations.

—Recording of received calls.

(2) The system of Nationality Identification Digits (NID's) as contained in the ITU Radio Regulations (Resolution 313 and Appendix 43) will be implemented.

E. Radio Frequency Provisions:

(1) The high frequency (HF) DSC frequencies listed in the ITU Radio Regulations, Article 62, will be made available to public coast and ship stations for DSC purposes to establish permitted radio communications.

(2) The currently authorized use of Article 62 (ITU Radio Regulations) DSC frequencies in conjunction with NB–DP operations will be rescinded.

(Note.—Section 81.203 of the rules authorized the use of Article 62 DSC frequencies for NB–DP purposes until such time as a digital selective calling system and associated procedures have been agreed upon and adopted into the ITU Radio Regulations. The current use of these frequencies for NB–DP operations is estimated to be minuscule; therefore, the impact of this proposed action on NB–DP operations should be very small. However, if comments to this proceeding indicate considerable use of these frequencies for NB–DP purposes, we will consider dual use of these frequencies until such time as DSC operations become more extensive.)

(3) Marine channel 69 will be made available or simplex DSC calling purposes in the VHF band with authorized use by both coast and ship stations.

(Note.—Channel 69 is suggested as the DSC simplex general calling frequency because this frequency is largely used by recreational boaters and the frequency is not utilized as much as some other VHF channels. There are approximately 95 limited coast stations currently authorized to use channel 69 as a working frequency. It is the Commission's intent to permit indefinite continued working frequency use of channel 69 at these limited coast stations provided they do not interfere with DSC operations. However, at some future date it may be necessary to assign these limited coast stations a replacement frequency to meet their noncommercial communication requirements.)

VOL 48 ISS 103 26 1983 MY UMI

(4) Coast and ship stations will be authorized to use DSC procedures on all authorized MF, HF, and VHF working frequencies except that in the case of VHF frequencies, DSC procedures are limited to those frequencies listed in the Port Operations, Commercial, Noncommercial, Public Correspondence and Digital Selective Calling categories.

Future Considerations

20. The Future Global Maritime Distress and Safety System (FGMDSS) is currently a matter of international planning. The 1983 Mobile Services World Administrative Radio Conference (WARC) will consider a number of items directly related to the FGMDSS. When the FGMDSS is adopted by amendment of the International Convention for the Safety of Life at Sea (SOLAS), 1974, and comes into force for the United States, it is envisioned that the use of CCIR DSC will be mandatory for U.S. vessels which come within the scope of the system. The FGMDSS will also serve other vessels which are equipped with compatible radio and CCIR DSC equipment even though such equipment does not have all the features of equipment which will be mandatory for vessels operating within the FGMDSS system.

21. Once the FGMDSS is fully operational, the U.S. Coast Guard plans to discontinue their manual distress watches as soon a practicable. When the U.S. Coast Guard discontinues their manual distress watches, CCIR DSC will be the primary method for vessels in distress to contact U.S. Coast Guard coast and ship stations for the purpose of requesting needed assistance.

22. Implementation of the CCIR DSC system will tend to reduce the Commission's enforcement effort. This is because all transmissions using DSC equipment must have a nine digit station identity which is contained in the format of the call sequence and is automatically transmitted. This nine digit identity can be used to identify stations that are operating in violation of the Commission's Rules.

Comments

23. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the mater is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's rules, 47 CFR 1.1231.

24. The proposed amendments to the rules, as set forth in the Appendix, are issued under authority contained in Sections 4(i) and 303 (a), (b), (c) and (r) of the Communications Act of 1934, as amended.

25. Under the applicable procedures set forth in §1.415 of the Commission's rules, interested persons may file comments on or before November 9, 1983, and reply comments on or before December 27, 1983. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching this decision, the Commission may take into consideration information and ideas not contained in the comments, provided such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

26. In accordance with the provisions of § 1.419 of the Rules and Regulations, 47 CFR 1.419, formal participants shall file an original and 5 copies of their comments and other materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and 11 copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy. All comments are given the same consideration, regardless of the number of copies submitted. All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

27. This item does not propose the mandatory use of selective calling equipment within the Maritime Mobile Service. This item does propose to make mandatory the use of equipment which contains delineated minimum features compatible with CCIR Recommendation 493–2 subsequent to January 31, 1986, only when selective calling equipment is to be used in conjunction with a communication system or radio station in the Maritime Mobile Service. Since marine transmitters and receivers currently utilized may continue to be utilized under the conditions of the proposed rule amendments and since relatively few vessels and coast stations are presently equipped with selective calling equipment of any type, the Commission has determined that Sections 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rulemaking proceeding. Therefore, the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

28. Regarding questions on matters covered in this document, contact Robert E. Mickley, telephone (202) 632–7175.

29. For the reasons set forth in footnote 2, it is ordered, That the petition for rule making, RM 2946, filed by WJG Telephone Company, Inc., IS DISMISSED.

30. It is further ordered, That a copy of this Notice of Proposed Rule Making shall be sent to the Chief Counsel for Advocacy of the Small Business Administration.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA—PUBLIC FIXED STATIONS

1. Section 81.2 is amended by adding paragraph (p) to read as follows:

§ 81.2 General.

* * * * *

(p) CCIR Digital Selective Calling System—A synchronous system, used to establish contact with a station or group of stations automatically by means of radio, developed by the International Radio Consultative Committee (CCIR) based on a ten-unit digital code consisting of seven information bits and an associated three bit binary code for error detection.

2. Section 81.131 is amended by revising paragraph (b) to read as follows:

§ 81.131 Authorized frequency tolerance.

* * * * *

(b) Authorized frequency tolerances for coast stations operating on frequencies below 515 kHz or within the band 1600 to 27,500 kHz:

Frequency ranges	Tolerance [1]
(1) From 14 to 525 kHz:[2]	
For A2H Emission	20 Hz.
For other than A2H emission	200.
(2) From 1605 to 4000 kHz:[2]	
For A3A, A3H, and A3J emission.	20 Hz.
(3) From 4000 to 27,500 kHz:[2]	
(i) For A3A and A3J emission	20Hz.
(ii) For narrow-band direct-printing telegraph and data transmission systems.	15 Hz.
(iii) For other than (i) and (ii) above.	15.

[1] Parts in 10^6 unless shown as hertz (Hz).

[2] Until February 1, 1990, the radio frequency tolerance for coast station transmitters associated with DSC equipment in the MF and HF bands is ±20 Hertz and the recommended receiver bandwidth is 270 to 340 Hertz. Thereafter, the radio frequency tolerances for coast station transmitters associated with DSC equipment in the MF and HF bands will be ± 10 Hertz and the recommended receiver bandwidth will be 200 to 270 Hertz.

* * * * *

3. Part 81 is amended by adding § 81.144 to read as follows:

§ 81.144 Selective calling equipment.

(a) Where there is need to fulfill maritime mobile coast radio station requirements for selective calling subsequent to January 31, 1986, equipment shall be compatible with the operational and technical characteristics of the International Radio Consultative Committee (CCIR) digital selective calling (DSC) system contained in CCIR Recommendation 493–2 except that station identification need only be accomplished by numerical means.

(b) With respect to the operational characteristics of the CCIR DSC system, the format of a call sequence is comprised of the following:

Format specifier
Address
Category
Self-identificaion
Message 1
Message 2
•
•
End of sequence

DSC equipment shall have the following operational characteristics as a minimum:

Note.—The numbers in the brackets refer to the applicable section of Annex I to CCIR Recommendation 493–2.

(1) Minimum operational characteristics of the call sequence in order to receive a DSC call:

(i) Format specifier [2].

(A) Distress call [2.1.2]; a separate and distinct aural alarm is required.

(B) All ships call [2.1.3].

(C) Selective call [2.1.5].

(ii) Address [3].

(A) Distress call [3.1].

(B) All ships call [3.1]; the address information for "distress calls" and "all ships calls" is contained in the format specifier.

(C) Selective call [3.2]; recognize the called coast station numerical identification. [3.2.1].

(iii) Category [4].

(A) Distress call [4.1]; the category information is contained in the format specifier.

(B) Priorities [4.2.1].

(*1*) Distress [4.2.1.1].

(*2*) Urgency [4.2.1.2].

(*3*) Vital safety [4.2.1.3].

(*4*) Important safety [4.2.1.4].

(*5*) Ship business priority [4.2.1.5].

(*6*) Routine [4.2.1.6].

Notes.—The same aural or visual indicator may be used for urgency, vital safety, important safety, ship business priority and routine priorities).

(iv) Self-identification [5]; not applicable to the receiving mode.

(v) Messages [6]; display a two digit channel number when VHF use only is intended; otherwise, display a four digit channel number [6.3:2.].

(vi) End of sequence [7]; recognize the "end of sequence".

(2) Minimum operational characteristics of the call sequence in order to transmit a DSC call:

(i) Format specifier [2].

(A) All ships call [2.1.3].

(B) Selective call [2.1.5].

(ii) Address [3].

(A) All ships call [3.1]; the address information for "all calls" is contained in the format specifier [3.1].

(B) Selective call [3.2]; transmit the called ship numerical identification [3.2.1].

(iii) Category (priority).

(A) Distress [4.2.1.1].

(B) Routine [4.2.1.6].

(iv) Self-identification [5]; automatically transmit the nine digit numerical coast station identity [5.1].

(v) Messages [6]; transmit a two digit number when VHF use only is intended; otherwise, transmit a four digit channel number.

(vi) End of sequence [7]; automatically transmit "end of sequence".

(c) With respect to technical characteristics of the CCIR DSC system, the technical format of the call sequence is comprised of the following:

Dot pattern
Phasing sequence
Format specifier
Address
Category
Self-identification
Message 1
Separator (if required)
Message 2
Separator (if required)
•
•
End of sequence
Error check character

DSC equipment shall have, as a minimum, all the technical characteristics prescibed in CCIR Recommendation 493–2 which are necessary to achieve the minimum operational characteristics set forth in § 81.144(b) of the rules. In addition, dot patterns shall automatically precede distress calls in order to accommodate the use of scanning devices.

(d) Until February 1, 1990, the radio frequency tolerance for coast station transmitters associated with DSC equipment in the MF and HF band is ±20 Hertz and the recommended receiver bandwidth is 270 to 340 Hertz. Thereafter, the radio frequency tolerances for coast station transmitters associated with DSC equipment in the MF and HF bands will be ±10 Hertz and the recommended receiver bandwidth will be 200 to 270 Hertz.

(e) When all of the following conditions are met, selective calling equipment not in conformance with technical characteristics contained in CCIR Recommendation 493–2 may be operated until a date to be established by FCC Order. Such date will be within six years of (Date to be inserted is the effective date of the FCC Order associated with this rulemaking proceeding.) and a minimum of one year's notice will be provided when the date is established:

(1) Such selective calling equipment, which is not compatible with the CCIR DSC technical characteristics, must have been installed and operational by January 31, 1986, and such fact recorded in the radio station records along with information which will positively identify the equipment.

(2) Such equipment, incompatible with CCIR DSC technical characteristics, is used only at the same radio station

VOL 48 ISS 103 MAY 26 1983 UMI

where located and operational on January 31, 1986.

4. In § 81.203, paragraph (f) is removed, and paragraphs (a), (b), (d) and (e) are revised to read as follows:

§ 81.203 Digital selective calling frequencies.

(a) The carrier frequencies set forth in the table below are available for use by each public coast station authorized to employ frequencies in the band 4—27.5 MHz for calls to ship stations by means of digital selective calling. The associated reply frequencies are also shown.

Coast station transmit to ships (kHz)	Coast station receive from ships (kHz)
4357	4187.6
6506	6281.4
8718.5	8375.2
13100	12562.3
13100.5	12562.8
17232	16749.9
17232.5	16750.4
22595	22248
22595.5	22248.5

(b) The MF and HF frequencies authorized at specific stations for calling and working purposes, other than distress frequencies, may also be used for digital selective calling.

* * * * *

(d) When calling ship stations by means of digital selective calling, the coast station shall use the ship station identity and effect self-identification by use of a coast station identity. Both the ship station identity and the coast station identity are nine digit numbers which will be assigned by the Commission based upon a system of Nationality Identification Digits (NID's) designed to be compatible with international operations.

(e) Operating procedures for the use of digital selective calling (DSC) equipment in the maritime mobile service are as contained in CCIR Recommendation 541–1.

5. Section 81.204 is amended by revising paragraph (b)(6) to read as follows:

§ 81.204 Assignable frequencies—Narrow-band direct-printing radiotelegraph and transmission systems.

* * * * *

(b) * * *

(6) Calls to ship stations by NB–DP shall be made by readioteleprinter on the NB–DP frequencies assigned to the coast station. The routine use of A1 Morse radiotelegraphy frequencies for the setting up of a NB–DP circuit is not authorized. Provided, however, that coast stations may when the above alternatives are unsuccessful, call ship stations by A1 Morse radiotelegraphy, shift to A1 radiotelegraphy working frequencies, and complete arrangements for setting up a NB–DP circuit.

* * * * *

6. Section 81.205 is amended by adding paragraphs (f), (g) and (h).

§ 81.205 Narrow-band direct-printing (NB–DP) operating procedure.

* * * * *

(f) In calling ship stations by narrow-band direct-printing, the coast station shall use the ship station selective calling number (5 digits) and effect self-identification by use of the coast station identification number (4 digits).

(g) Calls to ships stations shall employ the following format:

(1) Ship station selective call number, repeated twice;

(2) "DE", sent once; and

(3) Coast station identification number, repeated twice.

(h) When the ship station does not reply to a call sent three times at intervals of two minutes, the calling shall cease and shall not be renewed until after an interval of fifteen minutes.

7. In § 81.304, paragraph (a) is amended by adding the following "frequencies" and "conditions of use" in frequency numerical order to the table, and paragraphs (b)(10) and (d) are added as follows:

§ 81.304 Frequencies available.

(a) * * *

Carrier frequency (KHz)	Conditions of use	
	Section	Limitations
4357	81.305(c)	10
* *	* * *	*
6506	31.305(c)	10
* *	* * *	*
8718.5	81.305(c)	10
* *	* * *	*
13100	81.305(c)	10
13100.5	81.305(c)	10
* *	* * *	*
17232	81.305(c)	10
17232.5	81.305(c)	10
* *	* * *	*
22595	81.305(c)	10
22595.5	81.305(c)	10
* *	* * *	*
156.475 MHZ	81.304(d)	10
* *	* * *	*

(b) * * *

(10) Use of this frequency is limited to digital selective calling.

* * * * *

(d) The frequency 156.475MHz is available for use by coast stations, authorized to employ frequencies in the band 156–162 MHz, for the transmission and reception of calls to and from ship stations by means of digital selective calling.

* * * * *

8. Section 81.305 is amended by adding paragraph (c) to read as follows:

§ 81.305 Frequencies for calling and distress.

* * * * *

(c) The frequencies set forth in the following table are available for assignment to appropriate class public coast stations for calls to ship stations by means of digital selective calling. The associated reply frequencies are also shown:

Coast station transmit to ships	Coast station receive from ships
4357 kHz	4187.6 kHz
6506 kHz	6281.6 kHz
8718.5 kHz	8375.2 kHz
13100 kHz	12562.3 kHz
13100.5 kHz	12562.8 kHz
17232 kHz	16749.4 kHz
17232.5 kHz	16750.4 kHz
22595 kHz	22248 kHz
22595.5 kHz	22248.5 kHz
156.475 MHz	156.475 MHz

9. Part 81 is amended by adding § 81.315 to read as follows:

§ 81.315 Digital selective calling operating procedures.

(a) Operating procedures for the use of digital selective calling (DSC) equipment in the maritime mobile service are as contained in International Radio Consultative Committee (CCIR) Recommendation 541–1.

(b) The frequencies available to public coast stations for digital selective calling purposes are those specifically listed in § 81.305(c) of the rules and those MF and HF frequencies authorized for calling and working, other than distress frequencies, which are listed in Section 81.304 of the rules.

(c) When calling ship stations by means of digital selective calling, the coast station shall use the ship station identity and effect self-identification by use of a coast station identity. Both the ship station identity and the coast station identity are nine digit numbers which will be assigned by the Commission based upon a system of Nationality Identification Digits (NID's) designed to be compatible with international operations.

10. In § 81.356, paragraph (a) is amended by removing channel designator 69 and all entries horizontal thereto in the Noncommercial category of the frequency table, and by adding a new category, "Digital Selective Calling", to the frequency table below the Noncommercial category, paragraph

(b)(12) is removed and reserved, and paragraphs (b)(4) and (c) are added to read as follows:

§ 81.356 Assignable frequencies in the band 156—162MHz.

(a)

Digital selective calling				
69	156.475	156.475	Coast to ship	4

(b) * * *

(4) Authorized only to call ships by means of digital selective calling.

* * * * *

(12) Reserved]

* * * * *

(c) Limited coast stations may use authorized classes of emissions for selective calling on each frequency authorized for working. The use of selective calling on 156.8 MHz is prohibited.

11. Part 81 is amended by adding § 81.363 to read as follows:

§ 81.363 Digital selective calling operating procedures.

(a) Operating procedures for the use of digital selective calling (DSC) equipment in the maritime mobile service are as contained in International Radio Consultative Committee (CCIR) Recommendation 541–1.

(b) The frequencies available to limited coast stations for digital selective calling purposes are those provided for in § 81.356 plus those listed in § 81.361(a) of the rules.

(c) When calling ship stations by means of digital selective calling, the coast station shall use the ship station identity and effect self-identification by use of a coast station identity. Both the ship station identity and the coast station identity are nine digit numbers which will be assigned by the Commission based upon a system of Nationality Identification Digits (NID's) designed to be compatible with international operations.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. Section 83.2 is amended by adding paragraph (aa) to read as follows:

§ 83.2 General

* * * * *

(aa) CCIR Digital Selective Calling System—A system, used to establish contact with a station or group of stations automatically by means of radio, developed by the International Radio Consultative Committee (CCIR) based upon a synchronous ten-unit digital code consisting of seven information bits and an associated three bit binary code for error detection.

2. Section 83.7 is amended by adding paragraph (m) to read as follows:

§ 83.7 Technical.

* * * * *

(m) *Selective calling.* A means of calling in which signals are transmitted in accordance with a prearranged code for the purpose of operating a particular automatic attention device in use at the selected station whose attention is sought.

3. Part 83 is amended by adding § 83.147 to read as follows:

§ 83.147 Selective calling equipment.

(a) Where there is a need to fulfill maritime mobile ship radio station requirements for selective calling subsequent to January 31, 1986, equipment shall be compatible with the operational and technical characteristics of the International Radio Consultative Committee (CCIR) digital selective calling (DSC) system as contained in CCIR Recommendation 493–2 except that station identification need only be accomplished by numerical means.

(b) With respect to the operational characteristic of the CCIR DSC system, the format of a call sequence is comprised of the following:

Foremat specifier
Address
Category
Self-identification
Message 1
Message 2
•
•
End of sequence

DSC equipment shall have the following operational characteristics as a miminum:

Note.—The numbers in the brackets refer to the applicable section of Annex I to CCIR Recommendation 493–2)

(1) Minimum operational characteristics of the call sequence in order to receive a DSC call:
(i) Format specifier [2].
(A) Distress call [2.1.2]; as separate and distinct aural alarm is required.
(B) All ships call [2.1.3].
(C) Selective call [2.1.5].
(ii) Address [3].
(A) Distress call [3.1].
(B) All ships call [3.1]; the address information for "distress calls" and "all ships calls" is contained in the format specifier.
(C) Selective call [3.2]; recognize the called ship numerical identification [3.2.1].
(iii) Category [4].
(A) Distress call [4.1]; the category information is contained in the format specifier.
(B) Priorities [4.2.1].
(1) Distress [4.2.1.1].
(2) Urgency [4.2.1.2].
(3) Vital safety [4.2.1.3].
(4) Important safety [4.2.1.4].
(5) Ship business priority [4.2.1.5].
(6) Routine [4.2.1.6].

Note.—The same aural or visual indicator may be used for urgency, vital safety, important safety, ship business priority, and routine priorities.

(iv) Self-identification [5]; not applicable to the receiving mode.
(v) Messages [6]; display a two digit channel number when VHF use only is intended; otherwise, display a four digit channel number [6.3.2].
(vi) End of sequence [7]; recognize the "end of sequence".

(2) Minimum operational characteristics of the call sequence in order to transmit a DSC call:
(1) Format specifier [2].
(A) Distress call [2.1.2].
(B) All ship call [2.1.3].
(C) Selective call [2.1.5].
(ii) Address [3].
(A) Distress call [3.1].
(B) All ships call [3.1]; the address information for "distress calls and "all ships calls" is contained in the format specifier.
(C) Selective call [3.2]; transmit the called ship/coast numerical identification [3.2.1].
(iii) Category.
(A) Distress call [4.1]; the category information is contained in the format specifier.
(B) Priorities [4.2.1].
(*1*) Distress [4.2.1.1].
(*2*) Routine [4.2.1.6].
(iv) Self-identification [5]; automatically transmit the nine digit numerical ship station identity [5.1].
(v) Messages [6]; transmit a two digit channel number when VHF use only is intended; otherwise, transmit a four digit channel number [6.3.2].

(c) With respect to the technical characteristics of the CCIR DSC system, the technical format of the call sequence is comprised of the following:

Dot pattern
Phasing sequence
Format specifier
Address
Category
Self-identification
Message 1
Separator (if required)
Message 2
Separator (if required)
End of sequence

VOL 48 ISS 103 MY 26 1983 UMI

DSC equipment shall have, as a minimum, all the technical characteristics prescribed in CCIR Recommendation 493–2 which are necessary to achieve the minimum operational characteristics set forth in § 83.147(b) of the rules. In addition, dot patterns shall precede distress calls in order to accommodate the use of scanning devices.

(d) Until February 1, 1990, the radio frequency tolerance for ship station transmitters associated with DSC equipment in the MF and HF bands is ±20 Hertz and the recommended receiver 6 db bandwidth is 270 to 340 Hertz. Thereafter, the radio frequency tolerance for ship station transmitters associated with DSC equipment in the MF and HF bands will be ±10 Hertz and the recommended receiver 6 db bandwidth will be 200 to 270 Hertz.

(e) When all of the following conditions are met, selective calling equipment not in conformance with the technical characteristics contained in CCIR Recommendation 493–2 may be operated until a date to be established by FCC Order. Such date will not be within six years of (Date to be inserted in the effective date of the FCC Order associated with this rulemaking proceeding.) and a minimum of one year's notice will be provided when the date is established:

(1) Such selective calling equipment, which is not compatible with the CCIR DSC technical characteristics, must have been installed and operational by January 31, 1986, and such fact recorded in the radio station records along with information which will positively identify the equipment.

(2) Such equipment, incompatible with CCIR DSC technical characteristics, is used only at the same radio station where located and operational on January 31, 1986.

§ 83.318 [Amended]

4. In § 83.318, paragraph (b) is removed and reserved.

5. Section 83.329 is revised to read as follows:

§ 83.329 Digital selective calling operation procedures.

(a) Operating procedures for the use of digital selective calling (DSC) equipment in the maritime mobile service are as contained in International Radio Consultative Committee (CCIR) Recommendation 541–1 except that the provisions of paragraph (b) of this section have precedent over conflicting procedures contained in CCIR Recommendation 541–1.

(b) Digital selective calling procedures may be used to establish radiotelegraphy communications. The frequencies available to ships for digital selective calling purposes are those specifically designated or referred to in §§ 83.317, 83.318, and 83.319, of the rules.

(c) When calling ship or coast stations by means of DSC, the ship station shall use the appropriate nine digital ship or coast station identity and effect self-identification by use of a nine digit ship station identity.

6. In § 83.330, paragraph (d) is revised to read as follows:

§ 83.330 Narrow-band direct-printing operating procedure.

* * * * *

(d) In calling the coast station by NB–DP, the ship station shall use the coast station identification number (4 digits) and effect self-identification by the use of the ship station selective calling number (5 digits). Calls to a coast station or other ship station shall employ the following format: Coast station identification number, repeated twice; "DE", sent once; and ship station selective call number, repeated twice. When the coast station does not reply to a call sent three times at intervals of two minutes, the calling shall cease and shall not be renewed until after an interval of fifteen minutes.

* * * * *

7. In § 83.351, paragraph (a) is amended by adding the following "frequencies" and "conditions of use" in frequency numerical order to the table, and paragraph (b)(16) is added as follows:

§ 83.351 Frequencies available.

(a) * * *

Carrier frequency (kHz)	Conditions of use	
	Section	Limitations
4187.6	83.356	16, 40, 41
6281.4	83.356	16, 40, 41
8375.2	83.356	16, 40, 41
12562.3	83.356	16, 40, 41
12562.8	83.356	16, 40, 41
16749.9	83.356	16, 40, 41
16750.4	83.356	16, 40, 41
22248.0	83.356	16, 40, 41
22248.5	83.356	16, 40, 41
156.475	83.359	16, 40, 41

(b) * * *

(16) Use of this frequency is limited to digital selective calling.

* * * * *

8. Section 83.353 is revised to read as follows:

§ 83.353 Frequencies for calling.

(a) The frequency 2182 kHz is the international general calling frequency for radiotelephony; it may be used for this purpose by ship and aircraft stations operating in the maritime mobile service in the bands between 1605 and 4000 kHz. The frequency 156.8 MHz is the international distress, safety and calling frequency for radiotelephony for stations of the maritime mobile service when using frequencies in the authorized bands between 156 and 174 MHz. In addition, these frequencies may be used for transmission of:

(1) The international urgency signal, and very urgent messages (preceded by this signal) concerning the safety of a ship, aircraft, or other vehicle, or the safety of some person on board or within sight of such ship, aircraft, or vehicle.

(2) The international safety signal, and messages (preceded by this signal) concerning the safety of navigation or giving important meteorological warnings; however, safety messages shall be transmitted, when practicable, on a working frequency after a preliminary announcement on 2182 kHz.

(3) Brief radio operating signals.

(4) Brief test signals in accordance with the provisions of Section 83.356, as may be necessary to determine whether the radio transmitting equipment of the station is in good working condition on this frequency.

(b) Digital selective calling procedures may be used to establish radiotelephony communications. The frequencies available to ships for digital selective calling purposes are those specifically designated or referred to in §§ 83.351, 83.356, 83.359 and 83.360 of the rules.

9. Section 83.356 is added to read as follows:

§ 83.356 Digital selective calling frequencies.

The frequencies set forth in the table below are available for use by ship stations for calls to coast radiotelephone stations by means of digital selective calling. The associated reply frequencies are also shown.

Ship station transmit to coast	Ship station receive from coast
4187.6 kHz	4357 kHz.
6281.4 kHz	6506 kHz.
8375.2 kHz	8718.5 kHz.
12562.3 kHz	13100 kHz.
12562.8 kHz	13100.5 kHz.
16749.9 kHz	17232 kHz.
16750.4 kHz	17232.5 kHz.
22248 kHz	22595 kHz.
22248.5 kHz	22595.5 kHz.
156.475 MHz	156.475 MHz.

10. In § 83.359, the paragraph which includes the frequency table is amended by inserting "(a)" before the first sentence, deleting channel 69 and all entries horizontal thereto in the Noncommercial category of the frequency table, and by adding a new category, "Digital Selective Calling", to the frequency table below the Public Correspondence category, and paragraph (c) is added to read as follows:

§ 83.359 Frequencies listed in the following table are available for assignment to stations as indicated.

* * * * *

DIGITAL SELECTIVE CALLING

69	156.475	156.475	Intership and ship to coast.

* * * * *

(c) Ship stations may use authorized classes of emission for selective calling purposes on coast station receive frequencies listed in the Port Operations, Commercial, Noncommercial, Public Correspondence and Digital Selective Calling categories only.

11. Section 83.360 is amended by adding paragraph (b)(3) and revising (b)(6) to read as follows:

§ 83.360 Frequencies for business and operational purposes.

* * * * *

(b) * * *

(3) Digital selective calling procedures may be used on these frequencies for the purpose of establishing radiotelephony communications.

* * * * *

(6) The class of emission shall be 2.8A3J except when digital selective calling procedures are being utilized.

12. Section 83.366 is amended by adding paragraph (k) to read as follows:

§ 83.366 General radiotelephone operating procedure.

* * * * *

(k) Digital selective calling. Operating procedures for the use of digital selective calling (DSC) equipment in the maritime mobile service are as contained in International Radio Consultative Committee (CCIR) Recommendation 541–1. When calling ship or coast stations by means of digital selective calling, the ship station shall use the appropriate nine digit ship or coast station identity and effect self-identification by use of a nine digit ship station identity.

DEPARTMENT OF COMMERCE

International Trade Administration

Certain Fasteners From Japan; Final Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of countervailing duty order.

SUMMARY: On March 31, 1983, the Department of Commerce published in the **Federal Register** the preliminary results of its administrative review of the countervailing duty order on certain fasteners from Japan. The review covered the period January 1, 1981 through December 31, 1981. The notice stated that the Department had preliminarily determined the net subsidy to be 0.21 percent *ad valorem*, a rate the Department considers to be *de minimis*.

Interested parties were invited to comment on our preliminary results. We received no comments. Based on our analysis, the final results of the review are the same as those presented in the preliminary results.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Philip L. Otterness or Larry Hampel, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On March 31, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 13473) the preliminary results of its administrative review of the countervailing duty order on certain fasteners from Japan (42 FR 23147, May 6, 1977; 44 FR 31972, June 4, 1979). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are all fasteners currently classifiable under items 646.5400 and 646.5600, and non-metric fasteners currently classifiable under items 646.1700, 646.4000, 646.4100, 646.4920, 646.4940, 646.5100, 646.5300, 646.5800, 646.6020, 646.6040, 646.6320, 646.6340, 646.6500, 646.7200, 646.7400, 646.7500, 646.7600 and 646.7800 of the Tariff Schedules of the United States Annotated. The review covers the period January 1, 1981 through December 31, 1981, and the following programs: (1) The deferral of income taxes on export earnings under the Overseas Market Development Reserve, (2) benefits received under the "Temporary Measures Act for Small and Midsized Businesses with Regard to the High Yen Exchange Market", and (3) other loans given at preferential rates by the People's Finance Corporation, the Bank of Commerce and Industrial Cooperatives, the Small Business Finance Corporation, and the Japan Development Bank.

Final Results of the Review

Interested parties were invited to comment on our preliminary results. We received no comments. Based on our analysis, the final results of our review are the same as those presented in the preliminary results of review. We determine that the aggregate net subsidy for the period is 0.21 percent *ad valorem*. Because the aggregate net subsidy is less than 0.5 percent and therefore *de minimis*, the Department will instruct the Customs Service not to assess countervailing duties on any shipments of certain fasteners from Japan exported on or after January 1, 1981 and on or before December 31, 1981.

Further, the Department will instruct the Customs Service not to collect a cash deposit of estimated countervailing duties, as provided for by section 751(a)(1) of the Tariff Act of 1930 ("the Tariff Act"), on any shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit waiver shall remain in effect until publication of the final results of the next administrative review.

The Department is now beginning the next administrative review of the order. The suspension of liquidation previously ordered will continue for all entries of this merchandise exported on or after January 1, 1982.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information in the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: May 19, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–25–M

Cordage From Cuba; Preliminary Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of countervailing duty order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on cordage from Cuba. The review covers the period January 1, 1982 through December 31, 1982. This merchandise is covered by the embargo on trade with Cuba which has been in effect since February 7, 1962. As a result of the review, the Department has preliminarily determined to continue to use, for the purpose of establishing a cash deposit of estimated countervailing duties on possible future entries, the rate established by the Department of the Treasury. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Bernard Carreau or Joseph Black, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; Telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On August 3, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 33526) the final results of its last administrative review of the countervailing duty order on cordage from Cuba (T.D.) 53534, 19 FR 4560, July 23, 1954) and announced its intent to conduct the next administrative review by the end of August 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

The merchandise covered by the review is cordage which the Cuban government considered "binder twine and baler twine," but which does not meet the definition contained in the Tariff Schedules of the United States Annotated (TSUSA). Normally, binder twine and baler twine, as defined by the TSUSA, enter under items 315.2020 and 315.2040 of the TSUSA. The merchandise under consideration here is currently classifiable under item 315.2500 of the TSUSA.

The review covers the period January 1, 1982 through December 31, 1982.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the merchandise has not been imported into the United States since 1962. There are no known unliquidated entries. This merchandise is covered by the embargo on trade with Cuba, in effect since February 7, 1962 (27 FR 1085).

Therefore, the Department has preliminarily determined to continue using the rate of 2.488¢ per pound established by T.D. 53534 for cash deposits of estimated countervailing duties, on shipments of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later that five days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: May 19, 1983.

Gary N. Horlick,

Deputy Assistant Secretarty for Import Administration.

[FR Doc. 83–14185 Filed 5–25–83; 8:45 am]

BILLING CODE 3510–12–M

Melamine in Crystal Form From Japan; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: Internation Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on melamine in crystal form from Japan. The review covers the five know manufacturers and/or exporters of this merchandise to the United States and the period February 1, 1982 through January 31, 1983, There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

As a result of the review, the Department has preliminarily determined to require cash deposits of estimated antidumping duties on future entries equal to the margins calculated on the last know shipments. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Valerie Newkirk or Susan Crawford, Office of Compliance, International Trade Administration, U.S Department of Commerce, Washington, D.C 20230, telephone: (202) 377–3601/5255.

SUPPLEMENTARY INFORMATION:

Background

On October 8, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 44597) the final results of its last administrative review of the antidumping finding on melamine in crystal form from Japan (42 FR 6866, February 2, 1977) and announced its intent to conduct the next administrative review by the end of February 1984. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of melamine in crystal form, a fine white crystalline powder used to manufacture melamine formaldehyde resins, currently classifiable under item 425.1020 of the Tariff Schedules of the United States Annotated.

The review covers the five known manufacturers and/or exporters of Japanese melamine to the United States and the period February 1, 1982 through January 31, 1983. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties equal to the following percentages of the entered value shall be required on all shipments of Japanese melamine in crystal form from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Manufacturer/exporter	Cash deposit (percent)
C. Itoh & Co., Ltd.	[1] 60
Mitsui Toatsu Chemical, Inc.	[1] 70.22
Nichimen Co., Ltd.	[1] 60
Nissan Chemical Industries, Ltd.	[1] 60
Nozawa & Co., Ltd.	[1] 60

[1] No shipments during the period.

For any shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after January 31, 1983, and who is unrelated to any reviewed firm, a cash deposit of 70.22 percent shall be required for future entries. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results

VOL 48 ISS 103 MAY 26 1983 UMI

of the administrative review including the results of its analysis of any such comments or hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

May 19,1983.

Racing Plates (Aluminum Horseshoes) From Canada; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on racing plates (aluminum horseshoes) from Canada. The review covers the three known manufacturers and/or exporters of this merchandise to the United States and the period February 1, 1982 through January 31, 1983. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

As a result of the review, the Department has preliminarily determined to require cash deposits of estimated antidumping duties on future entries equal to the margins calculated on the last known shipments. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Valerie Newkirk or Susan Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5255/3601.

SUPPLEMENTARY INFORMATION:

Background

On November 17, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 51779-80) the final results of its last administrative review of the antidumping finding on racing plates (aluminum horseshoes) from Canada (39 FR 54388, February 27, 1974) and announced its intent to conduct the next administrative review by the end of February 1984. As requird by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of racing plates (aluminum horseshoes) that are used on race horses, polo, jumping, hunting, and other performing horses, as differentiated from pleasure and work horses, are made of aluminum, may have cleats or caulks, and come in a variety of sizes. Racing plates are currently classifiable under item 652.4200 of the Tariff Schedules of the United States Annotated.

The review covers the three known manufacturers and/or exporters of Canadian racing plates to the United States and the period February 1, 1982 through January 31, 1983. There were no known shipments of this merchandise to the United States and there are no known unliquidated entries.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties equal to the following percentages of the entered value shall be required on all shipments of Canadian racing plates (aluminum horseshoes) from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

Manufacturer/exporter	Cash deposit (percent)
Canadian Racing Plate Co. Limited	[1] 31.94
Equine Forgings Limited	[1] 6.77
Niagara Forge Inc.	[1] 6.77

[1] No shipments during the period

For any shipment from a new exporter not covered in this or prior reviews, whose first shipment occurred after January 31, 1983 and who is unrelated to any reviewed firm, a cash deposit of 6.77 percent shall be required for future entries. These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

DEPARTMENT OF DEFENSE

Department of the Air Force

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following: (1) Type of Submission; (2) Title of Information Collection and Form Number, if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of respondents; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension (No Change)

Report on Major/Minor Overhaul Modification and Reclamation of Engines

Data elements of the report are used to provide timely and systematic production status of engines in and out of contractor facilities consistent with schedules developed prior to contract negotiations, and to portray a realistic trend of engines being processed under contract.

All contractors who perform engine overhauls for the Department of the Air Force: 144 responses, 504 hours.

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John V. Wenderoth, DOD Clearance Officer, OASD, DIRMS, IRAD, Room 1A658, Pentagon, Washington, D.C. 20301, telephone (202) 697-1195.

A copy of the information collection proposal may be obtained from Mr. James N. Jack, HQ AFLC/MAWW, Wright-Patterson AFB, Ohio 45433, telephone (513) 257-4361.

Dated: May 20, 1983.

M.S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3910-01-M

Department of the Army

Privacy Act of 1974; Amendments of Systems to Records

AGENCY: Department of the Army, DoD.

ACTION: Deletion of and amendments to notices for systems of records.

SUMMARY: The Department of the Army proposes to delete 2 and amend 2 system notices for systems of records subject to the Privacy Act of 1974. Following identification of changes, the amended notices are set forth in their entirety below.

DATE: Actions shall be effective June 27, 1983 unless public comments are received which result in a contrary determination.

ADDRESS: Comments may be submitted to Headquarters, Department of the Army, ATTN: DAAG-AMR-S, Room 1146, Hoffman Building 1, 2461 Eisenhower Avenue, Alexandria, VA 22331.

FOR FURTHER INFORMATION CONTACT: Mrs. Dorothy Karkanen, Office of the Adjutant General, Department of the Army, at the above address; telephone: 703/325-6163.

SUPPLEMENTARY INFORMATION: The Army systems of records notices subject to the Privacy Act of 1974, as amended, Title 5, United States Code, Section 552a, have been previously published in the **Federal Register.**

These actions do not require a report of an altered system notice pursuant to 5 U.S.C. 552a(o).

May 20, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records include enlistment contract; Veterans Administration laws; physical evaluation board proceedings; military occupational specialty data; statement of service; qualification record; group life insurance election; emergency data; application for appointment; qualification/evaluation report; oath of office; medical examination; security questionnaire; application for retired pay; application for correction of military records; application for active duty; transfer or discharge report; active duty report; voluntary reduction; line of duty and misconduct determinations; discharge or separation reviews; police record checks consent/declaration of parent/guardian; Army ROTC suplemental agreement; award recommendations; academic reports; casualty reports; US field medical card; retirement points; deferment; pre-induction processing and commissioning data; transcripts of military records summary sheets review of conscientious objector; election of options; oath of enlistment extensions; survivor benefit plans; efficiency reports; records of proceeding, Title 10 U.S.C. section 815 appellate actions; determinations of moral eligibility; waiver of disqualifications; temporary disability record; change of name; statements for enlistment; acknowledgments of service requirements; retired benefits; application for review of physical evaluation board and disability board; appointments; designations; evaluations; extensions; birth certificates; photographs; citizenship statements and status; educational constructive credit/transcripts; flight status board reviews; assignment agreements/limitations/waivers/election and travel; efficiency appeals; promotion/reduction recommendations/approvals declinations/announcements/notifications/reconsiderations/worksheets/elections/ letters of notification to deferred officers and promotion passover notifications; absence without leave and desertion records; FBI reports; SSA correspondence; miscellaneous correspondence, documents, and military orders relating to military service including information pertaining to dependents, inter-service action, in-service details, determinations, reliefs, component; awards, pay entitlements, releases, transfers, and other military service data.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

By the Department of the Army: To maintain, use, collect, and disseminate information with respect to an individual holding a military status or former military status, including regular reserve, retired, former member separated, or deceased. Information pertains to individual's former, current, and subsequent to active duty status; birth; citizenship; parentage; home of record; education; training; dependents; travel; language proficiency; former and current associations; brotherhood, memberships and related affiliations with organizations and like collective elements which service member divulges as having meaning, substance, or significance to his/her military service status; assignment history; and other related military experiences, qualifications training, preferences, restrictions, and status actions.

Department of State: To issue passport/visa, to document persona non grata status, attaché assignments, and related administration of personnel assigned and performing duty with the Department of State.

Department of Defense: To authorize and consummate interdepartmental actions relating to inter-service requirements pertaining to the Army, Navy, Air Force, and Coast Guard (when the latter is operational under DOD).

Department of Justice: To file fingerprints; to perform intelligence function.

Department of Agriculture: To coordinate matters related to its advanced education program.

Department of Labor: To accomplish actions required under Federal Employees Compensation Act.

Department of Health and Human Services: To provide services authorized by medical, health, and related functions pursuant to 10 U.S.C., 1074–1079.

Nuclear Regulatory Commission: To accomplish requirements incident to nuclear accident/incident control officer functions.

American Red Cross: To accomplish coordination and complete service functions including blood donor programs and emergency investigative support and notifications.

Civil Aeronautics Board: To accomplish flight qualifications, certification, and licensing actions.

Federal Aviation Agency: To determine rating and certification (including medical) of in-service aviators.

General Services Administration: To records storage and archival services and for printing of directories and related material which includes personal data.

US Postal Service: To accomplish postal service authorization involving postal officers and mail clerk authorizations.

Veterans Administration: To provide information relating to service, benefits, pensions, in-service loans, insurance, and appropriate hospital support.

Bureau of Immigration and Naturalization: To comply with statutes relating to alien registration and annual residence/location.

Office of the President of the United States of America: To exchange required information relating to White House Fellows, regular Army promotions, aides, and related support functions staffed by Army members.

Federal Maritime Commission: To obtain licenses for military members accredited as captain, mate, and harbor master for duty as Transportation Corps warrant officer.

Each of the several States, and US possessions: To support state bonus applications; to fulfill income tax requirements appropriate to the service member's home of record; to record name changes in state bureaus of vital statistics; and for National Guard affairs.

Civilian educational and training institutions: To accomplish student registration, tuition support, tests, and related requirements incident to in-service education programs in compliance with 10 U.S.C., Chapters 102 and 103.

Social Security Administration: To obtain or verify Social Security Account Number; to transmit Federal Insurance Compensation Act deductions from member's wages.

Department of Transportation: To coordinate and exchange necessary information pertaining to inter-service relationships between US Coast Guard and US Army when service members perform duty with the USCG.

Civil authorities: For compliance with 10 U.S.C., 814.

Federal Emergency Management Agency: To facilitate participation of Army members in civil defense planning, training, and emergency operations pursuant to the military support of civil defense as prescribed by DOD Directive 3025.10 and Army Regulation 500–70.

Director of Selective Service System: Report of Non-Registration at Time of Separation Processing, of individuals who decline to register with Selective Service System; such report will contain name of individual, date of birth, Social Security Number, and mailing address at time of separation.

Other elements of the Federal Government pursuant to their respective authority and responsibility.

Record of the identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be a client/patient, maintained in connection with the alcohol or drug abuse prevention and treatment function conducted, regulated, or directly or indirectly assisted by any department or agency of the U.S., shall, except as provided therein, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized in 21 U.S.C. 1175 and 42 U.S.C. 4582. These statutes take precedence over the Privacy Act of 1974 in regard to accessibility of such records except to the individual about whom the record pertains. Blanket "routine uses" identified in 44 FR 72728 do not apply to these records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Microfiche stored randomly in electromechanical storage/retrieval devices. Temporary files consist of paper records in file folders; selected data automated for management purposes on tapes, discs, cards, and other computer media.

RETRIEVABILITY:

Alphabetically by surname; automated data retrieved by name, SSN or ADP parameter; records of reserve, retired, and deceased persons retrieved by SSN terminal digit sequence.

SAFEGUARDS:

Records are maintained in areas accessible only to authorized personnel; automated records are further protected by authorized password system for access terminals, controlled access to operations locations, and controlled output distribution.

RETENTION AND DISPOSAL:

Microfiche and paper records are permanent; retained in active file until termination of service following which they are retired to the US Army Reserve Components Personnel and Administration Center, St. Louis, MO 63132.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, US Army Military Personnel Center, 200 Stovall Street, Alexandria, VA 22332.

NOTIFICATION PROCEDURE:

Inquiries for records of commissioned or warrant officers (including members of Reserve Components serving on active duty) should be sent to the System manager.

Inquiries for records of enlisted members (including members of Reserve Components serving on active duty) should be sent to Commander, US Army Enlisted Records and Evaluation Center, Ft Benjamin Harrison, IN 46249.

Inquiries for records of commissioned officers or warrant officers in a reserve status not on active duty, or Army enlisted reservists not on active duty, or members of the National Guard who performed active duty, or commissioned officers, warrant officers, or enlisted members in a retired status should be sent to: Commander, US Army Reserve Components Personnel and Administration Center, 9700 Page Boulevard, St Louis, MO 63132.

Inquiries for records of commissioned officers and warrant officers who were completely separated from the service after June 30, 1917, or enlisted members who were completely separated after October 31, 1912 should be sent to: Chief, National Personnel Records Center, GSA, 9700 Page Boulevard, St Louis, MO 63132.

RECORD ACCESS PROCEDURES:

Individuals desiring access to their record must provide full name, service identification number, SSN, military status, and mailing address.

CONTESTING RECORD PROCEDURES:

The Army's rules for access to records and for contesting contents and appealing initial determinations are contained in Army Regulation 340–21 (32 CFR Part 505).

RECORD SOURCE CATEGORIES:

Enlistment, appointment, or commission related forms pertaining to individual's military status; academic, training, or qualifications records acquired prior to or during military service; correspondence, forms, records, documents, and other relevant papers in Department of Army, other Federal agencies, or state and local governmental entities; civilian education and training institutions; and members of the public when information is relevant to the service member.

BILLING CODE 3710–08–M

Office of the Secretary

Proposed Revision of the Manual for Courts-Martial

The Department of Defense is considering recommending a comprehensive revision of the Manual for Courts-Martial, Exec. Order No. 11476, as amended by Exec. Order Nos. 11835, 12018, 12198, 12233, 12306, 12315, 12340, and 12383. The proposed revision includes substantial modifications of court-martial procedure and punishments. It also revises the rules governing nonjudicial punishment. In addition, several modifications are made in the Military Rules of Evidence. A Table of Contents of the proposed revision is set forth below.

Copies of the proposed revision and an analysis of it may be examined at the Criminal Law Division, Room 2D434, Pentagon, Office of The Judge Advocate General, Army, Washington, D.C. Copies of the proposed revision and analysis will be available for distribution on or about June 2, 1983. A copy of the proposed revision and analysis may be obtained by mail upon request from the following address: DAJA–CL, ATTN: Major J. Cooke, Washington, D.C. 20310. Any comments on the proposed revision must be received at the same address not later than September 2, 1983, for consideration by the Joint Service Committee on Military Justice.

This notice is provided in accordance with Department of Defense policy with respect to amendments to the Manual for Courts-Martial, 47 FR 3401 (1982). It is intended only to improve the internal management of the federal government, and is not intended to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person.

CONTENTS

Part I—Preamble

Part II—Rules for Courts-Martial

Chapter I. General Provisions

101. Scope; title
102. Purpose and construction
103. Definitions
104. Unlawful command influence
105. Direct communications: convening authorities and staff judge advocates; among staff judge advocates
106. Delivery of military offenders to civilian authorities
107. Dismissed officer's right to request trial by court-martial
108. Rules of court
109. Professional supervision of military judges and counsel

Chapter II. Jurisdiction.

201. Jurisdiction in general
202. Persons subject to the jurisdiction of courts-martial
203. Jurisdiction over the offense

Chapter III. Initiation of Charges; Apprehension; Pretrial Restraint; Related Matters

301. Report of offense
302. Apprehension
303. Investigation of charges
304. Pretrial restraint
305. Pretrial confinement
306. Initial disposition
307. Preferral of charges
308. Notification to accused of charges

Chapter IV. Forwarding and Disposition of Charges

401. In general
402. Actions by immediate commander not authorized to convene courts-martial
403. Action by commander exercising summary court-martial jurisdiction
404. Action by commander exercising special court-martial jurisdiction
405. Pretrial investigation
406. Pretrial advice
407. Action by officer exercising general court-martial jurisdicition

Chapter V. Court-Martial Composition and Personnel; Convening Courts-Martial

501. Composition and personnel of court-martial
502. Qualifications and duties of personnel of courts-martial
503. Detailing members, military judge, and counsel
504. Convening courts-martial
505. Changes in composition and counsel
506. Accused's rights to counsel

Chapter VI. Referral, Service, Amendment, and Withdrawal of Charges

601. Referral
602. Service of charges
603. Changes to charges and specifications
604. Withdrawal of charges

Chapter VII. Pretrial Matters

701. Discovery
702. Depositions
703. Production of witness and evidence
704. Immunity
705. Pretrial agreements
706. Inquiry into the mental capacity or mental responsibility of the accused
707. Speedy trial

Chapter VIII. Trial Procedure Generally

801. In general
802. Conferences
803. Court-martial sessions without members under Article 39(a)
804. Presence of the accused at trial proceedings
805. Presence of military judge, members, and counsel
806. Public trial
807. Oaths
808. Record of trial
809. Contempt proceedings
810. Procedures for rehearings, new trial, and other trials
811. Stipulations
812. Joint and common trials
813. Announcing personnel of the court-martial and accused

Chapter IX. Trial Procedure Through Findings

901. Opening session
902. Disqualification of military judge
903. Accused's elections on composition of court-martial
904. Arraignment
905. Motions generally
906. Motions for appropriate relief
907. Motions to dismiss
908. Capacity of the accused to stand trial by court-martial
909. Pleas
910. Assembly of the court-martial
911. Challenge of selection of members; examination and challenges of members
912. Presentation of the case on the merits
913. Production of statements of witneses
914. Mistrial
915. Defenses
916. Motion for a finding of not guilty
917. Findings
918. Argument by counsel on findings
919. Instructions on findings
920. Deliberations and voting on findings
921. Announcement of findings
922. Impeachment of findings
923. Reconsideration of findings

Chapter X. Sentencing

1001. Presentencing procedure
1002. Sentence determination
1003. Punishments
1004. Capital cases
1005. Instructions on sentence
1006. Deliberations and voting on sentence
1007. Announcement of sentence
1008. Impeachment of sentence
1009. Reconsideration of sentence
1010. Adjournment

Chapter XI. Posttrial Procedure

1101. Report of result of trial; posttrial restraint; deferment of confinement
1102. Posttrial sessions
1103. Preparation of record of trial
1104. Records of trial: authentication; service; loss; correction; forwarding
1105. Clemency recommendations and petitions
1106. Reference to staff judge advocate; posttrial review
1107. Initial review and action by convening authority
1108. Suspension of execution of sentence; remission
1109. Vacation of suspension of sentence
1110. Disposition of the record of trial after action
1111. Supervisory review of summary courts-martial and certain special courts-martial
1112. Execution of sentences
1113. Promulgating orders

Chapter XII. Appeals and Review

1201. Action by the Judge Advocate General
1202. Appellate counsel
1203. Review by a Court of Military Review
1204. Review by the Court of Military Appeals
1205. Powers and responsibility of the Secretary
1206. Sentences requiring approval by the President
1207. Restoration
1208. Finality of courts-martial
1209. New trial

Chapter XIII. Summary Courts-Martial

1301. Summary courts-martial generally
1302. Convening a summary court-martial
1303. Right to object to trial by summary court-martial
1304. Trial procedure
1305. Record of trial
1306. Posttrial procedure

Part III—Military Rules of Evidence

[The proposal includes only those Military Rules of Evidence in which substantive changes are proposed. However, the entire Military Rules of Evidence will be part of the Executive Order, and comments may be submitted concerning any of the Military Rules of Evidence.]

Rule 312 Body views and intrusions
Rule 313 Inspections and inventories in the armed forces
Rule 314 Searches not requiring probable cause
Rule 315 Probable cause searches
Rule 321 Eyewitness identification

Part IV—Punitive Articles

1. Article 77—Principals
2. Article 79—Conviction of lesser included offenses
3. Article 78—Accessory after the fact
4. Article 80—Attempts
5. Article 81—Conspiracy
6. Article 82—Solicitation
7. Article 83—Fraudulent enlistment, appointment or separation
8. Article 84—Effecting unlawful enlistment, appointment, or separation
9. Article 85—Desertion
10. Article 86—Absence without leave
11. Article 87—Missing movement
12. Article 88—Contempt toward officials
13. Article 89—Disrespect toward a superior commissioned officer
14. Article 90—Assaulting or willfully disobeying superior commissioned officer
15. Article 91—Insubordinate conduct toward warrant officer, noncommissioned officer, or petty officer
16. Article 92—Failure to obey order or regulation
17. Article 93—Cruelty and maltreatment
18. Article 94—Mutiny and sedition
19. Article 95—Resistance, breach of arrest, and escape
20. Article 96—Releasing prisoner without proper authority
21. Article 97—Unlawful detention
22. Article 98—Noncompliance with procedural rules
23. Article 99—Misbehavior before the enemy

VOL 48 ISS 103 MAY 26 1983 UMI

24. Article 100—Subordinate compelling surrender
25. Article 101—Improper use of countersign
26. Article 102—Forcing a safeguard
27. Article 103—Captured or abandoned property
28. Article 104—Aiding the enemy
29. Article 105— Misconduct as a prisoner
30. Article 106—Spies
31. Article 107—False official statements
32. Article 108—Military property of the United States—sale, loss, damage, destruction, or wrongful disposition
33. Article 109—Property other than military property of the United States—waste, spoilage, or destruction
34. Article 110—Improper hazarding of vessel
35. Article 111—Drunken or reckless driving
36. Article 112—Drunk on duty
37. Article 113—Misbehavior of sentinel or lookout
38. Article 114—Dueling
39. Article 115—Malingering
40. Article 116—Riot or breach of peace
41. Article 117—Provoking speeches or gestures
42. Article 118—Murder
43. Article 119—Manslaughter
44. Article 120—Rape and carnal knowledge
45. Article 121—Larceny and wrongful appropriation
46. Article 122—Robbery
47. Article 123—Forgery
48. Article 123a—Making, drawing, or uttering check, draft, or order without sufficient funds
49. Article 124—Maiming
50. Article 125—Sodomy
51. Article 126—Arson
52. Article 127—Extortion
53. Article 128—Assault
54. Article 129—Burglary
55. Article 130—Housebreaking
56. Article 131—Perjury
57. Article 132—Frauds against the United States
58. Article 133—Conduct unbecoming an officer and gentleman
59. Article 134—General article
60. Article 134 (Abusing public animal)
61. Article 134 (Adultery)
62. Article 134 (Assault—indecent)
63. Article 134 (Assault)with intent to commit murder, voluntary manslaughter, rape, robbery, sodomy, arson, burglary, or housebreaking)
64. Article 134 (Bigamy)
65. Article 134 (Bribery and graft)
66. Article 134 (Burning with intent to defraud)
67. Article 134 (Check, worthless, making and uttering—by dishonorably failing to maintain funds)
68. Article 134 (Cohabitation, wrongful)
69. Article 134 (Correctional custody—offenses against)
70. Article 134 (Debt, dishonorably failing to pay)
71. Article 134 (Disloyal statements)
72. Article 134 (Disorderly conduct, drunkenness)
73. Article 134 (Drinking liquor with prisoner)
74. Article 134 (Drunk Prisoner)
75. Article 134 (Drunkenness—incapacitation for performance of duties through prior wrongful indulgence in intoxicating liquor or any drug)
76. Article 134 (Drug offenses)
77. Article 134 (False or unauthorized pass offenses)
78. Article 134 (False pretenses, obtaining services under)
79. Article 134 (False swearing)
80. Article 134 (Firearm, discharging—through negligence)
81. Article 134 (Firearm, discharging—willfully, under such circumstances as to endanger human life)
82. Article 134 (Fleeing scene of accident)
83. Article 134 (Fraternization)
84. Article 134 (Gambling with subordinate)
85. Article 134 (Homicide, negligent)
86. Article 134 (Impersonating a commissioned, warrant, noncommissioned, or petty officer, or an agent or official)
87. Article 134 (Indecent acts or liberties with a child
88. Article 134 (Indecent exposure)
89. Article 134 (Indecent language)
90. Article 134 (Indecent acts with another)
91. Article 134 (Jumping from vessel into the water)
92. Article 134 (Kidnapping)
93. Article 134 (Mail: taking, opening, secreting, destroying, or stealing)
94. Article 134 (Mails: depositing or causing to be deposited obscene matters in)
95. Article 134 (Misprision of serious offense)
96. Article 134 (Obstructing justice)
97. Article 134 (Pandering and prostitution)
98. Article 134 (Perjury: subornation of)
99. Article 134 (Public record: altering, concealing, removing, mutilation, obliterating, or destroying)
100. Article 134 (Quarantine: medical, breaking)
101. Article 134 (Requesting commission of an offense)
102. Article 134 (Restriction, breaking)
103. Article 134 (Seizure: destruction, removal, or disposal of property to prevent)
104. Article 134 (Sentinel or lookout: offenses against or by)
105. Article 134 (Soliciting another to commit an offense)
106. Article 134 (Stolen property: knowingly receiving, buying, concealing)
107. Article 134 (Straggling)
108. Article 134 (Testify: wrongful refusal)
109. Article 134 (Threat or hoax, bomb)
110. Article 134 (Threat, communicating)
111. Article 134 (Unlawful entry)
112. Article 134 (Weapon: concealed, carrying)
113. Article 134 (Wearing unauthorized insignia, decoration, badge, ribbon, device or lapel button)

Part V—Nonjudicial Punishment

1. General
2. Who may impose nonjudicial punishment
3. Right to demand trial
4. Procedure
5. Punishments
6. Suspension, mitigation, remission, and setting aside
7. Appeals
8. Records of nonjudicial punishment.

Dated: May 23, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

National Advisory Council on Adult Education; Meeting

AGENCY: National Advisory Council on Adult Education, ED.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Committee on Adult Illiteracy of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE: June 16–17, 1983, 9:00 a.m. to 5:00 p.m.

ADDRESS: National Advisory Council on Adult Education, 425 13th St., N.W., Suite 323, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Helen Banks, Administrative Assistant, National Advisory Council on Adult Education, 425 13th St., N.W, Washington, D.C. 20004 (202/376–8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The council is established to:

Advise the Secretary in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Committee is open to the public. The proposed agenda includes:

Develop position paper on illiteracy
Develop committee functions and responsibilities.

Records are kept of all Council proceedings, and are available for public inspection at the office of the National Advisory Council on Adult Education, 425 13th St., N.W., Suite 323, Washington, D.C., 20004, from the hours of 8:00 a.m. to 4:30 p.m.

Signed at Washington, D.C. on May 23, 1983.

Rick Ventura,

Executive Director, National Advisory Council on Adult Education.

[FR Doc. 83-14090 Filed 5-25-83; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Gulf Oil Corp.; Proposed Remedial Orders and Opportunity for Objection

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Five proposed remedial orders to the Gulf Oil Corporation and opportunity for objection.

I. Introduction

Gulf Oil Corporation ("Gulf") of Houston, Texas is a major refiner engaged in the production and the refining of crude oil, and the marketing of petroleum products. Gulf was therefore subject to the Mandatory Petroleum Price and Allocation Regulations which were in effect through January 27, 1981.

The Office of Special Counsel ("OSC") of the Economic Regulatory Administration of the Department of Energy ("DOE") conducted an audit of Gulf and determined that the firm violated these regulations. OSC found that, as a result of these violations, Gulf's customers were overcharged and its banks of unrecouped costs were overstated (which in turn is likely to have resulted in additional overcharges).

Pursuant to 10 CFR 205.192, OSC hereby gives notice of five Proposed Remedial Order issued to Gulf. In accordance with that section, a copy of one or more of the following Proposed Remedial Orders, with confidential information deleted, may be obtained from the DOE.

II. The Proposed Remedial Orders

1. Proposed Remedial Order No. RGFB00108

OSC's audit included an examination of Gulf's class of purchaser structure. One such audit revealed that Gulf established and maintained improper and unreasonable classes of purchaser for its Product Supply Department during the period August 19, 1973 through December 31, 1980. As a result of Gulf's actions, OSC found that the firm violated 10 CFR 212.83.

As a remedy for this violation, OSC proposes that Gulf be ordered to refund a minimum total of $3,954,634.87, plus interest, to the customers identified in the Proposed Remedial Order, to reclassify the relevant transactions by the Product Supply Department with customers east of the Rocky Mountains which occurred from August 19, 1973 through January 27, 1981, and to make any additional refunds, plus interest, which result from the establishment of proper classes of purchaser.

2. Proposed Remedial Order No. RGFB00104

OSC also examined the prices which Gulf charged for sales of gasoline and distillate to wholesale purchaser-resellers ("jobbers") in five states in the Gulf Oil—California ("GOCAL") marketing area who were "branded" on May 15, 1973 and were subsequently converted by Gulf to "unbranded." OSC found that Gulf, following conversion of these jobbers from branded to unbranded status, assigned certain of its converted unbranded jobbers to improper classes of purchaser. OSC further found that the resulting prices produced overcharges in the test month of December 1975 for five converted jobbers located in Oregon, Nevada and Washington. OSC further found that in May 1977 Gulf reduced its may 1973 marketing costs and as a result improperly passed through additional marketing costs during the period May 1977 through December 1980. OSC concluded that Gulf's actions were in violation of 10 CFR 212.83.

As a remedy for these violations, OSC proposes that Gulf be ordered to refund overcharges to the five identified customers in the amount of $2,863,195.69, plus interest, for the period January 1, 1974 through May 31, 1980. OSC further proposes that Gulf reduce its bank of unrecouped increased non-product costs by $11,214,032.

3. Proposed Remedial Order No. RGFM02104.

OSC also examined the prices which Gulf charged in sales of gasoline to certain of its branded and unbranded wholesale-purchaser resellers ("dealers") who either owned or leased stations from third parties. In particular, OSC examined the accounts of Gulf dealers who received a discounted price that was less than the full dealer tankwagon price and whose discounts or sales allowances has been terminated or adjusted by Gulf during the period September 1, 1973 through June 30, 1980.

OSC found that Gulf had improperly eliminated these discounts and, on termination of the discounts, erroneously placed the dealers into Gulf's full schedule dealer tankwagon class of purchaser. As a result, Gulf improperly increased the dealer's May 15, 1973 weighted average prices in violation of 10 CFR 212.83 and therefore charged prices in excess of the maximum allowable price.

As a remedy for the violation, OSC proposes that Gulf be ordered to refund $353,445.93, plus interest, to the identified overcharged customes for the period September 1, 1973 through June 30, 1980. Gulf is also to conduct an audit of its operations in accordance with the PRO's findings for the period July 1, 1980 through January 27, 1981 and refund all overcharges thus identified.

4. Proposed Remedial Order No. RGFL00077

OSC also investigated Gulf's failure to include net volumes for product exchanges in the calculation of its refinery yield factor for purposes of allocating crude oil and non-product costs to gasoline in the months of January through May of 1979. OSC found that Gulf's failure to include in the calculation of its refinery yield the net balance of gasoline paid out or received pursuant to exchanges during the first five months of 1979 was in violation of 10 CFR 212.83. This violation resulted in $27,174,000 in cost overstatements in the period January through May of 1979.

As a remedy for this violation, OSC proposes that Gulf be ordered to recalculate its monthly refinery yield of gasoline, monthly increased crude costs allocable to gasoline, and monthly increased non-product costs allocable to gasoline or the period January 1, 1979 through January 27, 1981. OSC also proposes that Gulf be ordered to recompute its banks of unrecouped costs to reflect these adjustments.

5. Proposed Remedial Order No. RGFM01906

OSC also examined Gulf's allocation of increased costs to gasoline on a greater than pro-rata volumetric basis for the month of December 1978.

OSC found that provisions of DOE regulations permitted a refiner to increase, or retro-tilt, its A_i^r and N_i^r banks in May 1979 to reflect certain costs incurred in the months of January and February of 1979. A refiner was not permitted to increase these costs for December 1978. Nevertheless, Gulf implemented the tilt for the months of

VOL 48 ISS 103 MAY 26 1983 UMI

December 1978 and January 1979 (instead of January and February 1979) in violation of 10 CFR 212.83. Gulf's premature implementation of the retro-tilt resulted in $22,696,000 in improper increases in relevant crude and non-product cost banks in the month of December 1978.

As a remedy for these violations, OSC proposes that for the period December 1, 1979 through January 27, 1981 Gulf be ordered to make the appropriate adjustments and to recompute its banks of increased costs to reflect these adjustments.

III. Notice of Objection

In accordance with 10 CFR 205.193, any aggrieved person may file a Notice of Objection to any of the above described Proposed Remedial Orders with DOE's Office of Hearings and Appeals within 15 days after the date of this publication. A person who fails to file a Notice of Objection shall be deemed to have admitted the findings of fact and conclusions of law stated in the Proposed Remedial Order. If a Notice of Objection is not filed in accordance with § 205.193, the respective Proposed Remedial Order may be issued as a final order.

All Notices of Objection, Statements of Objections, Responses, Replies, Motions, and other documents required to be filed with the Office of Hearings and Appeals shall be sent to: Office of Hearings and Appeals, Department of Energy, Room 3304, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

No confidential information shall be included in a Notice of Objection.

Copies of all Notices of Objection, Statements of Objections and all other pleadings filed by an aggrieved person or other participant in a proceeding shall be served on:

David L. Anderson, Deputy Solicitor, Economic Regulatory Administration, Department of Energy, Room 3117, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461;

Robert J. McKee, Jr., Director, Philadelphia Field Office, Economic Regulatory Administration, Department of Energy, 1421 Cherry Street, 10th Floor, Philadelphia, Pennsylvania 19102.

Requests for copies of one or more of the Proposed Remedial Orders with confidential information deleted shall be directed to: Freedom of Information Reading Room, Forrestal Building, 1000 Independence Avenue, S.W., Room 1E-190, Washington, D.C. 20585.

Issued in Washington, D.C. May 18, 1983.

Milton C. Lorenz,

Special Counsel, Economic Regulatory Administration.

[FR Doc. 83-14179 Filed 5-25-83; 8:45 am]

BILLING CODE 6450-01-M

[Docket No. ERA-FC-82-36; FC Case No. 67047-9224-01-24]

Sunlaw Energy Corp.; Granting of Exemption

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Order granting to Sunlaw Energy Corporation an exemption from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: On November 22, 1982, the Sunlaw Energy Corporation, hereinafter referred to as petitioner, filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for an electric powerplant from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits the use of petroleum and natural gas as a primary energy source in new powerplants and certain new major fuel burning installations. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA were published in the **Federal Register** at 46 FR 59872 (December 7, 1981) ("final rules"). A revised final rule governing eligibility and evidentiary requirements for the cogeneration exemption was issued on June 25, 1982 (47 FR 29209 (July 6, 1982)).

The proposed powerplant for which the petition was filed is a 25.2 megawatt (MW) (approximate) combined cycle cogeneration facility capable of using natural gas or No. 2 distillate oil, and designed to produce electricity and steam power for process applications at the petitioner's plant located in Vernon, California.

It is expected that more than fifty percent of the net annual electric power generation of the petitioner's turbine generator will be sold to Southern California Edison Company (SCE), making the cogeneration facility an electric powerplant pursuant to 10 CFR 500.2.

ERA has determined that the evidence available to it in the record of this proceeding is sufficient to support the issuance of the requested exemption. Therefore, pursuant to section 212(c) of the Act and 10 CFR 503.37, ERA hereby issues this Order granting a permanent cogeneration exemption for the new powerplant. The basis for ERA's Order is provided in the **SUPPLEMENTARY INFORMATION** section, below.

DATES: In accordance with section 702(a) of FUA, this Order and its provisions shall take effect on July 25, 1983.

The public file containing a copy of this Order and other documents and supporting materials on this proceeding is available for inspection upon request at: Department of Energy Freedom of Information Reading Room, 1000 Independence Avenue, S.W., Room 1E-190, Washington, D.C. 20585, Monday through Friday, 8:00 a.m.–4:00 p.m.

FOR FURTHER INFORMATION CONTACT:

Roland DeVries, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Bldg., Room GA-093, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Phone (202) 252-6002.

Allan Stein, Esq., Office of General Counsel, Department of Energy, Forrestal Bldg., Room 6B-222, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Phone (202) 252-2967.

SUPPLEMENTARY INFORMATION: The petitioner proposes to install a 25.2 MW (approximate) combined-cycle cogeneration system at its Vernon, California plant. The proposed cogenerator will consist of a baseloaded natural gas-fired combustion turbine with distillate oil backup capacity, which will produce 21.5 MW of electric power, and an unfired waste heat recovery boiler operating on the exhaust gases from the combustion turbine. The waste heat boiler will have both high and low pressure steam production capabilities. The high pressure steam (approximately 65,000 lbs/hr) will be delivered to an extraction turbine where the amounts required for process applications will be removed, and the remainder will be used to produce approximately 3.7 MW of electric power. The low pressure steam will be primarily applied to meet the petitioner's process use requirements. The electric power generated at the facility will be sold to the Southern California Edison Company.

The cogeneration facility is classified as a powerplant under 10 CFR 500.2 of the final rules (definition of "electric generating unit") because more than 50 percent of its net annual electric power generation will be sold.

Section 212(c) of the Act provides for a permanent cogeneration exemption from the prohibitions of Title II of FUA. In accordance with the certification procedures of 10 CFR 503.37(a)(1), the petitioner has certified that:

1. The oil or gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the cogeneration facility, where the calculation of savings is in accordance with 10 CFR 503.37(b); and

2. The use of a mixture of petroleum or natural gas and an alternate fuel in the cogeneration facility is not feasible, as required under 10 CFR 503.9.

In accordance with the evidentiary requirements of 10 CFR 503.37(c), the petitioner has, in addition to the certifications described above, included as part of its petition:

1. Exhibits containing the bases for the certifications and

2. An environmental impact analysis, as required under 10 CFR 503.13.

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitue a major federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act.

In accordance with the procedural requirements of FUA and 10 CFR 501.3(b), ERA published its Notice of its Acceptance of Petition for Exemption and Availability of Certification relating to the powerplant in the **Federal Register** on December 29, 1982 (47 FR 57989), commencing a 45-day public comment period pursuant to section 701(c) of FUA. As required by section 701(f) of the Act, ERA provided a copy of the petition to the Environmental Protection Agency for comments. During this period, interested persons were also afforded an opportunity to request a public hearing. The period for submitting comments and for requesting a public hearing closed on February 14, 1983. No comments were received and no hearing was requested.

Decision and Order: Based upon the entire record of this proceeding, ERA has determined that the petitioner has satisfied all of the eligibility requirements for the requested exemption as set forth in 10 CFR 503.37(a)(1) and, pursuant to section 212(c) of FUA, ERA hereby grants the petitioner a permanent cogeneration exemption for the new powerplant to be located at Vernon, California.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this Order may petition for judicial review thereof at any time before the 60th day following the publication of this Order in the **Federal Register.**

Issued in Washington, D.C. on May 20, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-83-002; FC Case No. 67047-9226-01-24]

Sunlaw Energy Corp.; Granting of Exemption

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Order granting to Sunlaw Energy Corporation an exemption from the prohibitions of the Powerplant and Industrial Fuel Use Act of 1978.

SUMMARY: On January 6, 1983, the Sunlaw Energy Corporation, hereinafter referred to as petitioner, filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent cogeneration exemption for an electric powerplant from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits the use of petroleum and natural gas as a primary energy source in new powerplants and certain new major fuel burning installations. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA were published in the **Federal Register** at 46 FR 59872 (December 7, 1981) ("final rules"). A revised final rule governing eligibility and evidentiary requirements for the cogeneration exemption was issued on June 25, 1982 (47 FR 29209 (July 6, 1982)).

The proposed powerplant for which the petition was filed is a 25.2 megawatt (MW) (approximate) combined cycle cogeneration facility capable of using natural gas or No. 2 distillate oil, and designed to produce electricity and steam power for process applications at the petitioner's plant located in Vernon, California.

It is expected that more than fifty percent of the net annual electric power generation of the petitioner's turbine generator will be sold to Southern California Edison Company (SCE), making the cogeneration facility an electric powerplant pursuant to 10 CFR 500.2.

ERA has determined that the evidence available to it in the record of this proceeding is sufficient to support the issuance of the requested exemption. Therefore, pursuant to section 212(c) of the Act and 10 CFR 503.37, ERA hereby issues this Order granting a permanent cogeneration exemption for the new powerplant. The basis for ERA's Order is provided in the **SUPPLEMENTARY INFORMATION** section, below.

DATES: In accordance with section 702(a) of FUA, this Order and its provisions shall take effect on July 25, 1983.

The public file containing a copy of this Order and other documents and supporting materials on this proceeding is available for inspection upon request at: Department of Energy Freedom of Information Reading Room, 1000 Independence Avenue, S.W., Room 1E-190, Washington, D.C. 20585, Monday through Friday, 8:00 a.m.–4:00 p.m.

FOR FURTHER INFORMATION CONTACT:

Roland DeVries, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Bldg., Room GA-093, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Phone (202) 252-6002.

Allan Stein, Esq., Office of General Counsel, Department of Energy, Forrestal Bldg., Room 6B-222, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Phone (202) 252-2967

SUPPLEMENTARY INFORMATION: The petitioner proposes to install a 25.2 MW (approximate) combined-cycle cogeneration system at its Vernon, California plant. The proposed cogenerator will consist of a baseloaded natural gas-fired combustion turbine with distillate oil backup capacity, which will produce 21.5 MW of electric power, and an unfired waste heat recovery boiler operating on the exhaust gases from the combustion turbine. The waste heat boiler will have both high and low pressure steam production capabilities. The high pressure steam (approximately 65,000 lbs/hr) will be delivered to an extraction turbine where the amounts required for process applications will be removed, and the remainder will be used to produce approximately 3.7 MW of electric power. The low pressure steam will be primarily applied to meet the petitioner's process use requirements. The electric power generated at the facility will be sold to the Southern California Edison Company.

The cogeneration facility is classified as a powerplant under 10 CFR 500.2 of the final rules (definition of "electric generating unit") because more than 50 percent of its net annual electric power generation will be sold.

VOL 48 ISS 103 MAY 26 1983

Section 212(c) of the Act provides for a permanent cogeneration exemption from the prohibitions of Title II of FUA. In accordance with the certification procedures of 10 CFR 503.37(a)(1), the petitioner has certified that:

1. The oil or gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of the cogeneration facility, where the calculation of savings is in accordance with 10 CFR 503.37(b); and

2. The use of a mixture of petroleum or natural gas and an alternate fuel in the cogeneration facility is not feasible, as required under 10 CFR 503.9.

In accordance with the evidentiary requirements of 10 CFR 503.37(c), the petitioner has, in addition to the certifications described above, included as part of its petition:

1. Exhibits containing the bases for the certifications, and

2. An environmental impact analysis, as required under 10 CFR 503.13.

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act.

In accordance with the procedural requirements of FUA and 10 CFR 501.3(b), ERA published its Notice of its Acceptance of Petition for Exemption and Availability of Certification relating to the powerplant in the **Federal Register** on February 11, 1983 (48 FR 6390), commencing a 45-day public comment period pursuant to section 701(c) of FUA, as required by section 701(f) of the Act, ERA provided a copy of the petition to the Environmental Protection Agency for comments. during this period, interested persons were also afforded an opportunity to request a public hearing. The period for submitting comments and for requesting a public closed on March 28, 1983. No comments were received and no hearing was requested.

Decision and order: Based upon the entire record of this proceeding, ERA has determined that the petitioner has satisfied all of the eligibility requirements for the requested exemption as set forth in 10 CFR 503.37(a)(1) and, pursuant to section 212(c) of FUA, ERA hereby grants the petitioner a permanent cogeneration exemption for the new powerplant to be located at Vernon, California.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this Order in the **Federal Register**.

Issued in Washington, D.C. on May 20, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. TA83-2-1-000]

Alabama-Tennessee Natural Gas Co.; Revised PGA Rate Adjustment

May 19, 1983.

Take notice that on May 13, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama, 35631, tendered for filing Fortieth Revised Sheet No. 3–A as part of its FPC Gas Tariff, Third Revised Volume No. 1. This tariff sheet is proposed to become effective May 1, 1983, and Alabama-Tennessee requests that there be granted any necessary waivers of the Commission's Regulations to accomplish this proposed effective date.

Alabama-Tennessee states that the purpose of the revised tariff sheet is to reduce Alabama-Tennessee's rates pursuant to Section 20 of the General Terms and Conditions of its FPC Gas Tariff to reflect a reduction in the rates of its principal supplier, Tennessee Gas Pipeline Company, a Division of Tenneco, Inc., filed on May 4, 1983, in Docket No. TA83–2–9, to be effective May 1, 1983, and to reflect a reduction in volumes taken from its other supplier, Sun Oil Company, of which approximately 45% is high cost deep gas.

Fortieth Revised Sheet No. 3–A provides for the following rates:

Rate schedule	Rates after current adjustment
G–1:	
Demand (dollars)	6.05
Commodity (cents)	371.92
SG–1: Commodity (cents)	413.12
I–1: Commodity (cents)	391.79

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest such filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further pleading. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-65-001]

Alabama-Tennessee Natural Gas Co.; Revised Base Tariff Rate Adjustment

May 19, 1983.

Take notice that on May 9, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama, 35631, tendered for filing the following tariff sheets as part of its FPC Gas Tariff, Third Revised Volume No. 1:

Substitute Thirty-Ninth Revised Sheet No. 3–A
Substitute Sixth Revised Sheet No. 5
Substitute Sixth Revised Sheet No. 6
Substitute Sixth Revised Sheet No. 11
Substitute Fifth Revised Sheet No. 13–B
Substitute Sixth Revised Sheet No. 14

These revised tariff sheets are proposed to become effective April 3, 1983, and Alabama-Tennessee requests that there be granted any necessary waivers of the Commission's Regulation to accomplish this proposed effective date.

Alabama-Tennessee states that the purpose of the revised tariff sheets, is to provide for a restatement of its Base Tariff Rates as required by the Commission's order issued on April 27, 1983, in the above referenced docket.

These revised tariff sheets provide for the following rates:

Rate schedule	Rates after current adjustment
G–1:	
Demand (dollars)	6.05
Commodity (cents)	421.04
SG–1: Commodity (cents)	462.24
I–1: Commodity (cents)	440.91

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest such filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and procedure. All such petitions or protests should be filed on or before May 31, 1983, Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further pleading. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-2-21-001 (PGA83-3a)]

Columbia Gas Transmisson Corp.; Proposed Changes in FERC Gas Tariff

May 19, 1983.

Take notice that Columbia Gas Transmission Corporation (Columbia) on May 9, 1983, tendered for filing proposed changes to its FERC Gas Tariff, Original Volume No. 1, as follows:

Substitute Eighty-seventh Revised Sheet No. 16.

Substitute Twenty-ninth Revised Sheet No. 64.

The enclosed tariff sheet, reflecting reduced rates applicable to sales rate schedules, bear an issue date of May 9, 1983 and an effective date of April 1, 1983.

Columbia states that it filed a special PGA on April 5, 1983 to reflect a reduction of $83,330,095, or 25.97¢ per Dth for the period April 1, 1983 through August 31, 1983. Columbia stated that although its calculations underlying that filing supported an increase in demand costs of approximately $6 million for this period, Columbia did not propose to effectuate such increase. Instead, Columbia requested waiver of the Commission's Regulations to permit it to recover (or return) any change in the Base Average Demand Rate of Purchased Gas Cost per Unit of Sales for the period April 1, 1983 through August 31, 1983 through its Account 191.

The Commission order issued May 2, 1983, directed Columbia to reflect the appropriate adjustment to its demand rates resulting from this change. The instant filing, recalculates the April 1, 1983 special PGA in compliance with the Commission order. The Tariff sheets submitted herein reflect an overall reduction in purchased gas costs of $77,229,102, or an increase of 23.0¢ per Dth in demand and a commodity decrease of 25.98¢ per Dth.

Columbia respectfully requests that the Commission grant any waivers as it may deem necessary for the acceptance of this filing.

Copies of the filing were served upon the Company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, Union Center Plaza Building, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of Columbia's filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-2-2-000]

East Tennessee Natural Gas Co.; Rate Filing

May 19, 1983.

Take notice that on May 10, 1983, East Tennessee Natural Gas Company tendered for filing Sixth Revised Sheet No. 4 to Original Volume No. 1 of its FERC Gas Tariff to be effective May 1, 1983.

East Tennessee states that the sole purpose of the revised tariff sheet is to simultaneously change its rates to reflect the reduced rates charged to East Tennessee by its supplier, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., to be effective May 1, 1983, in Docket No. TA83–2–9. East Tennessee requests waiver to make the filing effective as proposed and states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-23-001]

Eastern Shore Natural Gas Co.; Tariff Filing

May 19, 1983.

Take notice that Eastern Shore Natural Gas Company (Eastern Shore) on May 6, 1983, tendered for filing the following revised tariff sheets to Original Volume No. 1 of Eastern Shore's FERC Gas Tariff:

To Be Effective May 1, 1983

Second Revised Substitute Twenty-Second Revised Sheet No. 5.

Second Revised Substitute Twenty-Second Revised Sheet No. 6.

Second Revised Substitute Twenty-Second Revised Sheet No. 10.

Second Revised Substitute Twenty-Second Revised Sheet No. 11.

Second Revised Substitute Twenty-Second Revised Sheet No. 12.

Eastern Shore states that the purpose of these substitute tariff sheets is to comply with the Commission's Order issued April 26, 1983, requiring Eastern Shore to track the downward revision of Transcontinental Gas Pipe Line Corporation's rates in Docket No. TA83–2–29 (PGA 83–2).

UMI

VOL 48 ISS 103 MAY 26 1983 UMI

Eastern Shore states that copies of the filing have been mailed to each of its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

Secretary.

[FR Doc. 83-14079 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83 1-4-004 (PGA 83-3)]

Granite State Gas Transmission, Inc., Proposed Changes in Rates Pursuant to Purchased Gas Cost Adjustment Provisions

May 19, 1983.

Take notice that Granite State Gas Transmission, Inc. (Granite State), 120 Royal Street, Canton, Massachusetts 20201, on May 11, 1983, tendered for filing Substitute Fourth Revised Sheet No. 7 in its FERC Gas Tariff, First Revised Volume No. 1, containing proposed changes in its rates for jurisdictional wholesale sales for effectiveness on May 1, 1983.

According to Granite State, the revised rates contained on Substitute Fourth Revised Sheet No. 7 reflect the effect on its rates for jurisdictional sales of a reduction in the cost of gas purchased from its sole supplier, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) resulting from a rate reduction filed by Tennessee on May 4, 1983 in Docket No. TA83-2-9-000 (PGA 83-2) for effectiveness on May 1, 1983. Granite State further states that the decrease in rates is applicable to its sales to its two distribution company affiliates, Bay State Gas Company and Northern Utilities, Inc. It is further stated that the proposed reduced rates will result in a monthly reduction of approximately $850,000 in the cost of gas purchased by the two distributors.

Granite State requests permission to effect its rate reductions through its purchased gas cost provisions concurrent with the effectiveness of the proposed Tennessee reduction in order to flow through the reduction to its customers as soon as possible and to avoid accumulating substantial overcollections in rates.

According to Granite State, copies of the filing were served upon its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14080 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-5-001]

Midwestern Gas Transmission Co.; Rate Filing

May 19, 1983.

Take notice that on May 9, 1983, Midwestern Gas Transmission Company (Midwestern) tendered for filing Sixth Revised Sheet No. 5 to Original Volume No. 1 of its FERC Gas Tariff to be effective May 1, 1983.

Midwestern states that the sole purpose of the revised tariff sheet is to simultaneously change its Southern System rates to reflect the rates charged to Midwestern by its Southern System supplier, Tennesee Gas Pipeline Company, a Division of Tenneco, Inc., specifically the rate decrease to be effective May 1, 1983, in Docket No. TA83-2-9. Midwestern requests waiver to make this filing effective as proposed and states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14081 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-1-25-005 (PGA 83-1)]

Mississippi River Transmission Corp.; Rate Change Filing

May 19, 1983.

Take notice that on May 9, 1983 Mississippi River Transmission Corporation ("Mississippi") tendered for filing Substitute Eighty-Fifth Revised Sheet No. 3A to its FERC Gas Tariff, First Revised Volume No. 1, containing an effective date of March 1, 1983.

Mississippi states that such filing is being submitted pursuant to Commission order dated February 28, 1983 at Docket No. TA83-1-25-004. Such order accepted for filing Mississippi's Eighty-Fifth Revised Sheet No. 3A to be effective March 1, 1983, subject to any modification necessary to reflect revised March 1, 1983 rates for Natural Gas Pipeline Company of America ("Natural"), one of Mississippi's, pipeline suppliers, at Docket No. TA83-1-26. Mississippi states that the instant filing reflects such Natural revisions accepted by Commission order dated April 27, 1983.

Mississippi states that copies of its filing have been served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14082 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-396-000]

Northern Indiana Public Service Co.; Order Accepting for Filing and Suspending Rates, Granting Summary Disposition, Noting Interventions, and Establishing Hearing and Price Squeeze Procedures

Issued: May 19, 1983.

On March 21, 1983, Northern Indiana Public Service Company (NIPSCO) tendered for filing increased rates applicable to firm power service to 21 cooperative and municipal customers.[1] The company submitted a two-phased rate increase. Phase B, for which NIPSCO proposed an effective date of May 20, 1983, would increase jurisdictional revenues by approximately $32,800,000 (73%) based on a calendar year 1983 test period. In the event that the Commission were to suspend the Phase B rates, NIPSCO requested that the Commission permit the company's Phase A rates to go into effect as of May 21, 1983, during the period for which the Phase B rates were suspended. The Phase A rates were designed to increase revenues by approximately $28,500,000 (63%). As discussed below, NIPSCO subsequently amended its filing in response to the various interventions, by reducing the Phase A rate proposal and requesting a five month suspension for the Phase B rates.

Notice of NIPSCO's filing was published in the **Federal Register**,[2] with comments due on or before April 12, 1983. Timely motions to intervene were filed by the Indiana Municipal Power Agency and Rensselaer, Indiana (IMPA);[3] the Towns of Bremen, Winamac, Walkerton, Argos, Brookston, Kingsford Heights, Etna Green, and Chalmers, Indiana (Towns); and Wabash Valley Power Association (Wabash Valley).

IMPA and Wabash Valley each requested that the Commission suspend both phases of NIPSCO's rate increase for the maximum period. The Towns also requested that the company's Phase B rates be suspended for five months. However, the Towns requested that the Commission reject the Phase A rates or, in the alternative, suspend them for five months. In support of their requests, the intervenors raised a number of issues relating to the rate base, cost of service, and rate of return.[4]

Wabash Valley further alleged that NIPSCO's rates are excessive due to inefficiency and mismanagement of the company; accordingly, Wabash Valley requested that the issue of management efficiency be set for investigation. In addition, Wabash Valley requested that the Commission summarily order NIPSCO to cease the accrual of AFUDC associated with pollution control facilities for which CWIP is included in rate base. According to Wabash Valley, NIPSCO's treatment is contrary to section 2.16(c) of the Commission's Statements of General Policy and Interpretation. Finally, IMPA, the Towns, and Wabash Valley alleged that NIPSCO's rate increase may result in a price squeeze.

In addition to the motions to intervene, protests were received from: the Pulaski Memorial Hospital; Jessup Paper Box, Inc.; Galbreath, Inc.; Frontier School Corporation; Bremen Bearing Corporation; North Star Management, Inc.; Skyline Structures, Inc.; and the Singer Company.

On April 27, 1983, NIPSCO filed an answer to the motions to intervene filed by IMPA, the Towns, and Wabash Valley. The company did not object to the interventions. However, NIPSCO opposed the requests for rejection or maximum suspension of the proposed rates, an investigation concerning management efficiency, or initiation of price squeeze procedures. The company addressed the various substantive issues raised by the intervenors and further contended that the intervenors had not set forth a *prima facie* case of price squeeze. With respect to Wabash Valley's motion for summary disposition, NIPSCO admitted that it had improperly continued to accrue AFUDC on pollution control CWIP included in rate base and that a cost of service adjustment is therefore warranted.

On May 10, 1983, NIPSCO submitted a revised rate filing in response to the interventions and in an effort to alleviate price squeeze concerns.[5] NIPSCO has tendered reduced Phase A rates which reflect a revenue increase of approximately $15,900,000, or $12,500,000 less than originally proposed. The company asks that these rates become effective on May 21, 1983, and seeks waiver of the notice requirements to accomplish this result. In addition, NIPSCO now requests that the originally proposed Phase B rates be suspended for five months. NIPSCO indicates that a State commission decision on the company's pending retail rate increase is expected within the five month period and that, following that decision, NIPSCO will file revised Phase B rates. Finally, the company notes an error in its original filing relating to post-1970 investment tax credits.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motions to intervene serve to make IMPA, the Towns, and Wabash Valley parties to this proceeding.

As mentioned, the Towns requested that the Commission reject NIPSCO's originally proposed Phase A rates. The Towns alleged that the company failed to submit cost of service data required by the Commission's regulations in support of the rates and, further, that the submission of a two-step rate increase represents an attempt to circumvent the Commission's authority under section 205(e) of the Fedeal Power Act. Our review of NIPSCO's filing, however, indicates that the filing, as originally submitted and as modified, substantially complies with the Commission's regulations. Moreover, as we have noted before, nothing in the Federal Power Act or the Commission's regulations precludes an electric utility from filing a phased rate increase, such as that submitted by NIPSCO; the Commission has accepted such submittals for filing in a number of instances.[6] Accordingly,

---

[1] *See* Attachment A for rate schedule designations and effected customers. The City of Rensselaer, NIPSCO's only partial requirements customer, is served under a separate rate schedule. The remaining customers receive service under a tariff rate.

[2] 48 FR 13404 (March 31, 1983).

[3] IMPA is a joint agency organized under the laws of the State of Indiana for the purpose of supplying the power and energy needs of municipal utilities. IMPA purchased power from NIPSCO and resells it to its members, which include the City of Rensselaer.

[4] These issues include: return on common equity; fuel stocks, cash working capital, prepayments, purchased power expenses, O&M expenses, and customer accounting expenses; treatment of AFUDC and pollution control CWIP; accumulated deferred income tax balances; synchronization of fuel expenses and revenues; treatment of coal stocks; the date as of which a new generating unit is reflected as plant-in-service; and projected demands for the City of Rensselaer.

[5] The company indicates, however, that in amending its filing it has not waived any argument regarding the price squeeze claims.

[6] *See, e.g., Pacific Gas & Electric Co.*, 21 FERC ¶61,296 (Dec. 14, 1982); Cincinnati Gas & Electric Co., 20 FERC ¶61,148 (Aug. 4, 1982); *Jersey Central Power & Light Co.*, 19 FERC ¶61,208 May 28, 1982).

VOL 48 ISS 103 MAY 26 1983 UMI

we shall deny the Towns' motion to reject NIPSCO's Phase A rates.

In light of NIPSCO's acknowledgement that it had inadvertently continued to accrue AFUDC on amounts included in rate base as pollution control CWIP, we shall grant Wabash Valley's motion for summary disposition. In addition, we shall order summary disposition with respect to one other aspect of NIPSCO's filing.

We note that NIPSCO has failed to synchronize test year interest expenses used in determining the income tax component of its cost of service with the interest portion of the claimed rate of return allowance. Commission precedent requires that utilities compute the long-term debt component of the interest expense tax reduction as the product of the allocated rate base and the weighted cost of long-term debt.[7] Summary disposition is therefore appropriate. However, because the adjustments associated with AFUDC accrual on pollution control CWIP and interest synchronization partially offset each other in their effect upon NIPSCO's cost of service, we shall not order the company to file revised rates at the present time. In NIPSCO's compliance cost of service and rates at the conclusion of this proceeding, NIPSCO will be required to reflect our determination with respect to AFUDC and to synchronize its interest expense in accordance with Commission precedent.

NIPSCO has included in its wholesale tariff, as Paragraph 4 under the heading "Other terms and conditions," a provision which would allow the company to decline to provide service to any utility for end-use load not then served by the company at retail or wholesale if the company's power supply resources are insufficient to supply such load or if the provision of service for such load would increase the company's unit cost of serving existing customers. We are concerned that this provision may unduly restrict competition between NIPSCO and its wholesale customers.[8] However, we are not prepared to conclude at this time that the provision is *per se* unlawful. Accordingly, we shall set the matter for investigation. In particular, NIPSCO will be expected to show why this provision is not anticompetitive or unduly discriminatory, whether it serves some countervailing public interest, and if so, why these countervailing public interest considerations cannot be achieved in some manner less restrictive in its effect upon competition. *Florida Power & Light Co.*, Opinion No. 57, 8 FERC ¶ 61,121 (Aug. 3, 1979). *See also City of Huntingburg* v. *FPC*, 498 F.2d 778 (D.C. Cir. 1974).

With respect to the allegation of mismanagement and inefficiency made by Wabash Valley, the issue of whether the Company's costs have been prudently incurred may be raised in the course of the hearing which we shall order in this proceeding along with the other issues raised by the intervenors.

Our preliminary review indicates that NIPSCO's rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing an suspend them as ordered below.

The Commission explained its suspension policy in *West Texas Utilities Co.*, 18 FERC ¶61,189 (Feb. 26, 1982). As noted there, where our preliminary review suggests that increased rates may be unjust and—unreasonable and may yield substantially excessive revenues, as defined in *West Texas*, we will ordinarily impose a five month suspension. In the instant case, our preliminary review of NIPSCO's filing indicates that the Phase B rates may produce substantially excessive revenues, while the Phase A rates, as originally filed or as modified, may not be substantially excessive. Further, we note that NIPSCO has requested that its Phase B rates be suspended for the maximum five month period. Accordingly, we shall suspend NIPSCO's Phase B rates for five months from sixty days after filing to become effective on October 21, 1983, subject to refund. Given the substantial reduction in the level of NIPSCO's proposed Phase A rates, we do not believe that the affected customers will be prejudiced by permitting the lower rates contained in the company's May 10, 1983 filing to take effect following a one day suspension, in lieu of the rates originally proposed by NIPSCO. We find that good cause exists to waive the notice requirements and we shall suspend the revised Phase A rates for one day, to become effective on May 22, 1983, subject to refund. We shall deem the company's originally proposed Phase A rates to have been withdrawn.

In accordance with the Commission's policy and practice established in *Arkansas Power & Light Co.*, 8 FERC ¶ 61,131 (Aug. 6, 1979), we shall phase the price squeeze issue initially raised by the intervenors.

The Commission orders:

(A) The Towns' motion to reject NIPSCO's Phase A rates is hereby denied.

(B) Wabash Valley's motion for summary disposition regarding the accrual of AFUDC is hereby granted.

(C) Summary disposition is hereby ordered with respect to NIPSCO's failure to synchronize interest expense.

(D) NIPSCO's compliance cost of service and rates shall be developed at the conclusion of this preceeding to reflect (1) the discontinuation of AFUDC treatment for pollution contol CWIP included in rate base, and (2) a proper interest synchronization.

(E) Waiver of the notice requirements is herby granted with respect to NIPSCO's reduced Phase A rates.

(F) NIPSCO's reduced Phase A rates and originally filed Phase B rates are herby accepted for filing and suspended for one day and five months, respectively, to become effective, on May 22, 1983, and October 21, 1983, subject to refund.

(G) Pursuant to the authority contained in the subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of NIPSCO's rates.

(H) the Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(I) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service to top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(J) The Commission hereby orders the initiation of price squeeze proceedings and further orders that this docket be phased so that the price squeeze proceedings begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding judge may order a departure from this schedule for good cause shown. The price squeeze claim shall be governed by section 2.17 of the Commission's regulations as it may be modified prior to the commencement of the price squeeze phase of the instant docket.

(K) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment A—Northern Indiana Public Service Company

Docket No. ER83-396-000—Rate Schedule Designations

Designation and Description

(1) FERC Electric Tariff, 4th Substitute Revised Volume No. 1 (Supersedes 3rd Revised Volume No. 1)—Phase A rates.

(2) FERC Electric Tariff, 5th Revised Volume No. 1 (Supersedes 4th Revised Volume No. 1)—Phase B rates.

(3) Supplement No. 2 to Supplement No. 1 to Rate Schedule FERC No. 13 (Supersedes Supplement No. 1 to Supplement No. 1)—Rate Schedule VA111.

Tariff Customers

Rate Schedule VA1—Towns of Argos, Bremen, Brookton, Chalmers, Etna Green, Kingsford Heights, Walkerton and Winamac.

Rate Schedule VA11—Wabash Valley Power Association at Carrol County, Fulton County, Jasper County, Kankakee County, Koscuisko County, Lagrange County, Marshall County, Stueben County, Warren County and White County.

Rate Schedule VA111—None

Non-Tariff Customers

Rate Schedule VA111—Indiana Municipal Power Agency at City of Rensselaer.

[Docket No. CP83-325-000]

Northern Natural Gas Company, Division of InterNorth, Inc.; Application

May 19, 1983.

Take notice that on May 16, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-325-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued sale of natural gas to Iowa Power and Light Company (IP&L), for resale, with changes in authorized firm and seasonal sales volumes, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern proposes to decrease IP&L's level of firm contract demand service by 53,939 Mcf of gas per day and increase IP&L's seasonal service demand by 28,612 Mcf of gas per day. It is said that Natural and IP&L have executed new service agreements calling for an initial reduction in firm contract demand service equal to 8,671 Mcf per day and a further reduction of 45,268 Mcf per day, effective October 27, 1983, and thereafter. It is also stated that the increase in seasonal service demand will be effective November 27, 1983, and thereafter.

It is asserted that customer conservation and current economic downtrends in IP&L's market area have resulted in excess firm entitlements and consequently, the proposed changes in volumes will assist IP&L in achieving maximum utilization of its supply sources to meet current market requirements.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 6, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214, or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Northern to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-59-000]

Northern Natural Gas Co.; Purchased Gas Cost Adjustment Rate Change

May 19, 1983.

Take notice that on May 6, 1983, Northern Natural Gas Company (Northern) tendered for filing, as part of Northern's F.E.R.C. Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2, the following tariff sheets:

Third Revised Volume No. 1: Twenty-first Revised Sheet No. 4b
Original Volume No. 2: Thirty-first Revised Sheet No. 1c

These tariff sheets are being issued in substitution of those tariff sheets filed April 21, 1983 which reflected a decrease in the Commodity Component of Northern's rates resulting from the $.54 per MMBtu decrease in the Canadian Border export price. The sole purpose of these tariff sheets is to update the April 21 filing to reflect the change in the base average cost of purchased gas applicable to the billing period May through December, 1983.

Northern requests any waiver of the Commission's regulations to the extent, if any, required to effectuate the tariff sheets on April 27, 1983.

The Company states that copies of the filing have been mailed to each of the Gas Utility customers, interested State Commissions, and all parties to Docket Nos. RP82-71 and TA83-1-59.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal

VOL 48 ISS 103 MAY 26 1983 UMI

Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14084 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-59-001]

Northern Natural Gas Co.; ANGTS Transportation Adjustment Rate Change

May 19, 1983.

Take notice that on May 6, 1983, Northern Natural Gas Company (Northern) tendered for filing, as part of Northern's F.E.R.C. Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2, the following tariff sheets:

Third Revised Volume No. 1: Thirty-First Revised Sheet No. 4a; Twenty-Second Revised Sheet No. 4b
Original Volume No. 2: Thirty-Second Revised Sheet No. 1c

Such revised tariff sheets are required in order that Northern may place decreased rates into effect on June 27, 1983 to reflect the change in the costs of transportation of gas through the Alaska Natural Gas Transportation System (ANGTS) pursuant to Paragraph 21 of Northern's F.E.R.C. Gas Tariff, Third Revised Volume No. 1.

The Company states that copies of the filing have been mailed to each of its Gas Utility customers and to interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP82-71-011]

Northern Natural Gas Co.; Division of InterNorth, Inc.; Changes in F.E.R.C. Gas Tariff

May 19, 1983.

Take notice that Northern Natural Gas Company, Division of InterNorth, Inc. (Northern) on May 6, 1983 tendered for filing changes in its F.E.R.C. Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2. These tariff sheets reflect the settlement of Docket No. RP82-71 in accordance with the Stipulation and Agreement which was approved by Commission order issued April 28, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP83-41-002]

Northwest Pipeline Corp; Change in FERC Gas Tariff

May 19, 1983.

Take notice that on May 13, 1983, Northwest Pipeline Corporation ("Northwest") tendered for filing and acceptance Substitute Ninth Revised Sheet No. 10 as a part of its FERC Gas Tariff First Revised Volume No. 1. The tendered tariff sheet is Northwest's Statement of Rates applicable to service under rate schedules contained in its Volume No. 1 Tariff.

Ninth Revised Sheet No. 10 was filed by Northwest on December 30, 1982 in connection with its proposal to revise its Rate Schedule SGS-1 and was approved by Commission Order dated April 29, 1983 at Docket No. RP83-41-000 to be effective May 1, 1983 subject to modification to reflect Northwest's Purchased Gas Cost Adjustment filing dated February 15, 1983.

On April 15, 1983, Northwest filed Docket No. TA83-3-37 (PGA83-3) to reduce its rates in order to track a decrease in the Canadian border price to be effective April 11, 1983. Therefore, substitute Ninth Revised Sheet No. 10 as filed herewith reflects both the April 1, 1983 and April 15, 1983 Purchase Gas Cost Adjustments.

Northwest requests waiver of Commission regulations in order to permit an effective date of May 1, 1983 with respect to Substitute Ninth Revised Sheet No. 10.

Copies of this filing have been served on all of Northwest's jurisdictional customers and respective state commissions.

Any persons desiring to be heard or protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before May 31, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-505-000]

Alabama Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that on May 10, 1983, Alabama Power Company (Alabama) tendered for filing Eighteenth Revised Sheet No. 38 to its FERC Electric Tariff, Original Volume No. 1. The purpose of this filing is to give notice that effective June 3, 1983, the load normally served from Clarke-Washington Electric Membership Corporation's Dry Forks and Clairborne delivery points will be served from the Camden delivery point. The delivery point will be served at the Company applicable revision to Rate Schedule REA-1 incorporated in FERC Electric Tariff, Original Volume No. 1 of Alabama Power Company.

Copies of the filing were served upon Clarke-Washington Electric Membership Corporation.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 83-14189 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 7114]

Alaska Power Authority; Scoping Session and Public Hearings

May 23, 1983.

The Alaska Power Authority (Applicant) filed on February 28, 1983, an application for license for the Susitna Hydroelectric Project, FERC Project No. 7114, located on the Susitna River approximately 180 miles northeast of Anchorage, Alaska. The proposed project would consist of two major developments: an 885 foot-high earthfill dam and a 645 foot high concrete arch dam forming two reservoirs with a total surface area of 45,800 acres. Two underground powerhouses have a total generating capacity of 1,620 MW.

On April 12, 1983, the Commission's designee found that the application did not conform to the Commission's regulations and requested the Applicant to submit supplemental information on the proposed project. The application, if accepted, would constitute a major federal action significantly affecting the quality of the human environment. As a result, the project would require an environmental impact statement, which would address possible alternatives to to the proposed action.

Scoping Session

Interested persons and agencies are invited to participate in the scoping meeting to discuss the environmental impacts expected from the proposed Susitna Project. The scoping session will be convened by the Commission's staff. The session will be held on June 20, 1983 (9 am–12 am) at the West High School Library, 1700 Hillcrest Drive, Anchorage, Alaska 99503. The purpose of the scoping session is to enable interested persons and agencies to discuss with the Commission staff environmental impacts and other matters that they believe should be included in the environmental impact statement.

Public Hearings

Interested officials and members of the public are invited to express their views about the proposed project in a public hearing. The public hearings will be held as follows:

June 20, 1983, 7 pm–10 pm, West High School Cove Auditorium, 1700 Hillcrest Drive, Anchorage, Alaska 99503

June 21, 1983, 7 pm–10 pm, Susitna Valley High School Library, Mile 98, Parks Highway, Box AB, Palmer, Alaska 99645

June 22, 1983, 7 pm–10 pm, Cantwell Native Council Community Hall, Cantwell, Alaska 99729

June 23, 1983, 7 pm–10 pm, Ryan Junior High, Multipurpose Room, 951 Airport Road, Fairbanks, Alaska 99701.

The public hearings will be conducted by the Commission's staff.

At the public hearings, persons may give their statements orally or in writing. The hearings will be recorded by a stenographer, and all statements (oral and written) will become part of the public files associated with this proceeding. In addition, the public record for these proceedings will remain open until July 15, 1983 and anyone may submit written comments on the project until that time. Comments should be addressed to Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, and should clearly show the project name and number (Project No. 7114) on the first page.

BILLING CODE 6717-01-M

[Docket No. ER83-509-000]

American Electric Power Service Corp.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that American Electric Power Service Corporation (AEP) on behalf of its affiliate Columbus and Southern Ohio Electric Company (CSOE) tendered for filing on May 13, 1983 the following:

Agreement dated May 1, 1983, between City of Westernville, Ohio, and CSOE.

The Agreement sets forth terms pursuant to which CSOE proposes to supply Transmission Service to City of Westernville, Ohio.

AEP requests an effective date of August 1, 1983, and therefore requests waiver of the Commission's notice of requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Take notice that on April 29, 1983, Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Applicant), P.O. Box 21734, Shreveport, Louisiana 71151, Filed in Docket No. CP83-303-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes to construct and operate a

VOL 48 ISS 103 MAY 26 1983 UMI

sales tap and related appurtenant facilities in connection with the retail sale and delivery of gas for consumption in Stuart, Oklahoma, and its evirons, under the authorization issued in Docket Nos. CP82-384-000 and CP82-384-001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant states that it proposes to construct and operate a tap and related jurisdictional facilities at Station 2179 plus 10 on Applicant's Line AD in Section 25, Township 5 North, Range 11 East, Hughes County, Oklahoma. Applicant states that the gas to be deliver by the proposed facilities would be distributed in the town of Stuart, Oklahoma, and its environs. Applicant estimates that the annual requirements of the proposed distribution system would be approximately 45,000 Mcf and that approximately 79 residential customers, eight small commercial customers and one school would initially be connected.

Applicant states that the gas would be delivered from its general system supply and that the proposed connection would have a *de minimis* impact on Applicant's supply. Applicant indicates that the gas sold in the Stuart area would be billed at Applicant's regular retail rates as applicable and effective from time to time to the class of customer. Applicant estimates that the jurisdictional facilities involved in this request would cost $24,050 to install.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14182 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-512-000]

Connecticut Light and Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that on May 16, 1983, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule with respect to a Transmission Agreement dated November 1, 1982 between (1) CL&P, Western Massachusetts Electric Company (WMECO) and Holyoke Water Power Company (HWP, and together with CL&P and WMECO, the NU Companies) and (2) City of Holyoke, Massachusetts Gas and Electric Department (HG&E).

CL&P states that the Transmission Agreement provides for transmission services to HG&E for the wheeling of HG&E's purchase from the Massachusetts Municipal Wholesale Electric Company (MMWEC) of a portion of MMWEC's entitlement obtained from Point Lepreau Unit No. 1 (located in New Brunswick, Canada) during the period commencing on the date Point Lepreau Unit No. 1 achieves commercial operation to October 31, 1987.

CL&P further states that the transmission charge is a monthly rate equal to one-twelfth of the estimated annual average cost of transmission service to the electric transmission system of the NU Companies determined in accordance with Appendix A and Exhibits I, II and III thereto, of the Transmission Agreement. The monthly transmission charge is determined by the product of (i) the transmission charge rate ($/kW-month), and (ii) the number of kilowatts HG&E is entitled to receive during such month. The monthly transmission charge is reduced by 50% to give due recognition for payments made by HG&E to other utility systems also providing related transmission service.

CL&P requests an effective date of February 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been mailed to WMECO, HWP and HG&E.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14193 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-511-000]

Connecticut Light and Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that on May 16, 1983, the Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule change with respect to a transmission service agreement dated March 1, 1983 (Amendment) between (1) CL&P and Western Massachusetts Electric Company (WMECO), (together, the NU Companies) and (2) Town of Wallingford, Department of Public Utilities (Wallingford).

CL&P states that the Amendment provides for changes to a transmission service agreement between the same parties dated as of October 8, 1982 (the Agreement). The requested change modifies the amounts of transmission service provided to Wallingford during the period commencing on March 1, 1983 and terminating on October 31, 1983.

CL&P further states that the transmission charge rate is a monthly rate equal to one-twelfth of the estimated annual average cost of service on the transmission system of the NU Companies. The monthly transmission charge is determined as the product of (i) the appropriate transmission charge rate ($/kW-month), and (ii) the total kilowatts of capacity which Wallingford is entitled to receive in each month pursuant to the Amendment.

CL&P requests and effective date of March 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon WMECO and Wallingford.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14194 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-506-000]

Consumers Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that Consumers Power Company (Consumers) on May 10, 1983, tendered for filing Consumer's Supplemental Agreement No. 4 to the Coordinated Operating Agreement with Wolverine Power Supply Cooperative, Inc., the City of Grand Haven, Michigan, the City of Traverse City, Michigan and the City of Zeeland, Michigan (hereinafter collectively referred to as the MCP members") dated as of January 1, 1982.

Consumers states that the Supplemental Agreement No. 4 (1) adds a new provision in Service Schedule B–Short Term Capacity and Energy which allows either part to sell Short Term Capacity and Energy on a daily as well as a weekly basis, and (2) adds a new Service Schedule E—Non Displacement Energy, which allows either party to buy electric Energy available from surplus capacity on the other party's system for short intervals.

Consumers further states that the extent and use of Daily Short Term Power or Non-Displacement Energy among the parties for the next twelve months is unknown at the present time as this will be scheduled from time to time as load and capacity condititons on either system dictate. Accordingly, it is not possible to estimate the transaction for such period. Since Daily Short Term Power and Non-Displacement Energy have not been provided previously, a comparison cannot be made of the presently effective and proposed rates for the past twelve months as no transaction took place.

Consumers requests an effective date of May 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of filing have been served upon MCP members and on the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary

[FR Doc. 83-14195 Filed 5-25-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER83-407-000 and ER82-751-000]

Delmarva Power & Light Co; Order Accepting for Filing and Suspending Rate Schedules, Consolidating Dockets, Granting Waivers, and Establishing Procedures

Issued: May 20, 1983.

On March 25, 1983, Delmarva Power & Light Company (DP&L) tendered for filing revised rate schedules for service provided to the Cities of Newark, New Castle, and Milford, Delaware, and the Towns of Smyrna, Clayton, and Middletown, Delaware.[1] Also, DP&L's submittal includes executed partial requirements and transmission service agreements for service to the Towns of Clayton and Middletown. DPL requests waiver of notice, an effective date of March 31, 1983, and a one day suspension so that the submittal may become effective, subject to refund, on April 1, 1983. The affected customers concurred in DP&L's requests by letter dated March 24, 1983.

Background

On February 2, 1983, in Docket No. ER–82–751–003, a partial settlement agreement was filed between DP&L and the Cities of Milford, New Castle, Newark, and Smyrna, together with executed partial requirements and transmission service agreements.[2] One provision of the settlement agreement would allow Milford to begin receiving transmission service immediately on the condition that the existing transmission customers reduce their monthly wheeling demands and dedicate such capacity to Milford.

The instant submittal contains the corresponding transmission rate sheets which (1) incorporate Milford as a wheeling customer, (2) reflect Milford wheeling loads, and (3) reflect correspondingly reduced wheeling demands for the existing transmission customers. In addition, the instant submittal contains executed service agreements (identical to those incorporated in the February 2, 1983 settlement agreement) for service to the two remaining DP&L wheeling customers (the Cities of Clayton and Middletown, Delaware) who were not parties to the settlement agreement. DP&L requests that its submittal be consolidated with the proceedings in Docket No. ER82–751–000, since this submittal implements an offer of settlement already subject to Commission review and since the cost support for the revised rates is that filed in Docket No. ER82–751–000.[3]

Notice of the filing was published in the **Federal Register** with responses due on or before April 20, 1983. No comments have been received other than the customers' March 24, 1983 concurrence.

Discussion

Given the fact that the Commission has not yet considered and ruled on the merits of the pending offer of settlement in Docket No. ER82–751–000, we find that DP&L's proposed transmission agreements and service schedules, which implement provisions of the settlement, have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unawful. Accordingly, we shall accept the submittal for filing and suspend it as ordered below.

In explaining the Commisson's suspension policy in *West Texas Utilities Co.*, Docket No. ER–82–23–000, 18 FERC ¶ 61,189, footnote 6 (1982), we noted that the Commission would consider such factors as customer concurrence to a nominal suspension for settlement purposes. The instant filing has been submitted, pursuant to agreement among the parties, to implement certain settlement provisions

[1] *See* Attachment A for rate schedule designations.

[2] The settlement agreement was certified to the Commission by the presiding judge on April 1, 1983.

[3] On March 24, 1983, counsel representing all named parties in Docket No. ER82–751–000 and the Towns of Clayton and Middletown filed a letter supporting the DP&L submittal.

VOL 48 ISS 103 MAY 26 1983 UMI

and to enable Milford to receive a new service. All of the affected customers support not ony a one day suspension but also waiver of notice and an April 1 1983 effective date. We further note that in the underlying docket (ER82–751–000) involving the rates at issue here, we considered a one day suspension appropriate. Under these circumstances, we find that good cause exists to waive the notice requirements and to suspend DP&L's filing for one day, to become effective, subject to refund, on April 1, 1983. In addition, because common questions of law and fact may exist, we shall consolidate Docket No. ER83–407–000 with the proceedings in Docket No. ER82–751–000.

The Commission orders:

(A) DP&L's motion for waiver of the notice and filing requirements is hereby granted.

(B) DP&L's March 25, 1983 submittal is hereby accepted for filing and suspended for one day, to become effective, subject to refund, on April 1, 1983.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 208 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of DP&L's submittals. The rates, terms, and conditions at issue shall be subject to the outcome of the Commission's action on the offer of settlement in Docket No. ER82–751–003.

(D) Docket Nos. ER83–407–000 and ER82–751–000 are hereby consolidated for purposes of hearing and decision.

(E) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment A—Delmarva Power & Light Company Rate Schedule Designations

Docket No. ER82–407–000

Filed: (1), (2), (5–7) and (10–14) March 25, 1983.

Effective: April 1, 1983, Subject to Refund.

Designation	Other party	Description
(1) Rate Schedule FERC No. 84 (Supersedes Rate Schedule FERC No. 54).	Clayton, Delaware	Partial Requirements Service Agreement, Executed: March 14, 1983.

BILLING CODE 6717–01–M

[Docket No. ER83–513–000]

Duke Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that Duke Power Company (Duke Power) tendered for filing on May 16, 1983 a supplement to the Company's Electric Power Contract with Lockhart Power Company. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 252.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following decrease in contract demand: Delivery Point No. 3 from 40,000 KW to 33,000 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of April 19, 1983.

According to Duke Power, copies of this filing were mailed to Lockhart Power Company and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83–514–000]

Duke Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that Duke Power Company (Duke Power) tendered for filing on May 16, 1983 a supplement to the Company's Electric Power Contract with Little River Electric Cooperative, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 145.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following changes in contract demand: Delivery Point No. 6 from 2,600 KW to 1,300 KW and Delivery Point No. 9 is a new delivery of 1,000 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of April 19, 1983 for Delivery Point No. 6 and January 19, 1983 for Delivery Point No. 9.

According to Duke Power, copies of this filing were mailed to Little River Electric Cooperative, Inc., and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83–507–000]

Minnesota Power & Light Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that Minnesota Power & Light Company (Minnesota Power) on May 11, 1983, tendered for filing executed contract supplements relating to rates for electric utility service to the following municipal customers: Cities of Aitkin, Brainerd and Nashwauk, Minnesota.

Under the terms and conditions of the executed supplements, Minnesota Power will guarantee certain limitations on rate increases during the period 1983–1989.

Minnesota Power requests waiver of the Commission's Regulations to the extent necessary to permit the executed agreements to become effective as specified in the various executed supplements.

Copies of the executed supplements have been served upon the above-listed customers and the Minnesota Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. ER83–510–000]

Mississippi Power Co.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that on May 13, 1983, the Mississippi Power Company (Mississippi) tendered for filing Supplement Agreement with Coast Electric Power Association (CEPA) under its FERC Electric Tariff Original Volume No. 1. This agreement provides for the establishment of a new delivery point of CEPA in Hancock County, Mississippi. To establish service at this new point, Mississippi and CEPA have entered into a supplemental agreement under the Company's FERC Electric Tariff Original Volume No. 1 (Second Revised Sheet No. 14).

Mississippi agrees to deliver up to a maximum of 10,000 kilowatts at 115,000 volts at the point where the Company's 115 KV conductors attach to the customer's conductors on the customer's high side structure in substation located in Section 33, T8S, R14W, Hancock, Mississippi.

Mississippi states that this supplement will become effective on or about June 1, 1983, when the required additional facilities will be energized, at which time the existing Bay St. Louis (Supplement No. 4) will be be discontinued. Mississippi has requested the sixty day notice requirement to be waived in order to avoid a delay in rendering service.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Southern Company Services, Inc.; Filing

May 20, 1983.

The filing Company submits the following:

Take notice that Southern Company Services, Inc., on behalf of Alabama Power Company, Georgia Power Company, Gulf Power Company and Mississippi Power Company (Southern Companies), tendered for filing on May 12, 1983, an interchange contract between the City of Tallahassee, Florida (City) and Southern Companies, together with Amendment No. 1 to the interchange contract.

The interchange contract, as amended, between City and Southern Companies is scheduled to become effective upon the establishment of a 230 kV transmission interconnection between their respective systems. Amendment No. 1 to the interchange contract revises the service schedules contained in the original contract, which schedules were never made effective due to delays in the construction of this interconnection. The initial interconnection is now expected to be completed about May 17, 1983, and will enable the parties to engage in the various transactions contemplated under the amended contract.

Southern Companies requests an effective date of August 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 8, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6712-01-M

Telecommunications Industry Advisory Group, Definitions and Rules Subcommittee; Meetings

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of four meetings of the Telecommunications Industry Advisory Group's (TIAG) Definitions and Rules Subcommittee. Each meeting will begin at 9:30 a.m. and will be open to the public. The meeting dates and locations are as follows:

Tuesday, June 14, 1983

MCI Telecommunications Corporation (1st Floor Meeting Room), 1133 19th Street NW., Washington, D.C.

Tuesday, June 28, 1983

AT&T Conference Room A (10th Floor), 1120 20th Street NW., Washington, D.C.

Tuesday, July 12, 1983

Federal Communications Commission, Room 311, 1919 M Street NW., Washington, D.C.

Tuesday, July 26, 1983

AT&T Conference Room A (10th Floor), 1120 20th Street NW., Washington, D.C.

The agenda for each meeting is as follows:

I. General Administrative Matters
II. Review of Minutes of Previous Meeting
III. Discussion of Individual Assignments
IV. Other Business
V. Presentation of Oral Statements
VI. Adjournment

With prior approval of Subcommittee Chairman John Utzinger, oral statements, while not favored or encouraged, may be allowed if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Utzinger (203/965-2830) at least five days prior to the meeting date.

Federal Communication Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

[CC Docket No. 78-371; Transmittal No. 77]

American Telephone and Telegraph Co. and the Bell System Operating Companies; Exchange Network Facilities for Interstate Access (ENFIA); Memorandum Opinion and Order

Adopted May 12, 1983.
Released May 16, 1983.
By the Chief, Common Carrier Bureau.

1. On March 28, 1983, the American Telephone and Telegraph Company (AT&T) on behalf the Bell System Operating Companies (BSOC's) filed under transmittal No. 74 proposed increases in the rates for Exchange Network Facilities for Interstate Access (ENFIA) offered to other Common Carriers (OCCs) in BSOC Tariff F.C.C. No. 8. The increase, filed on 15 days notice, became effective April 16, 1983 after the Bureau denied petitions to reject or suspend. AT&T, CC 3635, released April 15, 1983. The BSOCs now propose a further increase in ENFIA rates, in tariff material filed with the above-captioned transmittal on April 28, 1983 to become effective May 13, 1983. They contend that this increase is warranted because the methodology for calculating minutes of use per ENFIA line employed in the March 28 tariff filing was based on that adopted in the Commission's *Investigation Order*, FCC 82-431, released September 29, 1982 [1] and this methodology was modified by the Commission in its *Reconsideration Order*, FCC 83-125, released April 5, 1983 during the notice period for the March 28 filing. The minutes of use and the rates in the present transmittal are claimed to be based on the methodology in the *Reconsideration Order*. Applying this methodology results in an increase in the billed minutes of use from 5236 to 5435, and an increase in the overall rate for ENFIA Rate elements 2 and 3 from $217.64 to $225.77. The present filing also "replaces and supersedes those rates effective under Transmittal No. 74 as fully as if originally filed to be effective on April 16, 1983." In other words, the tariff revisions seek to give the present increase retroactive effect from April 16, 27 days before the tariff material would become effective on May 13.

2. Southern Pacific Communications Company (SPCC) filed a petition to reject or suspend, but its petition does not question the accuracy of AT&T's calculations or its conformity with the methodology approved by the Commission in the *Reconsideration Order*. SPCC claims only that this additional increase represents rate churning which is inconsistent with the public interest and that the higher rate will unjustly disadvantage the OCCs who use ENFIA sevice. Such agruments have already been considered and rejected by the Commission. [2] Since AT&Ts proposed increase appears to conform to the ENFIA methodology approved in the *Reconsideraton Order*, SPCC's petition raises no issue warranting rejection or suspension and investigation.

3. However, we nevertheless must conclude that the filing is unlawful because it seeks to make this increase retroactive to April 16. The rates in effect from April 16 to date have been those specified in the ENFIA tariff. Under Section 203(c) of the Communications Act, 47 USC § 203(c) "no carrier shall (1) charge, demand, collect, or receive a greater or less or different compensation . . . than the charges specified in the schedule then in effect." A carrier is not entitled to increase rates retroactively, regardless of whether the higher rate would have been found just and reasonable had it been filed. AT&T stated in its March 28 filing that those tariff revisions were filed subject to appropriate redetermination of minutes of use and rates in light of the *Reconsideration Order*, but that statement has no legal effect.[3]

4. Accordingly, it is ordered, pursuant to authority delegated to the Chief, Common Carrier Bureau under Section 0.291 of the Commission's Rules, 47 CFR 0.291, That the tariff material filed by AT&T on behalf of the BSOCs under Transmittal No. 77 is rejected.

5. It is further ordered, That the petition to reject or suspend and investigate filed by SPCC is granted to the extent indicated herein but is otherwise denied.

Federal Communications Commission

Gary M. Epstein,

Chief, Common Carrier Bureau.

BILLING CODE 6712-01-M

[1] Review pending, MCI Telecommunications Corp. v. FCC, D.C. Cir. Nos. 82-1553, et al. (Appeals consolidated Nov. 8 and Dec. 8, 1982).

[2] Extension of ENFIA Agreement, 90 FCC 2d 6 (1982). Investigation Order, Reconsideration Order.

[3] Transcontinental and Western Air, Inc., v. C.A.B., 336 U.S.601 (1949). The commission may make rates retroactive to the date of commencement of a rate-making proceeding in some circumstances by adopting an interim billing and collection rate, subject to later adjustment after investigation. Lincoln Telephone and Telegraph Company, 72 FCC 2d 724 (1979), aff'd. 659 F.2d 1092 (D.C. Cir. 1981). The Commission imposed such an arrangement at the beginning of the ENFIA investigation last year, but no such proceeding or order was undertaken for the March 28 filing.

FEDERAL MARITIME COMMISSION

Agreement Filed

The Federal Maritime Commission hereby gives notice that the following Agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of the Agreement and the supporting statement at the Washington, D.C Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit protests or comments on the Agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending Agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the Agreement at the address shown below.

VOL 48 ISS 103 MAY 26 1983 UMI

Agreement No.: T–4121.
Title: Tampa Port Authority/Garrison Terminals, Inc. Lease.
Parties: Tampa Port Authority (TPA)/ Garrison Terminals, Inc. Trans-Florida Warehouse Corporation (Garrison).
Synopsis: Agreement No. T–4121, provides for the lease to Garrison on an exclusive basis of certain warehouse and bare land in the vicinity of Berth 202 in the Port of Tampa. The premises will be used as a marine terminal operation and activities incidental to such operations. Garrison will pay rental, as mutually agreed and dockage and wharfage in accordance with port tariff. Garrison will receive annual non-cumulative credit against bare land rental for all wharfage payments to TPA in excess of $25,000 per lease year. Garrison will also receive non-exclusive preferencial berthing rights at Berth 202. The basic term of the Agreement is on (1) year with options for extension periods of one (1) year and six (6) months, with provisions for appropriately notifying FMC of such extensions.
Filing agent: Harold E. Welch, Director of Traffic, Tampa Port Authority, P.O. Box 2192, Tampa, Florida 33601.

By Order of the Federal Maritime Commission.
Dated: May 23, 1983.

Burlington Industries, Inc. v. Dart Containerline Co., Ltd.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Burlington Industries, Inc. against Dart Containerline Co., Ltd. was served May 17, 1983. Complainant alleges that respondent has subjected it to payment of rates for ocean transportation in violation of sections 16 and 17 of the Shipping Act, 1916.
This proceeding has been assigned to Administrative Law Judge John E. Cograve. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies; General Bancshares Corp. et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).
Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.
A. Board of Governors of the Federal Reserve System (William W. Wiles, Secretary) Washington, D.C. 20551:
1. *General Bancshares Corporation,* St. Louis, Missouri; to acquire 100 percent of the voting shares or assets of Security Bank & Trust Co., Mt. Vernon, Illinois. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of St. Louis. Comments on this application must be received not later than June 20, 1983.
2. *Walter E. Heller International Corporation,* Chicago, Illinois, and American National Corporation, Chicago, Illinois; to acquire 100 percent of the voting shares or assets of First American Bank of Bensenville, Bensenville, Illinois. The applications may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Chicago. Comments on this application must be received not later than June 20, 1983.

Board of Governors of the Federal Reserve System, May 20, 1983.
James McAfee,
Associate Secretary of the Board.

BILLING CODE 6210–01–M

Bank Holding Companies; Proposed De Novo Nonbank Activities; First Railroad & Banking Co. of Georgia, et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.
With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.
The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.
A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street NW., Atlanta, Georgia 30303:
1. *First Railroad & Banking Company of Georgia,* Augusta, Georgia (finance and insurance activities; Tennessee): To engage *de novo* through its subsidiary, CMC Group, Inc., Charlotte, North Carolina, in the following activities: making or acquired for its own account or the account of others, loans and other extensions of credit such as would be made by a mortgage finance, or factoring company; to underwrite credit life and accident and health insurance; and to sell as agent, property insurance in connection with its loan and installment sales contracts. Such insurance activities are permissible under section 610 (A), (B) and (D) of the Garn-St Germain Depository Institutions Act of 1982. These activities will be conducted from an office in Greenville, Tennessee, serving Greene County. Comments on this application must be received not later than June 16, 1983.
B. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:
1. *BankAmerica Corporation,* San Francisco, California (financing, servicing, and insurance activities; expansion of geographic scope; Colorado): To continue to engage, through its indirect subsidiary, FinanceAmerica Corporation, a Colorado corporation, in the activities of making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company; servicing loans and other extensions of credit; and offering credit-related life insurance and credit-related accident and health insurance. Credit-related property insurance will not be offered. Such activities will include, but not be limited to, making consumer installment loans, purchasing installment sales finance contracts, making loans and other extensions of credit to businesses, making loans and other extensions of credit secured by real and personal property, and offering credit-related life and credit-related accident and health insurance directly related to extensions of credit made or acquired by FinanceAmerica Corporation. Credit-related life and credit-related accident and health insurance may be reinsured by BA Insurance Company, Inc., an affiliate of FinanceAmerica Corporation. These activities will be conducted from an existing office located in Englewood, Colorado, serving the entire State of Colorado. Comments on this application must be received not later than June 20, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.
James McAfee,
Associate Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPMR A-83]

Conference Location Selection Model; Availability

The Office of Federal Supply and Services issued on April 1, 1983, GSA Bulletin FPMR A-83, Conference Location Selection Model.

This bulletin announces the General Services Administration's (GSA) computerized conference location selection model that is available to Federal agencies. Agencies may obtain from GSA cost comparisons based on travel and per diem costs to determine the most cost advantageous location for conducting meetings, seminars, training sessions, or conferences. Use of the model will provide agencies with a means of reducing travel expenses associated with meetings, seminars, training sessions, or conferences that have attendees or travelers originating from multiple locations, with various per diem requirements and travel conditions.

Agencies should contact their agency headquarters publications liaison officer regarding receipt of copies.

Dated: May 16, 1983.

L. L. Mitchell,

Assistant Administrator for Federal Supply and Services.

BILLING CODE 6820-AM-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Preliminary Application Announcement, Proposed Funding Preferences and Grant Orientation Conferences for the Health Careers Opportunity Program

The Bureau of Health Professions, Health Resources and Services Administration, announces that applications for Fiscal Year 1984 Health Careers Opportunity Program (HCOP) grants will be accepted under the authority of Section 787 of the Public Health Service Act, after publication of final funding preferences.

Section 787 authorizes the Secretary to make grants to schools of medicine, osteopathy, public health, dentistry, veterinary medicine, optometry, pharmacy, podiatry and allied health and other public or private nonprofit health or educational entities to carry out programs which assist individuals from disadvantaged backgrounds to enter and graduate from health professions schools. The assistance authorized by this section includes identification and recruitment, retention, counseling and advice on financial aid.

For this program, an "individual from a disadvantaged background" means an individual who (a) comes from an environment that has inhibited the individual from obtaining the knowledge, skills and abilities required to enroll in and graduate from a health professions school or from a program providing education or training in an allied health profession or (b) comes from a family with an annual income below a level based on low income thresholds according to family size, published by the U.S. Bureau of the Census, adjusted annually for changes in the Consumer Price Index and adjusted by the Secretary for use in all health professions programs, 42 CFR 57.1804(b)(2).

The following income figures determine what constitutes a low income family for purposes of these Health Careers Opportunity Program grants for Fiscal Year 1984:

Size of parents' family [1]	Income level [2]
1	6,500
2	8,400
3	10,000
4	12,800
5	15,100
6 or more	17,100

[1] Includes only dependents listed on Federal income tax forms.

[2] Adjusted gross income for calendar year 1982, rounded to $100.

Based on the President's budget request and projected commitments for currently active projects requiring continued support, an estimated $16 million will be available for competitive HCOP awards in Fiscal Year 1984. This amount may be changed by final action on the Fiscal Year 1984 appropriation.

At least 80 percent of the funds appropriated in any fiscal year must be obligated for grants or contracts to institutions of higher education. Also, no more than five percent of the funds appropriated in any fiscal year can be awarded to projects having information dissemination as their primary purpose.

To receive support, applicants must meet the requirements of the program regulations which are located at Title 42 of the Code of Federal Regulations, Part 57, Subpart S. We refer you to these regulations for a more complete list of definitions and descriptions of program purposes.

Application materials will not be available until the final funding preferences are published in the **Federal Register.**

To obtain specific information regarding the programmatic aspects of this grant program, direct inquiries to: Mr. Arthur Testoff, Chief, Program Coordination Branch, Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8A-09, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443-4493.

To be considered for Fiscal Year 1984 funding, applications sent by mail must be postmarked no later than November 4, 1983, and received no later than November 11, 1983. Materials postmarked after November 4 will not be included in the review process. The term "postmarked" means a printed, stamped, or otherwise placed impression exclusive of a postage meter machine impression, that is readily identifiable as having been affixed on the date of mailing by an employee of the U.S. Postal Service. All hand delivered applications must be received by November 4.

This program is listed at 13.822 in the *Catalog of Federal Domestic Assistance.* Applications submitted in response to this announcement are not subject to review by State and areawide clearinghouses under the procedures in Office of Management and Budget Circular No. A-95.

Proposed Funding Preferences

The Division of Disadvantaged Assistance proposes to establish five preferences for funding approved applications in Fiscal Year. These preferences are proposed to achieve the programmatic objectives of improving academic competitiveness; increasing the number of individuals from disadvantaged backgrounds applying to, accepted by, and graduating from a health or allied health professions school; and fostering the development of educational pathways providing continuity of support to such students as they progress along the educational continuum. The five preferences, however, do not preclude funding of other eligible approved applications as appropriations permit. Therefore, entities which do not qualify for the preferences are also invited to submit applications.

As used in these funding preferences: "Health Professions Schools" means schools of medicine, dentistry, osteopathy, pharmacy, optometry, veterinary medicine, podiatry, public health, or graduate programs in health administration, as defined in Section 701(4) of the Public Health Service Act.

"Training Center for Allied Health Professions" means a junior college, or college, or university, as defined in Section 795 of the Public Health Service Act, which:

a. Provides educational programs leading to an associate, baccalaureate, or higher degree needed to practice as one of the following:

Doctoral Degree:
Clinical Psychologist
Master's Degree:
Speech Pathologist/Audiologist
Bachelor's Degree:
Dental Hygienist
Dietitian (Coordinated undergraduate program)
Community Health Educator
Health Services Administrator
Medical Records Administrator
Medical Technologist
Occupational Therapist
Physical Therapist
Primary Care Physician Assistant
Sanitarian (Environmental Health)
Associate Degree:
Clinical Dietetic Technician
Cytotechnologist
Dental Assistant
Dental Hygienist
Dental Laboratroy Technician
Medical Assistant
Medical Laboratory Technician
Medical Records Technician
Occupational Therapy Assistant
Ophthalmic Medical Assistant
Optometric Technician
Physical Therapy Assistant
Radiologic Technologist
Respiratory Therapist
Sanitarian Technician.

b. Provides training for no fewer than 20 persons in the substantive health portion, including clinical experience as required for employment, in three or more of the disciplines listed in paragraph (a) of this definition and has a minimum of six full-time students in that portion of each curriculum by October 15 of the fiscal yerar of application.

c. Has a teaching hospital as part of the grantee institution or is affiliated with a teaching hospital by means of a formal written agreement. The term "teaching hospital" includes other settings which provide clinical or other health services if they fulfill the requirement for clinical experience specified in an allied health curriculum.

"Feeder institution" means an institution of higher education meeting the requirements of Section 435 of the Higher Education Act, as amended, Pub. L. 89-239 (20 U.S.C. 1085 (b)), which:

a. Has a student body more than twenty percent of which are individuals from disadvantaged backgrounds; and

b. Has ten or more graduates annually (as averaged over the last three years) who are disadvantaged and who are accepted into health professions schools.

"Educational Assistance Agreement (EAA)" means a formal agreement between the grantee and another school or entity to assure continuity of training through health or allied health professions schools. This agreement must provide for financial or other support (excluding direct student aid) for this purpose and support may include funds from the grant awarded under this program, also joint use of facility, staff, and faculties. An EAA must:

a. Contain the names of the participating institutions;

b. Identify the prime grantee, subcontractors, and other participating institutions;

c. State the HCOP purposes addressed by each participating institution;

d. Identify the specific activities to be performed by the grantee, including a description of program activities and administrative responsibilities;

e. Identify the specific activities to be performed by all collaborating institutions, including a description of program activities;

f. Contain a detailed description of proposed expenditures for each participating institution;

g. Contain a description of how facilities, faculty, and staff will be shared, including times, places, and dates;

h. State the duration of the EAA;

i. Contain the terms for amending the EAA; and

j. Be signed by the President, Chancellor, Dean, or equivalent official from all participating institutions and health or educational entities.

It is proposed that an applicant may request consideration in one of the following five funding preferences:

(1) Health professions school(s) which have EAAs with one or more feeder institution(s) and who are requesting HCOP suppport only for:

a. The feeder institution(s) to provide individuals from disadvantaged backgrounds with preliminary education; and

b. Either the school or the institution to facilitate the entry of individuals from disadvantaged backgrounds into health professions schools; and

c. The health professions school(s) to provide individuals from disadvantaged backgrounds who are enrolled in their

VOL 48 ISS 103 MAY 26 1983 UMI

institution(s) with counseling or other retention services.

(2) A feeder institution requesting HCOP support only for:

a. Providing individuals from disadvantaged backgrounds with preliminary education; and

b. Facilitating the entry of individuals from disadvantaged backgrounds into health professions schools.

(3) A Health professions school requesting HCOP support only for:

a. Facilitating the entry of individuals from disadvantaged backgrounds into its health professions school; and

b. Providing its students who are individuals from disadvantaged backgrounds with counseling or other retention services.

(4) A joint application from two to five institutions of higher education, which as a group: (1) has a student body more than twenty percent of which are individuals from disadvantaged backgrounds; (2) has twenty or more graduates annually (as averaged over the last three years) who are disadvantaged individuals and who are accepted into health professions schools; and (3) is requesting HCOP support only for:

a. Providing individuals from disadvantaged backgrounds with preliminary education; and

b. Facilitating the entry of individuals from disadvantaged backgrounds into health professions schools.

(5) A training center for allied health professions requesting HCOP support only for:

a. Facilitating the entry of individuals from disadvantaged backgrounds into allied health training centers; and

b. Providing its students who are individuals from disadvantaged backgrounds with counseling or other retention services.

Greatest weight will be given to applicants in funding preference Number 1, decreasing, respectively, to funding preference Number 5.

The applicant must indicate on the upper right-hand corner of page one of the application the funding preference in which the applicant wishes consideration. However, the final funding preference category determination will be based upon a staff assessment of the contents of the proposal. An applicant may apply for consideration under only one preference. An institution which is identified in an EAA may not apply as a primary grantee to support the same type of HCOP activities.

Interested persons are invited to submit written comments on these proposed funding preferences to the Director, Division of Disadvantaged Assistance, Bureau of Health Professions, at the address given below. All comments received not later than June 27, 1983 will be considered before final funding preferences for Fiscal Year 1984 are established. Normally, this comment period would be 60 days. However, due to the need to implement any changes in funding preferences for the 1984 grant award cycle, this comment period has been reduced to 30 days. After the close of the comment period, the final funding preferences will be published as a notice in the **Federal Register.**

Written comments should be addressed to: Director, Division of Disadvantaged Assistance, Bureau of Health Professions, H.R.S.A., Parklawn Building, Room 8A–09, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Program Coordination Branch, Division of Disadvantaged Assistance, at the above address weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5:00 p.m.

Grant Orientation Conferences

Grant applications and program information for the Health Careers Opportunity Program also will be provided through four program orientation conferences. The conferences, scheduled during September of 1983, are for the benefit of interested potential applicants.

Each of the four conferences will be held for two days as indicated at the following locations:

September 12–13, 1983—New Orleans, LA

September 15–16, 1983—Baltimore, MD

September 19–20, 1983—Kansas City, MO

September 22–23, 1983—Reno, NV.

To obtain specific information regarding the conferences and programmatic aspects of this grant program, direct inquiries to: Mr. Arthur Testoff, Chief, Program Coordination Branch, Division of Disadvantaged Assistance, Bureau of Health Professions, H.R.S.A., Parklawn Building, Room 8A–09, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–4493.

Dated: May 19, 1983.

Robert Graham,

Administrator, Assistant Surgeon General.

BILLING CODE 4140–01–M

National Institute of Allergy and Infectious Diseases; Meetings

Pursuant to Pub. L. 92–462, notice is hereby given of the meetings of committees of the National Institute of Allergy and Infectious Diseases for June 1983.

These meetings will be open to the public to discuss administrative details relating to committee business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with provisions set forth in Section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and Section 10(d) of Pub. L. 92–463, for the review, discussion, and evaluation of individual grant applications and contract proposals. These applications and proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications and proposal, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Nancy Brun, Office of Research Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, Room 7A–32, National Institutes of Health, Bethesda, Maryland 20205, telephone (301) 496–5717, will provide summaries of the meetings and rosters of the committee members.

Substantative program information may be obtained from each executive secretary whose name, room number, and telephone number are listed below each committee.

Name of committee: Allergy and Clinical Immunology Subcommittee of the Allergy, Immunology, and Transplantation Research Committee.

Executive secretary: Dr. Nirmal Das, Room 706, Westwood Building Telephone: (301) 496–7966.

Date of meeting: June 14, 1983.

Place of meeting: Holiday Inn, Bethesda, Maryland.

Open: June 14, 1983, 9:00 a.m.–10:00 a.m.

Closed: June 14, 1983, 10:00 a.m.–adjournment.

Name of committee: Transplantation Biology and Immunology Subcommittee of the Allergy, Immunology, and Transplantation Research Committee.

Executive secretary: Dr. Nirmal Das, Room 706, Westwood Building Telephone: (301) 496–7966.

Date of meeting: June 15, 1983.

Place of meeting: Holiday Inn, Bethesda, Maryland.

Open: June 15, 1983, 9:00 a.m.–10:00 a.m.

Closed: June 15, 1983, 10:00 a.m.–adjournment.

Name of committee: Microbiology and Infectious Diseases Advisory Committee.

Executive secretary: Dr. Susan B. Spring, Room 706, Westwood Building Telephone: (301) 496–7465.

Dates of meeting: June 9–10, 1983.

Place of meeting: Holiday Inn, Bethesda, Maryland.

Open: June 10, 1983, 8:30 a.m.–9:15 a.m.

Closed: June 9, 1983, 8:30 a.m.–6:00 p.m. June 10, 1983, 9:15 a.m.–12:30 p.m.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[C–0124534]

Colorado; Proposed Withdrawal and Reservation of Lands

The U.S. Army Corps of Engineers has filed application C–0124534, for the withdrawal of the following described public land from settlement, sale, location or entry under the public land laws, including the mining laws (30 U.S.C., Ch. 2), but not from leasing under the mineral leasing laws, subject to valid existing rights:

Sixth Principal Meridian

T. 30 S., R. 59 W.,
Sec. 6, lot 4;
Sec. 31, lot 2.
T. 30 S., R. 60 W.,
Sec. 8, N½;
Sec. 10 N½;
Sec. 12, S½;
Sec. 13, N½;
Sec. 21, N½N½;
Sec. 22, NW¼;
Sec. 25, NE¼NE¼, S½NE¼, SE¼SW¼, and SE¼;
Sec. 26, N½NW¼;
Sec. 29, N½NE¼;
Sec. 33, S½NE¼, S½SW¼, and SE¼;
Sec. 35, SE¼SE¼.

The area described aggregates approximately 2,517 acres in Las Animas County.

The Department of the Army desires that this land be withdrawn as the Fort Carson Maneuver Area, Pinon Canyon Site for exclusive use by the military for maneuver training.

Effective on the date of publication of this notice, the above-described lands shall be segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. The segregative effect of this proposed withdrawal shall continue for a period of two years, unless sooner terminated by administrative action and publication in the **Federal Register.** Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation.

The Department of the Interior's regulations provide that the authorized officer of the BLM will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of assuring that the area sought is the minimum essential to meet the applicant's needs, providing for the maximum concurrent utilization of the lands for purposes other than the applicant's, and reaching agreement on the concurrent management of the lands and their resources.

This withdrawal will be authorized under the Act of February 28, 1958, (43 U.S.C. 155–158) and requires legislative action by Congress.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal. Any persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the State Director, at the address shown below, within 90 days of publication date. If a hearing is scheduled, notice of public hearing will be published in the **Federal Register** giving the time and place of such hearing. The public hearing will be scheduled and conducted in accordance with BLM Manual, Sec. 2351.16B.

All communications in connection with this proposed withdrawal should be addressed to the State Director, Colorado State Office, Bureau of Land Management, 1037–20th Street, Denver, Colorado 80202.

Robert D. Dinsmore,

Chief, Branch of Lands and Minerals Operations.

May 20, 1983.

BILLING CODE 4310–84–M

Fairbanks District Advisory Council Meeting

The Advisory Council for the Fairbanks District of the Bureau of Land Management will have a general meeting June 23–24, 1983 to discuss the White Mountains National Recreation Area and the Steese National Conservation Area.

At 7 a.m. on June 23rd, the Council will depart from the Fairbanks District Office by plane for an aerial survey of the White Mountains National Recreation Area and the Steese

VOL 48 ISS 103 MAY 26 1983 UMI

National Conservation Area. The Council will receive public comments on agenda items from 1 p.m. to 4 p.m. on June 23rd, in the Arctic Circle Hot Springs Resort conference room. The Council will return to Fairbanks by bus on June 24th.

Topics for discussion will include:

1. Recreational opportunities.
2. Mineral development.
3. Access.
4. Wildlife habitat.
5. The Birch and Beaver Creek Wild Rivers.

All meetings and activities of the Council are open to the public.

Donald E. Runberg,

Acting, District Manager.

BILLING CODE 4310-84-M

[Serial No. I-17736]

Idaho; Conveyance of Public Lands, Bear Lake County

May 20, 1983.

Notice is hereby given that pursuant to the Act of October 21, 1976 (90 Stat. 2750; 43 U.S.C. 1713), a patent was issued to Forty-Six Company, Inc., for the following-described public land:

Boise Meridian, Idaho

T. 16 S., R. 45 E.
Sec. 23, W½SE¼.
Containing 80 acres.

The purpose of this notice is to inform the public and interested State and local governmental officials of the conveyance.

Louis B. Bellesi,

Deputy State Director for Operations.

[FR Doc. 83-14106 Filed 5-25-83; 8:45 am]

BILLING CODE 4310-84-M

[Coal Lease Applications ES 30490 and ES 30967]

Knott County, Ky.; Public Hearing and Availability of Environmental Assessment

The Department of the Interior, Bureau of Land Management, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, hereby gives notice that a public hearing will be held on June 28, 1983, at 10 a.m., in the Eastern States Office Public Room. Application has been made to the United States that it offer for lease certain coal resources in the public lands hereinafter described. The purpose of the hearing is to obtain public comments on the Environmental Assessment prepared and on the following items.

1. The method of mining to be employed to obtain maximum economic recovery of the coal;
2. The impact that mining the coal in the proposed leasehold may have on the area including but not limited to impacts on the environment; and
3. Methods of determining the fair market value of the coal to be offered.

Written requests to testify orally at the June 28, 1983, public hearing should be received at the Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, prior to the close of business at 4 p.m. on June 27, 1983. People who indicate they wish to testify when they check in at the hearing room may have an opportunity to testify if time is available after the listed witnesses have been heard.

Both oral and written comments will be received at the public hearings, but speakers will be limited to a maximum of 10 minuntes each depending on the number of persons desiring to comment. The time limitation will be strictly enforced, but the complete text of prepared speeches may be filed with the presiding officer at the hearing, whether or not the speaker has been able to finish oral delivery in the allotted minutes. Written comments may also be submitted to the Eastern States Office, at the above address, prior to close of business on June 27, 1983. Substantive comments, whether written or oral, will receive equal consideration prior to any lease offering.

In addition, the public is invited to submit written comments concerning the fair market value of the coal resource to the Bureau of Land Management. Public comments will be utilized in establishing fair market value for the coal resources in the described lands.

Comments should address specific factors related to fair market value including, but not limited to: The quantity and quality of the coal resources, the price that the mined coal would bring in the market place, the cost of producing the coal, the probable timing and rate of production, the interest rate at which anticipated income streams would be discounted, depreciation and other accounting factors, the expected rate of industry return, the value of the surface estate (if private surface), and the mining method or methods which would achieve maximum economic recovery of the coal. Documentation of similar market transactions, including location, terms and conditions, may also be submitted at this time.

These comments will be considered in the final determination of fair market value as determined in accordance with 30 CFR 211.63 and 43 CFR 3422.12. Should any information submitted as comments be considered to be proprietary by the commentor, the information should be labeled as such and stated in the first page of the submission. Comments should be sent to the Eastern States Director, Bureau of Land Management, 350 South Picket Street, Alexandria, Virginia 22304.

Application ES 30490, 196.15 Acres

The coal resource to be offered is to be mined underground from the Fire Clay seam within three Corps of Engineers tracts (#457, #458 and #5M (#461)) which is within the Amburgey Undefined Known Recoverable Coal Resource Area, Knott County, Kentucky, northeast of the confluence of Irishman Creek and Carr Fork Lake. The metes and bounds description is available at the Eastern States Office at the address set out above, and;

Application ES 30967, 179.30 Acres

The coal resource to be offered is to be mined underground from the Fire Clay seam within Corps of Engineers tracts #457 and #458 which is within the Amburgey Undefined Known Recoverable Coal Resource Area, Knott County, Kentucky, northeast of the confluence of Irishman Creek and Carr Fork Lake. The metes and bounds description is available at the Eastern States Office at the address set out above.

The draft Environmental Assessment will be available for review in the Eastern States Office, Bureau of Land Management, at the above address. Single copies are available for distribution upon request from the Alexandria office.

A copy of the Environmental Assessment, the case file and the comments submitted by the public on fair market value, except those stated in the Freedom of Information Act, will be available for public inspection at the Eastern States Office, Bureau of Land Management, at the address set out above.

We have found that the Hazard #4 (Fire Clay) coal within these three tracts have met the criteria used to establish mineability of coal in the area. These criteria are as follows:

1. A minimum seam thickness of 28 inches clean coal;
2. A parting fraction of 20 percent or less of the seam thickness;
3. A maximum depth of 1000 feet and a minimum depth of 40 feet; and
4. Minimum quality standards (as received):
   a. Moisture (%)—5.0.
   b. Fixed Carbon (%)—54.0.
   c. Ash (%)—12.5.
   d. Sulfur (%)—1.0.
   e. Btu/lb.—12,500.

The area is part of the Hazard District of the eastern Kentucky Coal Field, and is underlain with rock of Lower and Middle Pennsylvanian age. The beds are essentially flatlying (less than 1° dip west). The rock strata within the tracts are described by Danilchik (1976) as being part of the Breathitt Formation. Approximately 800 feet of section is exposed in the area. The Fire Clay seam outcrops at around 1,170 feet and has a maximum of 550 feet to cover. Clean coal thickness ranges from 28 to 42 inches, with a parting thickness of 2.5 to 9 inches. Averaged quality for the Fire Clay coal (without parting) is as follows:

1. Moisture (%)—4.01.
2. Ash (%)—12.19.
3. Sulfur (%)—0.69.
4. Btu/lb.—12,520.

Pieter J. VanZanden,

Associate Director, Eastern States Office.

BILLING CODE 4310-84-M

[M 16402]

North Dakota; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub. L. 97-451, Tenneco Oil Company petitioned for reinstatment of oil and gas lease M 16402 covering the following described lands located in Billings County, North Dakota:

T 144 N., R. 101 W., 5th P.M.
Sec. 31, Lots 1, 2, 3, 4, E½W½
Sec. 33, S½N½, N½SW¼, SE¼SW¼, W½SE¼.
659.68 acres.

It has been shown to my satisfaction that failure to make timely payment of rental was due to inadvertence.

No valid lease has been issued affecting the lands. Payment of back rentals and royalties has been made. Administrative cost of $500 has been paid. Future rentals shall be at the rate of $5 per acre per year, and future royalties shall be at the rate of 16⅔ percent. Reimbusement for cost of publication of this notice shall be paid by lessee.

Reinstatement of the lease will be effective as of the date of termination, October 1, 1980, extended for a two year period under 43 CFR 3107.2, and so long thereafter as oil or gas is produced in paying quantities.

Dated: May 19, 1983.

Cynthia L. Embretson,

Supvr. Land Law Examiner, Branch of Fluid Minerals.

[FR Doc. 83-14108 Filed 5-25-83; 8:45 am]

BILLING CODE 4310-84-M

[NM 56990]

New Mexico; Proposed Withdrawal and Reservation of Lands

May 20, 1983.

The Bureau of Reclamation, Department of the Interior, on May 18, 1983, filed application NM 56990 for the withdrawal of the following described lands from settlement, sale, location, or entry under all of the general land laws, including but not limited to the general mining and leasing laws and the Geothermal Steam Act of 1970, subject to valid existing rights:

New Mexico Principal Meridian

T. 21 S., R. 24 E.,
Sec. 25, E½;
T 21 S., R. 25 E.,
Sec. 30, Lots 5, 6, 7, and 8.

The area described contains approximately 488.10 acres of public lands, more or less, in Eddy County, New Mexico.

The applicant agency desires that the land be withdrawn and reserved for use of the Bureau of Reclamation for the purpose of the Brantley Project, the Little Walt Canyon site is the only location in the area that will provide satisfactory riprap material required to protect the upstream face of the Brantley Dam.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal. All interested persons who desire a public hearing for the purpose of being heard on the proposed withdrawal must submit a written request to the State Director, Bureau of Land Management, New Mexico State Office, P.O. Box 1449, Santa Fe, NM 87501, within 90 days from the date of publication of this notice. Upon determination by the State Director that a public hearing will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the hearing. The public hearing will be scheduled and conducted in accordance with BLM Manual, Sec. 2351.16B.

The Department of the Interior's regulations provide that the authorized officer of the BLM will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of assuring that the area sought is the minimum essential to meet the applicant's needs, providing for the maximum concurrent utilization of the lands for purposes other than the applicant's, and reaching agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior who will determine whether or not the lands will be withdrawn and reserved as requested by the applicant agency. The determination of the Secretary of the application will be published in the **Federal Register**. The Secretary's determination shall, in a proper case, be subject to the provisions of section 204(c) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2752.

Effective on the date of publication of this notice, the above-described lands shall be segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected would prevent any form of disposal or appropriation under such laws. The segregative effect of this proposed withdrawal shall continue for a period of 2 years, unless sooner terminated by action of the Secretary of the Interior. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. If the withdrawal is approved, the segregation will continue for the duration of the withdrawal.

All communications (except for public hearing requests) in connection with this proposed withdrawal should be addressed to the Deputy State Director, Operations, Bureau of Land Management, New Mexico State Office, P.O. Box 1449, Santa Fe, NM 87501.

Fred L. Waskowiak,

Acting Deputy State Director, Operations.

May 20, 1983.

BILLING CODE 4310-84-M

Research Natural Area Designation—Unsweep Seep

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of designation.

SUMMARY: Public lands within the Unaweep Seep Area are designated a Research Natural Area under authority of 43 CFR Part 8223. the designated area contains *36* acres located in Mesa County, Colorado and described as:

T .15 S., R. 103 W., 6th P.M.
Sec. 3, E½SE¼SW¼ (a portion of) E½SE¼ (a portion of) SW¼SE¼ (a portion)

The primary objective on the Unaweep Seep Area is to maintain the unique hillside spring exosystem, and the vegetative complex necessary for the well being of the Great Basin Silverspot Butterfly (*Speyeria nokomis*). The Unaweep Seep Area was originally recommended for Research Natural Area designation in the Whitewater Management Framework Plan approved in 1977. The Unaweep Seep Habitat Management Plan approved on January 1, 1983 establishes the overriding management direction for the property.

Scientific research, environmental education and day use are allowable uses so long as these uses are compatible with maintaining the natural qualities present on the area. The District under authority of CSO–150 Memorandum of Understanding intends to enter into agreement with the Colorado Natural Areas Program to designate this site as a natural area as part of the Colorado Natural Areas System.

Removal of wood products, overnight camping, surface occupancy for oil and gas exploration, and motorized vehicle use will not be authorized on the area.

The area has not been withdrawn from mineral entry and until such time as the area may be withdrawn, surface disturbance due to mineral entry will be regulated under 43 CFR Subpart 3809.

Formal closure to off-road vehicle use under 43 CFR Part 8342 is not anticipated until the next plan update is completed for the area (ca, 1985).

Compatible use on the area include hunting and fishing in accordance to state regulations and livestock grazing as authorized by the Bureau.

FOR FURTHER INFORMATION CONTACT: Mac Berta, Area Manager, Bureau of Land Management, Grand Junction District Office, 764 Horizon Drive, Grand Junction, CO 81501.

Dick Freel,
Associate District Manager.

BILLING CODE 4310-84-M

[I-20088]

Public Land Sale/MFP Amendment

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action—Public Sale, Cassia County, Notice of Intent to Amend Cassia County Management Framework Plan (MFP).

Notice is hereby given that the BLM is proposing to amend the Cassia County MFP to allow for disposal through public sale of 39.52 acres of public land. Specifically, the following language would be incorporated into the MFP:

Multiple Use Recommendation L–9 (Disposals) is hereby modified to include that parcel of land, located in Sec. 6: SW¼SW¼, T. 13 S., R. 29 E., as suitable for transfer from Federal ownership upon satisfaction of the sale criteria of the Federal Land Policy and Management Act (FLPMA).

Additionally, this notice serves as the Notice of Realty Action as required by 43 CFR Part 2201. The following described lands have been determined to be suitable for disposal by public sale under Sec. 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Legal description	Acres	Value
T. 13 S., R. 29 E., B.M. Sec. 6: SW¼SW¼	39.52	$2,950

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year period.

The lands will be subject to the following reservations when patented:

1. Ditches and Canals constructed under the authority of the United States. Act of August 30, 1980, 26 Stat. 391; 43 U.S.C. 945.

2. Oil and Gas and Geothermal rights.

3. Oil and Gas lease I–14717.

The public auction will be held on August 10, 1983 at 1:30 P.M.

ADDRESS: The public auction will be held at the Burley District Office, 200 South Oakley Highway, Burley, Idaho, 83318. Additional information concerning the land, terms and conditions of the sale, and bidding instructions may be obtained from Nick Cozakos, District Manager at the above address, or by calling (208) 678–5514.

SUPPLEMENTARY INFORMATION: For a period of 30 days from the date of publication interested parties may submit comments to the District Manager regarding the land use plan amendment. For a period of 45 days from the date of publication, interested parties may submit comments to the District Manager regarding the Notice of Realty Action for the proposed land sale. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Nick James Cozakos,
District Manager.

[CA 13253]

Realty Action Non-Competitive Sale of Public Land in Calaveras County

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($24,000):

Mount Diablo Meridian, California

T. 5 N., R. 12 E.,
Sec. 8, S½NE¼SW¼ & NW¼SE¼SW¼.
Containing 30 acres.

The above described land, comprising 30 acres, is being offered by direct, non-competitive sale to Charles Luce at current fair market value. Luce is an adjoining landowner and also owns property within the San Francisco Bay National Wildlife Refuge of the U.S. Fish and Wildlife Service. The U.S. Fish and Wildlife Service desires to acquire the property owned by Mr. Luce and Mr. Luce desires to buy the subject parcel of public land.

Disposal of the subject land through a non-competitive sale would facilitate and support the acquisition of valuable land within the San Francisco Bay National Wildlife Refuge which Mr. Luce has agreed to sell upon purchase of this land. Disposal will also support another federal program and best serve the public interest.

The sale is consistent with the land use plan and disposal criteria of 43 CFR 2710.0–3(a). The land will not be offered for sale for at least 60 days after the publication of this notice. Upon notification of the sale date, the purchaser will be given 30 days to pay the full appraised market value.

The land is currently under grazing lease 4202 to Mr. David Green, Mokelumne Hill, California. The grazing authorization will be terminated upon selling the land but as a condition of the sale the purchaser agrees to accept and honor the conditions of the lease for a period of two years (43 CFR 4110.4–2(b)).

The terms and conditions applicable to the sale are:

1. A right-of-way for ditches and canals will be reserved to the United States (43 U.S.C. 945).

2. A right-of-way for overhead utility and communication purposes to Pacific Gas and Electric Company and Pacific Telephone Company granted under CA 3664 and CA 6399 respectively, California BLM.

3. A right-of-way for existing road (Jesus Maria Road) to Calaveras County under RS 2447.

4. All minerals in the land will be reserved to the United States (43 U.S.C. 1719).

Federal law requires that the purchaser be a U.S. Citizen or, in the case of a corporation, subject to the laws of any state of the U.S.

Detailed information concerning the sale, including the land report and environmental assessment report are available for review at the Folsom Resource Area Office, 63 Natoma Street, Folsom, California 95630. For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Sacramento, California 95824. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination.

Robert D. Rheiner, Jr.,
District Manager.

BILLING CODE 4310-84-M

[CA 10936]

Realty Action Sale of Public Land in Amador County

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value.

Mount Diablo Meridian, California

T 6 N., R. 12 E.,
Sec. 3.
Containing 8.06 acres as follows:

Parcel No.	Acres	Value
Tract 52A	7.04	$37,500
Tract 52B	.25	100
Tract 52C	.49	100
Tract 52D	.28	100

The above described land will be offered for sale by oral bid only utilizing modified competitive bidding procedures. The sale will be held at 10:00 a.m. on July 29, 1983, at the Folsom Resource Area Office, Bureau of Land Management, 63 Natoma Street, Folsom, California 95630. This date is not less than 60 days after the date of this notice. Particulars for this public auction sale will be made available through local newspaper released approximately 30 days before the scheduled sale date. The individuals named below who own land adjoining the sale parcels will be designated bidders; i.e., they will be offered the right to purchase the land indicated below by meeting the highest bid. Refusal or failure to meet the highest bid shall constitute a waiver of such bidding provisions.

Designated bidders	Parcel No.
Elton V. Rodman, Louis E. Ludekens	Tract 52A.
Clarence and Lillian Foyil and Herbert S. Fessell.	Tract 52B.
Allen R. and Donna Lee Rueger	Tract 52C.
John J. Snooks and Thelma Ruby Pete	Tract 52D.

VOL 48 ISS 103 MAY 26 1983 UMI

The sale land is a small isolated tract completely surrounded by private land in an area being developed as homesites. The sale parcels are too small to be classified as homesites under present zoning, even collectively. Their best use is in conjunction with the adjoining land. Therefore, because of its location and physical characteristics, the sale land is difficult and uneconomic to manage as part of the public lands and is not suitable for management by another Federal department or agency. The sale is consistent with the Bureau's planning for the land, and the public interest would be served by offering this land for sale.

The terms and conditions applicable to the sale area are:

1. A right-of-way for ditches and canals will be reserved to the United States (43 U.S.C. 945).

2. All minerals in the land will be reserved to the United States (43 U.S.C. 1719).

3. Elton V. Rodman must file with the Bureau of Land Management (BLM a relinquishment of the Manzanita Quartz claim filed with BLM on January 23, 1979, under serial No. CA MC 21167, prior to the date of the sale.

Federal law required that bidders be U.S. citizens or, in the case of a corporation, subject to the laws of any State of the U.S. Proof of citizenship shall accompany the bid. The sale will be conducted by oral bidding. Bids must be made by the principal or his agent at the time of the sale. The highest oral bid will establish the sale price. No bids will be acceptable for less than the appraised price and bids for parcel must include all the lands in the parcel. The apparent high bidder will be required to submit a nonrefundable deposit of one-fifth of the full bid price immediately at the sale. The remainder of the full bid price shall be paid within 30 days of the sale. Failure to pay the full price within 30 days shall disqualify the apparent high bidder and the deposit shall be forfeited and disposed of as other receipts of sale.

Detailed information concerning the sale, including the land report and environmental assessment report are available for review at the Folsom Resource Area Office, 63, Natoma Street, Folsom, California 95630. For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination.

[Serial No. I-07884]

Idaho; Termination of Proposed Withdrawal and Reservation of Lands

May 17, 1983.

Notice of an application, serial number I-07884, for withdrawal and reservation of lands was published as **Federal Register** Document No. 57-10253 on page 9949 of the issue for December 12, 1957. The applicant agency has cancelled its application insofar as it involves the lands described below. Therefore, pursuant to the regulations contained in 43 CFR, Subpart 2091, such lands will be at 10:00 a.m. on June 22, 1983, relieved of the segregative effect of the above-mentioned application.

The lands involved in this notice of termination are:

Boise Meridian, Targhee National Forest, Burns Creek Dam Recreation Area

T. 3 N., R. 41 E.,
- Sec. 12, unpatented portions of lots 4, 5, N½SW¼, SW¼SW¼.

T. 3 N., R. 42 E.,

Las Vegas District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Las Vegas District Grazing Advisory Board will be held on June 27, 1983, at 10:00 a.m. in the basement of the Agriculture Service Center, 360 Lincoln St., Caliente, Nevada.

The agenda for the meeting will include: (1) minutes from the March 10, 1983 Advisory Board Meeting, (2) establishing range improvement project priorities for FY 84 and FY 85.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3:30 p.m. and 4:15 p.m. on the date of the meeting or file written statements for the Board's consideration before or during the meeting. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 4765 West Vegas Drive, Las Vegas, NV. 89126 (P.O. Box 26569) by June 27, 1983. Depending on the number of persons wishing to make an oral statement, the District Manager may establish a per person time limit.

Summary minutes of the Board meeting will be maintained at the District Office. They will be available for public inspection and reproduction (during regular business hours) within thirty days after the meeting.

Dated: May 18, 1983.

Kemp Conn,

District Manager.

Rescheduling of Powder River Regional Coal Team Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Rescheduling of Powder River Regional Coal Team Meeting from May 18, 1983, to June 21, 1983.

SUMMARY: The Powder River Regional Coal Team meeting scheduled for May 18, 1983, in Billings, Montana, was cancelled due to weather. The meeting has subsequently been rescheduled for June 21, 1983, again in Billings, Montana. The purpose of the meeting is to rank potential lease tracts and to select the lease alternatives to be addressed in the regional EIS.

Public attendance at the regional coal team meeting is welcome and encouraged. The opportunity for the public to address the regional coal team will be provided during the meeting.

DATE: The regional coal team meeting will be held June 21, 1983, in Billings, Montana.

ADDRESS: The meeting will be held at the Ramada Inn, I-90 and Mullowney Lane, Billings, Montana 59102.

FOR FURTHER INFORMATION CONTACT: J. Stan McKee, Project Manager, 307-772-2293, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82001.

Dwayne E. Hull,

Deputy State Director, Mineral Resources.

BILLING CODE 4310-84-M

[INT DEIS 83-34]

Riley Ridge Natural Gas Project, Draft Environmental Impact Statement, Lincoln, Sublette, and Sweetwater Counties, Rock Springs District, Wyoming; Availability of Draft Environmental Impact Statement and Public Hearing Schedule

AGENCIES: Wyoming State Office, Bureau of Land Management (BLM), Department of the Interior, Region 4, Forest Service (FS), Department of Agriculture.

ACTION: Notice of Availability of the Draft Environmental Impact Statement (DEIS). Establishment of a public review and comment period and dates for public hearings on the DEIS.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the BLM and FS have prepared a DEIS for the proposed Riley Ridge Natural Gas Development Project. The DEIS will be available for public review on or about May 20, 1983.

DATE: Comments will be accepted until July 19, 1983.

ADDRESS: Comments and questions should be sent to: Riley Ridge Project Leader, Division of EISS, 555 Zang Street, First Floor, East, Denver, Colorado 80228, Commercial (303) 234-6737 or FTS 234-6737.

SUPPLEMENTARY INFORMATION: Exxon Company, USA; American Quasar Petroleum Company; Northwest Pipeline Corporation; Mobil Oil Corporation; and Williams Exploration company propose to develop, produce, treat, and transport natural gas from a new deep gas wellfield of approximately 160,000 acres west and southwest of Big Piney in southwestern Wyoming. Four gas treatment plants are proposed which would process a total of 2.8 billion cubic feet per day of natual gas to produce 580 million cubic feet per day of sales quality natural gas. By-products would include sulfur, carbon dioxide, and helium.

Nitrogen and sulfur dioxide would be vented to the atmosphere. Other facilites would include linear facilities to transmit sour gas to the plants, sweet gas to major gas distribution systems, an above-ground molten sulfur line, transmission lines, and gas extraction facilities including wells, gathering pipelines, roads, etc.

The required Federal actions include the issuance of rights-of-way for the linear facilities and later approval of application for permits to drill (APD) as the wellfield is developed. Processing the APD's would be made more efficient by this EIS.

This DEIS also analyzes the impacts of alternative siting configurations, transmission line routes, methods of transporting sulfur, employee housing, and no action.

A limited number of the draft statements are available upon request at the following offices:

Big Piney Ranger District, Forest Service, P.O. Box 218, Big Piney, Wyoming 83113

Bridger-Teton National Forest, Forest Service, P.O. Box 1888, Jackson, Wyoming 83001

Kemmerer Resource Area, Bureau of Land Management, P.O. Box 632, Kemmerer, Wyoming 83101

Pinedale Resource Area, Bureau of Land Management, P.O. Box 768, Pinedale, Wyoming 82941

Division of Environmental Impact Statement Services, Bureau of Land Management, 555 Zang Street, 1st Floor, East, Denver, Colorado 80228

Rock Springs District Office, Bureau of Land Management, P.O. Box 1869, Rock Springs, Wyoming 82901

BLM-Division of Minerals, P.O. Box 1170, 79 Winston Drive, Rock Springs, Wyoming 82901

Wyoming State Office, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82001

Office of Public Affairs, Bureau of Land Management, Department of the Interior, 18th and C Streets, NW, Washington, D.C. 20240

Intermountain Region, Forest Service, 324 25th Street, Ogden, Utah 84401

Public hearings to receive oral and/or written comments on the proposed project and its alternatives will be held at:

Pinedale Middle School, Carmichael Media Center, 227 East Hennick, Pinedale, Wyoming, on June 27, 1983, at 7 p.m.

Kemmerer Junior High School Auditorium, 1525 Third West Avenue, Kemmerer, Wyoming, on June 29, 1983, at 7 p.m.

Big Piney High School, 650 Piney Drive, Big Piney, Wyoming, on June 28, 1983, at 7 p.m.

Holiday Inn, 1675 Sunset Drive, Rock Springs, Wyoming, on June 30, 1983, at 7 p.m.

The hearing will be held pursuant to the objectives of the National Environmental Policy Act (Pub. L. 91-190; 83 Stat. 852, 853) to receive comments (testimony) on the scope of the EIS and the adequacy of the impact analysis. Testimony presented at these hearings will be considered in the preparation of the final environmental impact statement.

The public hearing will be conducted by a Bureau of Land Management (BLM) official who will be accompanied by other BLM, FS, and other Federal and State personnel involved in preparing this draft environmental impact statement. These personnel may ask questions of the witness to clarify points in the testimony. All hearing proceedings will be recorded.

Before giving testimony at the public hearings, participants are requested to complete a hearing registration form. A registration form is incorporated as the last page of the DEIS. Additional forms may be obtained from the Division of Environmental Impact Statement Services at the address listed in this notice. Registration froms must be returned to that address no later than

VOL 48 ISS 103 MY 26 1983 UMI

June 20, 1983. Participants may also register at the registration desk at each hearing. Time preferences for presentation of oral statements will be honored whenever possible. A tentative listing of speakers, in the order they will be called, will be available at the registration desk at each hearing.

After the last witness has been heard, the hearings administrator will consider the requests of other persons present who wish to testify. Only one witness will be allowed to present the viewpoint of a single organization at any one hearing. However, any witness will be permitted to give relevant testimony if it is offered as the opinion of a private citizen.

Persons wishing to give oral testimony will be limited to 10 minutes. Written submissions may also be presented at the hearing.

P. D. Leonard,

Associate State Director.

BILLING CODE 4310-84-M

Special Management Areas

The Vale District, Bureau of Land Management, has designated through the planning process the following Special Management Areas. The areas and the special management required to protect the resource values and natural systems within were developed in three stages through public participation in the Southern and Northern Malheur Management Framework Plans (MFPs). The first stage occurred in January 1981 during which time the public was asked to identify issues and to nominate special management areas for consideration in the MFPs. The second stage occurred in August and September 1981 when the public was asked to help develop planning criteria and to suggest alternative land use plan goals and objectives. The third stage occurred in September and October 1982 when the public was asked to comment on the land use plan alternatives and to select a preferred alternative. The district manager has since selected the preferred alternative for special management areas which has been concurred with by the Oregon State Director and published for public information on March 14, 1983. This notice is the district managers decision to designate the areas as special management areas and to provide special management attention described in the MFPs.

A. Areas of Critical Environmental Concern (ACECs):

	Acres
1. Honeycombs	11,930
3. Leslie Gulch	9,300
3. Owyhee River	30,400
4. Jordan Craters	29,670
5. Saddle Butte Lava Tubes	7,040
6. Whitehorse Basin	1,290
Total	89,630
B. Research Natural Areas (RNAs):	
1. Honeycombs	11,930
2. Mahogany Ridge	320
3. Stockade Mountain	640
4. Jordan Craters Addition	1,275
Total	14,165

The general location of these areas are within the Southern and Northern Malheur Resource Areas of the Vale District. The specific location and description of the resource values and special management attention required to protect the values are shown in the Management Framework Plans (MFPs) for each resource area, and are available for inspection in the Vale District Office. Limited copies of the Preferred Land Use Alternative document published March 14, 1983, which also addresses Special Management Areas, are available upon request.

Dated: May 17, 1983.

Pearl M. Parker,

District Manager.

BILLING CODE 4310-84-M

[CA 13279]

State of California, Realty Action; Sale of Public Lands in Riverside County

AGENCY: Bureau of Land Management, Interior.

ACTION: Realty action—sale of public lands in Riverside County—CA 13279.

SUMMARY: The following described land has been examined and identified as suitable for disposal by sale as one unit under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($141,250):

Legal Description

San Bernardino Meridian

T. 7 S., R. 8 E.,

Sec. 18, S½ of Lots 1 and 2 of the SW¼.

The land described aggregates 76.33 acres in Riverside County.

The lands are being sold subject to a preference right consideration to allow Ladyvest, Inc., to meet the high bid. The sale parcels are contiguous to land owned by Ladyvest, Inc.

Disposal of such tract will serve important public objectives, including but not limited to, expansion of agricultural development, which outweigh other public objectives and values which would be served by maintaining such tract in Federal ownership. The proposed sale is consistent with the Bureau's planning for lands involved, and the public interest would be served by offering this land for sale.

The terms and conditions applicable to the sale are:

1. A right-of-way for ditches and canals will be reserved to the United States (43 U.S.C. 945).

2. All minerals in the land will be reserved to the United States (43 U.S.C. 1719); however, under Section 209 of the said Act of October 21, 1976, the high bidder may apply to purchase the mineral interests.

3. The patent will be subject to all valid existing rights.

4. Federal law requires that all bidders be United States citizens, or in the case of corporations be authorized to own real estate in the State of California. A State, State instrumentality or political subdivision must be authorized to hold property. Proof of these requirements shall accompany the bid.

5. Upon disqualification of an apparent high bidder, the next high bidder will be honored.

DATES: The above described land will be offered for sale by sealed and oral bids. The sealed bids will be opened at 10:00 am on July 26, 1983, at the California Desert District Office of the Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507. Bids may be made by a principal or a duly qualified agent, either mailed or delivered to the California Desert District Office, Bureau of Land Management, at the above address. Sealed bids shall be considered only if received prior to 10:00 am on July 26, 1983, and are made for at least the appraised value of the land. Each sealed bid shall be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount of the bid. The sealed envelope must be marked in the lower left hand corner "Public Sale Bid, Serial Number CA-13279, sale held July 26, 1983". No bid will be accepted for less than the appraised value, and bids must include all of the land in the parcel. The sealed bids shall be opened and publicly declared at the beginning of the oral bidding. Only those bidders submitting qualified sealed bids will be allowed to participate in the oral auction. The purpose of the oral bid is to allow each qualified participant to revise their bid. Oral bidding will begin at 11:00 am on July 26, 1983 at the California Desert District Office. The person declared to have entered the highest qualifying oral bid shall submit payment for cash, personal check, bank draft, money order, or any combination for not less than one-fifth of the amount of the bid immediately following the close of the sale.

The successful bidder, whether such bid is a sealed or oral bid, shall submit the remainder of the full bid price prior to the expiration of 30 days from the date of the sale. Failure to submit the full bid price prior to, but not including the 30th day following the day of the sale, shall result in cancellation of the sale of the specific parcel and the deposit forfeited and disposed of as other receipts of sale. If two or more sealed bids for the same amount are received and no oral bids are received, then the apparent high bidder shall be determined by a drawing.

For a period of 30 days following the date of the sale, Ladyvest, Inc., will have opportunity to claim the preference rights indicated above. Refusal or failure to meet the highest bid shall constitute a waiver of such bidding provisions.

FOR FURTHER INFORMATION CONTACT: Concerning the sale, including the land report and environmental assessment report, is available for review at the California Desert District Office at the above address. For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Federal Office Building, 2800 Cottage Way, Room E-2841, Sacramento, California 95825. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become a final determination.

Dated: May 5, 1983.

Bary Freet,

Assistant District Manager for Administration.

BILLING CODE 4310-84-M

[CA 13892]

State of California, Realty Action; Noncompetitive Sale of Public Lands in Riverside County

AGENCY: Bureau of Land Management; Interior

ACTION: Realty Action—Noncompetitive Sale of Public Lands in Riverside County—CA 13892

SUMMARY: The following described land has been examined and identified for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value.

San Bernardino Base Meridian

T. 7 S., R. 3 E., Section 6, Lot 18

The land described aggregates 5.83 acres in Riverside County.

This land is being offered at direct sale to Mrs. George Messenger at the appraised fair market value. The direct sale is necessary to protect equities arising from inadvertent unauthorized use, as a result of private surveying errors.

The proposed sale is consistent with the Bureau's planning for the lands involved and the public interest would be served by offering this land for direct sale to Mrs. Messenger.

The terms and conditions applicable to the sale are:

1. A right-of-way for ditches and canals will be reserved to the United States (43 U.S.C. 945).

2. All minerals in the land will be reserved to the United States (43 U.S.C. 1719); however, under Section 209 of the said Act of October 21, 1976, the new landowner may apply to purchase the mineral interests.

3. Federal law requires that all bidders be United States citizens, or in the case of corporations be authorized to own real estate in the State of California. A State, State instrumentality or political subdivision must be authorized to hold property. Proof of these requirements shall accompany the bid.

FOR FURTHER INFORMATION CONTACT: Concerning the sale, including the land report and environmental assessment report is available for review at the California Desert District Office at 1695 Spruce Street, Riverside, California 92507.

For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Federal Office Building, 2800 Cottage Way, Room E-2841, Sacramento, California 95825. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination.

SUPPLEMENTARY INFORMATION: The land will not be offered for sale for at least 60 days after the date of this notice.

Dated: May 19, 1983.

Bary Freet,

Assistant District Manager for Administration.

BILLING CODE 4310-84-M

[C-37218]

Colorado; Invitation for Coal Exploration License Application; Peabody Coal Co.

Members of the public are hereby invited to participate with Peabody Coal Company in a program for the exploration of coal deposits owned by the United States of America in the following described lands situated in Routt County, Colorado:

Sixth Principal Meridian, Colorado

T. 4 N., R. 88 W.
Sec. 8, Lots 1 to 4, inclusive, and S½ (all);
Sec. 9, Lots 1 to 4, inclusive, and S½ (all);
Sec. 10, Lots 1 to 4, inclusive, and S½ (all);
Sec. 11, Lots 3 and 4, and N½SW¼;
Sec. 15, NW¼;
Sec. 16, N½.
T. 5 N., R. 88 W.
Sec. 31, Lots 21 to 25, inclusive;
Sec. 32, Lots 9 to 12, inclusive;
Sec. 33, Lots 9 to 12, inclusive;
Sec. 34, Lots 11 and 12.

The area described contains 2853.38 acres, more or less.

Any party participating in this exploration license will share all costs on a pro rata basis with Peabody Coal Company and with any other participants. The exploration plan, as submitted to the Bureau of Land Management, is available under serial number C-37218 for public review during normal business hours at the Colorado State Office, 1037 20th Street, Denver, Colorado. Additional copies of the exploration plan are available for review at the BLM Craig District Office, 455 Emerson Street, Craig, Colorado, and at the District Mining Supervisor's Office, The Mart, 2135 East Main Street, Grand Junction, Colorado.

Any party electing to participate in this exploration program must send written notice of such election both to the Bureau of Land Management and to Peabody Coal Company, Rocky Mountain Division, within 30 days after the publication of this Notice of Invitation in the **Federal Register**. Such written notice must be addressed to:

Chief, Mineral Leasing Section,
Colorado State Office, Bureau of Land

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development and Production Plan.

SUMMARY: Notice is hereby given that Shell Offshore Inc. has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS 0445, Block 176, Eugene Island Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Rom 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and proedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: May 19, 1983.

John L. Rankin,
Acting Regional Manager Gulf of Mexico OCS Region.

NH 17-12: All Federal Blocks.
NG 17-2: Ft. Pierce: All Federal Blocks.
NG 17-5: West Palm Beach: All Federal Blocks.

Instructions on Call

Indications of interest from potential bidders should be limited to the Federal acreage included in the Call area described above. Respondents should indicate interest in those portions of the Call area having sufficient potential for the discovery of oil and gas to be offered for lease. Those indicating interest are requested to do so on the standard Call for Information Map, available free from the Regional Manager, Atlantic OCS Region, or the New York Office, Atlantic OCS Region, at the addresses stated in the second paragraph under "Description of Area," telephone (703) 285-2168 or (212) 264-2401, respectively. Interest should be shown by outlining the area(s) along block lines.

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE
South Atlantic
Lease Offering (January 1985)
Call for Information

Purpose of Call

The purpose of the Call is to assist the Secretary of the Interior in carrying out his responsibilities under the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1331-1343), as amended (92 Stat. 629), and regulations appearing at 30 CFR 256.23. Potential bidders are requested to outline areas where they believe hydrocarbon potential is sufficient to warrant offering these areas in the South Atlantic. The Secretary is also requesting comments from all interested parties--Federal, State, and local governments, environmental groups, the general public, and potential bidders--on possible environmental effects and use conflicts in the Call area and on the appropriateness of initial lease terms longer than 5 years and lease areas larger than 5,760 acres (2,331 hectares).

Use of Information from Call

Indications of interest submitted in response to this Call will be considered during the area identification process in selecting the areas of hydrocarbon potential to be proposed for leasing and analyzed in the environmental impact statement as the proposed Federal action. This information will also be used in identifying alternatives to the proposed action. Comments received on possible environmental effects and use conflicts may be used in the analysis of local environmental conditions within the Call area so that the potential effects of oil and gas exploration and development, other than the benefits accruing to the Nation as a result of inventorying and producing oil and gas, can be assessed. These comments may also be useful in developing special lease terms and conditions designed to assure safe offshore operations. Comments submitted regarding length of lease term and size of lease areas may be used in the assessment of the appropriate initial lease term and appropriate lease size, pursuant to section 8 of the OCS Lands Act, as amended (43 U.S.C. 1337).

Description of Area

The general area of this Call is offshore the States of North Carolina, South Carolina, Georgia, and Florida and lies approximately between the 35th and 26th parallels within the area of Federal jurisdiction.

VOL 48 ISS 103 MAY 26 1983 UMI

Final delineation of the area for competitive bidding will be made only at a later date after compliance with established departmental procedures, all requirements of the National Environmental Policy Act of 1969, and the OCS Lands Act, as amended. A final Notice of Lease Offering, detailing areas to be offered for competitive bidding, will be published in the Federal Register stating the conditions and terms for leasing and the place, date, and hour at which bids will be received and opened.

Acting Director, Minerals Management Service
Gary Bennethum

Date: 5/17/83

Approved

Assistant Secretary of the Interior
Daniel N. Miller, Jr.

The standard Call Map shows the Call area and highlights the area identified by the Minerals Management Service (MMS) as having potential for the discovery of oil and gas. Although individual indications of interest are considered to be privileged and confidential information, the names of persons or entities indicating interest or submitting comments will be of public record.

Respondents are encouraged to broadly rank areas according to priority of interest (e.g., priority 1 (high), 2, or 3). Priority information submitted by companies will be held confidential and may be used as a criterion in determining the area to be analysed in the environmental impact statement.

In addition to indications of interest, we are seeking comments from all interested parties about particular geological, environmental, biological, archeological, or socioeconomic conditions or problems, or other information which might bear upon potential leasing and development of particular areas. Comments should preferably address broad areas but may be restricted to designated blocks of particular concern.

Comments are also being sought from all interested parties on the appropriateness of initial lease terms longer than 5 years and on the need, if any, for lease areas larger than 5,760 acres (2,331 hectares). Such comments should describe why such modifications would be appropriate and identify where such modifications should be applied. Those making comments are requested to mark the area commented upon on the standard Call for Information Map discussed above.

Indications of interest and comments must be submitted no later than 30 days following publication of this document in the Federal Register in envelopes labeled "Indications of Interest for Leasing in the Outer Continental Shelf, South Atlantic (January 1985)" or "Comments on Leasing in the Outer Continental Shelf, South Atlantic (January 1985)" as appropriate. The map (original) and indications of interest or comments must be submitted to the Regional Supervisor for Leasing and Environment, Atlantic OCS Region, Minerals Management Service, 1951 Kidwell Drive, Suite 601, Vienna, Virginia 22180. One copy of the map and indications of interest or comments are also to be sent to the Chief, Offshore Resource Evaluation Division, Minerals Management Service, Mail Stop 643, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

VOL 48 ISS 103 MAY 26 1983 UMI

Office of the Secretary

Indian Policy Review Team; Meeting

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs in 209 DM 8.

Notice is hereby given that a meeting of the Indian Policy Review Team will be held on Monday, June 13, 1983, at 9:00 in the Secretary's Conference Room (Room 5160) at the Interior Department Building, 18th and C Streets, N.W., Washington, D.C.

The purpose of the Indian Policy Review Team is provide advice to the Assistant Secretary—Indian Affairs on major Indian policy issues of a national significance. It analyzes such policy alternatives and issues as may be assigned by the Assistant Secretary and formulates, proposes, and submits comments to the Assistant Secretary.

The purpose of the meeting of Team is to discuss the restructuring of the Bureau with the Assistant Secretary—Indian Affairs.

The meeting will be open to the public. However, facilities and space to accommodate members of the public are limited and persons will be accommodated on a first come, first served basis. Any member of the public may file with the Assistant Secretary—Indian Affairs a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting may contact Mr. Carl Shaw, Office of the Assistant Secretary—Indian Affairs, Room 4153, Interior Department Building, Washington, D.C., telephone number (202) 343–4576. Minutes of the meeting will be available for public inspection three weeks after the meeting and may be inspected at the Office of the Assistant Secretary—Indian Affairs, Room 4150, Interior Department Building, 18th and C Streets N.W., Washington, D.C.

Dated: May 20, 1983.

John E. Fritz,

Acting Assistant Secretary—Indian Affairs.

BILLING CODE 4310–10–M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of approved exemptions.

SUMMARY: The motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 1343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: The exemptions will be effecive on June 27, 1983. Petitions for reconsideration must be filed by June 15, 1983. Petitions for stay must be filed by June 6, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW, Washington, DC 20423; or call (202) 289–4357 in the DC metropolitan area; or (800) 424–5403 Toll-free outside the DC area.

Decided: May 16, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,

Secretary.

[No. MC–F–15125]

Dutton Trucking, Inc.—Purchase Exemption—Grand Island Express, Inc.

ADDRESSES: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; (2) Petitioners' representative: Jack L. Shultz, Nelson & Harding, P.O. Box 82028, Lincoln, NE 68501.

Pleadings should refer to No. MC–F–15125.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(2), the purchase by Dutton Trucking, Inc., of the rights held by Grand Island Express, Inc., under MC–135283 (Sub-Nos. 15 and 28).

[FR Doc. 83–14148 Filed 5–25–83; 8:45 am]

BILLING CODE 7035–01–M

[Volume No. OP4F–314]

Motor Carriers; Decision-Notice; Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the Federal Register. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: May 20, 1983.

By the Commission, Review Boad No. 2, Members: Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4 at (202) 275–7669.

MC–F–15280. Filed April 25, 1983. NATIONAL STEEL CORPORATION (NATIONAL) (20 Stanwix St., Pittsburgh, PA 15222)—CONTINUANCE IN CONTROL—INTEGRATED DISTRIBUTION, INCORPORATED (INTEGRATED) (One Centure Dr., Parsippany, NJ 0754). Representative: Raymond L. PUCCI, One Century Dr., Parsippany, NJ 07054. National, a non-carrier, seeks authority to continue control of Integrated upon the institution by Integrated of operations in interstate or foreign commerce, as a motor contract carrier. National also controls through stock ownership the Delray Connecting Railroad Company, and it has a minority interest in Enamel Products and Plating Company which owns all of the outstanding stock of E. P. & P. Trucking Co., a motor contract carrier pursuant to Permits Nos. MC–133013 (Sub-No. 1) and MC–133013 (Sub-No. 2) authorizing the transportation of metal awnings, metal carports, and metal patio covers, and component parts thereof, coated sheet metals, and materials equipment and supplies (except in bulk), between McKeesport, PA, on the one hand, and on the other, points in AL, FL, GA, NC, SC, and VA, and metal awnings, metal carports, metal patio coves, and coated sheet metals, form Portage, IN, to points in AR, IL, IA, KY, MD, MI, MO, NJ, NY, OH, PA, TN, TX, WV, and WI, under a continuing contract(s) with Enamel Products & Plating Co., Artcraft Awning Co., and Artcraft Industries, Inc. Integrated holds no persent authority. Simultaneously herewith it has filed a contract carrier application docketed

No. MC–167626 which was published in the **Federal Register** on May 10, 1983, to transport general commodities (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S., under continuing contract(s) with National Steel Corporation, of Pittsburgh, PA, and its subsidiaries, published in the **Federal Register** of May 10, 1983.

BILLING CODE 7035–01–M

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rule at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

transfer to Ebony Express, Eugene, OR, of Certificate No. MC–148877 Sub 2, issued June 24, 1981, Sub 3, issued October 27, 1981, and Sub 4, issued August 6, 1982, to Leon's Trucking Co., Eugene, OR, authorizing the transportation of clay, concrete, glass or stone products, metal products, and rubber and plastic products, between points in OR, WA, ID, CA and UT, general commodities (with exceptions), for or on behalf of the U.S. Government, and food and other edible products and byproducts intended for human consumption (except alcoholic beverages and drugs), limestone, fertilizer and other soil conditioners, by the owner of the motor vehicle, in such vehicle, between points in the U.S., and general commodities (except classes A and B explosives and household goods), between points in OR and WA, and those in Rio Grand County, CO, on the one hand, and, on the other, points in OR, WA, CA, NV, ID, UT, AZ, MT, WY, CO, NM, AL, AR, FL, GA, IL, IN, IA, KS, LA, MI, MN, MS, MO, NE, NY, OH, OK, PA, SD, ND, NJ, SC, NC, TX and WI. Representative: Frederick De Leon, 1511 Brooklyn, Ave., Eugene, OR 97403.

Volume No. OP4–FC–307

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC–FC–81451, filed May 3, 1983. By decision of May 18, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1, approved the transfer to GREENS MOVING & STORAGE, INC., of Fall River, MA, of Certificate No. MC–69907, issued July 7, 1947, to GREEN BROS., INC., d/b/a GREENS STORAGE WAREHOUSES, of Fall River, MA, authorizing the transportation (1), over regular routes, of *general commodities* (except those of unusual value, classes A and B explosives, household goods, commodities in bulk, and those requiring special equipment), between Providence, RI and New Bedford, MA, over U.S. Hwy 6, serving all intermediate points, and the off-route points of Acushnet, Fairhaven, Assonet, and Digthon, MA, and Middletown, Newport, Cranston, East Greenwich, Pawtucket, Warwick, West Warwick, and Tiverton, RI; (2) *machinery*, between Fall River, MA, on the one hand, and, on the other, New York, NY, Danbury, Norwalk, and Bridgeport, CT, and points in MA and RI; (3) *blankets and cotton piece goods*, between Taunton, MA and Providence, RI; and (4) *such commodities* as are dealt in by retail furniture, mail order, and department stores, from Fall River, MA, to points in Bristol, Newport, and Providence Counties, RI. Representative: Daniel F. Duffy, 59 9th St., Fall River, MA 02720, (617) 675–7428, for both transferee and transferor.

MC–FC–81458. By decision of May 16, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 1 approved the transfer to RYAN TRANSFER CORPORATION, of Green Bay, WI, of Certificate No. MC–111377, issued September 27, 1955, to RYAN MOVING & STORAGE, INC., of Green Bay, WI, authorizing the transportation of (1) household goods, (a) between points in WI, on the one hand, and, on the other, points in KY, MI, MA, OH, PA, NE, NJ, IL, IN, NY, MN, MO, WV, NC, CT, ME, RI, DE, MD, VA, IA, and DC, and (b) from points in NY and NJ to points in OH, MI, IN, IL, and MN, and (2) office equipment, between Milwaukee, WI, on the one hand, and, on the other points in IL, IN, IA, MI, and MN. Transferee is a carrier holding authority under No. MC–161426 and affiliated Ryan Moving & Storage Inc., Transferor herein. Representative: James Robert Evans, 145 W. Wisconsin Ave., Neenah, WI 54956, (414) 722–2848 for applicants.

For the following, please direct status calls to Team 5 at 202–275–7289.

Volume No. OP5–FC–236

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–81413. By decision of May 18, 1983 issued under 49 U.S.C. 10926, and 10931 or 10932, and the transfer rules at 49 CFR Part 1181, Review Board Number 3 approved the transfer to JOHN E. COBAI, d/b/a CRESTED BUTTE TRUCK LINE, of Crested Butte, CO of Certificate No. MC 98228 Sub 1 issued February 13, 1979, and Certificate of Registration No. MC 98228 Sub 2 issued February 13, 1979 to CLIFFORD D. ELLIS, II, CRESTED BUTTE TRUCK LINE, of Crested Butte, CO authorizing: Sub 1 the transportation of *ores and ore concentrates*, from Crested Butte, CO, to Salida, CO, serving intermediate and off-route points within 10 miles of Crested Butte; from Crested Butte over Colorado Hwy 135 to Gunnison, CO, then over U.S. Hwy 50 to Salida, and return over the same route; and Sub 2, evidencing a right to engage in transportation in interstate commerce corresponding in scope to that portion of Certificate of Public Convenience and Necessity No. 2070, as was embraced in predecessor's Certificate of Registration and transferred by Decision Nos. 79749 and 89484, dated September 29, 1971, and October 12, 1976, respectively, issued by the Public Utilities Commission of the State of Colorado, authorizing the transportation of (1) *general commodities*, between Gunnison, CO, and Crested Butte, CO, over CO Hwy 135, serving all intermediate points, and (2) to use equipment in the State of Colorado as a common interstate carrier between all points in the State of CO, and the CO State boundary lines where all highways cross same in interstate commerce only, subject to the provisions of the Federal Motor Carrier Act of 1935, as amended. Representative: John E. Cobai, Meridian Lake Park, Box 307, Crested Butte, CO 81224. Condition: Prior to or concurrent with consummation, applicant must submit a copy of the order of the State Commission approving transfer of the underlying intrastate rights.

MC–FC 81463 By decision of May 17, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 3, approved the transfer to NORMAND R. EMOND, d/b/a SWIFT'S EXPRESS of Attleboro, MA, of Certificate No. MC–6749 issued August 3, 1956, to WARREN A. JOHNSON, d/b/a SWIFT'S EXPRESS authorizing the transportation of *general commodities* (except classes A and B explosives, household goods, commodities in bulk, livestock, those of unusual value, commodities requiring special equipment and those injurious or contaminating to other lading), between Attleboro, MA, and points in MA within 12 miles thereof on the one hand, and, on the other, Providence, RI, and points in RI within 5 miles thereof. Representative Robert K. Cunningham, 8 North Main St., Attleboro, MA 02703.

BILLING CODE 7035–01–M

[Volume No. OP2–228]

Motor Carriers; Permanent Authority; Republications of Grants of Operating Rights Authority Prior to Certification

The following grant(s) of operating right authority is republished by order of the Commission to indicate a broadened grant of authority over that previously notice in the **Federal Register**.

An original and one copy of an appropriate petition for leave to intervene, setting forth in detail the precise manner in which petitioner has been prejudiced, must be filed with the Commission within 30 days after the date of this **Federal Register** notice.

By the Commission

Agatha L. Mergenovich,

Secretary.

MC 161753 (Republication), filed December 13, 1982, published in the

Federal Register issue of January 4, 1983, and republished this issue. Applicant: MINORITY UNIVERSAL CARRIERS, INC., 967 40th Lane, Anoka, MN 55303. Representative: Harold Orlofske, 145 W. Wisconsin Ave., Neenah, WI 54948. A Decision of the Commission, *Review Board 3*, decided April 5, 1983 and served April 18, 1983, finds that the present and future public convenience and necessity require operations by applicant in interstate or foreign commerce, over irregular routes, as a *common carrier*, by motor vehicle, transporting (3) *such commodities* as are used by public telephone companies between points in Arkansas, Iowa, Kansas, Minnesota, Missouri, North Dakota, Nebraska, Oklahoma, South Dakota and Texas, on the one hand, and, on the other, points in the United States (except Hawaii); that applicant is fit, willing, and able properly to perform the granted service and to conform to statutory and administrative requirements. The purpose of this republication is to indicate that part (3) is somewhat broader than the request, originally published.

[FR Doc. 83–14146 Filed 5–25–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 GFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: Common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 5 at (202) 275–7289.

Volume No. OP5–239

Decided: May 18, 1983.

By the Commission, Review Board No. 3, members Krock, Joyce, and Dowell.

For the following, please direct status calls to Team 1 at 202–275 7992.

Volume No. OP1–187

Decided: May 19, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Parker not participating.)

W–1371, filed April 19, 1983. Applicant: CRO-MARINE TRANSPORT, INC., 120 South Central Ave., St. Louis, MO 63105. Representative: Edward K. Wheeler, 1729 H St., N.W., Washington, DC 20006, (202) 337–6500. To operate as a *contract carrier*, by water, by non-self-propelled vessels with the use of separate towing vessels in the transportation of *general commodities* between ports and points along all rivers, streams, bayous, canals, channels and other waterways constituting the Mississippi River System and the Gulf Intracoastal Waterway System, the Gulf of Mexico between Brownsville, TX and Carrabelle, FL, and Lake Michigan between Chicago, IL and Burns Harbor (Portage), IN.

Note.—This application contemplates operations which should result in decreased energy consumption in comparison with existing energy consumption in the affected area. To the extent traffic will be diverted from existing transportation modes, greater energy efficiencies may be obtained without disruption to existing patterns of energy distribution or to development of energy resources. The application is, in all respects, consistent with prevailing goals and objectives of the National Energy Policy. This application is directly-related to a concurrently filed petition for exemption application docketed FD–30174.

MC 110841 (Sub-26), filed May 11, 1983. Applicant: PORT NORRIS EXPRESS CO., INC., North Avenue, Port Norris, NJ 08349. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P.O. Box 1240, Arlington, VA 22210, (703) 525–4050. Transporting *general commodities* (except classes A and B explosives and household goods), between points in the U.S. (except AK and HI), under continuing contract(s) with Warner Company, of Bala Cynwyd, PA, and Whitehead Brothers Company, Inc., of East Hanover, NJ.

MC 117201 (Sub-62), filed May 12, 1983. Applicant: INTERSTATE DISTRIBUTOR CO., 8311 Durango S.W., Tacoma, WA 98499. Representative: George R. LaBissoniere, 15 S. Grady Way, Suite 239, Renton, WA 98055, (206) 228–3807. Transporting *general commodities* (except classes A and B explosives, and household goods and commodities in bulk), between points in the U.S., under continung contract(s) with URM Stores, Inc., of Spokane, WA.

MC 145040 (Sub-5(B)), filed May 11, 1983. Applicant: RAMSEY'S TRAILWAYS, INC., P.O. Box 667, Jonesboro, LA 71251. Representative: Lawrence E. Lindeman, 4660 Kenmore Ave., Suite 1203, Alexandria, VA 22304, (703) 751–2441. *Over regular routes*, transporting *passengers*, between Monroe, LA, and Lake Providence, LA, from Monroe over U.S. Hwy 165 to Bastrop, then over LA Hwy 2 to U.S. Hwy 65, then over U.S. Hwy 65 to Lake Providence, and return over the same route, serving all intermediate points.

Note.—Applicant seeks to provide regular route service in interstate or foreign commerce and in intrastate commerce under 49 U.S.C. 10922(c)(2)(B) over the same route. Applicant has also requested authority in interstate or foreign commerce in MC–145040 Sub 5(A) published this same **Federal Register** issue.

MC 149100 (Sub-21), filed May 12, 1983. Applicant: JIM PALMER TRUCKING, 9730 Derby Drive, Missoula, MT 59801. Representative: John T. Wirth, 717 17th St., Suite 2600, Denver, CO 80202–3357, (303) 892–6700. Transporting *general commodities* (except classes A and B explosives, and household goods and commoditites in bulk), between points in the U.S. (except AK and HI).

MC 152261 (Sub-6), filed May 3, 1983. Applicant: M. W. ETTINER, INC., 2711 North Fairview Ave., Roseville, MN 55113. Representative: Samuel Rubenstein, P.O. Box 5, Minneapolis, MN 55440, (612) 542–1121. Transporting *general commodities* (except classes A and B explosives, and household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with S-R-F-T-C Brokers, of Minneapolis, MN

MC 152370 (Sub-2), filed May 9, 1983. Applicant: COLOROW TRUCKING, INC., 904 N. Oxford Lane, Glenwood Springs, CO 81601. Representative: Timothy Robert Ferguson (same address as applicant), (303) 945–9347. Transporting, *beer*, between points in Tarrant County, TX, on the one hand, and, on the other, points in CO.

MC 155510 (Sub-3), filed May 13, 1983. Applicant: ORANGE DISTRIBUTION, INC., Maine Street, P.O. Box 729. Representative: David L. Bolyard, 112 South Pitt Street, P.O. BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

VOL 48 ISS 103 MAY 26 1983 UMI

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier, Member Parker not participating.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275–7992.

Volume No. OP1–186

Decided: May 19, 1983.

MC 145040 (Sub-5(A)), filed May 11, 1983. Applicant: RAMSEY'S TRAILWAYS, INC., P.O. Box 667, Jonesboro, LA 71251. Representative: Lawrence E. Lindeman, 4660 Kenmore Ave., Suite 1203, Alexandria, VA 22304, (703) 751–2241. Transporting *passengers*, in charter and special operations, between points in the U.S. (except HI).

Note.—Applicant seeks to provide privately funded charter and special transportation. Applicant has also requested intrastate authority in MC–145040 Sub 5(B) published this same **Federal Register** issue.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83–14143 Filed 5–25–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

The following restriction removal applications are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, at (202) 275–7992.

Motor Carriers; Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: Comments must be received within 30 days after the date of publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: May 19, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

City-Wide Cartage Contract Carrier, Inc.—Purchase Exemption—Geetings, Inc.

Volume OP4–F–310

City-Wide Cartage Contract Carrier, Inc., (MC–151342) seeks an exemption from the requirement under section 11343 of prior regulatory approval for its purchase of the certificate held in No. MC–34027 (Sub-No. 25) by Geetings, Inc., which authorizes the transportation of food and related products (1) radially, between points in Marion and Polk Counties, IA, and 13 States, and (2) radially, between points in Marion County, IA, and Chicago, IL, Porter County, IN, Van Buren County, MI, and Polk County, FL. City-Wide also intends to tack the purchased rights with its existing interstate authority in MC–151342 (Sub-No. 1), which authorizes the transport of confectionery from Des Moines, IA, to points in Iowa. Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423 and (2) Petitioner's representative: Larry D. Knox, 500 Hubbell Building, Des Moines, IA 50309.

BILLING CODE 7035–01–M

[Ex Parte No. 387]

Rail Carriers; Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice.[1] These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register**.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet in Room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, N.W. in Washington, D.C. on June 24, 1983 beginning at 9 a.m.

The purpose of the meeting is to discuss topics and questions which may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in Title 29, U.S. Code, section 1242(a)(1)(B) and to review the May 1983 Joint Board basic examination in order to make recommendations relative thereto, including the minimum acceptable pass score. In addition, there will be a discussion of restructuring of the examination program as described in the announcement published in the **Federal Register** on March 2, 1983, 48 FR 8877 (1983).

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) has been made that the portions of the meeting dealing with the discussion of questions which may appear on the Joint Board's examinations and the review of the May 1983 Joint Board basic examination fall within the exceptions to the open meeting requirement set forth in Title 5, U.S. Code, section 552b(c)(9)(B), and that the public interest requires that such portions be closed to public participation.

The portion of the meeting dealing with the discussion of restructuring the Joint Board examination program will commence at 1:30 p.m. and end at approximately 3:00 p.m. This portion of the meeting will be open to the public as space is available. To the extent feasible, the discussion will be limited to (1) the possible separation for credit purposes of the proposed segments of the Joint Board basic examination program under 20 CFR 901.13, i.e., those segments dealing with (a) life contingencies and compound interest; (b) basic pension mathematics; and (c) pension law and (2) the term of credit for qualifying examinations successfully completed.

Time permitting, after discussion of the program by Committee members, interested persons may make statements germane to the subjects under consideration. Persons wishing to make oral statements are requested to notify the Committee Management Office in writing prior to the meeting in order to aid in scheduling the time available, and should submit the written text, or, at a minimum, an outline of comments they propose to make orally. Such comments will be limited to ten minutes in length. Any interested person also may file a written statement for consideration by the Joint Board and Committee by sending it to the Committee Management Officer. Notifications and statements should be mailed no later than June 16, 1983 to Mr. Leslie S. Shapiro, Joint Board for the Enrollment of Actuaries, c/o U.S. Department of the Treasury, Washington, D.C 20220.

Dated: May 23, 1983.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Music Advisory Panel; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Challenge Section) to the National Council on the Arts will be held on June 13–14, 1983, from 9:00 a.m.–5:30 p.m. in Room M–07 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b to Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 682–5433.

Dated: May 20, 1983.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–537]

Department of Energy, Tennessee Valley Authority and Project Management Corp.; Issuance of Limited Work Authorization

Pursuant to the provisions of 10 CFR 50.10(e) of the Nuclear Regulatory Commission's (Commission) regulations, the Commission has issued a Limited Work Authorization to the U.S. Department of Energy, Tennessee Valley Authority, and Project Management Corporation (applicants) authorizing them to conduct certain site activities in connection with the Clinch River Breeder Reactor Plant (CRBRP), prior to a decision regarding the issuance of a construction permit. A Partial Initial Decision (Limited Work Authorization) on matters relating to the National Environmental Policy Act and site suitability was issued by the Atomic Safety and Licensing Board in the above captioned proceeding on February 28, 1983.

The activities that are authorized are within the scope of those authorized by 10 CFR 50.10(e)(1) and include the following:

Site preparation; excavations for foundations; dewatering and covering the nuclear island base area; temporary plant facilities; parking; railroads spurs; construction utilities; site drainage system and run-off treatment ponds; permanent access road and temporary on-site roads; on-site quarry, crushing facility, borrow and stock pile areas; sewage treatment plant; fire protection system, barge unloading facility; contractor work and storage areas; and construction buildings.

Any activities undertaken pursuant to this authorization are entirely at the risk of the applicants and, except as to matters determined under § 50.10(e)(2), the grant of the authorization has no bearing on the issuance of a construction permit with respect to the requirements of the Atomic Energy Act of 1954, as amended, and rules, regulations, or orders promulgated pursuant thereto.

A copy of (1) the Partial Initial Decision (Limited Work Authorization); (2) the applicants' Preliminary Safety Analysis Report and amendments thereto; (3) the applicants' Environmental Report and amendments thereto; (4) the staff's Final Environmental Statement dated February 1977; Supplement No. 1 to the Final Environmental Statement dated October 1982; and (5) the Commission's letter of authorization, dated May 19, 1983, are available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. 20555; the Oak Ridge Public Library, Civic Center, Oak Ridge, Tennessee 37830; and the Lawson McGhee Public Library, 500 West Church Street, Knoxville, Tennessee 37902.

Dated at Bethesda, Maryland this 19th day of May 1983.

For the Nuclear Regulatory Commission.

J. Nelson Grace,

Director, CRBR Program Office, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

Issuance and Availability "For Comment" of Miscellaneous Documents

The Nuclear Regulatory Commission (NRC) staff has prepared the following documents "For Comment": NUREG–0927, "Evaluation of Water Hammer in Nuclear Power Plants—Technical Findings Relevant to Unresolved Safety Issue A–1;" Standard Review Plan (SRP) Section 5.4.6 "Reactor Core Isolation Cooling System (BWR);" SRP Section 5.4.7, "Residual Heat Removal (RHR) System;" SRP Section 6.3, "Emergency Core Cooling System;" SRP Section 9.2.1, "Station Service Water System;" SRP 9.2.2, "Reactor Auxiliary Cooling Water Systems;" SRP Section 10.3, "Main Steam Supply Systems;" SRP Section 10.4.7, "Condensate and Feedwater Systems;" and the supporting Value/Impact Analysis.

These documents, when issued in final form, will serve as the NRC staff's resolution of USI A–1, "Water Hammer." This issue was identified as an Unresolved Safety Issue in the 1978 Annual Report pursuant to Section 210 of the Energy Reorganization Act of 1974.

The central issue of Unresolved Safety Issue A–1 deals with the frequency and severity of water hammer occurrences and reported damage, and whether such water hammer occurrences have resulted in unacceptable impairment to safety system functions—thereby establishing conditions which could lead to release of radionuclides to the environment.

The staff has completed its technical evaluation of this issue and these findings are reported in NUREG–0927. Based on extensive reviews of reported water hammer occurrences, underlying causes, safety implications and corrective actions taken, the staff recommends revisions to the SRP Sections noted above. These changes reflect design measures (e.g., J-tubes in top feedring steam generators, "keep-full" systems and vacuum breakers in BWRs) which have evolved from both industry and staff attention to water hammer occurrences and methods to avoid such occurrences. In addition, it is clear that operator training and awareness regarding water hammer potential and means to avoid setting up such conditions, will also play an important part in reducing frequency of occurrence. The proposed SRP changes represent currently utilized design features and operational conditions which have been implemented by industry and are reviewed by the staff. Thus these changes are proposed to clearly identify such practices and to maintain proven design concepts and operation requirements in future plants.

These proposed SRP changes amend information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). These proposed changes will be submitted to the Office of Management and Budget for review and approval of the paperwork requirements during the "For Comment" period.

Comments are being solicited from interested organizations, groups and individuals. The staff will evaluate the comments received and address them in the final documents.

Copies of the "For Comment" documents will be available after May 31, 1983. Copies will be sent directly to utilities, utility industry groups and associations and environmental and public interest groups. Other copies will be available for review at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C.; and the Commission's Local Public Document Rooms located in the vicinity of nuclear power plants. Addresses of these Local Public Document Rooms can be obtained from the Chief, Local Public Document Room Branch, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone (301) 492–7536.

Comments should be forwarded in writing to Mr. Karl Kniel, Division of Safety Technology, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, by July 18, 1983.

Dated at Bethesa, Maryland, this 16th day of May, 1983.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13256; (812-5503)]

First Investors Tax-Exempt Money Market Fund, Inc.; Filing of Application

May 18, 1983.

Notice is hereby given that First Investors Tax-Exempt Money Market Fund, Inc. ("Applicant"), 120 Wall Street, New York, New York 10005, an open-end, diversified, management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on March 21, 1983, requesting an order of the Commission pursuant to Section 6(c) of the Act exempting Applicant to the extent necessary to permit Applicant to value its assets through use of the amortized cost method of valuation; to consider the maturity of variable rate demand instruments in its portfolio as the longer of the notice period required before Applicant would be entitled to prepayment on the instrument or the period remaining until the instrument's next interest rate adjustment; and to value in the manner described below rights acquired from commercial banks to sell portfolio securities to such persons. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it was organized under Maryland law on March 11, 1983 as a "money market" fund and that its investment objective is to provide its investors with as high a rate of current income as is consistent with preservation of capital and maintenance of liquidity, which income is exempt from federal income tax. It is further stated that Applicant will invest in fixed rate and variable rate municipal instruments, including participation interests therein, having a maturity of one year or less at the date of purchase and being of "high grade" as determined by a major rating service or, if not rated, of comparable quality as determined by Applicant's board of directors. It is stated that specific categories of municipal instruments in which Applicant may invest are the following:

(1) Municipal bonds rated Aaa or Aa at the date of purchase by Moody's Investors Services, Inc., ("Moody's"), or AAA or AA by Standard & Poor's Corporation ("S&P"); or, if not rated, are determined to be of comparable quality by Applicant's board of directors;

(2) Municipal notes rated MIG-1 or MIG-2 at the date of purchase by Moody's or, if not rated, are determined to be of comparable quality by Applicant's board of directors;

(3) Municipal commercial paper that is rated Prime-1 or Prime-2 by Moody's or A-1+, A-1, or A-2 by S&P, or if not rated, are determined to be of comparable quality by Applicant's board of directors.

Applicant further states that although its objective is to invest 100% of its assets in tax-exempt municipal instruments, Applicant may, either from time to time or for defensive purposes, invest in short-term taxable investments consisting of marketable securities issued or guaranteed as to principal and interest by the United States Government or its agencies or instrumentalities; commercial paper rated Prime-1 by Moody's or A-1+ or A-1 by S&P; certificates or deposit of domestic branches of U.S. banks with assets of $500 million or more; and bankers' acceptances.

Applicant represents that unless its investment adviser recommends to the contrary in response to market conditions or to any other factor necessitating a defensive investment posture towards municipal instruments, Applicant will not invest more than 20 percent of its assets in taxable securities. It is also stated that Applicant may enter into repurchase agreements applicable to United States Treasury or agency obligations. Applicant represents that it will not invest in a repurchase agreement maturing in more than seven days if any such investment together with all other illiquid assets it holds exceed 10% of Applicant's total assets.

Applicant states further that the municipal instruments in which it invests may include variable rate demand instruments which provide for a periodic adjustment in the interest rate payable on the instrument and permit the holder to demand payment of the unpaid balance plus accured interest upon seven calendar days' notice. It is stated that the terms of these instruments will provide for interest rate adjustments at intervals ranging from daily to six months. Applicant may purchase participation interests in variable rate demand instruments to produce a negotiated, variable rate yield to Applicant based on the applicable interest rate adjustment index for such security, it is stated. Applicant represents that the variable rate demand instruments it purchases will satisfy the requirements of, and that the maturities thereof will be determined in accordance with, the procedures set forth in proposed Rule 2a-7, or, if proposed Rule 2a-7 is ultimately adopted, the Rule as so adopted.

Applicant states that it also may purchase securities together with the right to resell them to the seller at an agreed-upon price or yield within a specified period prior to the maturity date of such securities ("stand-by commitments"). It is further stated that Applicant intends to enter into stand-by commitments soley with banks (unless Applicant shall obtain an exemptive order from the Commission to permit it to aquire stand-by commitments from brokers or dealers) and for the purpose of maintaining liquidity to meet unanticipated redemptions. Applicant represents that its acquisition of stand-by commitments will not affect the valuation or assumed maturity of the underlying muncipal obligations, which would continue to be valued at amortized cost.

As here pertinent, Section 2(a)(41) of the Act defines "value" to mean: (i) With respect to securities for which market quotations are readily available, the market value of such securities, and

(ii) with respect to other securities and assets, fair value as determined in good faith by the board of directors or a registered investment company. Rule 22c-1 provides, in part, that no registered investment company or principal underwriter therefor issuing any redeemable security shall sell, redeem, or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or sell such security.

Rule 2a-4 provides, as here relevant, that the current net asset value of a redeemable security issued by a registered investment company used in computing its price for purposes of distribution, redemption and repurchase shall be an amount which reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a-4 further states that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by an investment company's board of directors. Prior to the filling of the application, the Commission expressed its view that, among other things, Rule 2a-4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and that it would be inconsistent generally with the provisions of Rule 2a-4 for a "money market" fund to value its portfolio instruments with over 60-day maturities on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977).

Section 6(c) of the Act provides, in part, that the Commission may, upon application, conditionally or unconditionally exempt any person, security, or transaction, or any classes of persons, securities, or transactions, from any provision or provisions of the Act or the rules thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of its exemptive request to permit the use of amortized cost valuation, Applicant states that: (a) The amortized cost method of valuation will permit Applicant to provide the stability of principal and steady flow of investment income demanded by investors; (b) given the nature of Applicant's policies and expected operations, there will normally be a relatively negligible discrepancy between the market value and the amortized cost value of Applicant's portfolio securities; (c) the possibility of a change in Applicant's price per share is largely eliminated by Applicant's policies and restrictions; and (d) by reason of the stable price Applicant expect to maintain, investors in Applicant will receive a yield similar to yields available in the general debt market that otherwise would not be available to them if Applicant were required to maintain a portfolio having an average maturity, or a duration, shorter than that which Applicant proposes.

In addition to the foregoing, Applicant consents to issuance of the requested order of exemption subject to the following conditions:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's Board of Directors undertakes—as a particular responsibility within its overall duty of cared owed to shareholders of Applicant to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objective, to stabilize its net asset value per share, as computed for the purposes of distribution, redemption and repurchase, at $1.00 per share.

2. Included among the procedures to be adopted by the Board of Directors of Applicant shall be the following:

(a) Review by the Board of Directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's amortized cost price per share, and maintenance of records of such review.[1]

(b) In the event deviation from Applicant's $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the Board of Directors will promptly consider what action, if any, should be Initiated.

(c) Where the Board of Directors believes that the extent of any deviation from Applicant's amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the average portfolio maturity of Applicant; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that it will not: (a) Purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days.[2]

4. Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 2 above, and Applicant will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Board of Directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the meeting of the Board of Directors. The documents preserved to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, to those U.S. dollar-denominated instruments which its Board of Directors determines present minimal credit risks, and which are of "high quality" as determined by any major rating service, or in the case of any instrument that is not rated, is of comparable quality as determined by the Board of Directors.

6. Applicant will include in each quarterly report, as an attachment to Form N-1Q, a statement as to whether

[1] To fulfill this condition, Applicant states that it intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the Board of Directors in the exercise of its discretion to be appropriate indicators of value, which may include, among others: (i) Quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes or money market instruments published by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce the dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

VOL 48 ISS 103 26 1983 MY UMI

any action pursuant to condition 3(c) was taken during the preceding fiscal quarter, and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2086]

New York; Declaration of Disaster Loan Area

Broome and Oneida Counties in the State of New York constitute a disaster area as a result of damage caused by severe weather and tornadoes beginning on May 2, 1983. Eligible persons, firms and organizations may file applications for physical damage until the close of business on July 18, 1983, and for economic injury until the close of business on February 17, 1984, at the address listed below: U.S. Small Business Administration, Federal Building, Room 1071, 100 South Clinton Street, Syracuse, New York 13260 or other locally announced locations.

Interest rates for applicant filing for assistance are as follows:

	Percent
Homeowners with credit available elsewhere	11.125
Homeowners without credit available elsewhere	5.625
Businesses with credit available elsewhere	10.500
Businesses without credit available elsewhere	8.000
Businesses (EIDL) without credit available elsewhere	8.000
Other (non-profit organization including charitable and religious organizations)	11.375

It should be noted that assistance for agricultural enterprises is the primary responsibility of the Farmers Home Administration as specified in Pub. L. 96-302.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008)

Dated: May 17, 1983.

James C. Sanders,

Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA); Special Committee 135—Environmental Conditions and Test Procedures for Airborne Equipment; Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 135 on Environmental Conditions and Test Procedures for Airborne Equipment to be held on June 15, 1983, at the Cathedral Hill Hotel, Van Ness & Geary Streets, San Francisco, California, commencing at 9:00 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of the Fourth Meeting Held on October 20-22, 1981; (3) Review Proposed Final Draft Section on Explosion Testing for Incorporation into RTCA and European Organization for Civil Aviation Electronics (EUROCAE) Documents concerning Environmental Conditions and Test Procedures for Airborne Equipment; (4) Discuss Proposed Revision of RTCA Document DO-160A and EUROCAE Document ED-14A "Environmental Conditions and Test Procedures for Airborne Equipment"; (5) Assignment of Change Coordinators; (6) Establish Schedule for Completing Committee Work; and (7) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, D.C. 20005; (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C. on May 16, 1983.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4910-13-M

[Summary Notice No. PE-83-12]

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: June 15, 1983.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. ——, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on May 20, 1983.

Donald P. Byrne,

Acting Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
23635	Deere & Co.	14 CFR 61.57(d)	To permit petitioner's pilots in command to credit three takeoffs and landings to a full stop in a visual simulator as night recency experience and also to extend that training period for an additional 90 days until which time that pilot will undergo his next six months simulator training.
23411	John M. Houston	14 CFR 121.411(a)(1)	Reconsideration of Denial of Exemption 3723 to permit petitioner to qualify as a simulator pilot check airmen without holding at least a Class III medical certificate.
21812	Albuquerque Int'l. Balloon Fiesta, Inc.	14 CFR 61.3 and 91.27	To allow certain foreign balloon pilots and foreign balloons to participate in the 12th Annual Albuquerque Int'l. Balloon Fiesta during the period of October 1-9, 1983, without complying with the pilot certification and airworthiness requirements of these sections.
17067	Sis-Q Flying Service, Inc.	14 CFR 91.27	To extend Exemption 2430B for another two years or unless sooner superceded or rescinded, to permit petitioner to ferry its four-engine McDonnell Douglas DC-6 aircraft with one engine inoperative when operating under contract with the U.S. Forest Service for forest fire control. Exemption 2430B terminates on July 31, 1983.

DISPOSITIONS OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought—disposition
23616	Aero West Airlines, Inc.	14 CFR 91.307	To allow operation in the United States, under a service to small communities exemption, of 3 civil, subsonic planes powered by two engines that have not been shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1988: 3 B-737. *Granted 5/11/83.*
23629	Sunworld Int'l. Airways	14 CFR 91.307	To allow operation in the United States, under a service to small communities exemption, of 2 civil, subsonic "Stage 1 airplanes" powered by two engines that have not shown to comply with the applicable operating noise limits as follows: Until not later than January 1, 1988: 2 DC-9. *Granted 5/18/83.*
23546	Owensboro Aviation	14 CFR 93.113	To permit petitioner to conduct fixed wing Special VFR operations within the Lousville (Standiford) Airport Traffic Control Zone under less than basic VFR conditions. Petitioner's operations are pipeline patrol. *Granted 5/13/83.*
23159	Department of Defense	14 CFR 91.71 (c) and (d)	To permit acrobatic flight within Federal airways and control zones below 1500 feet above the surface in specific locations and under specific conditions. *Granted 5/10/83.*
23493	Riley Aircraft Mfg., Inc.	14 CFR 21.195(a)	To permit petitioner a Designated Alteration Station, to issue experimental airworthiness certificates for modified aircraft to be used for market survey, sales demonstrations, and crew training. *Partial grant 5/13/83.*

[FR Doc. 83-14187 Filed 5-25-83; 8:45 am]

BILLING CODE 4910-13-M

Federal Railroad Administration

[Waiver Petition Docket Nos. RSGM-83-2, -5, -8, -11, -16 and -18]

Petitions for Waiver of Safety Glazing Standards; Atchison, Topeka, and Santa Fe Railway Co. et al.

Notice is hereby given that six petitioners have submitted requests for temporary or permanent waivers of compliance with Safety Glazing Standards (49 CFR Part 223). The Federal Railroad Administration (FRA) published a final rule on December 31, 1979, that requires that all newly built and most existing railroad equipment have improved safety glazing materials installed in order to reduce the risk of death or serious injury resulting from flying objects, including bullets. The regulations provide for the affected locomotives, passenger cars, and cabooses to be equipped with certified glazing in all windows after June 30, 1983.

The individual petitions for a waiver of compliance with this regulation are described below. The description indicates the nature and extent of the relief requested as well as any information that has been submitted in support of the request for the waiver of compliance.

Interested persons are invited to participate in these proceedings by submitting written data, views, or comments. FRA does not anticipate scheduling an opportunity for oral comment since the facts do not appear to warrant it. All communications concerning these petitions must identify the appropriate Docket Number (e.g. FRA Waiver Petition Docket Number RSGM-83-5) and should be submitted in triplicate to the Docket Clerk, Office of

VOL 48 ISS 103 MAY 26 1983 UMI

Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Communication received before July 15, 1983 will be considered by the Federal Railroad Administration before action is taken. All comments will be available for examination both before and after the closing date for comments, during regular business hours (9:00 a.m.–5:00 p.m.) in room 7321A, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

Atchison, Topeka and Santa Fe Railway Company

(FRA Waiver Petition Docket No. RSGM–83–2)

The Atchison, Topeka and Santa Fe Railway Company (ATSF) seeks this waiver for approximately 600 locomotives. The ATSF has retrofitted about 900 locomotives with type 1 and type 11 glazing material but will not be able to complete the remaining 600 locomotives within the expiration date of June 30, 1983. A great number of man-hours are required for modifying or equipping each locomotive with type 1 and type 11 glazing material. It is necessary to remove all existing glazing material, rubber molding, sliding window frames and slide tracks. Cab window frame channels must be cleaned and repaired and new rubber molding applied before certified glazing can be applied. Therefore, the ATSF is petitioning for an extension of time to complete the remaining locomotives.

Chicago, Milwaukee, St. Paul and Pacific Railroad Company

(FRA Waiver Petition Docket Number RSGM–83–5)

The Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) seeks a temporary waiver for 40 of its fleet of 180 cabooses. The temporary waiver sought by the MILW was for the completion of its caboose retrofit program to be extended to June 30, 1984. This extension is requested because of heavy restraints on expenditures due to the economy, and secondly because the negotiatons for removal of cabooses on their property are still unresovled.

Birmingham Southern Railroad Company

(FRA Waiver Petition Docket No. RSGM–83–8)

The Birmingham Southern Railroad Company (BS) seeks a permanent waiver of compliance with Part 223 for approximately 18 of their present fleet of 22 locomotives.

The BS states that they have not had a major problem with vandalism and no reported incidents of injury to employees that the installation of the glazing materials would eliminate. Also, the cost of retrofitting including inventoring of material would be a heavy burden for a small railroad to bear.

Lake Superior and Isbpeming Railroad Company

(FRA Waiver Petition Docket No. RSGM–83–11)

The Lake Superior and Ishpeming Railroad Company (LS&I) seeks a waiver of compliance with Part 223 for 22 of their fleet of 23 locomotives.

The LS&I states that due to a decline in business that they are operating at 50% of capacity, that they operate through very sparsely populated areas and have not encountered the "stoning" problems associated with densely populated areas.

They have one locomotive equipped with certified glazing at this time with the intent of completing the remainder when they become due for overhaul or when glass replacement is required for other reasons.

Staten Island Rapid Transit Operating Authority

(FRA Waiver Petition Docket No. RSGM–83–16)

The Staten Island Rapid Transit Operating Authority (SIRT) seeks a permanent waiver of compliance with § 223.15(c) requiring the installation of four emergency windows for 52 rapid transit cars acquired from the St. Louis Car Company as part of the total RT5C (R44) order of the New York City Transit Authority.

The SIRT said that during nine years of operating the R44 class equipment that there are no recorded incidents which would have benefited from the use of emergency exits on their equipment. The SIRT believes the eight pair of double panel doors uniformly spaced on each side of the car are more than adequate in supplying the necessary emergency evacuation exits under the supervision and control of the on-board train personnel. The SIRT believes the requirement of four emergency exits per car to be operable by the general public at all times could lead to catastrophic results due to attitude, and familiarity with its operation by the public.

Sourtheastern Michigan Transportation Authority

(FRA Waiver Petition Docket No. RSGM–83–18)

The Southeastern Michigan Transportation Authority (SEMTA) seeks a temporary waiver of compliance with Part 223 for 23 passenger cars.

The SEMTA states that due to delays from the manufacturers, of their new polycarbonate glazing, they need more time to retrofit their cars with certified glazing. According to SEMTA there has been only one incident of projectile penetration of a window on their commuter trains in the last five years. This incident resulted in no injuries or claims.

This notice is issued under the authority of Sectioin 202 of the Federal Railroad Safety Act of 1970, 84 Stat. 97 (45 U.S.C. 43) and § 1.49(m) of the regulations of the Office of the Secretary of Transportation 49 CFR 1.49(m).

Issued in Washington, D.C. on May 18, 1983.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

[FR Doc. 83–13837 Filed 5–25–83; 8:45 am]

BILLING CODE 4910–06–M

[FRA Waiver Petition Docket Nos. LI–80–29, LI–83–1, LI–83–4, LI–83–6, LI–83–7]

Waivers of Compliance, Temporary or Permanent; Chessie System et al.

Notice is hereby given that five petitioners have submitted requests for temporary or permanent waivers of compliance with the Locomotive Safety Standards (49 CFR Part 229).

The individual petitions for waiver of compliance with these standards are described below. The description of each petition indicates the nature and extent of the relief requested as well as the information that has been submitted in support of that petition.

Interested persons are invited to participate in these proceedings by submitting written data, views, or comments. FRA does not anticipate scheduling an opportunity for oral comment since the facts do not appear to warrant it. All communications concerning these petitions must identify the appropriate Docket Number (e.g. FRA Waiver Petition Docket Number LI–83–1) and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Communications received before July 15, 1983 will be considered before final action is taken. All comments will be available both before and after the closing date for comments, during regular business hours (9:00 a.m. to 5:00 p.m.) in room 7321A, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

Chessie System

(FRA Waiver Petition Docket No. LI–80–29)

The Chessie System (C&O) seeks a permanent waiver of compliance for 19 of its SD–18 class locomotives with the requirement in § 229.55(c) of the Locomotive Safety Standards (49 CFR 229.55(c)) that the minimum brake cylinder pressure shall be 30 pounds per square inch. These locomotives are used primarily in yard and hump service, but occasionally are use in road freight service. They are equipped with six wheel trucks, clasp brakes, composition brake shoes, and a differential type J–1.6–16 relay valve which provides 27 PSI brake cylinder pressure.

Bay Colony Railroad Corporation

(FRA Waiver Petition Docket No. LI–83–1)

The Bay Colony Railroad Corporation (BCLR) seeks a permanent waiver of compliance with the requirement in § 229.117 of the Locomotive Safety Standards that its five locomotives be equipped with speed indicators. The BCLR has upgraded their track which permits a maximum freight train speed of 25 mph.

None of their existing locomotives, on hand or on order, are equipped with speed indicators. The cost to equip 20-year old locomotives with speed indicators which would only increase the maximum allowable speed by 5 mph is not economically justified. The track speed will not be increased further in the foreseeable future. The BCLR operates over approximately 124.4 miles of former Conrail track of which nearly half is now Class II track. The operation is divided into five groups wholly within the Commonwealth of Massachusetts.

Central Wisconsin Railroad Company

(FRA Waiver Petition Docket No. LI–83–4)

The Central Wisconsin Railroad Company (CWR) seeks a permanent waiver of compliance with the requirement in § 229.117 of the Locomotive Safety Standards that its locomotives be equipped with speed indicators. The CWR has a maximum authorized speed of 25 mph. They operate with eight locomotives equipped with friction bearings and there is no speed indicator available for installation on these locomotives.

Wisconsin Western Railroad Corporation

(FRA Waiver Petition Docket No. LI–83–6)

The Wisconsin Western Railroad Corporation (WWRC seeks a permanent waiver of compliance with the requirement in § 229.117 of the Locomotive Safety Standards that its locomotives be equipped with speed indicators. The WWRC has a maximum authorized speed of 25 mph. They operate with two locomotives equipped with friction bearings and there is no speed indicator available for installation on these locomotives.

Elkhorn and Walworth Railroad Company

(FRA Waiver Petition Docket No. LI–83–7)

The Elkhorn and Walworth Railroad Company (EWRC) seeks a permanent waiver of compliance with the requirements in § 229.117 of the Locomotive Safety Standards that its locomotives be equipped with speed indicators. The EWRC has a maximum authorized speed of 25 mph. They operate with six locomotives equipped with friction bearings and there is no speed indicators available for installation on these locomotives.

This notice is issued under the authority of Sections 1, 2, 5, 9, 36 Stat. 913, 914, 45 U.S.C. 22, 23, 28, 34; Section 6 (e) and (f), 80 Stat. 939, 940, 49 U.S.C. 1655 (e) and (f); § 1.49(c) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(c).

Issued in Washington, D.C. May 18, 1983.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

BILLING CODE 4910–06–M

[Waiver Petition Docket Nos. RSGM–83–1,–3, –4, –6, –7, –9, –10, –12 through –15, –17, –19 through –25]

Petitions for Waiver of Safety Glazing Standards; Corinth and Counce Railroad Co. et al.

Notice is hereby given that nineteen railroads have submitted requests for permanent or temporary waivers of compliance with Safety Glazing Standards (49 CFR Part 223). The Federal Railroad Administration (FRA) published a final rule on December 31, 1979, that requires that all newly built and most existing railroad equipment have improved safety glazing materials installed in order to reduce the risk of death or serious injury resulting from flying objects, including bullets. The regulations provide for the affected locomotives, passenger cars, and cabooses to be equipped with certified glazing in all windows after June 30, 1983.

The individual railroads seeking a waiver of compliance with this regulation are listed below. In this listing FRA has identified the railroad, the specific docket designation and the number of locomotives, passenger cars or cabooses that are involved in each request. Each of the petitions are similar in most respects. Each railroad operates twelve or less locomotives and has experienced no vandal related damage to the windows of its equipment. Most of these railroads operate in rural surroundings and the others provide service in very compact industrial areas. The petitioners generally indicate that the cost of retrofitting would be very costly in terms of their limited operating budget.

The railroads seeking the waivers are as follows:

1. The Corinth and Counce Railroad company (Docket No. RSGM–83–1) which operates three locomotives and one caboose.

2. Central California Traction Company (Docket No. RSGM–83–3) which operates four locomotives and three cabooses.

3. Roscoe, Synder and Pacific Railway (Docket No. RSGM–83–6) which operates two locomotives and one caboose.

4. Tradewater Railway Company (Docket No. RSGM–83–6) which operates three locomotives.

5. Dakota Rail (Docket No. RSGM–83–7) which operates two locomotives and one caboose.

6. Bay Colony Railroad Corporation (Docket No. RSGM–83–9) which operates five locomotives.

7. Little Rock and Western Railway Corporation (Docket No. RSGM–83–10) which operates two locomotives.

8. Central Wisconsin Railroad Company (Docket No. RSGM–83–12) which operates eight locomotives.

9. Berlin Mills Railway, Inc. (Docket No. RSGM–83–13) which operates one locomotive.

10. Natchez Trace Railroad (Docket No. RSGM–83–14) which operates three locomotives.

11. The Pittsburg and Lake Erie Railroad Company (Docket No. RSGM–83–15) which operates four passenger coaches.

12. Omaha, Lincoln and Beatrice Railway Company (Docket No. RSGM–83–17) which operates two locomotives.

VOL 48 ISS 103 MAY 26 1983 UMI

13. Andalusia and Conecuh Railroad Company, Inc. (Docket No. RSGM–83–19) which operates one locomotive.

14. East Tennessee and Western North Carolina Railroad Company (Docket No. RSGM–83–20 which operates two locomotives.

15. Ann Arbor Railroad System (Michigan Interstate Railway Company) (Docket No. RSGM–83–21) which operates three locomotives and one caboose.

16. Prairie Central Railway Company (Docket No. RSGM–83–22) which operates seven locomotives.

17. Kyle Railroad Company (Docket No. RSGM–83–23) which operates twelve locomotives.

18. Wisconsin Western Railroad Corporation (Docket No. 83–24) which operates two locomotives.

19. Elkhorn and Walworth Railroad Company (Docket No. RSGM–83–25) which operates six locomotives.

Interested persons are invited to participate in these proceedings by submitting written data, views, or comments. FRA does not anticipate scheduling an opportunity for oral comment since the facts do not appear to warrant it. All communications concerning these petitions must identify the appropriate Docket Number (e.g., FRA waiver petition Docket No. RSGM–83–1) and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590.

Communications received before July 15, 1983 will be considered by the Federal Railroad Administration before action is taken. All comments will be available for examination both before and after the closing date for comments, during regular business hours (9 a.m.–5 p.m.) in room 7321A, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

This notice is issued under the authority of Section 202 of the Federal Railroad Safety Act of 1970, 84 Stat. 97 (45 U.S.C. 431) and § 1.49(m) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(m).

Issued in Washington D.C. on May 18, 1983.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

BILLING CODE 4910-06-M

National Highway Traffic Safety Administration

National Highway Safety Advisory Committee; Public Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App. I), notice is hereby given of meetings of the National Highway Safety Advisory Committee to be held June 15–17, 1983.

The agenda will consist of subcommittee meetings on the 15th, 16th, and the 17th, and a full committee meeting in the afternoon of the 16th. On June 15th the Accident Investigation & Records Subcommittee will meet in room 6200 from 1:00 p.m.–2:00 p.m. The Executive Subcommittee will meet from 2:00 p.m.–5:00 p.m. in room 6202. On June 16th the Highway Environment/55 MPH Subcommittee will meet from 8:30 a.m.–12 Noon in room 6202 and the full Committee will meet from 1:00 p.m.–5:00 p.m. in room 2230. On June 17th the Alcohol Subcommittee will meet from 8:30 a.m.–12 Noon in room 6200.

All meetings will be held in the DOT Headquarters Building, 400 Seventh Street, SW., Washington, D.C. Attendance is open to the interested public, but may be limited to the space available. Members of the public may present a written statement to the Committee at any time.

This meeting is subject to the approval of the appropriate DOT officials. Additional information may be obtained from the NHTSA Executive Secretariat, 400 Seventh Street, SW., Washington, D.C. 20590, telephone 202–426–2870.

Issued in Washington, D.C. on: May 23, 1983.

Robert E. Doherty,

Executive Secretary.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations [49 CFR Part 107, Subpart B], notice is hereby given of the exemptions granted in April 1983. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
3126–P	DOT–E 3126	Valcor Engineering Corp. Springfield, NJ	49 CFR 173.304, 175.3	To become a party to exemption 3126. (Modes 1, 2, 3 and 4.)
3549–P	DOT–E 3549	Thiokol Corp. Huntsville, Al	49 CFR 173.65(a), 173.77	To become a party to exemption 3549 (Modes 1 and 2.)
3630–X	DOT–E 3630	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 177.839(a) 177.839(b)	To authorize use of a DOT specification 33A polystyrene case to contain four 5-pint glass bottles of nitric acid. (Mode 1.)
3630–X	DOT–E 3630	Allied Chemical, Morristown, NJ	49 CFR 177.839(a), 177.839(b)	To authorize use of a DOT specification 33A polystyrene case to contain four 5-pint glass bottles of nitric acid (Mode 1.)
4453–X	DOT–E 4453	Kentucky Powder Co. Lexington, KY	49 CFR 173.114a(h)(3)	To authorize use of a non-DOT specification bulk, hopper-tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Mode 1.)
4803–X	DOT–E 4803	Dowell Inc., Tulsa, OK	49 CFR 173.245, 173.248, 173.249, 173.263, 173.272, 173.289, 178.343–5.	To authorize use of non-DOT specification cargo tank motor vehicles, for shipment of certain corroeve liquids. (Mode 1.)
5206–X	DOT–E 5206	Gulf Oil Chemicals Co. Houston, TX	49 CFR 173.114a	To authorize privately operated bulk hopper-type units, for transportation of blasting agents. (Mode 1.)
5206–X	DOT–E 5206	Austin Powder Co., Cleveland, OH	49 CFR 173.114a	To authorize privately operated bulk hopper-type units, for trasportation of blasting agents. (Mode 1.)
5206–X	DOT–E 5206	Nelson Brothers, Inc., Parnell, AL	49 CFR 173.114a	To authorize privately operated bulk hopper-type units, for transportation of blasting agents. (Mode 1.)
5248–X	DOT–E 5248	The Boeing Co., Seattle, WA	49 CFR 173.389(g), 175.3	To authorize shipment of a certain quantity of polonium-210 in any DOT specification approved outer Type A packaging. (Modes 1, 2, 4 and 5.)
5662–X	DOT–E 5662	Dow Chemical Co., Midland, MI	49 CFR 173.353(e), 173.353a	To authorize use of a DOT specification 51 portable tank, for shipment of class B poisonous liquids. (Modes 1, 2 and 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6267–X	DOT–E 6267	Coastal Industries, Inc., Carlstadt, NJ	49 CFR 173.217(a)	To authorize use of DOT and non-DOT specification fiberboard boxes, for shipment of certain oxidizing materials. (Modes 1, 2 and 3.)
6530–P	DOT–E 6530	Savage Welding Supplies, Inc., Phoenix, AZ.	49 CFR 173.302	To become a party to exemption 6530. (Modes 1 and 2.)
6557–X	DOT–E 6557	General Fire Extinguisher Corp., Northbrook, IL.	49 CFR 175.3, 178.36–4(c), 178.37–4(c), 178.50–4(c).	To authorize deviation from the requirements of the inspector's report for DOT specification 3A, 3AA, and 4B cylinders, for shipment of certain nonflammable compressed gases. (Modes 1, 2, 3, 4 and 5.)
6762–P	DOT–E 6762	Economy Service & Sales Co., Philadelphia, PA.	49 CFR 173.286(b)(2), 175.3	To become a party to exemption 6762. (Modes 1, 2, 3 and 4.)
6762–P	DOT–E 6762	Combustioneer Water, Rockville, MD	49 CFR 173.286(b)(2), 175.3	To become a party to exemption 6762. (Modes 1, 2, 3 and 4.)
7015	DOT–E 7015	Helium Sales, Inc., Amarillo, TX	49 CFR 172.101, 173.315(a)(1)	To become a party to exemption 7015. (Modes 1, 2 and 3.)
7025	DOT–E 7025	Helium Sales, Inc., Amarillo, TX	49 CFR 172.101, 173.315(a)(1)	To become a party to exemption 7025. (Mode 1.)
7052–X	DOT–E 7052	Bren-Tronics, Inc., Commack, NY	49 CFR 172.101, 175.3	To authorize shipment of batteries containing lithium and other materials, classed as flammable solids. (Modes 1, 2, 3 and 4.)
7060–P	DOT–E 7060	Coast Air Freight Inc., Long Beach, CA	49 CFR 175.702(b), 175.75(a)(3)(ii).	To become a part to exemption 7060. (Mode 4.)
7060	DOT–E 7060	Sports Air Travel, Inc., Troutdale, OR	49 CFR 175.702(b), 175.75(a)(3)(ii).	To become a party to exemption 7060. (Mode 4.)
7076–P	DOT–E 7076	Oxford Chemicals, Inc., Atlanta, GA	49 CFR 173.266(b)	To become a party to Exemption 7076. (Modes 1, 2 and 3.)
7446–X	DOT–E 7446	Kaiser Aluminum & Chemical Corp., Ene, PA.	49 CFR 173.302(a)(1), 178.36	To authorize shipment of dry powder-fire extinguishant charge with compressed air or nitrogen in non-DOT specification seamless aluminum cylinders. (Modes 1, 2 and 3.)
7451–X	DOT–E 7451	Union Carbide Corp., Danbury, CT	49 CFR 173.304, 173.315	To authorize use of non-DOT specification pressure vessel, for shipment of a nonflammable gas. (Modes 1 and 3.)
7466–X	DOT–E 7466	Firmenich Inc., Princeton, NJ	49 CFR 173.119(a)(7), 175.3	To authorize shipment of certain flammable liquid mixtures, in a spun 99-percent pure aluminum can, overpacked in a corrugated fiberboard box. (Modes 1, 2, 3 and 4.)
7489–X	DOT–E 7489	Moor Co., Inc., Milwaukee, WI	49 CFR 172.312, 173.249	To authorize shipment of a corrosive liquid in specified non-DOT specification metal container having a capacity of 1 quart or less, in a DOT Specification 37A metal drum. (Modes 1, 2 and 3.)
7526–P	DOT–E 7526	Dow Chemical Co., Freeport, TX	49 CFR 173.134	To become a party to exemption 7526. (Modes 1 and 3.)
7721–X	DOT–E 7721	Applied Environments Corps., Woodland Hills, CA.	49 CFR 173.302(a)(4), 175.3	To authorize manufacture, marking, and sale of non-DOT specification steel cylinders, for transportation of certain nonflammable, nonliquefied compressed gases. (Modes 1, 2 and 4.)
7725–X	DOT–E 7725	Economics Laboratory, Inc., St. Paul, MN	49 CFR 172.201(a)(3)	To authorize shipping description on shipping papers to contain coded information. (Modes 1, 2 and 3.)
7887–P	DOT–E 7887	Vulcan Systems Inc., Rantoul, IL.	49 CFR 172.101, 173.111, 175.3, Part 107 Appendix B.	To become a party to exemption 7887. (Modes 1, 2, 3, 4 and 5.)
7985–X	DOT–E 7985	Process Engineering, Inc., Plaistow, NH	49 CFR 173.315(a)	To authorize manufacture, marking and sale of non-DOT specification vacuum insulated portable tanks, for shipment of non-flammable gases. (Modes 1 and 3.)
8080–X	DOT–E 8080	Allied Chemical, Morristown, NJ	49 CFR 173.164	To authorize transport of dry chromic acid in a DOT specification 105A300W tank car which has been converted to DOT specification 111a100W1; or a DOT specification 103AW tank car converted to DOT specification 103W. (Mode 2.)
8129–X	DOT–E 8129	Allied Chemical, Morristown, NJ	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To authorize shipment of various waste hazardous materials packed in bottles surrounded by absorbent material overpacked in DOT specification 37A, 17H, or 6J drums. (Mode 1.)
8129–P	DOT–E 8129	Safety Specialists, Inc., San Jose, CA	49 CFR 177.834(k) Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to exemption 8129. (Mode 1.)
8129–X	DOT–E 8129	FMC Corp., Princeton, NJ	49 CFR 177.834(K), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To authorize shipment of various waste hazardous materials packed in bottles surrounded by absorbent material overpacked in DOT specification 37A, 17H, or 6J drums. (Mode 1.)
8129–P	DOT–E 8129	Stanford University, Standford, CA	49 CFR 177.834(k) Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to exemption 8129. (Mode 1.)
8152–X	DOT–E 8152	Allied Corp., Morristown, NJ	49 CFR 177.824(b) 178.343–2	To authorize shipment of hydrofluoric acid, solution in an unlined DOT specification MC–312 cargo tank. (Mode 1.)
8196–P	DOT–E 8196	Allied Chemical Co., Marristown, NJ	49 CFR 173.119, 173.315(a)	To become a party to exemption 8196. (Modes 1, 2, and 3.)
8214–P	DOT–E 8214	Mercedes-Benz of North America, Inc., Montvale, NJ.	49 CFR 173.153, 173.154, 175.3	To become a party to exemption 8214. (Modes 1, 2, 3 and 4.)
8225–X	DOT–E 8225	Hoover Universasl, Inc., Beatrice, NE	49 CFR 173.119, 173.256, 173.266, Part 173, Subpart F.	To authorize manufacture, marking and sale of non-DOT specification rotationally molded polyethylene portable tanks, for transportation of corroeive liquids, flammable liquids or an oxidizer. (Modes 1, 2 and 3.)
8225–X	DOT–E 8225	Hoover Universal, Inc. Beatrice, NE	49 CFR 173.119, 173.256, 173.266, Part 173, Subpart F.	To authorize cleaning compounds containing hydrofluoric acid not over 52 percent strength as an additional commodity. (Modes 1, 2 and 3.)
8269–X	DOT–E 8269	Olin Corp., East Alton, IL	49 CFR 173.93	To authorize shipment of certain identified solid propellant explosive, class B, in non-DOT specification cylindrical metal cans overpacked in fiberboard boxes. (Modes 1 and 3.)
8535–X	DOT–E 8535	Advance Aviation Services, Inc., Mesa, AZ.	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107 Appendix B.	To authorize carriage of class A, B, & C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (Mode 4.)
8563–X	DOT–E 8563	Ashland Oil, Inc., Columbus, OH	49 CFR 173.266(e), 177.848(a)	To authorize shipment of an oxidizer and a corroeive material in compartmented DOT specification MC–307 or MC–312 cargo tanks, with double bulkheads and completely seperate loading and unloading systems. (Mode 1.)
8577–X	DOT–E 8577	Micor Co., Inc., Milwaukee, WI	49 CFR 172.312, 173.249	To authorize shipment of certain alkaline corrosive liquids n.o.s., in a two quart polyethylene bottle, placed in a molded polyethylene liner, overpacked in a DOT specification 37C steel drum of 3.5–gallon capacity, also containing a non-regulated resin. (Modes 1, 2 and 3.)
8585–X	DOT–E 8585	Bergen Barrel and Drum Co., Demarest, NJ.	49 CFR 173.247, 173.266, 178.19, Part 173 Subpart D, Subpart F, H.	To authorize manufacture, marking and sale of non-DOT specification reusable, rotationally molded, polyethylene container, for shipment of certain corroeive, flammable, class B poisonous liquids, and oxidizer. (Modes 1, 2 and 3.)
8723–P	DOT–E 8723	PACCO, Inc., Tenino, WA	49 CFR 173.114a(h)(3)	To become a party to exemption 8723. (Mode 1.)
8877–P	DOT–E 8877	Allied Chemical, Morristown, NJ	49 CFR 173.119(m)(3), 173.245, 175.3	To become a party to exemption 8877. (Modes 1, 2 and 3.)

VOL 48 ISS 103 MAY 26 1983 UMI

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8911-X	DOT-E 8911	Olin Corp., East Alton, IL	49 CFR 173.101	To authorize shipment of scrap, guillotined small arms ammunition loosely packed in non-DOT specification, nonreusable, closed-top wooden crates or fiberboard boxes, in truck load lots to an incinerator for disposal. (Mode 1.)
8921-X	DOT-E 8921	Hoover Universal, Inc., Bestrice, NE	49 CFR Part 173, Subpart F	To authorize manufacture, marking and sale of nonreusable non-DOT specification steel jacketed polyethylene portable tanks, for transportation of corrosive liquids. (Modes 1, 2 and 3.)
8969-X	DOT-E 8969	McDonnell Douglas Corp., St. Louis, MO	49 CFR 173.79(b), 173.92(b)	To authorize shipment of certain rocket motors with igniter installed (Modes 1 and 3.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6309-N	DOT-E 8995	Olin Corp., Stamford, CT	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification steel portable tanks for transportation of certain nonpoisonous, nonflammable compressed gases. (Modes 1 and 2.)
8802-N	DOT-E 8802	Eve Eisenbahn-Verkehrsmittel-Gesellschaft mbH, Dusseldorf, West Germany	49 CFR 173.315	To authorize use of non-DOT specification IMO Type 5 portable tanks, for transportation of liquefied compressed gases. (Modes 1, 2 and 3.)
8814-N	DOT-E 8814	Structural Composites Industries, Inc., Pomona, CA	49 CFR 173.302(a)(1), 175.3	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic full composite cylinders, for transportation of certain flammable and nonflammable compressed gases. (Modes 1, 2, 3 and 4.)
8815-N	DOT-E 8815	Atlas Powder Co., Dallas, TX	49 CFR 173.114a(b)	To authorize transport of certain blasting agents in a cement mixer motor vehicle. (Mode 1.)
8904-N	DOT-E 8904	Keith Huber, Inc., Guilport, MS	49 CFR 173.119(a), 173.119(m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying generally with DOT specification MC-307/312 except for bottom outlet valve variations and certain other features, for transportation of flammable, corrosive or poisonous waste liquids or semi-solids. (Mode 1.)
8912-N	DOT-E 8912	Schonung, West Germany	49 CFR 171.12(c), 178.116-6(a)	To authorize manufacture, marking and sale of non-DOT specification steel drums of one millimeter thickness, to be used in place of 20/18 gauge, 55-gallon capacity, DOT-17E steel drums. (Modes 1, 2 and 3.)
8945-N	DOT-E 8945	Clark Engineering of Brownwood, Inc., Brownwood, TX	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT specification MC-307/312 except for bottom outlet valve variation, for shipment of liquid and semi-solid waste material. (Mode 1.)
8946-N	DOT-E 8946	U.S. Department of Defense, Washington, DC	49 CFR 173.127	To authorize shipment of nitrocellulose wet with not less than 30% by weight of heptane, in DOT specification containers. (Mode 1.)
8949-N	DOT-E 8949	Aerotransit, Inc., Danvers, MA	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (Mode 4.)
8955-N	DOT-E 8955	Dresser Industries, Inc., Houston, TX	49 CFR 173.110(c)(1), 173.80(b), 173.80(c)	To authorize transport of charged oil well guns with detonators attached. (Modes 1 and 3.)
8956-N	DOT-E 8956	Clif Mock Co., Conroe, TX	49 CFR 173.119, 173.302(a)(1), 173.304(a)(1), 173.304(b)(1), 175.3, 176.3	To authorize manufacture, marking and sale of non-DOT specification stainless steel cylinders, for transportation of nonflammable flammable gases or flammable liquids. (Modes 1, 3 and 4.)
8960-N	DOT-E 8960	Sunshine Aero Industries, Inc., Crestview, FL	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107 Appendix B.	To authorize carriage of class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for shipment by air. (Mode 4.)
8962-N	DOT-E 8962	HTL Industries, Inc., Duarte, CA	49 CFR 173.302(a), 175.3, 178.44	To authorize manufacture, marking and sale of non-DOT specification girth welded stainless steel cylinders, for transportation of a compressed gas. (Modes 1, 2 and 4.)
8964-N	DOT-E 8964	Larson Tool and Stamping Co., Attleboro, MA	49 CFR 173.302, 173.304, 175.3, 178.50-19	To authorize manufacture, marking and sale of DOT specification 4B cylinders that are stamped with prescribed markings in the foot ring of the cylinder containing non-corrosive fire suppressant agents only. (Modes 1, 2, 3, 4 and 5.)
8970-N	DOT-E 8970	Williams Strategic Metals, Inc., Wheat Ridge, CO	49 CFR 173.968	To authorize shipment of arsenical dust, in a non-DOT specification cylindrical steel container. (Mode 2.)
8975-N	DOT-E 8975	Baker Brothers Welding, Inc., Norman, Ok	49 CFR 173.119, 173.245, 178.253	To authorize manufacture, marking and sale of 6-60 gallon non-DOT specification portable tanks manifolded together within a frame and securely mounted on a truck chassis, for transportation of flammable and corrosive liquids. (Mode 1.)
8981-N	DOT-E 8981	Rusk Aviation, Inc., Kankakee, IL	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107 Appendix B.	To authorize carriage of class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for air shipment. (Mode 4.)
8982-N	DOT-E 8982	Olin Corp., Stamford, CT	49 CFR 173.217	To authorize shipment of calcium hypochlorite, hydrated, classed as an oxidizer in DOT specification 56 steel portable tanks. (Modes 1 and 2.)
8983-N	DOT-E 8983	Universal Propulsion Co., Inc., Phoenix, AZ	49 CFR 173.236	To authorize transport of aircraft rocket engines, commercial, which do not comply with the requirements of 49 CFR 173.238, note 1, as engines contain a small amount of class B explosives. (Mode 1.)
8990-N	DOT-E 8990	Pressure Pak, Inc., East Hampton, CT	49 CFR 173.302(a)(1), 175.3, 178.65-2, 178.65-5(a)(4).	To authorize manufacture, marking and sale of non-DOT specification nonrefillable steel inside cylinders, for transportation of nonflammable compressed gases. (Modes 1, 2, 3, 4 and 5.)
8991-N	DOT-E 8991	LeaRonal, Inc., Freeport, NY	49 CFR 172.35(a), 172.400, 172.402(a)(2), 172.402(a)(3), 172.504(a), 173.126, 173.138, 173.237, 173.246, 175.3.	To authorize transport of packages bearing the DANGEROUS WHEN WET label, in motor vehicles which are not placarded FLAMMABLE SOLID W. (Modes 1, 2 and 4.)
8998-N	DOT-E 8998	Oil-Air Industries, Inc., Brookshire, TX	49 CFR 173.302(a)(1), 175.3	To authorize shipment of nitrogen in hydraulic accumulators. (Modes 1, 2, 3 and 4.)
9004-N	DOT-E 9004	Metric Corp., Tulsa, OK	49 CFR 173.119, 173.304, 173.315	To authorize manufacture, marking and sale of non-DOT specification containers, for transportation of flammable liquids and flammable gases. (Mode 1.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9006-N	DOT-E 9009	Stauffer Chemical Co., Westport, CT	49 CFR 173.356	To authorize shipment of thiophosgene in DOT specification 5C steel drums. (Modes 1, 2 and 3.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 7071-P	DOT-E 7071	Clayton Chemical, Los Angeles, CA	49 CFR 172.101, 173.245, 175.3	To become a party to exemption 7071. (Modes 1, 2 and 3.)
EE 7862-X	DOT-E 7862	General Electric Co., Milwaukee, WI	49 CFR 173.302, 175.3	To authorize use of non-DOT specification steel, single trip, inside container, for transportation of a nonflammable gas. (Modes 1, 4 and 5.)

Denials

9007-N Request by U.S. Environmental Protection Agency, Washington, DC to authorize transport of non-DOT specification stainless steel cylinders filled with air which may or may not be radioactive denied April 8, 1983.

Issued in Washington, DC, on May 18, 1983.

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation Materials, Transportation Bureau.

Nuclear Assurance Corporation; Application for Inconsistency Ruling; Public Notice and Invitation To Comment

Correction

In FR Doc. 83-12756 beginning on page 21496 in the issue of Thursday, May 12, 1983, make the following corrections:

1. On page 21497, middle column, between the end of third complete paragraph and the caption **Docket No. IRA-20 (New York State)**, the following text should be inserted:

"As a result of the actions described above, NAC has been forced to halt shipments of spent fuel from Canada. Therefore, in October of 1982, NAC filed separate applications for inconsistency rulings seeking preemption of: (1) the regulations of the Michigan Fire Safety Board and Department of Public Health affecting radioactive materials transportation; (2) the radioactive materials transportation ban on the New York State Thruway; (3) the suspension order issued by letter of the Governor of Vermont; and, (4) the suspension order issued by letter of the representative of the Governor of New York.

"NAC did not seek inconsistency rulings with regard to the applicable regulations of the Ogdensburg Bridge and Port Authority, St. Lawrence County, the Thousand Islands Bridge Authority, or Jefferson County. Nevertheless, since these regulations appear to have contributed to the narrowing of NAC's route selection options, the Department has elected, in accordance with 49 CFR 107.209(b), to consider the issue of inconsistency with regard to these regulations, notwithstanding that application for a ruling has not been filed under 49 CFR 107.203.

"In order to facilitate consideration of the many issues raised, eight separate dockets have been established. Each is described below."

2. In the third column of the same page, first complete paragraph, sixteenth line, "177.825(b)" should have read "177.825(b)(2)".

3. Same column, six lines from the bottom of the page, "177.285(b)(1)" should have read "177.825(b)(1)".

4. On page 21498, first column, eleven lines from the top of the page, "177.285(b)" should have read "177.825(b)".

5. Same column, third complete paragraph, sixth line, "43 FR 16925" should have read "43 FR 16954".

6. On page 21501, middle column, the caption **Docket No. IRA-236 (Thousand Islands Bridges)"** should have read **"Docket No. IRA-26 (Thousand Islands Bridges)".**

7. On page 21506, third column, twenty lines from the bottom of the page, "a transcript" should have read "a transit".

BILLING CODE 1505-01-M

UNITED STATES INFORMATION AGENCY

Order of Succession

Pursuant to the authority vested in me by Section 5 of Reorganization Plan No. 2 of 1977, I hereby authorize and direct the following named official of the United States Information Agency to act for and perform the functions of the Director of the Agency in case of death, resignation, sickness or absence of both the Director and the Deputy Director:

Kenneth Y. Tomlinson, Associate Director for Broadcasting.

This Order shall remain in effect unless and until modified or rescinded in writing by the Director or until the above-named Associate Director has left office.

Dated: May 19, 1983.

Charles Z. Wick,

Director.

CONSUMER PRODUCT SAFETY COMMISSION

Announcing a Change to a Previously Announced Meeting.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 48 FR 22875, Thursday, May 19, 1983.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., Tuesday, May 24, 1983.

CHANGES IN THE MEETING: The Commission meeting scheduled for May 24, 1983 has been postponed until June 1, 1983.

[S–745–83 Filed 5–24–83; 2:45 pm]

BILLING CODE 6355–01–M

2

FEDERAL MARITIME COMMISSION

TIME AND DATE: 9 a.m., June 1, 1983.

PLACE: Hearing Room One, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Parts of the meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Portion open to the public:

1. Docket No. 83–17: Petition of Pacific Westbound Conference and OOCL-Seapac Service for Declaratory Order—Consideration of the record.

Portion closed to the public:

1. Chumet Shipping Co., Inc.—Compliance with requirements of Commission Order in Docket No. 80–61.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary (202) 523–5725.

[S–744–83 Filed 5–24–83; 2:32 pm]

BILLING CODE 6730–01–M

3

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

May 23, 1983.

TIME AND DATE: 10 a.m., Wednesday, May 25, 1983.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: In addition to the previously announced item, the Commission will also consider and act upon the following:

2. Black Diamond Coal Mining Co., Docket No. SE 82–48: Petition for Discretionary Review (Issues include whether the judge properly concluded that the operator could not challenge in a penalty proceeding the special Findings in a section 104(d)(1) withdrawal order, where the operator had not filed a notice of contest of the order, and whether the judge properly concluded that the operator violated 30 CFR 75.400, dealing with the cleaning of coal dust and float coal dust.)

It was determined by a unanimous vote of Commissioners that Commission business required that a meeting be held on this item and that no earlier announcement of the item was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen (202) 653–5632.

FOREIGN CLAIMS SETTLEMENT COMMISSION
[FCSC Meeting Notice No. 6–83]

Announcement in Regard to Commission Meetings and Hearings

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR Part 504), and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings and oral hearings for the transaction of Commission business and other matters specified, as follows:

Date, Time, and Subject Matter

Tuesday, June 7, 1983 at 10:30 a.m.
Consideration of decisions involving claims against the Government of the Czechoslovak Socialist Republic and decisions involving claims for Vietnam prisoner of war compensation.

Subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

All meetings are held at the Foreign Claims Settlement Commission, 1111 20th Street, NW., Washington, D.C. Requests for information, or advance notices of intention to observe a meeting, may be directed to: Administrative Officer, Foreign Claims Settlement Commission, 1111 20th Stree NW., Room 409, Washington, DC 20579. Telephone: (202) 653–6155.

Dated at Washington, D.C. on May 23, 1983.

Judith H. Lock,
Administrative Officer.

Part II

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

VOL 48 ISS 103 MAY 26 1983 UMI

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 897]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 19, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, VA 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
- 102–2: New well (2.5 mile rule)
- 102–3: New well (1000 ft rule)
- 102–4: New onshore reservoir
- 102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
- 107–GB: Geopressured brine
- 107–CS: Coal Seams
- 107–DV: Devonian Shale
- 107–PE: Production enhancement
- 107–TF: New tight formation
- 107–RT: Recompletion tight formation

Section 108: Stripper well
- 108–SA: Seasonally affected
- 108–ER: Enhanced recovery
- 108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

VOL 48 ISS 103 MAY 26 1983 UMI

[Volume 898]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 19, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 Mile rule)
102-3: New well (1000 FT rule)
102-4: New onshore reservoir
102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
107-GB: Geopressured brine
107-CS: Coal Seams
107-DV: Devonian Shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation

Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

VOL 48 ISS 103 MAY 26 1983 UMI

[Volume 896]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 18, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
102-2: New well (2.5 Mile rule)
102-3: New well (1000 Ft rule)
102-4: New onshore reservoir
102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
107-GB: Geopressured brine
107-CS: Coal Seams
107-DV: Devonian Shale
107-PE: Production enhancement
107-TF: New tight formation
107-RT: Recompletion tight formation

Section 108: Stripper well
108-SA: Seasonally affected
108-ER: Enhanced recovery
108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

[Volume 899]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued May 20, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd. Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

Part III

Department of Health and Human Services

Office of Human Development Services

Program Solicitation for Small Business Innovation Research (SBIR) Program on Social Services Research

VOL 48 ISS 103 MY 26 1983 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

[Program Announcement No. 13647-831]

Program Solicitation for Small Business Innovation Research (SBIR) Program on Social Services Research

AGENCY: Office of Human Development Service (HHS).

SUBJECT: Program solicitation for the Small Business Innovation Research (SBIR) program on social services research.

ACTION: Announcement of availability of financial assistance to small businesses interested in the development of programs and products in the field of social services research.

SUMMARY: The Office of Human Development Services (HDS) announces the availability of Fiscal Year 1983 financial assistance for cooperative arrangement under the authority of Section 1110 of the Social Security Act (SSA) for several projects. The competing applications will be accepted for *new* research and development (R&D) under the cooperative arrangement authorized by 15 U.S.C. 638 (Pub. L. 97-219, "Small Business Innovation Development Act of 1982").

This program announcement consists of four parts. Part I covers background information, discusses the purpose of the Small Business Innovation Research and Development Program and briefly describes the FY 1983 process. Part II describes the application process, who is eligible to apply, what funds are expected to be available, and the selection criteria. Part III describes the topic areas in which the cooperative agreements will be awarded. Part IV is the appendix and gives detailed guidance on how to prepare and submit an application. It also includes a copy of the 424 form.

DATE: The closing date for receipt of the application is July 1, 1983.

Part I—General Consideration

A. Scope of This Announcement

This Program Announcement includes research topics of interest to several agencies of the Department of Health and Human Sevices (HHS) including: the Office of Human Development Services (HDS), the Health Care Financing Administration (HCFA), the Office of the Assistant Secretary for Planning and Evaluation (ASPE), and the Social Security Administration (SSA).

HDS has the responsibility for issuing the Program Announcement and receiving applications. The review, evaluation and award of applications, will be the responsibility of each Operating Division (OPDIV) as appropriate for each application. Awards will be made by September 30, 1983. Awards resulting from this announcement are expected to total $162,400. Each OPDIV's share will calculate at .002 percent of its FY 83 Extramural Research and Development (R&D) budget as follows:

OPDIV	Fiscal year 1983 extramural R&D budget (millions)	SBIR set-aside
HDS	30.5	61,000
HCFA	26.2	52,400
ASPE	13.0	26,000
SSA	11.3	23,000
Totals	81.0	162,400

B. Program Purpose

The purpose of the Small Business Innovative Development Act is to stimulate technological innovation within the American small business community and thereby foster jobs, augment industrial productivity, increase competition, and spur economic growth. Small businesses have been both an important source of technological innovation and cost-effective performance of R&D, and will permit the small business sector an increased role in the Federal R&D efforts. The new legislation will give the small business sector an increased role in the Federal R&D effort as well as attract private capital to commercialize the results of federally funded research.

C. Program Goals, Objectives, and Topic Areas

The objective of this solicitation is to invite Phase I applicants from small businesses that have the technological expertise to undertake research in general support of the service programs financed by HHS agencies and offices participating in this announcement. A specific list of research topics and examples of prospective projects follow in part III.

The program goals are intended to involve the small business sector in developing creative and innovative ways of improving and administering service programs. The program is intended to expand the boundaries of service delivery knowledge by drawing on new ideas from small businesses. These new ideas and perspectives should stimulate and challenge both service professionals and the public to respond more effectively to state and local needs.

The goals are limited to projects which can demonstrate substantial prospect of product marketability following completion of the R&D. Applications merely seeking supplemental funds for the provision of services will not be considered responsive. Applications will not be considered responsive if the project proposes to develop a product identical to one already available elsewhere.

D. Definitions

A "small business" is an organization including its affiliates, which is independently owned and operated for profit, is not dominant in its field of operation and can further qualify under the following size standard: Not more than 500 employees (full-time, part-time, temporary or other) during the previous 12 month period in which all affiliated firms are owned or controlled by a single parent firm.

"Research" or "research and development" is defined as: (1) A systematic study directed toward greater knowledge for understanding of the subject studied; (2) a systematic study directed specifically towards applying a new knowledge to meet a recognized need; or (3) a systematic application of knowledge toward the production of useful material(s), device(s) and system(s) or method(s), including design, development and improvement of prototypes and new processes to meet specific requirements.

A "cooperative agreement" is a financial assistance mechanism whereby money and/or direct assistance is provided to carry out approved non-federal activities, and where significant Federal programmatic involvement with the recipient during performance is anticipated by the funding agency.

E. Eligible Applicants

Each organization submitting a grant application under the HDS SBIR Program must qualify as a small business in accordance with the definition given in the announcement. Two-thirds of each SBIR project must be carried out in the same business firm, and the primary employment of the principal investigator must be with the firm at the time of award and during the conduct of proposed project.

F. Available Funds

The Department of Health and Human Services expects to award $162,400 and approximately 6 to 8 grants in the fourth quarter of FY 1983 for the new cooperative arrangements. Subject to Congressional Action on the FY 1984 budget, a limited number of Phase II grants under this announcement may be made during FY 1984.

Under the Phase I goal for FY 83, which is $162,400, the awards will not normally extend beyond six (6) months. The size of the award will vary depending on the specific goals to be achieved. In no case will the award exceed $500,000. The average total is expected to be around $15,000.00 for a total of about eight (8) awards.

At this time, no money is available in FY 1983 for Phase II awards. In FY 1984, both Phase I and II awards will be made, although due to constrained budgets it is likely that only a few of the most successful Phase I projects will be followed with a Phase II award. Phase II awards are expected to have an average annual cost of approximately $100 thousand and may be made for a period which will normally not exceed two (2) years. Detailed instructions for Phase II awards will be made available in a subsequent announcement.

G. Cost-Sharing

The Appropriation Act for the Department requires that recipient institutions share in the cost of activities supported by research grants and cooperative agreements. For-profit organizations must cost-share by an individual agreement which specifies the level of cost-sharing for each research project. Applications should not submit individual cost-sharing proposals until they are notified by the awarding agency/office that an application has been approved and that a cost-sharing agreement is required.

H. Profit or Fee

In accordance with federal regulations, 45 CFR Part 74, no profit or fee will be provided to for-profit organizations through cooperative agreements. A profit is considered to be any amount in exess of actual direct and indirect costs incurred in the conduct of a project.

I. Joint Ventures and Limited Partnership

Joint ventures are permitted provided the entity created qualifies as a small business in accordance with the definition included in this solicitation.

J. Limit on Contracting

Contracting under a cooperative agreement, as defined in this solicitation, may not exceed thirty-three percent of the total proposed direct and indirect costs unless otherwise approved in writing by the contracting officer.

K. Terms and Conditions of Award

Upon acceptance of a cooperative agreement, the recipient must comply with the terms and conditions contained or referenced in the notice of award document. These terms and conditions constitute legal requirements imposed on a recipient by statute, regulations, administrative policy, or the award document itself.

Awards must be administered in accordance with the following regulations:

45 CFR Part 46 Protection of Human Subjects.
74[1] Administration of Grants.
80 Nondiscrimination Under Programs Receiving Federal Assistance through DHHS Effectuation of Title VI of the Civil Rights Act of 1964.
84 Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting from Federal Financial Assistance.
91 Nondiscrimination on the Basis of Age in Programs and Activities Receiving or Benefiting from Federal Financial Assistance.

L. Additional Information

- This solicitation is intended for informational purposes and reflects current planning. If there is any inconsistency between the information contained herein and the terms of any resulting SBIR funding agreement, the terms of the funding agreement are controlling.
- Prior to the award of an SBIR funding agreement, the Government may request the applicant to submit certain additional organizational, management, personnel, and financial information in order to assure responsibility of the applicant.
- The Government is not responsible for any expenditures by the proposer prior to award of the funding agreement.
- This solicitation is not an offer by the Government and does not obligate the Government to make any specific number of awards. Awards under this Program are contingent upon the merit of an application and the availability of funds for research and development.
- The Government is under no obligation to fund any application or make any specific number of awards in a given research area. The government may also elect to fund several or none of the proposed projects within a given topic area, depending on the quality of the applications and the availability of funds.
- The SBIR Program is not a substitute for existing unsolicited proposal mechanisms. Unsolicited proposals will not be accepted under the SBIR program in either Phase I or Phase II.
- A successful applicant under this program will be required to certify that he or she has not previously been, nor is currently being, paid by any federal agency for essentially equivalent work.
- Significant federal involvement is required for all cooperative agreements. The type and level of involvement is expected to vary with each funded project, and will be determined during pre-award negotiations.

[1] **Federal Register**, Vol. 47, No 227, November 24, 1982, pp 53007-53014 amends 45 CFR 74 to allow the regulations to apply to "for-profit" organizations and provides guidance on special conditions under which to assist in making awards.

Part II—The Application Process

1. Availability of Forms

Application for Cooperative Agreement under the HHS SBIR Program must be submitted on Standard Form 424. For your convenience a copy of the form and instructions for its completion are included in the appendix to this announcement.

2. Application Submission

In order to be considered, an application must be submitted on this (424) Form and in the manner required. The application must be executed by an individual authorized to act for the applicant business and to assume responsibility for the obligation imposed by the terms and conditions of the cooperative agreement grant awards. Applications must be prepared in accordance with the guidance provided in the announcement and the instructions given on the back of the Form 424.

3. Application Consideration

Businesses wishing to compete for Cooperative Agreements under this announcement must submit an application by July 1, 1983.

Applications that conform to the requirements of this program announcement will be reviewed competitively and evaluated by HHS staff and qualified persons outside the Federal Government.

The results of review assist the approving officials in considering competing applications. This consideration may also take into account comments from Federal and Regional office.

The approving officials will make the decision to fund or not to fund a competing grant application

VOL 48 ISS 103 MAY 26 1983 UMI

4. Special Assistance

Applications for Cooperative Agreement under the HHS SBIR Program must be submitted on Standard Form 424. For your convenience, a copy of that form, as well as detailed guidance in completing it are included with the Standard Form 424. If additional assistance is needed the applicant may write to or call: HDS/Division of Research and Demonstration, 200 Independence Avenue, S.W., Room 732 E., Washington, D.C. 20201, Telephone: (201) 245–6235.

5. Time Qualification

Applications will be considered to be on time if sent by first class, registered, or certified mail no later than the closing date as evidenced by a dated U.S. Postal Services post mark. Hand delivered applications are accepted during the normal working hours of 9:00 a.m. to 5:30 p.m., Monday through Friday except Federal Holidays. Applications not submitted on time will be returned to the sender and will not be reviewed and evaluated.

6. Criteria for Evaluation

The following factors and relative weights will be used in assessing the technical merit of each application:

Factor	Weight (percent)
· The soundness of the proposed project, the anticipated products that may be derived from the effort, and the adequacy of the proposed effort; given in the products in mind	25
· Qualifications of the proposed principal key investigator(s), supporting staff, and consultants; given the proposed products	10
· The potential of the proposed products for technological innovation	20
· The potential of the proposed products for commercial application	20
· The appropriateness of the budget requested, given the proposed products	15
· Adequacy and suitability of the facilities and organizational environment	10

7. Notification

Unsuccessful applicants are notified of the decision in writing. Successful applicants are notified through the issuance of a Notice of Financial Assistance Award, and the total recipient participation.

Part III—Topic Areas

The following topics have been identified by the Department as research topics for this solicitation. Applicants are encouraged to propose projects that respond to these identified needs or to other needs of the service programs financed by the agencies and offices participating in their solicitation.

TECHNIQUES AND PRODUCTS TO REDUCE THE COSTS AND IMPROVE THE EFFECTIVENESS OF HEALTH AND HUMAN SERVICES DELIVERY.

1.1 *Develop innovative methods to reduce the time needed for health examination and diagnosis and improve accuracy of examination.*

1.2 *Improve the cost-effectiveness of services to rural and isolated individuals in both examination, diagnosis, and treatment through mobile treatment clinics.*

1.3 *Develop systems to facilitate the increased use of alternative health care providers such as ancillary or specialized staff.*

1.4 *Promote the need for and availability of donated kidneys and dialysis machines.*

Topic Area 2

TECHNIQUES AND PRODUCTS TO IMPROVE THE MANAGEMENT AND REDUCE THE ADMINISTRATIVE COST OF HEALTH AND HUMAN SERVICES PROGRAMS.

2.1 *Innovative, locally adaptable and pragmatic day care centers, welfare offices, and community provider agencies.*

2.2 *Utilizing micro-computer software and providing techniques of monitoring and analyzing data that can be used by small providers such as day care centers, doctors, and local welfare offices.*

2.3 *Development of systems and techniques of identifying inappropriate systems and services.*

Topic Area 3

TECHNIQUES AND PRODUCTS TO IMPROVE CLIENT INFORMATION AND AWARENESS.

3.1 *Innovative techniques and devices to inform individuals not to drink and drive.*

3.2 *Innovative techniques and devices to avoid unnecessary hospitalization and institutionalization.*

3.3 *Innovative techniques and devices to encourage sound health practices.*

Topic Area 4

TECHNIQUES AND PRODUCTS TO IMPROVE THE ABILITY OF ELDERLY OR DISABLED PERSONS TO REMAIN AT HOME AND AVOID INSTITUTIONAL PLACEMENT.

4.1 *Devices and techniques to extend the period(s) of job, community and social functioning are considered essential.*

4.2 *Devices and techniques to assist the disabled and infirm individuals.*

Closing Date for Receipt of Application

The closing date for receipt of all applications under this Program Announcement is *July 1, 1983.*

Mailed Application

Applications mailed through the U.S. Postage Service shall be considered as meeting the deadline date if they are received at the following address: HDS/Division of Grants and Contracts Management, 330 Independence Ave., S.W., Room 1740, Washington, D.C. 20201, Attention HDS–SBIR.

1. On/or before the deadline date; or,

2. Sent by first class mail postmarked on or before *July 1, 1983* and received in time for Field review. *(Applicants are cautioned to request a legible U.S. Postal Service postmark or to use express mail or certified or registered mail and obtain a legibly dated mailing receipt from the U.S. Postal Service.* Private metered postmarks shall not be acceptable as proof of timely mailing.)

Applications submitted by other means

Applications submitted by any means except mailing first class through U.S. Postal Service shall be considered at meeting the deadline *only if they are physically received before close of business on or before the deadline date of July 1, 1983.*

Late applications

Applications which do not meet these criteria are considered late applications and will not be considered in the current competition.

Dated: May 20, 1983.

Dorcas R. Hardy,

Assistant Secretary for Human Development Services.

Department of Commerce

National Oceanic and Atmospheric Administration

Fisheries Loan Fund Procedures; Final Rule

VOL
48
ISS
103
MAY
26
1983
UMI

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 250

[Docket No. 30401-50]

Fisheries Loan Fund Procedures

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: These regulations implement an extension of the Fisheries Loan Fund. The Fund which expires on September 30, 1983, now has available $10 million for countercyclical assistance loans to commercial fishing vessel owners or operators. The intended effect of this action is to establish Agency priorities for the countercyclical loans.

EFFECTIVE DATE: May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Grable, Chief, Division of Financial Services, Office of Industry Service, (202) 634–4688.

SUPPLEMENTARY INFORMATION: Ten million dollars has been appropriated and is available for loans under the latest extension of the amended Fisheries Loan Fund.

The Fund has three lending purposes:

(a) Avoiding default of debt obligations guaranteed under the Fisheries Obligation Guarantee Program (vessel must be over 5 net tons).

(2) Avoiding default on debt obligations which financed the construction, reconstruction, reconditioning, or purchase of commercial fishing vessels (vessels must be over 5 net tons).

(3) Assisting commercial fishing vessel owners or operators who face net operating losses (vessel may be any size).

Fund monies are available for the second or third loan purposes only to the extent they are not required for the first loan purpose.

The interest rate for loans for the first two loan purposes will be 3 percent. The interest rate for loans for the third loan purpose, should they become available, will be equal to that for loans under the Emergency Agricultural Credit Act of 1978. Maximum loan maturities will be 10 years in all cases.

Applications for loans for the first loan purpose may be submitted at any time (although the Fund ceases to exist on September 30, 1983). Applications for loans for the second loan purpose may only be submitted during an open season to be announced later and will be considered in order of submission. Because Fund monies are limited, they will later be allocated on a Regional basis and maximum loan amounts will be established. Restrictive application criteria will be established by further notice for applicants for loans to protect the interest of the U.S. Government.

Successful loan applicants must have proven ability in the management and financing of fishing vessels. The amounts of the loan available must be likely to result in the financial viability of the applicants' fishing operations.

This final rulemaking has been reviewed under Executive Order 12291 ("Federal Regulation") and its Commerce Department guidelines. The review determined that this final rulemaking is not "major" because it does not significantly affect the economy, costs, prices, employment, investment, or productivity. No regulatory impact analysis is required.

Classification

This rulemaking involves procedures for countercyclical assistance loans to commercial fishermen. As a "matter relating to Agency * * * contracts," this rulemaking is exempt from the notice and comment provisions of the Administrative Procedure Act.

Exemption from the notice and comment provisions of the Administrative Procedure Act means analysis under the Regulatory Flexibility Act is not required.

Collection of additional information from applicants will be required. Collection of this additional information is necessary for determining eligibility. This final rulemaking has been submitted to the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980.

This final rulemaking will affect only those who choose to apply for loans. This final rulemaking will not have a significant economic impact on a substantial number of small entities. The Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration, determined that this final rulemaking does not require an environmental impact analysis under the National Environmental Policy Act.

List of Subjects in 50 CFR Part 250

Fisheries, Fishing vessels, Financing business.

Dated: May 23, 1983.

Roland F. Smith,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

Accordingly, 50 CFR Part 250 is revised to read as follows:

SUBCHAPTER F—AID TO FISHERIES

PART 250—FISHERIES LOAN FUND PROCEDURES

Subpart A—Introduction

Sec.
250.1 Purpose.
250.2 Definitions.
250.3 Loan authorization and priority.

Subpart B—Application

250.4 Eligibility.
250.5 Other requirements.
250.6 Application processing and procedures.

Subpart C—Loans

250.7 Approval.
250.8 Amount of loan and other restrictions.
250.9 Interest.
250.10 Maturity.
250.11 Security.
250.12 Insurance.
250.13 Inspection of property.
250.14 Books, records, and reports.

Subpart D—Default and Remedies

250.15 Default.
250.16 Remedies after default.

Authority: 70 Stat. 1121, as amended; 16 U.S.C. 742(c), as amended; and Reorganization Plan No. 4 of 1970.

Subpart A—Introduction

§ 250.1 Purpose.

These regulations implement the latest extension of section 4 the Fish and Wildlife Act of 1956 as amended by the American Fisheries Promotion Act. The amended section 4 creates a revolving Fisheries Loan Fund to be used for assisting the owners or operators of commercial fishing vessels to avoid default on primary vessel financings and to cover vessel operating losses.

§ 250.2 Definitions.

For the purpose of this part, the following terms mean:

(a) *Secretary.* The Secretary of Commerce or his designee.

(b) *Act.* The Fish and Wildlife Act of 1956, as amended (16 U.S.C. 742(c)).

(c) *State.* Any State, the territories and possessions of the United States, the Commonwealth of Puerto Rico, and the District of Columbia.

(d) *Citizen of the United States.* Any individual who is a United States citizen by law, birth, or naturalization; any association, partnership, or corporation which meets the requirements of section 2 of the Shipping Act, 1916, for documenting vessels in the coastwise trade; or any State, agency of a State, or group of States.

(e) *National of the United States.* Any individual who is a United States national by law or birth or any

association, partnership, or corporation which meets the requirements of section 2 of the Shipping Act, 1916, for documenting vessels in the coastwise trade (except that organization under the laws of American Samoa is permissible and individuals who are either nationals or citizens of the United States meet the Shipping Act requirements for the purpose of this Program).

(f) *Commercial fishing vessel.* Any waterborne craft documented under U.S. law or registered under State laws whose purpose is commercial fishing or assisting commercial fishing.

(g) *Fund.* The Fisheries Loan Fund authorized by 16 U.S.C. 742(c), as amended.

(h) *Obligation.* Any evidence of indebtedness.

(i) *Obligor.* Any owner or operator of a commercial fishing vessel who is primarily liable for payment of any obligation.

§ 250.3 Loan authorization and priority.

(a) Loans shall be made only for one of the following purposes:

(1) Assisting obligors to avoid default obligations financing the construction, reconstruction, reconditioning, or purchase of commercial fishing vessels of at least 5 net tons when those obligations are guaranteed by the Federal Government under the Fisheries Obligation Guarantee Program authorized by Title XI of the Merchant Marine Act, 1936 (46 U.S.C. 1271–1280).

(2) Assisting obligors to avoid default on obligations financing the construction, reconstruction, reconditioning, or purchase of commercial fishing vessels of at least 5 net tons (i) when those obligations are not guaranteed under the Fisheries Obligation Guarantee Program, but; (ii) the vessels involved meet the use and documentation requirements, and the obligors meet the citizenship requirements, which would apply if the obligations had been guaranteed under the Fisheries Obligation Guarantee Program.

(3) Assisting the owners or operators of commercial fishing vessels of any size where there has been, or may be, a net operating loss.

(4) The first priority for loans is paragraph (a)(1) of this section. Any monies not needed for paragraph (a)(1) of this section will be used for paragraph (a)(2) of this section. Any monies not required for paragraph (a)(2) of this section will be used for paragraph (a)(3) of this section.

Subpart B—Application

§ 250.4 Eligibility.

An eligible applicant must be a citizen or national of the United States and must:

(a) Reside or conduct business in any State;

(b) Own or operate a commercial fishing vessel used for commercial fishing operations; and

(c) Demonstrate that he has substantial experience and proven ability in the management and financing of fishing operations and that the loan is likely to result in the continued viability of the commercial fishing operation. In making this determination, the Secretary shall consider, among other factors, economic conditions within any fishery, the negative financial effect these conditions may have had, and the uncertainty these conditions may cause over the longer term.

§ 250.5 Other requirements.

(a) The applicant must demonstrate at the time of application that the loan applied for is not otherwise available at reasonable rates which permit continued operation. The loan applied for shall be deemed to be otherwise available at reasonable rates which permit continued operation unless an applicant can show:

(1) Proof of at least two refusals of the desired credit from the applicant's bank. This proof of refusal must be dated and state the amount of loan and terms requested.

(2) That the desired credit is otherwise unavailable on reasonable terms from sources other than banks, as from: (i) The disposal at a fair price of assets not required by the applicants in the conduct of his business or not reasonably necessary to its potential growth, (ii) use of personal credit and/or resources of the owner, partners, management, affiliates, or principal stockholders of the applicant, or (iii) from other known sources of credit.

(b) Bank refusals to advance credit will not be considered the full test of credit unavailability where there is reason to believe that credit is otherwise available on reasonable terms from sources other than banks. Nevertheless, in the case of an application by an obligor whose obligation is guaranteed under the Fisheries Obligation Guarantee Program, proof of the refusal of the obligor's bank and at least one other source to extend further credit on behalf of the obligor may constitute proof that the credit applied for is not otherwise available on reasonable terms.

§ 250.6 Application processing and procedures.

(a) Applicants for loans under § 250.3(a)(1) may apply at any time (the Fund will, however, expire on September 30, 1983). Applicants for loans under § 250.3(a)(2) may apply only during such open seasons as the Secretary provides by further notice. In the event monies become available under § 250.3(a)(3), open seasons will be established by further notice. Available monies for all purposes may be regionally apportioned and maximum loan amounts will be established by further notice. Restrictive application criteria will be established by further notice for loan applications under § 250.3(a)(2).

(b) *Forms.* Applicants must file an application, furnished by the National Marine Fisheries Service, with the Regional Branch of the National Marine Fisheries Service's Financial Services Division in the Region in which the applicant conducts his business. The Regional Offices' addresses follow:

(1) *Northeast Region.* (Maine, Massachusetts, Rhode Island, Connecticut, New Hampshire, New York, New Jersey, Delaware, Maryland, Virginia, and the Great Lakes States): Financial Services Branch, National Marine Fisheries Service, Post Office Building, Box 1109, Gloucester, Massachusetts 01930, (617) 281–3600.

(2) *Southeast Region.* (North Carolina, South Carolina, Georgia, Flordia, Alabama, Mississippi, Louisiana, Texas, Puerto Rico, Virgin Islands): Financial Services Branch, National Marine Fisheries Service, 9450 Koger Boulevard, Duval Building, St. Petersburg, Flordia 33702, (813) 893–3148.

(3) *Southwest Region.* (California, Hawaii, American Samoa, Guam, Trust Territory of Pacific Islands): Financial Services Branch, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731, (213) 548–2478.

(4) *Northwest Region.* (Washington, Oregon, Alaska): Financial Services Branch, National Marine Fisheries Service, 7600 Sandpoint Way, NE (BIN C15700) Seattle, Washington 98115, (206) 446–6118.

(c) *Processing of applications.* If the application is materially complete and the applicant is eligible, the Regional Financial Services Branch will accept the application and assign it a case number. Applications under § 250.3(a)(2) will be considered in the order of their submission. Applications received after available monies are exhausted will not be considered. The Regional Financial Services Branch will evaluate

VOL
48
ISS
103
MAY
26
1983
UMI

applications being considered for funding. After a decision is made, the Regional Financial Services Branch will inform the applicant.

Subpart C—Loans

§ 250.7 Approval.

(a) The Secretary will approve the loan by a loan authorization letter covering the terms and conditions of the loan.

(b) Loan documents will be furnished by the Secretary. Applicants whose applications are not approved will be notified by a letter from the Financial Services Branch.

§ 250.8 Amount of loan and other restrictions.

Loan amounts may be limited from time to time in order to prevent exhaustion of available loan monies and to assure that monies will be used effectively. The amount any one borrower, or related borrowers, may borrow will be restricted. Only principals may apply. Restrictions regarding length of fisheries experience and other factors will be established by further notice. Loan amount limitations and other requirements will be effected by instructions from the Chief, Financial Services Division, National Marine Fisheries Service, Washington, D.C.

§ 250.9 Interest.

The rate of interest on all loans made under § 250.3 (a)(1) and (a)(2) will be 3 percent. Interest rates on loans made under § 250.3(a)(3) will be the rate prevailing for loans made under the Emergency Agricultural Credit Act of 1978 (7 U.S.C. preceding 1961 note).

§ 250.10 Maturity.

The maturity of any loan will be determined by the Secretary, but may not exceed 10 years.

§ 250.11 Security.

Loans will be approved only upon the furnishing of such security or other reasonable assurance of repayments as the Secretary may require.

§ 250.12 Insurance.

If insurance is required on property under the terms of a loan, it must be in a form, and from an underwriter, satisfactory to the Secretary.

§ 250.13 Inspection of property.

The Secretary shall have access at all reasonable times to all vessel or other property in connection with a loan or loan application.

§ 250.14 Books, records, and reports.

The Secretary shall have the right to inspect the applicant's books and records, including tax returns. The Secretary may also require periodic reports to be submitted by a loan recipient.

Subpart D—Default and Remedies

§ 250.15 Default.

The borrower's failure to conform to the Act, these regulations, or the loan documents will be a default. The Secretary's remedy for defaults is acceleration of the total loan amount due, foreclosure on security, and pursuit of all other collection avenues. Default may result in discontinuance of any further disbursement of loan funds to the borrower.

§ 250.16 Remedies after default.

Specific provisions governing remedies after default will be included in the loan documents. Upon default, the Secretary may:

(a) Take possession of all collateral given as security for the loan;

(b) Initiate legal proceeding of any type against the borrower or the security, including foreclosure; and

(c) Pursue all other available remedies.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**
